Depopulation Of A Planet

Thinning Out The "Useless Eaters"

An Unspoken NWO Agenda

Part I: Historical Perspective

11/19/95 RICK MARTIN

Many writers have spoken of intentional plans by certain Elite to thin-out the world's population; it's a recurring theme among so-called conspiracy theorists. There are frequent references to "useless eaters", which includes the bulk of mankind.

Most, when hearing of plots to depopulate the planet, simply say under their breath, "Yeah, right," or more often, while shaking their head, "You're nuts." But when there is a careful examination of writings by prominent authors of this century, pieces of the puzzle certainly do fall into place—pieces which support the contention that there are certain

individuals, if not entire governments, who have implemented a program of global genocide in an effort to salvage and corner "resources".

What you will be reading in this series on *Depopulation Of A Planet* are selected writings from a wide cross-section of viewpoints and political leanings. I will be using "their" own documents, their own words, to weave a fabric which, in the end, will be a tapestry of undeniable clarity for those with

Latest Journal Goes To PressEVERY DAY LIVING

Getting Out The Truth Is No Easy Matter

Editor's note: Readers, please keep in mind that it currently takes a good 9 months of publication and printing activities between the time that we announce the latest Journal here, only GOING to press, and when that new Journal is actually completed and available for purchase through Phoenix Source Distributors. Always look to the Back Page of CONTACT for Journal availability information.

11/21/95 #1 HATONN

FOREWORD

We have a computer catch-22. There is a computer "filing" system which allows references to our work which separates it in some crude fashion from other resources. Many take our filing system as somehow being a "gospel" or something. We always try to identify resources to lessen confusion. For instance: the file identification of this writing is IFB11211, listed under "Hatonn" (Dharma's computer file system), Tue., Nov. 21, 1995, 6:41 A.M., Year 9, Day 097. If there are changes, say Doris writes, or Sananda or, or, or... we try to get that recognition into the data but it is usually only identified in the body of the writing. I cannot help or change a heading after it is written and sent away to various locations for varying purposes. Dharma doesn't know who or what will be the writer or the subject as we sit to the keyboard but there HAS TO BE A FILE FOR USE IN THE COMPUTER! I note that it is a good system for if ones wish to write to the *News Desk of CONTACT*, they write to Phyllis, if to the Chief Investigative Journalist, they write to Rick Martin, to the Chief Editor, Dr. Ed Young and thus and so. It seems quite acceptable to us for we are interested ONLY in the content—not the fingers who type the information. *CONTACT* is a NEWS PAPER; why do you ask for REVELATION? You can get all sorts of revelations from the churches or cults who offer you such leveraged and controlling power to manipulate you. Our efforts are to give you information about "what is" so that YOU can control and leverage your own participation.

Does the paper make errors? If others make errors, then of course the paper makes errors! If One Who Knows, as in this journal under *Fire From The Sky* makes errors—then we print errors. We do try to catch them and, always, with permission, comment. We do not take liberties with another's writings except in commentary or question. We DO choose and pick, VERY CAREFULLY, the information we use and TRY TO IDENTIFY IT SO WE CAN FOLLOW THE AUTHORS CAREFULLY AND ESTABLISH VALIDITY OR PARTIAL FICTION—OR TOTAL FICTION.

As in the few portions of *Death of Camelot* by Ronn Jackson, we ran many segments. He claimed he was of the Secret Service team of the day and was privy, at some time, to details of the .FK assassination, even to the payoff of participants. That SHOULD be accurate enough as Mr. Jackson is a shrewd and cunning "hit man". He never claimed to be anything else. "Grandma", who we already knew quite well—had worked with him, played with him and had known him "back in the 'good ol' days'". She not only claimed to

KNOW him but stated on more than one occasion that he "scared her to death". Well, they work together NOW so we assume the "scare" is over. They also seem to be working together on something to do with gold certificates of which we are now not longer informed as we were told to get our "ass from over the dash-board and get back to our job". We obliged!

"They" killed Russell Herman(n) (Grandma's husband) who, we have been told, worked for the government intelligence service and KNEW TOO MUCH—as well as holding a major gold certificate. Vina was infected through water contamination in an effort to try to murder her. Every serious non-plant has been in the line of fire and MANY have been murdered. To shut-up Peter Kawaja "they" murdered his wife in a most HORRIBLE way. They continue to threaten him and right now, as we write, plan to take him out while he is on an airline flight—or so go the threats. Would "they" take out a plane load of people to get him? ABSOLUTELY AND INDEED—THEY DO IT EVERY DAY! SO, READERS, PUBLICITY IS ALL YOU HAVE FOR PROTECTION WHEN IT BOILS RIGHT TO THE BOTTOM OF THE POT.

Since our people live under the threat of the sword daily, as well, what can be done? We can stop our work, capitulate to the cocks of the walk, or the people who take from our meagre coffers because no-body is daring enough to take back that which is ours and not theirs—or continue in caution to do the very best we can under the worst of circumstances. So, readers, this means you will have to put up with a few errors in grammar, spelling, file headings and impatient and frightened writers.

YOU HAVE TO COUNT ON LIVING EVERY SINGLE DAY IN A WAY YOU BELIEVE WILL MAKE YOU FEEL GOOD ABOUT YOUR LIFE—SO THAT IF IT WERE OVER TOMORROW, OR THIS AFTERNOON, YOU'D BE CONTENT WITH YOURSELF.

This means, for here and for instance, that farm equipment, service supplies, rent unpaid, loans which were directly made to "Challenge Met", etc., are left ungathered to our needs. Nobody wants to "hurt" the takers—but the lenders seem to have no say in the matter of legal justice. So be it, for the salary you lose may well be your own. How many of YOU are hurt by the problems facing any of "ours" through the indiscretions of others? Everyone who reads *CONTACT* and/or any of our writings. So, "let it go"? If YOU let it go—fine. I despise your money quarrels—but ah, you come back and BLAME ME for your lack, your own drizzling away, and hold the people who do take responsibility—accountable, even if you give away assets which are another's. So be it—let it go! Just cover the accounts in legal form so that all know exactly what happened, why, and to whom. Every cent, for instance, that funnelled through to Challenge Met, Inc., and

What Are The Phoenix Journals?

Many people have asked us what the *PHOENIX JOURNALS* are. They contain the true history (His-story) of mankind on this planet as well as detailed information about the most asked about and wondered about subjects (i.e., Spirituality, E.T.s, our origin, our purpose here on this planet, etc.). Commander Hatonn and the other Higher Spiritual Teachers who have authored these *JOURNALS*, weave spiritual lessons and insights throughout the unveiling of lies which have been deceptively forced upon us, throughout time, by the Elite anti-Christ controllers. These *JOURNALS* are the "*DEAD SEA SCROLLS*" of our time. Their importance in the growth of mankind cannot be overstated. They are the textbooks of understanding which God promised us we would have, to guide us through the "End Times".

Here is what Commander Hatonn has said about the *PHOENIX JOURNALS*. Quoting from *JOURNAL #40, THE TRILLION DOLLAR LIE*, Vol. II, pgs. 47 & 48: "Some day in the far recesses of the future experiences of another human civilization—these *JOURNALS* will be found and TRUTH will again be given unto the world manifest so that another lost civilization can regain and find its way. God always gives His creations that which they need when the sequence is proper. It is what man DOES WITH THESE THINGS which marks the civilization. WHAT WILL YOUR LEGACY BE????? I focus on current activities which might turn your world about in time to save your ecosystems and your sovereignty as nations and peoples. You cannot wait to be filled in on the lies of the generations lest you wait until too late to take control of your circumstance presently within the lies. YOU ARE A PEOPLE OF MASSIVE DECEPTION AND WHAT YOU WILL DO WITH THIS INFORMATION IN ACTION DETERMINES YOUR PURPOSE AND GROWTH IN THIS WONDROUS MANIFESTED EXPERIENCE—WILL YOU PERISH PHYSICALLY OF THE EVIL INTENT, OR WILL YOU MOVE INTO AND WITHIN THE PLACES OF HOLY CREATOR? THE CHOICE IS YOURS."

In case you didn't know, Phoenix Source Distributors, Inc. can automatically send you the latest *PHOENIX JOURNALS* as they are printed. This gives you an extra discount on new *JOURNALS* and you don't have to keep remembering to order. Call (800) 800-5565 for details.

See Back Page for ordering information.

Brent Moorhead
Business Manager

there were THOUSANDS of dollars—are ACCOUNTED to and from the proper lenders. Why should anyone pay back loans which were intended and went directly to that Corporation for personal use?

Well, you legal people work it out for that is YOUR LINE OF RESPONSIBILITY, but the paperwork and line of flow will be continued in the accounting—right there where it has always been—right down to the pizza receipts. There are members of the FAMILY who are trying to collect their own loans from OTHERS, now that there is debate. I suggest the legal department decide what to do about those—for there are no funds in the sugar-bowl to cover them. Charles, consider bankrupting Sunshine Farms, Inc., please. There are no funds, outstanding debts left and all the equipment has been taken by the tenants of Challenge Met, Inc. I find that an interesting name to say the least. Confer with the other managers and caretakers and see if perhaps that might be the best way to go. If you have uncollectible debts in the flow-through to Challenge Met, so be it; turn it over to the court as uncollectible. This means you must write up a collection-attempted list with the police department, itemized circumstances and whatever else is necessary. "Sunshine" is insolvent? Then give it dissolution. The farm lease is not in the corporation, Sunshine Farms—so the milling operation will be secure until the lease expires.

I believe this is the only way you can live today and feel good about your responsibilities and self—tomorrow. I weary of people living as they want to and then dumping the responsibility off on others. I see no way to work it out without bringing in records and payments and conferencing with the other responsible parties in Sunshine Valley Farms.

I apologize to everyone who is tired of local problems—but this is, after all, the reason we started and continue this work—at all. We have assets (YOURS) to protect and we have to do so in the only ways we have open for our use. Our intent is to always cover privacy of each of you who participate in any way—even in the face of our adversary "takers" telling everything they know about you and your activities. It is not acceptable. And, I might add right here, that Ekkers' problems continue because the COURTS demand information on everything remotely touched by the Ekkers—and demand open publication of everything. I can tell you now that they will give up the rest of anything—to keep YOUR PRIVACY SECURE. It is fine—they have little insight to personal transactions and have no information about corporation structures of any individuals.

Challenge Met corporation is a bit different in that personal funds were loaned through, and into, that corporation for personal use of family members. It appears that the ones from Challenge Met wish to consider everything as gifts, etc. Very well, then Challenge Met will have to account for it in order to have other businesses correct in their already established records. If you have to do honorable business

with Sierra Bank, Sanwa, and Tehachapi Cement—why do people assume you have no responsibility to other corporations? I SHOULD NOT BE THE PARTY TO EXPLAIN THE WORKINGS OF CORPORATIONS. NEVER have I ever suggested that this wonderful sheltering opportunity be ill-used—NEVER!

I am told that I don't make some people, Happy! Oh? Well, I am not in the "happiness" business. I am in the business of JOY. Joy is a step beyond "happiness". "Happiness" is a sort of atmosphere in which you can sometimes experience if you are lucky. Joy is a light that fills you with hope and faith and love—no matter what are the circumstances.

JOY IS A STATE OF BEING. HAPPINESS IS A PASSING PHYSICAL-PERCEPTION. To suggest that "I make people happy," is both a curse against me and a small pleasure of which I often must hold shame. You must seek and search and chase "happiness"—JOY FINDS YOU.

APPRECIATION

I want to give great appreciation to the one who has offered us the use of the contents of this journal in major portion. This writer in point offers his work as from "One Who Knows". It is sufficient and we look forward to any further sharing and, when that is finished, as with others asking anonymity—we shall surely

give accolades and honor for all to know. Until then, we honor every request. I do want you to realize, however, that it is often ONLY through publicity that protection is garnered. As journalists we protect our sources—PLEASE PROTECT OURS.

THE DAY OF THE LORD IS AT HAND—AND THAT MEANS THAT SO, TOO, IS THE DAY OF SATAN!

Gyeorgos Ceres Hatonn
November 21, 1995

This should be identified for reference:

FIRE!

There shall come forth FIRE from the sky, from the Earth and all parts of it. Mankind shall taste and feel the scorch of his actions and intent. It is a terrible thing to die in Hell; it is more terrible to have to LIVE IN IT. You can live in the "fire of God"; you shall perish in the "fire of Evil". May you come to know the difference BEFORE the choice is absolute.

There Are Always Clues For Discerning Truth

11/22/95 #1 HATONN

TRUE OR FALSE?

I find a lot of your questions, on a personal level, are seemingly about being unable to tell who is lying to you and who is telling you truth. In every scenario there is truth enough so that the telling is couched in such a manner as to offer "almost" an inability to catch the liar in confusion enough to sort accurately. If a man "takes" your wallet from a table while you actually are watching but you fail to notice—is this theft or simply taking something? If it was "taken" through error (say, he thought it was his) then it is not the same, surely, as stealing it. So, what is the difference? The man will discover his error, bring back your wallet and everything within it without even a search, once the error is known—and APOLOGIZE. He will not build bigger tales than the simple truth. There will have been no cover-up of actions and the two involved (owner and taker) become closer friends and worthy trust is born.

One who schemes behind backs, presents false tales to cover actions—KNOWS the tactics are WRONG. When a man, even with cohorts helping, deceives those he is trusted to serve, he becomes a political criminal using his "office" for his personal gain while pretending YOU are the culprit. When you take intentionally from God's larder—you have no honor AT ALL. When you have grown men or women acting in this manner—and there is a past pattern of deception, it becomes hard to ever trust again, and rightfully so. Gifts obtained through deception or half-truths are WORSE, for first there is the intent of self-gain, the maintaining of self-gain, and the end is theft through implicit lies—to have another stand responsible in the eyes of public view. This is NEVER right and the parties in operation KNOW IT IS NEVER RIGHT.

But how can you tell if the first act was one of wrong intent? The tales continue to cover the first act!

*TRUTH EXISTS;
ONLY FALSEHOOD HAS
TO BE INVENTED!*

And by the way, readers, when one goes about to bunches of various people to discuss a situation which is one of choosing whether or not your own responses to circumstances are right or wrong and the pretense is such that you keep searching until you find someone who gives you what you WANT TO HEAR—you have acted unwisely—for you are then suspect of aiding and abetting, then finding excuses to continue in the lie. If, in addition, you fear loss of relationships if you take a stand for truth—you HAVE NO RELATIONSHIP. By the way, for you who fits these "shoes", I suggest you look carefully at WHY you need ask so many for often they are working with less information than you have—if you are a participant within the circle of cover. It is good to check your "head" and often you will find TWO OR MORE intentions—and thus, you are caused to think with more than the one head and the one may play against the other's wisdom which can be summed up as one being in semi-good condition with only a few "blockers" and the other totally screwed. The end

result is that you had best think with the right head and stop screwing around. Further, if you are required to be silent, gather information from the new "enemy" camp and report status—you will be nailed royally. You do not need to be "disloyal" or judgmental—just look at facts and make some CONDITIONS for self if the other wishes your friendship. Loyalty and friendship NEVER ask lies or cheating from another.

When the decision of declaration of love and loyalty comes forth—a goodly person by the name of Dr. Elizabeth Kubler-Ross offered what was supposed to be a beautiful and "giving" lesson: *"The ultimate lesson all of us have to learn is unconditional love, which includes not only others but ourselves as well."* NO, NO, AND NO! You may, as with GOD, offer absolute and unswerving LOVE but CONDITIONS ARE MANDATORY FOR ACCEPTANCE. In other words, you can love the liar—just be careful that you recognize the "condition". And, there are a zillion possibilities surrounding the lie—but decisions regarding the matter are personal—just know why you choose what you do. If your decision casts aspersions on the one lied against or thieved against and you come into knowledge—you have obligation as a decent human person to counter the argument. When you let the lies focus against GOD OR GOD'S MESSENGERS, and you take no stand when possible, you err FOR YOU WILL EVENTUALLY BE SET ASIDE AS UNTRUSTWORTHY.

If a father or a mother, or both, cause the children to bear the lie and keep it hidden—the SINS OF THOSE TWO SHALL BE RESTED UPON THEIR CHILDREN AS SURELY AS YOU KNOW THE EARTH WILL TURN. AND, FURTHER, IF A MAN WILL DECEIVE HIS PARTNER—HE WILL DECEIVE ANY AND ALL WHERE HE FINDS OPPORTUNITY. WHEN YOU DECEIVE YOUR FAMILY, YOU ARE THE LOWEST THIEF OF ALL. TO ADVERTISE BLAME UPON THE INNOCENT IS THE FINAL JUDGEMENT AGAINST THE ACTION, AND ACTIONS MUST ALWAYS BE JUDGED. REMEMBER, ONCE YOU HAVE BROKEN A TRUST—YOU CAN NEVER EXPECT TO BE EVER AGAIN TRUSTED IN THAT ENVIRONMENT IN WHICH YOU DECEIVED. FORGIVENESS AND INTELLIGENCE ARE TWO DIFFERENT RELATIONSHIPS.

If there is quarrel about what is right or wrong—you can suspect the one which is hidden in secret wrappings. This is why politicians come forth after doing dastardly deeds and pronounce, often correctly, that they have broken no laws. Well, they have broken the trust and the laws of moral integrity and betrayed the one(s) against whom they acted or from whom truth was hidden. But don't people err? Yes, all the time and when an honorable man errs he is quick to speak of the possibilities—not further hide the lies nor threaten heinous actions against the innocent—THROUGH THEIR PERCEIVED ENEMIES WHO HAVE ALREADY PROVEN THEIR OWN LIES, THEFTS AND LACK OF HONOR. HARD? YES INDEED!

So, with whom might you choose to walk? I suggest you choose one who least claims leadership but responsibly acts with integrity and honor—every time. Will that person err? Yes indeed, but it will be without intentional self-gain or intent to harm or damage. Check out what a man does when he grabs power or even inadvertently gains power. Who does he thrust down, complain about and try always to upstage? When an unsuccessful person tells you how to run your business, when you are quite successful—BEWARE! You have to ask no other for ADVICE—you KNOW right from wrong and determine, further, why did you come to a given environment? There are but two choices when you consider my environment: YOU ARE EITHER FOR ME OR AGAINST ME. IF YOU JUDGE ME TO BE WRONG—THEN GET THEE FROM ME FOR ANOTHER'S OPINION IS NOT VALID TO BE TAKEN FOR YOUR OWN. I DO NOT TAKE LIGHTLY THE THIEVING OR LYING TO MY PEOPLE, OR TO ME. TO CHEAT AND MANIPULATE IN THE NAME OF ANOTHER TO DECEIVE THE LENDER—IS THEFT BY ANY NAME. FURTHER, IF YOU DO THIS DEED WHEN SERVING ON A SEAT OF RESPONSIBILITY AND YOU ACT AGAINST THE OPEN BROTHERHOOD—YOU HAVE BROKEN THE LAWS OF THE LAND!

One day a man said in open meeting: "I guess we need these lessons!" My response was: "Well, you're getting them!" I meant it as specifically and directly as it seemed—to the speaker! I also offered many opportunities to rectify positions and errors but the pit was only more deeply dug. Opportunities missed, over and over again, often never are offered again. Mankind, as individual man, sorts himself away from his opportunities for successful gain—through his need for immediate and instant gratification. In other words, he flunks his tests while indicating his inability to adjust balance and intent. I must choose my stewards according to their consistent actions in the furthering of our mission and all the lies thrust against them will not stand—for TRUTH STANDS!

I will also tell you something else—directly: *If the cur continues to bite me whilst I feed him—I shall no longer attempt to feed. It is a fool who gives quarter to his avowed enemy while he loses his hands to the beast!* If your goal be with God, you will KNOW that which is unGodly and it is wise to act in such manner as to present that which is good—from the intent outward. YOU CREATE YOUR OWN CIRCUMSTANCES AND YOUR OWN TESTING, SO, DO YOU PASS OR FLUNK ON THE GOODNESS SCALE OR DO YOU CONTINUE TO PASS THE LUCIFERIAN EXAMINATION OF MISCHIEF? Either is none of my business—ONLY YOURS.

Pulse Waves, Beams & Charged Particle Systems

11/22/95 #1 HATONN

I need to turn now to the subject of pulse waves, beams and particle systems. Yes indeed, there IS a difference among the various weapons and controlling systems. Charged particle beams, for instance, can carry all manners of "substance" from microbes to chemical particulate. Pulse waves can interrupt all manners of electronic apparatus, etc. This is a major inquiry: "Do pulse waves have effects on pacemakers?" Not usually—under ordinary circumstances. However, any time the intent is to bring down electronic gear—YES INDEED. Just as you will be warned to keep a good distance from possible microwave channels, you can know that electronic pulses CAN BE a hazard to any apparatus, such as heart pulsers. To miss a few beats is not important but, of course, if the system is knocked out for a period of time and you cannot function without the pacemaker at all, you are in serious jeopardy. What should you do? If you are home and the pacemaker becomes erratic—have a "safe place" wherein you can go and shield self. Sometimes the simple fact of turning on a radio will scramble the pulse and allow the pacemaker to balance itself. I have no PERFECT answer to offer. I ALWAYS offer the recognition that if you can quiet yourself, relax and allow the "at rest" body to function—it will usually balance itself. Use your GOD PRESENCE TO SHIELD YOU. Every panic reaction of body will have an effect on electronic apparatus.

I wish I could tell you to just not concern about these things but, of course, if you have a pacemaker you MUST be concerned. I simply don't have any hard and fast rules to protect self. The POINT is to have control over the people by any means necessary and the further intent is to depopulate the planet to a small enough number of humans to handle and control.

I would guess that according to the current schedule of on-lining of some of the major systems for beams and pulses, such as HAARP, GWEN, etc., that you have a couple or so years before they are turned on and left on. The idiots in charge—do not have means of protection of their own.

There is a book brought to our attention after we sat to write on this topic which I need to bring to your attention ASAP for your library acquisition as it is current in publication and very descriptive. There are errors, yes, but most of you are not scientists, rocket or otherwise, so generalities are sufficient for your needs. It is entitled *ANGELS DON'T PLAY THIS HAARP*. (Advances in Tesla Technology) by Jeane Manning and Dr. Nick Begich, ISBN #: 0-9648812-0-9, Earthpulse Press, P.O. Box 201393, Anchorage, Alaska, 99520, U.S.A. The U.S. price is around \$15.00 and this book is the approximate size of the journals.

I will offer the *Timelines* and the *Introduction* to this book and then I suggest you obtain your own copy for I want to offer you a printing of Dr. John Coleman's writings of *ELF RADIATION AND GROUNDWAVES IN THE 1990s, PARTS I AND II* [see p. 22-30].

I want to also remind you here and now that the book STILL AVAILABLE which I consider THE BEST reference as to the "controllers" is *Conspirators' Hierarchy: The Story of the Committee of 300*. By Dr. John Coleman, W.I.R., 2533N. Carson St. Suite J-118, Carson City, NV 89706. He has other valid and out-

standing publications but I only deal with these titles and information can be obtained directly from Coleman for your use.

Dr. Coleman has given us permission to use any of his writings but since these copies have come from two different sources, I ask Mr. Martin to check personally with Dr. Coleman for updating and specific permission.

This information may seem a bit "out of order" in arrangement but I think you need some ideas about operational capabilities and what are the "accepted" speculations through informed study for timelines. You are going to find references to some of Mr. Tesla's patents. I believe that you will find I have, quite a while ago, supplied Dr. Young with copies of same for his use. I ask that copies be given to Mr. James as quickly as possible lest he waste time acquiring them elsewhere.

You will find that we have written on all of the topics herein and to which reference is directed, so our regular readers will be quite a bit ahead of new readers; so, if we re-present information, please have patience for ALL of you need this information if you are to do anything about your circumstances.

[QUOTING:]

From: *ANGELS DON'T PLAY THIS HAARP*

MESSING WITH 'MOTHER EARTH' AND HER KIDS ELECTROMAGNETICALLY— A BRIEF HISTORY OF EVENTS & DISCOVERIES

1886-8: Nikola Tesla invents system of Alternating Current power source and transmission system. As 60-pulse-per-second (hertz) AC power grids spread over the land, Mom Earth will eventually dance to a different beat than her usual 7-8 hertz frequency.

1900: Tesla applies for patent on a device to "Transmit Electrical Energy Through the Natural Mediums".

1905: U.S. Patent #787,412 issued for above.

1924: Confirmation that radio waves bounce off ionosphere (electrically-charged layer starting at altitude of 50 kilometers).

1938: Scientist proposes to light up night sky by electron gyrotron heating from a powerful transmitter.

1940: Tesla announces "death ray" invention.

1945: Atomic bomb tests begin—40,000 electromagnetic pulses to follow.

1952: W.O. Schumann identifies 7.38 hertz resonant frequency of the Earth.

1958: Van Allen radiation belts discovered (zones of charged particles trapped in Earth's magnetic field) 2,000+ miles up. Violently disrupted in the same year.

1958: Project Argus, U.S. Navy explodes 3 nuclear bombs in Van Allen belt. [H: This is very important and very serious.]

1958: White House advisor on weather modification says Defense Dept. studying ways to manipulate charges "of Earth and sky, and so affect the weather".

1960: Series of weather disasters begin. (Editor's page, "Weather Modification", *Saturday Review* 2/5/1977.)

1961?: Copper needles dumped into ionosphere as "telecommunications shield". (*Keesings Historisch Archief*, courtesy of Nigel Harle, Netherlands.)

1961: Scientists propose artificial ion cloud experiments. In 1960s the dumping of chemicals (barium powder, etc.) from satellites/rockets began. (Manfred Scholer, "On the Motion of Artificial Ion Clouds in the Magnetosphere", *Planet Space Sci.* 1970, Vol. 18, pp. 977 to 1004. Printed in Northern Ireland.)

1961-62: Soviets and USA blast many EMPs in atmosphere; 300 megatons of nuclear devices deplete ozone layer by about 4%. (National Academy of Sciences, "Long-Term Effects of Multiple Nuclear-Weapon Detonation", 1975 pp. 7-7.)

1962: Launch of Canadian satellites & start of stimulating plasma resonances by antennas within the space plasma. (Michael J. Rycroft, "Active Experiments in Space Plasmas", *Nature*, Vol. 287, 4 Sept., 1980, pg. 7.)

1966: Gordon J.F. MacDonald publishes military ideas on environmental engineering. (Lowell Ponte, *The Cooling*, Prentice-Hall, NJ, 1976, pg. 166-7.)

1960s: In Wisconsin, US Navy Project Sanguine lays ELF antennae.

1968: Moscow scientists tell the West that Soviets pinpointed which pulsed magnetic field frequencies help mental & physiological functions and which do harm. (Sheila Ostrander and Lynn Schroeder, *Super Memory: The Revolution*, Carroll & Graf, NY, pg. 303.)

1972: First reports on "ionospheric heater" experiments with high-frequency radio waves, at Arecibo. (W.E. Gordon and H.C. Carlson, "Arecibo Heating Experiments", *Radio Science*, Vol. 9, No. 11, pgs. 1041-7, Nov. 1974.) 100-megawatt heater in Norway built later in decade; can change conductivity of auroral ionosphere. (Michael J. Rycroft, "Active Experiments in Space Plasmas", *Nature*, Vol. 287, 4 Sept. 1980, pg. 7.)

1973: Documentation that launch of Skylab "halved the total electron content of the ionosphere for three hours" (by rocket exhaust gases). (Michael J. Rycroft, "Ionospheric Hole Caused by Rocket Engine", *Nature*, Vol 297, June 1982, pg. 537 AND Michael Mendillo, Gerald S. Hawkins, John A. Klobuchar, "A Sudden Vanishing of the Ionospheric F Region Due to the Launch of Skylab", *Journal of Geophysical Research*, Vol. 80, No. 16, June 1982.)

1973: Recommendations for study of Project Sanguine's biological effects denied by Navy. (Robert O. Becker, *Cross Currents*, Jeremy Tarcher LA 1990, pgs. 201-3.)

1974: United Nations General Assembly bans environmental warfare.

1974: High-frequency experiments at Platteville, Colorado; Arecibo, Puerto Rico; and, Armidale, New South Wales heat "bottom side of ionosphere". (G. Meltz, F.W. Perkins, "Ionospheric Modification Theory: Past, Present and Future", *Radio Science*, Vol. 9, No. 11, Nov. 1974.)

1974: Experiments—airglow brightened by hitting oxygen atoms in ionosphere with accelerated electrons.

1975: Stanford professor Robert Helliwell reports that VLF from power lines is altering the ionosphere. (Lowell Ponte, *The Cooling*, Prentice-Hall, NJ 1976, pg. 169.)

1975: U.S. Senator Gaylord Nelson forces Navy to release research showing that ELF transmissions can alter human blood chemistry. [H: TO YOU, THIS IS ONE OF THE MOST IMPORTANT TOPICS.]

1975: Pell Senate Subcommittee urges that weather & climate modification work be overseen by civilian agency answerable to U.S. Congress. This did not happen.

1975: Soviets begin pulsing "Woodpecker" ELF waves, at key brainwave rhythms. (Sheila Ostrander and Lynn Schroeder, *Super-Memory: The Revolution*, Carol & Grant Publishers, NY 1991, pg. 299.) Eugene,

Oregon, one of the locations where people were particularly affected.

1976: Drs. Susan Bawin & Ross Adey show nerve cells affected by ELF fields. (Dr. Robert O. Becker, *Cross Currents: The Perils of Electropollution-The Promise of Electromedicine*, Jeremy Tarcher, LA 1990, pg. 233.)

1979: Launch of NASA's third High-Energy Astrophysical Observatory causes large-scale, artificially-induced depletion of the ionosphere. Plasma hole caused by "rapid chemical processes" between rocket exhaust and ozone layer. (Michael Mendillo, Donald Rote, Paul A. Bernhardt, "Preliminary Report of the HEAO Hole in the Ionosphere", *American Geophysical Union*, EOS, Vol. 61, NO. 28, July 8, 1980, pg. 529.) "Ionosphere was significantly depleted over a horizontal distance of 300 km for some hours."

1980: Bernard J. Eastlund applies for patent "Method and Apparatus for Altering a Region in the Earth's Atmosphere, Ionosphere and/or Magnetosphere", (First of 3 Eastlund patents assigned to ARCO Power Technologies Inc.)

1986: US Navy Project Henhouse duplicates Delgado (Madrid) experiment—very low-level, very-low-frequency pulsed magnetic fields harm chick embryos. (Dr. Robert O. Becker, *Cross Currents: The Perils of Electropollution, The Promise of Electromedicine*, Jeremy Tarcher, LA, 1990.)

1980s: In the later part of the decade the U.S. begins network of Ground Wave Emergency Network (GWEN) towers, each to generate Very Low Frequency (VLF) waves for defense purposes.

1987-92: Other APTI scientists build on Eastlund patents for development of new weapon capabilities.

1994: Military contractor E-Systems buys APTI, holder of Eastlund patents and contract to build biggest ionospheric heater in world (HAARP).

1994: Congress freezes funding on HAARP until planners increase emphasis on earth-penetrating tomography uses for nuclear counterproliferation efforts.

1995: Raytheon buys E-Systems and old APTI patents. The technology is now hidden among thousands of patents within one of the largest defense contractor portfolios.

1995: Congress budgets \$10 million for 1996 under "nuclear counterproliferation" efforts for HAARP project.

1995: HAARP planners to test patent number 5,041,834 in September.

1994-6: Testing of first-stage HAARP (euphemistically named High-frequency Active Auroral Research Program) equipment continues although funding was frozen.

1996: HAARP planners to test the earth-penetrating tomography applications by modulating the electroject at Extremely Low Frequencies (ELF). [H: Now the game gets even more NASTY!]

1998: Projected date for fully-operating HAARP system.

[H: Please don't be foolish and rely on these

dates—you are going to undergo many tests prior to 1998 so **BE PREPARED**. One major problem with the testing is that the planners and operators are very apt to get very bad results when they pump all that massive energy into the Van Allen RADIATION BELT. That whole belt can ignite and it won't be like a ticking clock—it is going to encircle the globe almost simultaneously. Have those dark glasses close, friends.]

FOREWORD

We live in an age in which scientific progress is advancing at a greater rate than the rate of development of spiritual values. Scientists are experimenting in areas that project our knowledge and civilization into the future at warp speed. On the other hand, it could bring us back to the stone-age. It is said that absolute power corrupts absolutely. Governments and gigantic multinational corporate bodies are growing so fast that they appear to wield so much power they have lost their accountability. Organizations, like people, can go insane. I believe that the sanity of a corporate entity is inversely proportional to its size.

Our government is a gigantic corporation that is in partnership with hundreds of private corporations that form defense intelligence contractual networks. In order to survive the death of the "Cold War" with the Soviet block these entities need to expand their horizons to keep those tax dollars pouring into their coffers.

The HAARP (High-frequency Active Auroral Research Project) story, when first viewed from a limited exterior viewpoint, looks like a harmless research project. When viewed from a wider perspective, we begin to see that HAARP is a secret undertaking that is not unlike the Manhattan Project which gave us the atomic bomb. That is where Nick Begich and Jeane Manning come in.

Nick Begich is one of the best researchers I have ever met. He can track down infinite details on virtually any subject in record time. Give him a string and he will follow it into the depths. He knows how to use the system to track down information.

Nick is a master of the skill each of us is taught in school. The purpose of education is to teach us how to follow our interests. We learn how to find information that will help us in our life's vocation. [H: Well, perhaps some schools teach this but I find it a very rare thing in these current times.]

In the case of HAARP, he saw a tiny one paragraph notice on the project in *Nexus* magazine. It peaked his curiosity so he applied his skills in tracking down the rest of the story. He got ninety percent of the information within a few hours. He found layers of deception at every level. Peeling the data like layers of an onion, he opened new insights with each peel. The ten percent that was left over was found over the following months. As he unraveled the Gordian Knot of the HAARP project he uncovered a megalithic project that, if implemented, could profoundly affect the lives of every

person on Earth.

Jeane Manning is an experienced journalist who encountered the Bernard Eastlund patent in 1989 and recognized that the "big boys with big toys"—the military-industrial-academic complex—could go over the edge with this project. But she was busy looking into non-conventional non-polluting energy alternatives at the time. When she heard that similar patents would be actually used, in the HAARP project near her birthplace in Alaska, it was time to do something about it. Nick and Shelah Begich provided the way.

Jeane approached the research from a different angle which drew out important aspects of the story. This was accomplished by numerous in depth interviews with scientists, researchers and others and from a good deal of digging through a maze of documents.

Nick Begich and Jeane Manning used me as a consultant along the way since I have a 43 year background in radio engineering and bio-electronics. Like many scientists, I am concerned about the possible repercussions from the irradiation of our ionosphere with gigawatts of polarized radio frequency energy. Harmful ramifications potentially exist at many levels, from biological effects to the altering of world weather patterns. The HAARP story will unfold in all its aspects in the following pages [of the book] but a couple of points might whet the reader's appetite.

I invented an electronic telepathy machine 37 years ago that has been called the neurophone. The neurophone is able to transmit acoustic information directly into the brain of an individual by means of electromagnetic fields. [H: This is VERY important technology.] It has many wonderful applications as an enhanced learning machine or as a computer-to-brain interface when it is used consciously. When I first applied for a patent on the device, no one at the patent office believed such a device could possibly work. As a result, it took nearly twelve years before I received the first patent and that was only after we made a nerve-deaf employee at the patent office "hear" for the first time in fifteen years. As a result of these personal research experiences I am acutely aware of the potential misuse of HAARP technology for the implementation of electronic global mind control. [H: The worst thing, however, is going to the patent office in the first place. Don't you people KNOW that this is where the idiots get their technology?] Certain types of electromagnetic signals can induce visual and auditory effects when the field around the head or body is at the right frequency, intensity and modulation levels. We are not accusing the developers of HAARP of amoral intentions for the use of this technology but the potential for abuse is there. [H: Listen up, if it has anything to do with government—it is amoral use of anything and everything they touch.]

As another example, Dr. Abraham Liboff of Oakland University has demonstrated that low energy circularly polarized electromagnetic waves can have a profound effect on cell and blood-brain barrier permeability to ions and toxins through a process known as cyclotron resonance.

Under ordinary conditions, certain minerals and substances cannot harm our cells because they cannot pass across these barriers and enter where they don't belong. Dr. Liboff has demonstrated that circularly polarized signals can drastically weaken these barriers to the extent that ordinarily benign chemicals can become deadly toxins. The power levels proposed by the HAARP manifesto are so great that these circularly polarized waves will be amplified by using solar energy and the amplification by the maser effect. This means these types of signals could be focused over large areas of the planet. Whole populations could be adversely affected by these signals.

In addition to the protective action of the ozone layer, our planet is protected from harmful cosmic rays by the Van Allen Radiation Belt. This belt, in conjunction with the Earth's magnetic field forms a barrier that shields us from DNA-mutating energy beams from

around the magnetic lines of force that extend from the poles of the planet into the stratosphere forming a protective shield around the Earth. These barriers protect us from atomic particles in the same way the ozone layer protects our planet from ultra-violet light. If this barrier is weakened, we have a lot more to worry about than a little extra sunburn. The entrance of high-energy particles could cause severe damage to the DNA blueprints of virtually all life on our planet.

These changes could also have a profound effect on our already rapidly shifting weather patterns. For example, a change in the ionic make-up of the upper atmosphere could potentially alter the infrared transmission windows which control the heat energy reaching our planet from the Sun. This, in turn, could cause an acceleration of the melting of the polar ice-caps which is already under way. The partial melting of the Antarctic ice cap alone could raise sea levels all over the world by at least 150 feet. This would devastate the entire civilized world. [H: NO IT CAN'T AND WON'T. THIS WILL NOT BE THE REASON BEHIND FLOODING AND SINKING OF LAND MASSES. WATER SIMPLY GOES TO THE LOWEST POINT AND ICE TAKES UP MORE SPACE THAN DOES WATER—SO SCIENTIFICALLY THIS ASSUMPTION IS UNSOUND! WHOEVER STARTED THAT RUMOR GOING IS AS UNSOUND AS EITHER NEWTON'S IDEA OF GRAVITY AND/OR EINSTEIN'S THEORY OF RELATIVITY. BOTH ARE INCORRECT IN TOTAL APPLICATION AND THEY WERE THE FIRST TO ACKNOWLEDGE AS MUCH. "REASON" IS STILL YOUR BEST SUPPORTING EVIDENCE TO KEEP THE EGG-ON-FACE DISEASE FROM STRIKING YOU. P.S.: I personally have not found "a civilized" world!]

The implementation of the HAARP project should be carefully studied by large groups of independent scientists before it is allowed to be activated. [H: TOO LATE!]

These, and other concerns, should be voiced and examined for merit before the project is allowed to continue. [H: TOO LATE!]

Nick Begich and Jeane Manning have started the process. This monumental effort is a humanitarian contribution to the sanity of this process and for this we applaud them.

Dr. Patrick Flanagan
Dr. Gael Crystal Flanagan
Sedona, Arizona, U.S.A.

[END OF QUOTING]

Please, when you get the book, read with a careful eye—in reason. Information is a wonderful thing but when you find one gross error right up front, it is hard to follow on with more than suspect attention. For instance, if the polar caps all melted—it would lower the sea level as is by many, many times in foot measurements.

I don't want to pick about this but if you find such discrepancy—you may VERY WELL have wrong dates and

places as well. This is not intentional, only realistic in your approach to any topic. You are already in the "testing" phase and accuracy of isolated targets is now being systematically tested on a regular basis as instructions are being issued which cause deadly damage, and confusion factors are being pumped into pilots and drivers, etc. Electronic failures, power failures and confusion are the main intent at present. To the testors and puppet-masters you represent only the laboratory

mice and puppets. When GOD is left OUT of the games—you can only have EVIL results. It is long now that the laws of GOD have been "written out" of your working world—while GOD's NAME is used more and more by your politicians TO FOOL YOU. It is up to you to get informed because the full intent of the One World Order is that you NEVER BE INFORMED!

May you clear your vision that you can see.
Salu.

Nevada Corporations

Ultimate Lawsuit Protection

The Ultimate Liability Protection: Most every state in the United States has adopted corporate statutes that limit the liability of any of its representatives which includes Officers, Directors and Stockholders. Nevada has very specifically spelled out in its state statutes that all corporate representatives are free from personal liability from corporate activities except in cases where fraud has been perpetrated. This means that the corporation can be sued, file bankruptcy and be involved in other unfortunate activities and not personally jeopardize the assets of its agents or representatives. The significant thing to remember here is that if your corporation does get sued, the initiator of the suit must bring the action against the corporation in its state of domicile. This is where it becomes important to have set up your corporation in a state that has taken a stand to protect the personal liability of a corporation's participants. Nevada has taken this stand quite firmly.

Piercing the Corporate Veil: There is another key reason why you want the corporation to be domiciled in Nevada. Nevada offers personal and financial privacy and makes it extremely difficult to pierce the corporate veil. Let's look at two very important examples that validate the difficulty of piercing the corporate veil in Nevada. In the Rowland vs. Lepire case in 1983, (999 NV 308, 6621 2d at 1337) the court rejected an attempt to set aside a corporation which had incomplete records and few documented formalities. There was clearly inadequate initial capital, the corporation had a negative net worth at the time of trial and there were no formal directors or shareholders meetings ever held. No dividends were paid to shareholders, nor did the officers or directors receive salaries. There was no corporate minute book, nor was there any evidence that minutes were ever kept. On the other hand, the corporation had managed to secure a general contractor's license and a framing contractor's license, "both in its name." There was also a corporate checking account. The court concluded that "Although the evidence does show that the corporation was undercapitalized and that there was little existence separate and apart from (the two key shareholders) . . . the evidence was insufficient to support a finding that appellants were the alter ego of the corporation. If you are considered to be the alter ego of the corporation, this means you are one in the same with the corporation. In other words, the corporation would not be viewed as a separate entity from yourself.

In Nevada, there is a three-prong test for proving that you are, in fact, the alter-ego of the corporation. **The burden of proof on the three "general requirements" is on the plaintiff, who seeks to pierce the veil. Failure to prove any of the three will result in the veil not being pierced.** (The three requirements for application of the alter-ego doctrine are included within the NCH manual). The great difficulty in piercing the corporate veil in Nevada is reason enough to have your corporation domiciled in Nevada.

In another case, the Governor rejected IRS attempts to go after an individual's tax records, who happened to be a successful bidder for the Mustang Ranch. The Governor sent a statement to the IRS

stating: "The state of Nevada protects its corporation's privacy". Basically, the state did not allow the IRS to invade an individual associated with a Nevada corporation, simply because of the individual's personal tax situation. Do you understand now why so many individuals incorporate their business in Nevada?

Liability - Example: David is a business owner in California and has seen the inside of a courtroom on numerous occasions. David owns a construction company that often finds itself in court defending itself against frivolous law suits. David had a friend, Paul, who was also in the construction business and had lost everything he had to a lawsuit which forced him to close down. Paul was also forced to sell his personal assets for the judgment because the opposing attorney was able to pierce through Paul's California corporation and find him personally liable.

This infuriated David to no end so he looked for a solution. David thought that the corporation was supposed to keep lawsuits out of his personal life. David investigated and found out that more and more Lawsuits in California against California corporations were going through the corporation to its owners. Then, David found Nevada Corporations; he quickly merged his California Corp. with his new Nevada Corporation.

This was done just in time because one of David's roofers fell off the roof of one of David's projects.

The great difficulty in piercing the corporate veil in Nevada is reason enough to have your corporation domiciled in Nevada.

David's corporation had not installed the proper OSHA securities on the job site and courts found David's corporations negligent. David was forced out of business. Now the attorneys were going after David personally for more damages. This is where things finally went his way. Because David had a Nevada Corporation, they had to go through the corporation in Nevada. Nevada courts, unlike California courts said "No way!" Nevada courts ruled that because David was acting as a Nevada Corporation he could not be held personally liable for damages. David was able to start over with money and assets that he had accumulated over the years.

No Exchange With The IRS: One of the unique features of Nevada is that they have taken a stand with the IRS. The Governor of Nevada, Bob Miller has stated that Nevada will not create a system of information exchange with the IRS. The IRS has a formal exchange program with most states where they can track the income and assets of people throughout the country. The states feel that they benefit because they get access to the information that the IRS uses for their own taxing purposes. Nevada has no state tax, therefore, they have no use of any arrangement with the IRS.

The attitude of most Nevadans is that your business is no one else's business and they certainly don't like anyone from the government telling them what they can do. So far this attitude has helped keep state government small. Every indication from political figures, including the Nevada Bar Association, points to this

remaining a firm Nevada tradition.

Low Cost Incorporation: Nevada is one of the lowest cost states to incorporate in. Once your corporation has been set up and running you are only charged \$85 a year by the state to keep the corporation operating in Nevada. That means for only \$85 a year, Nevada will give you the right to all of the benefits of a Nevada Corporation. All the state really cares about is their annual fees—you just have to pay them and you are left alone.

States like California will charge you at least \$1500 to get set up and then annually you will pay the state about \$1200 to receive all of their wonderful privileges like audits with the Franchise Tax Board.

Nevada has positioned itself as the low cost state for incorporation. With such low operating costs one can easily see what an advantage Nevada has, over operating in other states. Besides these low costs, keep in mind that there are also no corporate taxes to pay!

Why Incorporate?— Better Yet, Why Not?: Many people think that just because they are a single person or a family that incorporating is not for them—Wrong! It only requires one person to form the corporation, be the Board of Directors, and Officers. You then have all of the benefits of a corporation, business-wise and tax-wise. Why do you think the government seems to give breaks to corporations? Because most of our government "servants" are incorporated and do business through their corporations. Their private corporate lives are never made public. Yes, it is the best kept secret in the United States and abroad, because people from foreign countries can also incorporate in Nevada. This is a benefit that "Big Brother" has made every effort to hide from you so that there is not a chance of removing those benefits.

A Nevada corporation can own property in ANY state without having to qualify or be incorporated in that state. Therefore, in this instance (owning or buying real property), you are exempt from incorporating or qualifying to do business in your home state. When that circumstance also exists, then you would certainly want to incorporate in a preferred state and let the corporation in the preferred state own the property. Then, if you sell the property, simply sell the whole corporation. There are many benefits in that kind of transaction. Simply determine what activities are exempt from qualifying to do business in your home state and those which are not. This can easily be done by contacting the Secretary of State's Office in your home state.

It is wise to incorporate in the state with the best corporation and tax laws regardless of where you are going to do business. Then, if for ANY reason you ever wish to, you do have a safe HAVEN, as it were, to return, retreat or withdraw to.

Incorporating is a very tidy way to organize and get the best "breaks" around, wherever you choose to utilize the tool. Nevada is the most overall efficient state for personal corporations for dozens of reasons.

What the "little people" do not realize is that you can function in security and safety the same as the "big corporate giant", only more effectively.

For a **FREE INFORMATION PACKET** about the benefits of Nevada Corporations or to find out how you can take advantage of Nevada Corporations call NCH, INC. at 1-800-398-1077. To order the "Nevada Corporation Manual" for \$34.95 or "The Complete Do-It-Yourself Kit" for \$34.95 call NCH, INC. or send your check to NCH at P.O. Box 27740, Las Vegas, NV 89126. The News Desk

NEWS DESK article on Euthanasia in the Netherlands, and/or check out the next article on the same subject.]

DEPOPULATION BY EUTHANASIA

Stephen Chapman shows the direction assisted suicides have led in the Netherlands in his column in the November 13 issue of *THE ORLANDO SENTINEL*, [quoting:]

AMSTERDAM—In Michigan, Dr. Jack Kevorkian continues to defy the law by helping people kill themselves. In the Netherlands, things are different. Here, doctors have government permission [*I bet they DO!*] to assist patients who want to commit suicide—and to euthanize those who are unable to do it themselves. By sanctioning and regulating such practices, the Dutch might be expected to avoid the sort of dangers represented by renegade doctors such as Kevorkian. Instead, they have ingeniously managed to institutionalize abuses on a mass scale. Allowing patients to choose their own end may seem fine in principle, but it has been a ghastly mess in practice.

A 1991 survey unearthed a disturbing fact. A doctor is supposed to give a patient a lethal potion only if the patient requests it. But physicians admitted killing about 1,000 patients without their consent. But that's not the way it's supposed to work. The regulations forbid euthanasia unless the patient has made a "voluntary and durable" request based on "full information". Doctors often ignore the most fundamental protection in the law—and the government approves. [*Enough said! Doctor assisted suicides, living wills, meeting a hideous*

end in the Temple of Doom—these are all trappings of the allopathic medical model. They are by-products of our IGNORANCE on the subjects of health and nutrition, soil depletion, devitalized "foods", and the elite power-brokers who daily work to keep us helpless and ignorant. Ooops! There I go sounding fanatical again! The antidote to ignorance is knowledge. The

New Atlantean Press, P.O. Box 9638, Santa Fe, NM 87504, has many illuminating books for sale. The Phoenix Journals have covered a lot of these topics, as well, especially #42, UNHOLY ALLIANCE and #130, TRACKING DOWN THE KILLER AND OTHER FORMS OF MURDER.]

KEVORKIAN

ANOTHER NOBEL DISGRACE

The Nobel Peace Prize. Wow, pretty prestigious, right?? Ha! Presumably, we *CONTACT* readers are not so easily fooled. Here's an excerpted article from the October 27 issue of *EIR (Executive Intelligence Review)*, a Lyndon LaRouche publication, [quoting:]

Bertrand Russell was arguably the most evil man of the 20th century. Russell's vision was to use atomic weapons to police a one-world dictatorship—which might run under the aegis of the United Nations, but which would in fact be the British Empire reconstructed. Russell did not realize the entirety of his evil vision, but we can give him credit for the present state of affairs, in which we face the possible descent into a new dark age. Russell was one of the founders of the *Bulletin of the Atomic Scientists*, in 1945, and it was he who kicked off the Pugwash movement in 1955. This

TRADING IN DEATH FUTURES

Beacons of compassion or money-grubbing low life—or just another episode of "Life on Earth"? You be the judge in this intriguing challenge in discernment, from the November 10 issue of *THE ORLANDO SENTINEL*, [quoting:]

NEW YORK—An initial stock offering by a California company that buys life insurance policies from terminally ill people may help move the entire industry into the mainstream. Dignity Partners Inc. of San Francisco, which has operated since 1993, is one of an estimated 30 to 50 companies in what's known as the viatical settlement business. [*"Viatic—of or pertaining to a journey or to travel", Funk & Wagnalls. A euphemism, no doubt, like "passing away".*] It would become just the second company specializing in viatical settlements to be publicly traded. Under a viatical settlement, a company agrees to pay its client a certain percentage of the life insurance policy's face value. The company may purchase the policy for itself or for investors. Many transactions are arranged through brokers, who take a percentage of the profit. The amount paid for the policy depends, among other things, on how long the person is expected to live. Typically, patients with less than six months to live receive at least 80 percent of the face value of their policy. Patients with up to a year to live typically receive 70 percent, and those with up to 18 months to live usually receive 60 percent of the face value. The company pays the premiums on the policy and collects the death benefits when the client dies. According to industry sources, viatical settlement companies will purchase policies with a total face value of \$300 million to \$400 million this year.

Viatical settlements began in 1988 as a way for people whose illness had cost them their job and whose medical bills had exhausted their money to tap into what was often their only remaining financial resource. In its prospectus, Dignity Partners said 98 percent of the policies it has purchased have come from people with AIDS. But the company plans to follow an industry trend toward marketing to patients with cancer or heart disease. [*I suppose, if one had a cynical bent, this might appear to be an enterprising effort on the part of the parasitic perpetrators of depopulating diseases to extract every last shekel from their "hosts"—even money that was set aside for family and loved ones.*]

Steven Simon, former chairman of CAPX Corp., which was a publicly traded viatical settlement company, praised Dignity Partners' operations. "Dignity is one of the shining lights in the industry," Simon said. "They've done a very excellent job of finding the right mix between compassion and profits." [*This sounds bizarre, but when you stop and think about it, it's not much more bizarre than the life insurance policy upon which it is based, in which you bet you will die and when you win, you're not around to collect!*]

DEATH WITH DIGNITY DENIED

This *NEW YORK TIMES* article by Susan Gilbert appeared in the November 22 issue of the *DAILY NEWS*, [quoting:]

After 25 years of public outcry over the right to die with dignity doctors still are ignoring patients' last wishes, according to a new study of terminally ill patients. The study, reported in the current issue of *The*

Journal of the American Medical Association, has found that doctors often misunderstand or ignore the patients' requests, with the result that large numbers of people still die alone, in pain and tethered to mechanical ventilators in intensive care units. Twenty-five years since the living will movement began, the study's authors say they have discovered that the wills, which are supposed to give terminally ill patients legal safeguards against unwanted medical treatment, offer virtually no protection. The \$28 million study, financed by the Robert Wood Johnson Foundation, took place at six medical centers around the country. It was divided into two parts, each one lasting two years and involving similar groups of terminally ill patients.

During the first phase, the researchers gathered base-line information, including the percentage of patients who did not want aggressive medical treatment like cardiopulmonary resuscitation and mechanical ventilation, the percentage of doctors who knew their patients' wishes, how often aggressive treatment was used and how much pain patients were in before they died. The researchers found large gaps between what the patients wanted and what they got. Thirty-one percent of patients said they did not want cardiopulmonary resuscitation, but 80 percent of the doctors misunderstood or ignored their patients' wishes. Forty-nine percent of the patients who wanted to avoid cardiopulmonary resuscitation by having their doctors write do-not-resuscitate orders did not get their wish. The patients who did had to wait a long time for the doctors' orders [*an average of 22-73 days*]. Half the patients spent eight or more days in what the researchers defined as an undesirable state—comatose or receiving mechanical ventilation in an intensive-care unit. Half of all patients were also in moderate to severe pain during their last three days of life.

The second phase of the study tested a system called Support, designed to help patients avoid pain and unwanted life-prolonging treatments by fostering better communication between them and their doctors. Nurses met daily with each patient or the patient's family to discuss the patients' wishes for treatment and then relayed this information to the doctors and the hospital staff. With the aid of an advanced computer program, the nurses also gave the doctors and hospital staff estimates of each patient's chance of surviving for six months, his or her functional disability in two months and the outcome of cardiopulmonary resuscitation. By coincidence, the study's second phase began shortly after the federal Patient Self-Determination Act was passed in 1990. This act requires hospitals to inform patients upon admission of their right to refuse resuscitation and other lifesaving measures if they are near death, in accordance with state laws.

After phase two, there was no overall change in the percentage of do-not-resuscitate requests that were written, the amount of time it took for doctors to write them, the number of days that dying patients spent in undesirable states and the percentage of patients who died in pain. "The findings were startling to us," said Dr. William Knaus, who is chairman of the department of health evaluation sciences at the University of Virginia in Charlottesville. "Everyone from the American Medical Association to the American Cancer Society said that if you increase communication between patients and doctors and give doctors information on likely outcomes, you would decrease the amount of unwanted medical intervention. But that didn't work." [*So how optimistic does that make you feel about euthanasia laws for doctor-assisted suicides?! For the probable outcome, refer to the February 28, 1995*

became a vehicle for a typical British double game. On the one hand, Winston Churchill initiated the Cold War with his Iron Curtain speech, and Russell, on the other, was playing the British card of detente. [A dandy corollary of Hegelian dialectics!]

Pugwash became an instrument for Soviet as well as British propaganda initiatives, but it was always primarily an instrument of British State policy. On October 13, 1995, Russell's hatchetman and longtime collaborator, Josef Rotblat, was awarded the Nobel Peace Prize for 1995. Rotblat is currently the head of the Pugwash Conference on Science and World Affairs, an international organization.

In 1946, Russell had written an article in the *Bulletin of the Atomic Scientists*, in which he advocated the creation of a totalitarian world government whose purpose would be "to preserve the peace". [Sound familiar?] The following quotation from that article gives the flavor of his thinking: "When I speak of an international government, I mean one that really governs.... An international government... must have the only atomic bombs, the only plant for producing them, the only air force, the only battleships, and, generally, whatever is necessary to make it irresistible." [The NEW, revised, reformed, United Nations—see final article.]

QUACK-ADEMICS WIN NOBEL PRIZE

The next article is from the same source, [quoting:] The Royal Swedish Academy of Sciences awarded its 1995 Nobel Prize for chemistry Oct. 11 to the three fakers credited with developing the "theory" behind environmentalist claims that the ozone layer was depleted by using CFCs as a chemical refrigerant. On the basis of this hoax, an international ban on CFCs (chlorofluorocarbons)—the basis for vital cooling and refrigeration systems worldwide—is currently being implemented by decree. F. Sherwood Rowland of the University of California; his former student Mario Molina, now at the Massachusetts Institute of Technology; and Paul Crutzen of the Netherlands, Europe's "Mr. Ozone", shared the prize. In its tribute to the winners, the Academy said: "By explaining the chemical mechanisms that affect the thickness of the ozone layer, the three researchers have contributed to our salvation from a global environment problem that could have catastrophic consequences."

The alleged catastrophe presumes that the use of CFCs reduces the thickness of the ozone layer—thus admitting more ultraviolet radiation from the sun, resulting in increased incidence of skin cancer. No competent scientific evidence of such a connection has been produced—but there is ample evidence that a ban on CFCs will eliminate enough existing refrigeration systems, to jeopardize the food, medical, and other supplies which tens of millions of people depend upon for survival.

SESAME STREET: NOT SO GREAT FOR YOUR KIDS!

Since we're knocking down national/international icons, let's take a closer look at Bert and Ernie—here are some excerpts from Mona Charen's column which appeared in the November 16 issue of the *DAILY NEWS*, [quoting:]

As congressional budget conferees huddle in back rooms, ironing out differences in the House and Senate budgets, one thing is clear—Big Bird has survived the ax. Leaving aside arguments about the proper scope of the federal government, Kay Hymowitz, writing in the Autumn edition of the *City Journal*, argues that *Sesame Street* does not deserve its status as educational icon.

Far from preparing young children for school and the wider world of learning, *Sesame Street* grooms its charges only for more television.

All of the hype notwithstanding, *Sesame Street* doesn't actually glorify learning at all. It glorifies television and the youth culture. In-jokes and references to other television programs are endless. And while they can be extremely amusing to adults—Alistair Cookie is my favorite—they soar above the heads of the preschoolers in the audience. *Sesame Street* invokes (and spoofs) soap operas, game shows, cultural fare like *Great Performances*, and most of all, commercials. Indeed, *Sesame Street* is self-consciously modeled on commercials, with fast cuts, jazzy music and very, very short segments. If your child cannot concentrate for more than 30 seconds, *Sesame Street*, in marked contrast to other programs aimed at preschoolers like *Barney* and *Mister Rogers*, reinforces that.

Even if the show's claims about improving familiarity with letters and numbers are true, Hymowitz argues, "identifying the letter A is about as central to reading as defining shortstop is to playing baseball—necessary but wildly insufficient. The skills required for reading are a complex mix of concentration, persistence, the linking of concepts and more. Far from teaching concentration, *Sesame Street* schools viewers in video surfing, short takes on everything from addition to shapes and sounds.

And then there is the matter of content. The cultural tone of *Sesame Street* is politically correct through and through. All families are fine, kids are instructed. Some have one daddy; some have two. The worst behavior on the part of a child is not pouting, hitting, or cruelty, but wasting water. Although *Sesame Street* is undeniably clever and carefully crafted, it does little to stimulate children's imaginations. Enchant-

United Nations was created as a vehicle to take us to the NEW WORLD ORDER. Perhaps it's time to begin to condition the masses for the next—or final—phase of ONE WORLD GOVERNMENT. The following is from a two-part report by Dale Van Atta that appeared in the October and November issues of *READER'S DIGEST*, [quoting:]

As the United Nations approaches its 50th anniversary this year, *Reader's Digest* assigned Roving Editor Dale Van Atta to examine U.N. operations and effectiveness. For four months he interviewed dozens of officials here and abroad and pored over U.N. budget documents and confidential files [Right.] He found an institution in critical need of reform.

YUGOSLAVIA—Sonja's Kon-Tiki is a notorious Serbian watering hole six miles north of Sarajevo. While Serb soldiers perpetrated atrocities in nearby Bosnian villages, local residents reported that U.N. peacekeepers from France, Ukraine, Canada, and New Zealand regularly visited Sonja's drinking and eating with these very same soldiers—and sharing their women. The women of Sonja's, however, were actually prisoners of the Serb soldiers. As one soldier, Borislav Herak, would later confess, he visited Sonja's several times a week, raping some of the 70 females present and killing two of them. Tragically, Sonja's Kon-Tiki illustrates much of what has plagued U.N. peacekeeping operations: incompetent commanders, undisciplined soldiers, alliances with aggressors, failure to prevent atrocities and at times even contributing to the horror. And at the level of waste, fraud and abuse is overwhelming.

SOMALIA—After the Americans left, the U.N. took over in May 1993 with UNOSOM II. The \$2-million-a-day operation turned the former U.S. embassy complex into an 80-acre walled city boasting air-conditioned housing and a golf course. When U.N.

officials ventured out of the compound, their "taxis" were helicopters that cost "500,000 a week. Meanwhile, the peacekeeping effort disintegrated, particularly as warlord Mohammed Aidid harassed UNOSOM II troops. As the civil war continued, Somalis starved. But U.N. peacekeepers—on a food budget of \$ 56-million-a-year—dined on fruit from South America, beef from Australia and frozen fish from New Zealand and the Netherlands.

Thousands of yards of barbed wire arrived with no barbs; hundreds of light fixtures to illuminate the streets abut-

ting the compound had no sockets for light bulbs. What procurement didn't waste, pilferage often took care of. Peacekeeping vehicles disappeared with regularity, and Egyptian U.N. troops were suspected of large-scale black-marketing of minibuses. These loses, however, were eclipsed in a single night by an enterprising thief who broke into a U.N. office in Mogadishu and made off with \$3.9 million in cash. The office door was easy pickings: its lock could be jimmed with a credit card. The money, stored in the bottom drawer of a filing cabinet, had been easily visible to dozens of U.N. employees.

RWANDA—The relief effort was soon corrupted when the U.N. let the very murderers who'd massacred a half-million people take over the camps.... [Classic U.N. move! This article includes many other examples of waste and corruption. But it carefully ignores the REAL treachery underlying the United Nations and its goal of total enslavement of the world's population.]

Big Bird blues: "Sesame Street" too closely resembles a quick-cut commercial.

ment gets short shrift on *Sesame Street*, where the tone is smart-alecky and worldly wise. "Hip" and "cool" are the favorite words and the preferred mood. It is all image and flash, little depth or emotion. Sometimes fun for adults, it teaches preschoolers all the wrong lessons. [Like all television, *Sesame Street's* main lesson is passivity—watching, rather than doing.]

BEYOND THE U.N.

The mainstream media has long touted the United Nations as the "hope of peace in a turbulent world". So when this message begins to change to "the U.N. is outmoded and in need of reform", WATCH OUT! It's not because newspapers and magazines such as *Reader's Digest* are finally catching on to the Khazarian Elite conspiracy—*Reader's Digest* IS the conspiracy—or at least one of its transmission belts. Remember the

Depopulation Of A Planet

(Continued from Front Page)

eyes to see.

Without the historical foundation upon which to base understanding, writing about current efforts at depopulation, through the use of viruses and microorganisms, would have far less significance. So please stay with it as you read and it will come together. I realize that some of this initial material may seem dry, but it is important for a broader understanding of this critical and timely issue.

THOMAS MALTHUS

Thomas Robert Malthus was a parson of the English State Church and an economist who lived from 1766-1834. He is best known for his writing *An Essay On The Principle Of Population*, published in 1798. His main idea is that populations increase more rapidly than food supplies. So, he claimed, there would always be more people in the world than can be fed, and wars and disease will be necessary to kill off the extra population.

Malthus did not claim to be the originator of this idea, although it has come to be known as the "Malthusian Theory". Malthus based his argument on the works of Condorcet, David Hume, Adam Smith, Defoe, Sir James Steuart, Townsend, Franklin, and others.

Malthus' *Essay* suggested to Charles Darwin the relationship between progress and the survival of the fittest. This was the basic idea in Darwin's theory of evolution.

GEORG WILHELM HEGEL

Turning to the *New American Encyclopedia*, we read, "Georg Wilhelm Friedrich Hegel (1770-1831), German philosopher of idealism who had an immense influence on 19th and 20th-century thought and history. During his life he was famous for his professorial lectures at the University of Berlin and he wrote on logic, ethics, history, religion and aesthetics. The main feature of Hegel's philosophy was the dialectical method by which an idea (*thesis*) was challenged by its opposite (*antithesis*) and the two ultimately reconciled in a third idea (*synthesis*) which subsumed both. Hegel found this method both in the workings of the mind, as a logical procedure, and in the workings of the history of the world, which to Hegel was the process of the development and realization of the World Spirit (*Weltgeist*). Hegel's chief works were *Phenomenology of the Mind* (1807) and *Philosophy Of Right* (1821). His most important follower was Marx."

In the book edited by Carl J. Friedrich titled *The Philosophy of Hegel*, Hegel writes in *The Philosophy of History*, "In the Christian religion God has revealed Himself, giving to men the knowledge of what He is so that He is no longer secluded and secret. With this possibility of knowing Him God has imposed upon us the duty to so know Him. The development of the

thinking spirit, which has started from this basis, from the revelation of the Divine Being, must at last progress to the point where what was at first presented to the spirit in feeling and imagination is comprehended by thought. Whether the time has come to achieve this knowledge depends upon whether the final end of the world has at last entered into actual reality in a generally valid and conscious manner."

Hegel concludes with, "World history, with all the changing drama of its histories, is this process of the development and realization of the spirit. It is the true theodicy, the justification of God in history. Only this insight can reconcile the spirit with world history and the actual reality, that what has happened, and is happening every day, is not only not 'without God', but is essentially the work of God."

In his work *A History Of Western Philosophy*, Bertrand Russell writes, "Throughout the whole period after the death of Hegel, most academic philosophy remained traditional, and therefore not very important. British empiricist philosophy was dominant in England until near the end of the century, and in France until a somewhat earlier time; then, gradually, Kant and Hegel conquered the universities of France and England, so far as their teachers of technical philosophy were concerned."

Russell continues, "[Condorcet 1743-1794]... was also the inventor of Malthus's theory of population, which, however, had not for him the gloomy consequences that it had for Malthus, because he coupled it with the necessity of birth control. Malthus's father was a disciple of Condorcet, and it was in this way that Malthus came to know of the theory."

Of Hegel, Russell writes in part, "Hegel does not mean only that, in some situations, a nation cannot rightly avoid going to war. He means much more than this. He is opposed to the creation of institutions—such as a world government—which would prevent such situations from arising, because he thinks it is a good thing that there should be wars from time to time. War, he [Hegel] says is the condition in which we take seriously the vanity of temporal goods and things. (This view is to be contrasted with the opposite theory, that all wars have economic causes.) War has a positive moral value: 'War has the higher significance that through it the moral health of peoples is preserved in their indifference towards the stabilizing of finite determinations.'"

Still quoting Bertrand Russell, "The Philosophical Radicals were a transitional school. Their system gave birth to two others, of more importance than itself, namely Darwinism and Socialism. Darwinism was an application to the whole of animal and vegetable life of Malthus's theory of population, which was an integral part of the politics and economics of the Benthamites—a global free competition, in which victory went to the animals that most resembled successful capitalists. Darwin himself was influenced by Malthus, and was in

general sympathy with the Philosophical Radicals. There was, however, a great difference between the competition admired by orthodox economists and the struggle for existence which Darwin proclaimed as the motive force of evolution. 'Free competition,' in orthodox economics, is a very artificial conception, hedged in by legal restrictions. You may undersell a competitor, but you must not murder him. You must not use the armed forces of the State to help you to get the better of foreign manufacturers. Those who have not the good fortune to possess capital must not seek to improve their lot by revolution. 'Free competition,' as understood by the Benthamites, was by no means really free.

"Darwinian competition was not of this limited sort; there were no rules against hitting below the belt. The framework of law does not exist among animals, nor is war excluded as a competitive method. The use of the State to secure victory in competition was against the rules as conceived by the Benthamites, but could not be excluded from the Darwinian struggle. In fact, though Darwin himself was a liberal, and though Nietzsche never mentioned him except with contempt, Darwin's *Survival Of The Fittest* led, when thoroughly assimilated, to something much more like Nietzsche's philosophy than like Bentham's. These developments, however, belong to a later period, since Darwin's *Origin Of Species* was published in 1859, and its political implications were not at first perceived."

KARL MARX

In his 1843 writing from *The Kreuznach Manuscripts: Critique Of Hegel's Philosophy Of Right* [from Discussion Of The Princely Power, Comments On Hegel's 279] Karl Marx writes, [quoting:]

Democracy is the truth of monarchy; monarchy is not the truth of democracy. Monarchy is forced to be democracy as a *non sequitur* within itself, whereas the monarchical moment is not a *non sequitur* within democracy. Democracy can be understood in its own terms; monarchy cannot. In democracy, none of its moments acquires a meaning other than that which is appropriate to it. Each is actually only a moment within the whole demos. In monarchy, a part determines the character of the whole. The whole constitution has to take shape of this firm foundation. Democracy is the type or species of the constitution. Monarchy is a variety, and indeed a bad variety. Democracy is 'form and content'. Monarchy is *supposed* to be only form, but it falsifies the content.

In monarchy, the whole, the people, is subsumed under one of its particular modes of existence, that of the political constitution. In democracy, on the other hand, the *constitution itself* appears as only *one* determination, and indeed, as the self-determination of the people. In monarchy, we have the people of the constitution; in democracy we have the constitution of the people. Democracy is the *riddle* of all constitutions solved. In democracy the constitution is always based on its actual foundation, on *actual man* and the *actual people*, not only *in itself*, according to its essence, but in its *existence* and actuality; it is postulated as autonomous. The constitution is seen as what it is, the freely-created product of man. One could say that in some respects this is also true of constitutional monarchy, but what specifically differentiates democracy is the fact that in democracy the *constitution* is only one particular moment in the existence of the people, that the *political constitution* does not itself constitute the state.

Hegel begins with the state and turns man into the state subjectivized; democracy begins with man and makes the state into man objectivized. Just as religion does not create man but man creates religion, so the constitution does not create the people but the people create the constitution. In certain respects, democracy bears the same relation to all other forms of state as Christianity bears to all other religions. Christianity is religion *par excellence*, the *essence of religion*, man deified as a *particular religion*. Similarly, democracy

is the *essence* of every constitution; it is socialized man as a particular constitution. Democracy is related to other constitutions as a species is related to its varieties. But in democracy the species itself appears as a particular [form of] existence, as one therefore that appears as a particular type *vis-a-vis* other particular [individual] existences that do not correspond to their essence. Democracy is the *Old Testament* in relation to all other forms of state. Man does not exist for the law, but the law exists for man. In democracy law is the existence of man, while in other forms of state man is the existence of law. This is the fundamental distinguishing mark of democracy. [End quoting.]

Marx concludes with, "In all states other than democracy the *state*, the *law*, the *constitution* is dominant without actually dominating, i.e., without penetrating materially the content of the remaining non-political spheres. In democracy the constitution, the law, the state itself as a political constitution is only a self-determination of the people, a particular content of theirs.

"It is self-evident, incidentally, that all forms of state have democracy as their truth, and are therefore untrue in so far as they are not democratic."

In a correspondence of 1843, which was an exchange of letters between Marx, Ruge, and Bakunin concerning the prospects of social and political emancipation, Marx writes, [quoting:]

Man's self-esteem, freedom, must be awakened once more in the heart of these men. Only this feeling, which disappeared from the world with the Greeks and vanished into the blue mists of heaven with Christianity, can once more transform society into a fellowship of men working for their highest purposes, a democratic state.

Those people, on the other hand, who do not feel themselves to be men become appendages of their masters, like a herd of slaves or horses. The hereditary masters are the point of this whole society. This world belongs to them. They take it as it is and as it feels. They take themselves as they find themselves and stand where their feet have grown, on the necks of these political animals who know no other destiny than to be subject, loyal and at their master's service.

The world of the Philistines is the *political kingdom of animals*; if we have to recognize its existence then we have no alternative but simply to accept the *status quo*. Centuries of barbarism created and shaped it and it now exists as a consistent system, whose principle is the *dehumanized world*. The perfected world of the Philistine, our Germany, naturally had to lag far behind the French Revolution, which restored man to himself. A German Aristotle, who would take his *Politics* from our conditions, would write on the first page: 'Man is a social, but a completely apolitical, animal.' [End quoting.]

Further on, Marx continues, [quoting:]

To be sure, in times when the political state as such is born, violently, out of civil society, when men strive to liberate themselves under the form of political self-liberation, the state can and must go on to *abolish* and destroy religion. But it does so only the way that it abolishes private property, by setting a maximum, providing for confiscation and progressive taxation, just as it abolished life by establishing the guillotine. In moments when political life has a specially strong feeling for its own importance, it seeks to repress its presuppositions, civil society and its elements, and to constitute itself as the real, harmonious species-life of man. It can do this only by entering into *violent* contradiction with its own conditions of existence; it can do so only by declaring the revolution to be *permanent*; and the political drama therefore necessarily ends with the restoration of religion, of private property, and of all the elements of civil society, just as war ends with peace...

We have shown, then, that political emancipation from religion leaves religion standing, even if not as privileged religion. The contradiction in which the

follower of a specific religion finds himself in relation to his citizenship is only *one aspect* of the universal secular *contradiction between the political state and civil society*. The consummation of the Christian state is a state that recognizes itself as state and abstracts itself from the religion of its members. The emancipation of the state from religion is not the emancipation of actual man from religion. [End quoting.]

In *Capital*, Marx writes, [quoting:]

The laboring population therefore produces, along with the accumulation of capital produced by it, the means by which itself is made relatively superfluous, is turned into a relative surplus-population; and it does this to an always increasing extent. This is the law of population peculiar to the capitalist mode of production; and in fact every specific historic mode of production has its own specific laws of population, historically valid within its limits alone. An abstract law of population exists for plants and animals only, and only insofar as man has not interfered with them. [End quoting.]

Bertrand Russell writes in *A History Of Western Philosophy*, "Marx's philosophy of history is a blend of Hegel and British economics. Like Hegel, he thinks that the world develops according to a dialectical formula, but he totally disagrees with Hegel as to the motive force of this development. Hegel believed in a mystical entity called *Spirit*, which causes human history to develop according to the stages of the dialectic as set forth in Hegel's *Logic*. Why Spirit has to go through these stages is not clear. One is tempted to suppose that Spirit is trying to understand Hegel, and at each stage rashly objectifies what it has been reading. Marx's dialectic has none of this quality except a certain inevitableness. For Marx, matter, not spirit, is the driving force. But it is a matter in the peculiar sense that we have been considering, not the wholly dehumanized matter of the atomists. This means that, for Marx, the driving force is really man's relation to matter, of which the most important part is his mode of production. In this way Marx's materialism, in practice, becomes economics."

THE FABIAN SOCIETY

In one of his *Fabian Essays* [The Fabian Society], titled *Economic*, George Bernard Shaw wrote the following in 1889, "All economic analyses begin with the cultivation of the Earth. To the mind's eye of the astronomer the Earth is a ball spinning in space without ulterior motives. To the bodily eye of the primitive cultivator it is a vast green plain, from which, by sticking a spade into it, wheat and other edible matters can be made to spring."

Shaw continues, "It was the increase of population that spread cultivation and civilization from the center to the snow line, and at last forced men to sell themselves to the lords of the soil: it is the same force that continues to multiply men so that their exchange value falls slowly and surely until it disappears altogether—until even black chattel slaves are released as not worth keeping in a land where men of all colors are to be had for nothing. This is the condition of our English laborers today: they are no longer even dirt cheap: they are valueless, and can be had for nothing."

On overpopulation Shaw writes, "The introduction of the capitalistic system is a sign that the exploitation of the laborer toiling for a bare subsistence wage has become one of the chief arts of life among the holders of tenant rights. It also produces a delusive promise of endless employment which blinds the proletariat to those disastrous consequences of rapid multiplication which are obvious to the small cultivator and peasant proprietor. But indeed the more you degrade the workers, robbing them of all artistic enjoyment, and all chance of respect and admiration from their fellows, the more you throw them back, reckless, on the one pleasure and the one human tie left to them—the gratification of their instinct for producing fresh supplies of men. You will applaud this instinct as divine until at last the excessive supply becomes a nuisance: there comes a plague of men; and you suddenly discover that the instinct is diabolic, and set up a cry of 'over population'. But your slaves are beyond caring for your cries: they breed like rabbits; and their poverty breeds

Attention Readers

I would like to take this opportunity to thank all of our readers for their continued support—both financial and spiritual. Each week, when the bills need to be paid, we always seem to squeak by due to the thoughtfulness of all of you out there who care for TRUTH. Because of you, we continue.

I also need to discuss a few issues that have become problems for us from time to time. Many of you obtain *CONTACT* and/or copy articles from *CONTACT* to share with others. We certainly encourage this and, as long as it is not done commercially, we are happy that you think enough of what we print to want to share. However, please do not deliver random, unsolicited issues of *CONTACT* or articles therein to people either by throwing the newspaper on their property or using the mail box at their house or business. It is against the law for individuals or businesses to use anyone's mail box for delivery of anything. This may surprise some of you but this is true and only the Post Office is allowed by law to deliver mail to anyone's mail receptacle. We have, from time to time, received angry telephone calls from either local postmasters around the country or people who have had the paper delivered or thrown in their yard by some of you out there. I received an angry telephone call from a lady last week who received a copy of an article out of our newspaper. Apparently, one of our readers used a prepaid business reply envelope to send the article copy to her business. I'm not sure whether or not this is illegal but it certainly is, to my way of thinking, unethical. While I'm in the complaint mode, there is one other issue which I want to address. Please do not use *CONTACT, Inc.*'s or Phoenix Source Distributors, Inc.'s return address to mail Journals, *CONTACTS*, articles or anything else to people. This causes ones to presume that we initiated the mailing, when in fact we did not, and we catch the flack. Please respect the right of businesses and individuals to use their addresses exclusively, unless there is some type of written prearrangement.

We understand the excitement of wanting to share the Truth but please use some discretion in who you send information to and also how you send it. Remember, it is we here at *CONTACT* who get the irate telephone calls and the blame from people who have no interest in *CONTACT* or the information contained in it when they receive it unsolicited. We ask that you exercise good judgement in sharing with others. Thanks for your understanding.

Brent Moorhead
Business Manager

filth, ugliness, dishonesty, disease, obscenity, drunkenness, and murder. In the midst of the riches which their labour piles up for you, their misery rises up too and stifles you. You withdraw in disgust to the other end of the town from them; you appoint special carriages on your railways and special seats in your churches and theaters for them; you set your life apart from theirs by every class barrier you can devise; and yet they swarm about you still: your face gets stamped with your habitual loathing and suspicion of them: your ears get so filled with the language of the vilest of them that you break into it when you lose your self-control: they poison your life as remorselessly as you have sacrificed theirs heartlessly. You begin to believe intensely in the devil. Then comes the terror of their revolting; the drilling and arming of bodies of them to keep down the rest; the prison, the hospital, paroxysms of frantic coercion, followed by paroxysms of frantic charity. And in the meantime, the population continues to increase!"

GEORGE ORWELL

In George Orwell's classic *Animal Farm*, he writes, [quoting:]

Now, comrades, what is the nature of this life of ours? Let us face it: our lives are miserable, laborious, and short. We are born, we are given just so much food as will keep the breath in our bodies, and those of us who are capable of it are forced to work to the last atom of our strength; and the very instant that our usefulness has come to an end we are slaughtered with hideous cruelty. No animal in England knows the meaning of happiness or leisure after he is a year old. No animal in England is free. The life of an animal is misery and slavery: that is the plain truth.

But is this simply part of the order of nature? It is because this land of ours is so poor that it cannot afford a decent life to those who dwell upon it? No, comrades, a thousand times no! The soil of England is fertile, its climate is good, it is capable of affording food in abundance to an enormously greater number of animals than now inhabit it. This single farm of ours would support a dozen horses, twenty cows, hundreds of sheep—and all of them living in a comfort and a dignity that are now almost beyond our imagining. Why then do we continue in this miserable condition? Because nearly the whole of the produce of our labour is stolen from us by human beings. There, comrades, is the answer to all our problems. It is summed up in a single word—Man. Man is the only real enemy we have. Remove Man from the scene, and the root cause of hunger and overwork is abolished for ever.

Man is the only creature that consumes without producing. He does not give milk, he does not lay eggs, he is too weak to pull the plough, he cannot run fast enough to catch rabbits. Yet he is lord of all the animals. He sets them to work, he gives back to them the bare minimum that will prevent them from starving, and the rest he keeps for himself. Our labour tills the soil, our dung fertilizes it, and yet there is not one of us that owns more than his bare skin. You cows that I see before me, how many thousands of gallons of milk have you given during this last year? And what has happened to that milk which should have been breeding up sturdy calves? Every drop of it has gone down the throats of our enemies. And you hens, how many eggs have you laid in this last year, and how many of those eggs ever hatched into chickens? The rest have all gone to market to bring in money for Jones and his men. And you, Clover, where are those four foals you bore, who should have been the support and pleasure of your old age? Each was sold at a year old—you will never see one of them again. In return for your four confinements and all your labour in the fields, what have you ever had except your bare rations and a stall?

And even the miserable lives we lead are not allowed to reach their natural span. For myself I do not grumble, for I am one of the lucky ones. I am twelve

years old and have had over four hundred children. Such is the natural life of a pig. But no animal escapes the cruel knife in the end. You young porkers who are sitting in front of me, every one of you will scream your lives out at the block within a year. To that horror we all must come—cows, pigs, hens, sheep, everyone. Even the horses and the dogs have no better fate. You, Boxer, the very day that those great muscles of yours lose their power, Jones will sell you to the knacker, who will cut your throat and boil you down for the foxhounds. As for the dogs, when they grow old and toothless, Jones ties a brick around their neck and drowns them in the nearest pond.

Is it not crystal clear, then, comrades, that all the evils of this life of ours spring from the tyranny of human beings? Only get rid of Man, and the produce of our labour would be our own. Almost overnight we could become rich and free. What then must we do? Why, work night and day, body and soul, for the overthrow of the human race! That is my message to you, comrades: Rebellion! I do not know when that Rebellion will come, it might be in a week or in a hundred years, but I know, as surely as I see this straw beneath my feet, that sooner or later justice will be done. Fix your eyes on that, comrades, throughout the short remainder of your lives! And above all, pass on this message of mine to those who come after you, so that future generations shall carry on the struggle until it is victorious.

And remember, comrades, your resolution must never falter. No argument must lead you astray. Never listen when they tell you that Man and the animals have a common interest, that the prosperity of the one is the prosperity of the others. It is all lies. Man serves the interests of no creature except himself. And among us animals let there be perfect unity, perfect comradeship

in the struggle. All men are enemies. All animals are comrades. [End quoting.]

ALDOUS HUXLEY

In the *Foreword* to the 1946 (second printing) of the classic novel *Brave New World*, first published in 1932, author Aldous Huxley writes, [quoting:]

There is, of course, no reason why the new totalitarisms should resemble the old. Government by clubs and firing squads, by artificial famine, mass imprisonment and mass deportation, is not merely inhumane (nobody cares much about that nowadays); it is demonstrably inefficient and in an age of advanced technology, inefficiency is the sin against the Holy Ghost. A really efficient totalitarian state would be one in which the all-powerful executive of political bosses and their army of managers control a population of slaves who do not have to be coerced, because they love their servitude. To make them love it is the task assigned, in present-day totalitarian states, to ministries of propaganda, newspaper editors and school teachers. But their methods are still crude and unscientific. The old Jesuits' boast that, if they were given the schooling of the child, they could answer for the man's religious opinions, was a product of wishful thinking. And the modern pedagogue is probably rather less efficient at conditioning his pupils' reflexes than were the reverend fathers who educated Voltaire. The greatest triumphs of propaganda have been accomplished, not by doing something, but by refraining from doing. Great is truth, but still greater, from a practical point of view, is silence about truth. By simply not mentioning certain subjects, by lowering what Mr. Churchill calls an "iron curtain" between the masses and such facts or

THE WORD

Tapes, Transcriptions & Videos

Donations to cover the costs of tapes are \$4.00 for one tape, \$6.00 for two tapes and \$2.50 per tape for three or more, except where otherwise noted. Postage is included in tape prices.

Please send check or money order to: *THE WORD*, P.O. Box 6194, Tehachapi, CA 93582 or call 805-822-4176 if you have questions or you wish to use your Visa, Discover or Master Card.

If you desire to *automatically* receive tapes from future meetings, please send at least a \$50 donation from which tape costs will be deducted. We will try to notify you as your balance reaches zero.

The following is a *partial* list of older items but including all of the most current meeting dates, with the number of tapes in **bold**, in parentheses, and mentioning if the meeting has a special focus:

10/10/94 Columbus Day(5); 10/28 & 30(4); 11/6/94(2); 11/20/94(2); 11/27/94(2);
12/11/94(2); 12/18/94(3); 1/8/95(2); 1/15/95(3) Norio Hayakawa & Jordan Maxwell;
1/22/95(2); 2/5/95(2);
2/10/95(2) Japanese visitors, plus Jordan Maxwell on Masonic symbolism;
2/19/95(4) extended slide-lecture on Masonic and other symbols by Jordan Maxwell;
3/5/95(1); 3/12/95 (3) Rayelan/Ede Koenig Blast; 3/26/95 (2);
4/9/95(5) Vladimir Terziski's meeting with Commander and the ground crew;
4/23/95(2) Mary Snell & Ronn Jackson via phone;
5/1 & 2/95 (6) May Day meeting; 5/16/95(3); 5/28/95(3);
6/11/95(2); 6/25/95(2); 7/9/95(3); 7/30/95(3); 9/24/95(1) Ronn Jackson;
10/22/95(3) includes audio of Farrakhan's speech;
10/29/95(4) Mark Phillips & Cathy O'Brien;
11/12/95 (3); 11/26/95(3).

arguments as the local political bosses regard as undesirable, totalitarian propagandists have influenced opinion much more effectively than they could have done by the most eloquent denunciations, the most compelling of logical rebuttals. But silence is not enough. If persecution, liquidation and the other symptoms of social friction are to be avoided, the positive sides of propaganda must be made as effective as the negative. The most important Manhattan Projects of the future will be vast government-sponsored enquiries into what the politicians and the participating scientists will call "the problem of happiness"—in other words, the problem of making people love their servitude. Without economic security, the love of servitude cannot possibly come into existence; for the sake of brevity, I assume that the all-powerful executive and its managers will succeed in solving the problem of permanent security. But security tends very quickly to be taken for granted. Its achievement is merely a superficial, external revolution. The love of servitude cannot be established except as the result of a deep, personal revolution in human minds and bodies. To bring about that revolution we require, among others, the following discoveries and inventions. First, a greatly improved technique of suggestion—through infant conditioning and, later, with the aid of drugs, such as scopolamine. Second, a fully developed science of human differences, enabling government managers to assign any given individual to his or her proper place in the social and economic hierarchy. (Round pegs in square holes tend to have dangerous thoughts about the social system and to infect others with their discontents.) Third (since reality, however utopian, is something from which people feel the need of taking pretty frequent holidays), a substitute for alcohol and the other narcotics, something at once less harmful and more pleasure-giving than gin or heroin. And fourth (but this would be a long-term project, which it would take generations of totalitarian control to bring to a successful conclusion) a foolproof system of eugenics, designed to standardize the human product and so to facilitate the task of the managers. In *Brave New World* this standardization of the human product has been pushed to fantastic, though not perhaps impossible, extremes. Technically and ideologically we are still a long way from bottled babies and Bokanovsky groups of semi-morons. But by A.F. 600, who knows what may not be happening? Meanwhile the other characteristic features of that happier and more stable world—the equivalents of soma and hypnopaedia and the scientific caste system—are probably not more than three or four generations away. Nor does the sexual promiscuity of *Brave New World* seem so very distant. [Let me remind you this was written in 1946.] There are already certain American cities in which the number of divorces is equal to the number of marriages. In a few years, no doubt, marriage licenses will be sold like dog licenses, good for a period of twelve months, with no law against changing dogs or keeping more than one animal at a time. As political and economic freedom diminishes, sexual freedom tends compensatingly to increase. And the dictator (unless he needs cannon fodder and families with which to colonize empty or conquered territories) will do well to encourage that freedom. In conjunction with the freedom to daydream under the influence of dope and movies and the radio, it will help to reconcile his subjects to the servitude which is their fate.

All things considered it looks as though Utopia were far closer to us than anyone, only fifteen years ago, could have imagined. Then, I projected it six hundred years into the future. Today it seems quite possible that the horror may be upon us within a single century. That is, if we refrain from blowing ourselves to smithereens in the interval. Indeed, unless we choose to decentralize and to use applied science, not as the end to which human beings are to be made the means, but as the means to producing a race of free individuals, we have only two alternatives to choose from: either a number of national, militarized totali-

tarianisms, having as their root the terror of the atomic bomb and as their consequence the destruction of civilization (or, if the warfare is limited, the perpetuation of militarism); or else one supra-national totalitarianism, called into existence by the social chaos resulting from rapid technological progress in general and the atomic revolution in particular, and developing, under the need for efficiency and stability, into the welfaretyranny of Utopia. You pay your money and you take your choice. [End quoting.]

Mark Twain in *The Mysterious Stranger* writes, "And what does it amount to?" said Satan, with his evil chuckle. "Nothing at all. You gain nothing: you always come out where you went in. For a million years the race has gone on monotonously propagating itself and monotonously reperforming this dull nonsense to what end? No wisdom can guess! Who gets a profit out of it? Nobody but a parcel of usurping little monarchs and nobilities who despise you; would feel defiled if you touched them; would shut the door in your face if you proposed to call; whom you slave for, fight for, die for, and are not ashamed of it, but proud; whose existence is a perpetual insult to you and you are afraid to resent it; who are mendicants supported by your alms, yet assume toward you the airs of benefactor toward beggar; who address you in the language of master toward slave, and are answered in the language of slave toward master; who are worshipped by you with your mouth, while in your heart if you have one you despise yourselves for it. The first man was a hypocrite and a coward, qualities which have not failed yet in his line; it is the foundation upon which all civilizations have been built."

In a lecture titled *The Population Explosion*, delivered at Santa Barbara, Calif. in 1959, Aldous Huxley said, [quoting:]

Today I want to pass on to what is happening to the human species and to think a little about what our philosophy and our ethical outlook on the subject should be. This lecture is essentially about human numbers and their relation to human well-being and human values in general.

Needless to say, any accurate estimation of human numbers is very recent, but we can extrapolate into the past and come to what seem to be fairly good conclusions. Although there are some fairly wide margins of difference among the experts, the numbers they come to are roughly in agreement. They agree that in pre-agricultural days, for example in the lower Palaeolithic times, when man was a food-gathering creature, there were probably not more than twenty million humans on this whole planet. In later Palaeolithic times, after organized hunting had been invented, the number probably doubled. We can make a rough estimate of what an organized hunting people could do because we know how many Indians were present in North America when the white man arrived—not more than one million in the entire North American continent east of the Rockies—and this gives one an indication of the extremely low density of population possible in a hunting economy.

The Great Revolution came about 6000 B.C. with the invention of agriculture, and the creation of cities in the next millennia. By about 1000 B.C., after five thousand years of agriculture, there

were probably about one hundred million people in the world.

By the beginning of the Christian era, this figure had a little more than doubled: it was somewhere between two hundred million and two hundred and fifty million—less than half the present population of China. The population increased very gradually in the following years; sometimes there were long periods of standstill and sometimes there were even periods of decrease, as in the years immediately following 1348, when the Black Death killed off 30 percent of the population of Europe and nobody knows how much of the population of Asia.

By the time the Pilgrim fathers arrived in this country, it is estimated that the population of the world was about twice what it had been on the first Christmas Day—that is to say, it had doubled in sixteen hundred years, an extremely slow rate of increase. But from that time on, from the middle of the seventeenth century, with the beginnings of the industrial revolution and the first importation of food from the newly developed lands of the New World, population began rising far more rapidly than it had ever risen before.

By the time the *Declaration of Independence* was signed, the figure for the human population of the world was probably around seven hundred million; it must have passed the billion mark fairly early in the nineteenth century and stood at about fourteen hundred million around the time when I was born in the 1890s. The striking fact is that since that time the population of the planet has doubled again. It has gone from fourteen hundred million, which is already twice what it was at the signing of the *Declaration of Independence*, to twenty-eight hundred million. And the rate of increase now is such that it will probably double again in rather less than fifty years.

Thus the rates of increase have been increasing along with the absolute increase in numbers.

[Please remember, this was written in 1959. The world's current population is rapidly approaching the 7 Billion figure—those are not "official" numbers, however.]

Still quoting Huxley:

Let us now ask ourselves what the practical alternatives are as we confront this problem of population growth. One alternative is to do nothing in particular about it and just let things go on as they are, but the consequences of that course are quite clear: the problem will be solved by nature in the way that nature always solves problems of over-population. When any animal population tends (a) to starve and (b) to suffer from severe epidemic and epizootic diseases. In the

human population, we can envisage that the natural check on the unlimited growth of population will be precisely this: there will be pestilence, famine, and, since we are human beings and not animals, there will be organized warfare, which will bring the numbers down to what the Earth can carry. What nature teaches us is that it is extraordinarily dangerous to upset any of its fundamental balances, and we are in the process of upsetting a fundamental balance in the most alarming and drastic manner. The question is: Are we going to restore the balance in the natural way, which is a brutal and entirely anti-human way, or are we going to restore it in some intelligent, rational, and humane way? If we leave matters as they are, nature will certainly solve the problem in her way and not in ours.

Another alternative is to increase industrial and agricultural production so that they can catch up with the increase in population. This solution, however, would be extremely like what happens to Alice in *Through The Looking Glass*. You remember that Alice and the Red Queen are running a tremendous race. To Alice's astonishment, when they have run until they are completely out of breath they are in exactly the same place, and Alice says, 'Well, in our country...you'd generally get to somewhere else—if you ran very fast for a long time as we've been doing.'

'A slow sort of country!' says the Queen. 'Now here, you see, it takes all the running you can do, to keep in the same place. If you want to get somewhere else, you must run at least twice as fast as that!'

This is a cosmic parable of the extremely tragic situation in which we now find ourselves. We have to work, to put forth an enormous effort, just to stand where we are; and where we are is in a most undesirable position because, as the most recent figures issued by the United Nations indicate, something like two-thirds of the human race now lives on a diet of two thousand calories or less per day, which—the ideal being in the neighborhood of three thousand—is definitely a diet of undernourishment. [End quoting.]

Further into the speech, quoting Huxley again:

The third alternative is to try to increase production as much as possible and at the same time to try to re-establish the balance between the birth rate and the death rate by means less gruesome than those which are used in nature—by intelligent and humane methods. In this connection it is interesting to note that the idea of limiting the growth of populations is by no means new. In a great many primitive societies, and even in many of the highly civilized societies of antiquity, where local over-population was a menace, although less fearful than the natural means. The most common was infanticide—killing or exposing by leaving out on the mountain unwanted children, or children of the wrong sex, or children who happened to be born with some slight deficiency or other. Abortion was also very common. And there were many societies in which strict religious injunctions imposed long periods of sexual continence between the birth of each child. But in the nineteenth and twentieth centuries various methods of birth control less fearful in nature have been devised, and it is in fact theoretically conceivable that such methods might be applied throughout the whole world.

What is theoretically possible, however, is often practically almost impossible. There are colossal difficulties in the way of implementing any large-scale policy of limitation of population; whereas death control is extremely easy under modern circumstances, birth control is extremely difficult. The reason is very simple: death control—the control, for example, of infectious diseases—can be accomplished by a handful of experts and quite a small labour force of unskilled persons and requires a very small capital expenditure. [End quoting.]

Again, Huxley, "The problem of control of the birth rate is infinitely complex. It is not merely a problem of medicine, in chemistry, in biochemistry, in physiology; it is also a problem in sociology, in psychology, in theology, and in education. It has to be attacked on

about ten different fronts simultaneously if there is to be any hope of solving it."

And, continuing later in Huxley's speech, "Merely from a technical and temporal point of view, we are obviously in a very tight spot. But we have also to consider the political point of view. There would undoubtedly have to be either world-wide agreement or regional agreements on a general population policy in order to have any satisfactory control of the situation at all. But there is absolutely no prospect at the present time of our getting any such political agreement."

Huxley continues, "Now we have to ask ourselves what our attitude should be towards these problems. We come to the other end of the bridge. We pass from the world of facts to the world of values. What we think about all this depends entirely on what we regard as the end and purpose of human life. If we believe the end and purpose of human life is to foster power politics and nationalism, then we shall probably need a great deal of cannon fodder, although even this proposition becomes rather dubious in the light of nuclear warfare. But if, as I think most of us would agree, the end of human life is to realize individual potentialities to their limits and in the best way possible, and to create a society which makes possible such a realization and philosophical way about the population problem. We see that in very many cases the effort to raise human quality is being thwarted by the mere increase of human quantity, that quality is very often incompatible with quantity. We have seen that mere quantity makes the educational potentialities of the world unrealizable. We have seen that the pressure of enormous numbers upon resources makes it almost impossible to improve the material standards of life, which after all have to raise to a minimum if any of the higher possibilities are to be realized: although it is quite true that man cannot live by bread alone, still less can he live without bread, and if we simply cannot provide adequate bread, we cannot provide anything else. Only when he has bread, only when his belly is full, is there some hope of something else emerging from the human situation.

"Then there is the political problem. It is quite clear that as population presses more and more heavily upon resources, the economic situation tends to become more and more precarious. As there is a tendency in precarious situations for centralized government to assume more and more control, there is therefore now a tendency towards totalitarian forms of government, which certainly we in the West find very undesirable. But when you ask whether democracy is possible in a population where two-thirds of the people are living on two thousand calories a day, and one-third is living on over three thousand, the answer is no, because the people living on less than two thousand calories will simply not have enough energy to participate in the political life of the country, and so they will be governed by the well-fed and energetic. Again, quantity militates against quality."

And later, "Finally, the unlimited increase in human numbers practically guarantees that our planetary resources will be destroyed and that within a hundred or two hundred years an immensely hypertrophied hu-

man species will have become a kind of cancer on this planet and will ruin the quasi-organism on which it lives. It is a most depressing forecast and possibility.

"I think one can say from this last point that the problem of quality and quantity is really a religious problem. For, after all, what is religion but a preoccupation with the destiny of the individual and with the destiny of society and the race at large? This is summed up very clearly in the Gospel when we are told that the Kingdom of God is within us but at the same time it is our business to contribute to the founding of the Kingdom of God upon Earth. We cannot neglect either of these two aspects of human destiny. For if we neglect the general, quantitative, population aspect of destiny, we condemn ourselves, or certainly our children and grandchildren, as individuals. We condemn them to the kind of life which we should find intolerable and which presumably they will find intolerable too.

"There are no certain theological objections to population limitation. Most religious organizations in the world today, both within and outside the Christian pale, accept it. But the Roman Catholic church does not accept any method of population control except that which was promulgated and made permissible in 1932—the so-called rhythm method. Unfortunately, where the rhythm method has been tried on a considerable scale in an undeveloped country such as India, it has not been found to be very effective. The fact that the Church recognizes this problem was brought home very clearly in 1954 at the time of the first United Nations Population Congress, which took place in Rome, when the late Pope, in an allocution to the delegates, made it quite clear that the problem of population was a very grave one which he recommended to the consideration of the faithful."

And later, "We can conclude, then, by saying that over-population is quite clearly one of the gravest problems which confront us, and the choice before us is either to let the problem be solved by nature in the most horrifying possible way or else to find some intelligent and humane method of solving it, simultaneously increasing production and balancing the birth rate and the death rate, and in some way or other forming an agreed international policy on the subject. To my mind, the most important prerequisites to such a solution are first of all an awareness of the problem, and then a realization that it is a profoundly religious problem, a problem of human destiny. Our hope, as always, is to be realistically idealistic."

LETTER TO U.N. SECRETARY GENERAL U THANT

August 30, 1965—My Dear Mr. Secretary General:

The United States Government recognizes the singular importance of the meeting of the second United Nations World Population Conference and pledges its full support to your great undertaking.

As I said to the United Nations in San Francisco, we must now begin to face forth-rightly the multiplying problems of our multiplying population. Our government assures your conference of our wholehearted support to the United Nations and its agencies in their

MALLARD FILLMORE / Bruce Tinsley

efforts to achieve a better world through bringing into balance the world's resources and the world's population.

In extending my best wishes for the success of your conference, it is my fervent hope that your great assemblage of population experts will contribute significantly to the knowledge necessary to solve this transcendent problem. Second only to the search for peace, it is humanity's greatest challenge. This week, the meeting in Belgrade carries with it the hopes of mankind.

Sincerely, Lyndon B. Johnson [President]

**POPE PAUL VI
HUMANAE VITAE (1968)**

[Quoting:] The changes which have taken place are in fact noteworthy and of varied kind. In the first place, there is the rapid demographic development. Fear is shown by many that world population is growing more rapidly than the available resources, with growing distress to many families and developing countries, so that the temptation for authorities to counter this danger with radical measures is great. Moreover, working and lodging conditions, as well as increased exigencies both in the economic field and in that of education, often make the proper education of an elevated number of children difficult today.

This new state of things gives rise to new questions. Granted the conditions of life today, and granted the meaning which conjugal relations have with respect to the harmony between husband and wife and to their mutual fidelity, would not a revision of the ethical norms in force up to now seem to be advisable, especially when it is considered that they cannot be observed without sacrifices, sometimes heroic sacrifices?

...conjugal love requires in husband and wife an awareness of their mission of "responsible parenthood," which today is rightly much insisted upon, and which also must be exactly understood. Consequently it is to be considered under different aspects which are legitimate and connected with one another.

In relation to the biological processes, responsible parenthood means the knowledge and respect of their functions; human intellect discovers in the power of giving life biological laws which are part of the human person.

In relation to the tendencies of instinct or passion, responsible parenthood means that necessary dominion which reason and will must exercise over them.

In relation to physical, economic, psychological and social conditions, responsible parenthood is exercised, either by the deliberate and generous decision to raise a numerous family, or by the decision, made for

grave motives and with due respect for the moral law, to avoid for the time being, or even for an indeterminate period, a new birth.

These acts, by which husband and wife are united in chaste intimacy and by means of which human life is transmitted, are, as the council recalled, "noble and worthy" and they do not cease to be lawful if, for causes independent of the will of husband and wife, they are foreseen to be infecund, since they always remain ordained toward expressing and consolidating their union. In fact, as experience bears witness, not every conjugal act is followed by a new life. God has wisely disposed natural laws and rhythms of fecundity which, of themselves, cause a separation in the succession of births. Nonetheless the church, calling men back to the observance of the norms of the natural law, as interpreted by her constant doctrine, teaches that each and every marriage act ("quilibet matrimonii usus,") must remain open to the transmission of life.

In conformity with these landmarks in the human and Christian vision of marriage, we must once again declare that the direct interruption of the generative process already begun, and, above all, directly willed and procured abortion, even if for therapeutic reasons, are to be absolutely excluded as licit means of regulating birth.

Equally to be excluded, as the teaching authority of the church has frequently declared, is direct sterilization, whether perpetual or temporary, whether of the man or of the woman.

Similarly excluded is every action which, either in anticipation of the conjugal act or in its accomplishment, or in the development of its natural consequences, proposes, whether as an end or as a means, to render procreation impossible.

To rulers, who are those principally responsible for the common good, and who can do so much to safeguard moral customs, we say: Do not allow the morality of your peoples to be degraded; do not permit that by legal means practices contrary to the natural and divine law be introduced into that fundamental cell, the family. Quite other is the way in which public authorities can and must contribute to the solution of the demographic problem: namely, the way of a provident policy for the family, of a wise education of peoples in respect of the moral law and the liberty of citizens.

We are well aware of the serious difficulties experienced by public authorities in this regard, especially in the developing countries. To their legitimate preoccupations we devoted our encyclical letter "Populorum Progressio." But, with our predecessor Pope John XXIII, we repeat: No solution to these difficulties is acceptable "which does violence to man's essential dignity" and is based only "on an utterly materialistic conception of

man himself and of his life." The only possible solution to this question is one which envisages the social and economic progress both of individuals and of the whole of human society, and which respects and promotes true human values.

Neither can one, without grave injustice, consider Divine Providence to be responsible for what depends, instead, on a lack of wisdom in government, on an insufficient sense of social justice, on selfish monopolization or again on blameworthy indolence in confronting the efforts and the sacrifices necessary to insure the raising of living standards of a people and of all its sons. Paulus PP. VI.

U THANT

"I do not wish to seem over dramatic, but I can only conclude from the information that is available to me as Secretary-General, that the Members of the United Nations have perhaps ten years left in which to subordinate their ancient quarrels and launch a global partnership to curb the arms race, to improve the human environment, to defuse the population explosion, and to supply the required momentum to development efforts. If such a global partnership is not forged within the next decade, then I very much fear that the problems I have mentioned will have reached such staggering proportions that they will be beyond our capacity to control." U Thant, 1969.

**UNITED NATIONS WORLD
POPULATION CONFERENCE (1974)**

Resolutions and Recommendations

[Quoting:] The World Population Conference, having due regard for human aspirations for a better quality of life and for rapid socioeconomic development, and taking into consideration the interrelationship between population situations and socioeconomic development, decides on the following World Population Plan of Action as a policy instrument within the broader context of the internationally adopted strategies for national and international progress.

**POPULATION GOALS
AND POLICIES**

Recommendations for Action

Population growth: According to the United Nations medium population projections, little change is expected to occur in average rates of population growth either in the developed or in the developing regions by

CONTACT: The Phoenix Project

CONTACT is a unique and inspired newspaper for concerned citizens everywhere, though it particularly focuses on the United States because of this country's special mission in the affairs of the world. That is, "As goes the United States, so goes the world."

CONTACT is a vehicle for Commander Gyeorgos Ceres Hatonn's most recent writings on important current affairs, plus those from other enlightening sources, on matters critical to a responsible and informed public at this time of planetary transition and final days of battle between the Forces of Light and the "Evil Empire" forces of darkness.

CONTACT exists to counteract the manipulating lies and clever half-truths put out (on purpose) by the regular print and broadcast media prostitutes of the Satanic Elite controllers—parasites who are in the process of economically, physically, and spiritually collapsing this once great country (and actually the entire planet) down to a slave-state level of existence under their diabolical control plan called The New World Order.

This newspaper, CONTACT, began life on March 30, 1993, risen, like the mythical bird, with great determination "up from the ashes" of its internationally acclaimed predecessor called THE PHOENIX LIBERATOR.

THE PHOENIX LIBERATOR, in turn, began life in mid-October of 1991, having evolved from an earlier newsletter called the PHOENIX JOURNAL EXPRESS, which itself came into existence as a faster way to get THE TRUTH out to you readers than was possible with the more substantial "book" format of the PHOENIX JOURNALS. Much incredible ground has been covered so far in that mission.

While the PHOENIX LIBERATOR's motto reminded all that "The Truth Will Set You Free", the CONTACT's motto, displayed prominently in the masthead, takes that thought another important step forward and proclaims: "Ye Shall Know The Truth And The Truth Shall Make You Mad!"

The "Phoenix Project" is about those preparations needed—at body, mind and soul levels—to both understand and survive the great healing changes which are beginning to energize this beautiful little planet, now so frazzled and tortured from abuses of all kinds. We look forward, with great expectations, to the CONTACTing with all of you—a coming together that is rapidly taking place as the entire Phoenix Project "ground crew" continues to connect, solidify, and gain strength through becoming informed of THE TRUTH. Indeed, welcome aboard, friends!

—Dr. Edwin M. Young
Editor-In-Chief, CONTACT

1985. According to the United Nations low variant projections, it is estimated that as a result of social and economic development and population policies as reported by countries in the Second United Nations Inquiry on Population and Development, population growth rates in the developing countries as a whole may decline from the present level of 2.4 percent per annum to about 2 percent by 1985; and below 0.7 percent per annum in the developed countries. In this case the world-wide rate of population growth would decline from 2 percent to about 1.7 percent.

Countries which consider that their present or expected rates of population growth hamper their goals of promoting human welfare are invited, if they have not yet done so, to consider adopting population policies, within the framework of socioeconomic development, which are consistent with basic human rights and national goals and values.

Countries which aim at achieving moderate or low population growth should try to achieve it through a low level of birth and death rates. Countries wishing to increase their rate of population growth should, when mortality is high, concentrate efforts on the reduction of mortality, and where appropriate, encourage an increase in fertility and encourage immigration.

Recognizing that *per capita* use of world resources is much higher in the developed than in the developing countries, the developed countries are urged to adopt appropriate policies in population, consumption and investment, bearing in mind the need for fundamental improvement in international equity.

Consistent with the Proclamation of the International Conference on Human Rights, the Declaration of Social Progress and Development, the relevant targets of the Second United Nations Development Decade and the other international instruments on the subject, it is recommended that all countries:

(a) Respect and ensure, regardless of their over-all demographic goals, the right of persons to determine, in a free, informed and responsible manner, the number and spacing of their children;

(b) Encourage appropriate education concerning responsible parenthood and make available to persons who so desire advice and means of achieving it;

(c) Ensure that family planning, medical and related social services aim not only at the prevention of unwanted pregnancies but also at elimination of involuntary sterility and subfecundity in order that all couples may be permitted to achieve their desired number of children, and that child adoption be facilitated;

(d) Seek to ensure the continued possibility of variations in family size when a low fertility level has been established or is a policy objective;

(e) Make use, wherever needed and appropriate, of adequately trained professional and auxiliary health personnel, rural extension, home economics and social workers, and non-governmental channels, to help provide family planning services and to advise users of contraceptives;

(f) Increase their health manpower and health facilities to an effective level, redistribute functions among the different levels of professional and auxiliaries in order to overcome the shortage of qualified personnel and establish an effective system of supervision in their

health and family planning services;

(g) Ensure that information about, and education in, family planning and other matters which affect fertility are based on valid and proven scientific knowledge, and include a full account of any risk that may be involved in the use or non-use of contraceptives.

It is recommended that countries wishing to affect fertility levels give priority to implementing development programs and educational and health strategies which, while contributing to economic growth and higher standards of living, have a decisive impact upon demographic trends, including fertility. International co-operation is called for to give priority to assisting such national efforts in order that these programs and strategies be carried into effect.

While recognizing the diversity of social, cultural, political and economic conditions among countries and regions, it is nevertheless agreed that the following development goals generally have an effect on the socioeconomic context of reproductive decisions that tends to moderate fertility levels:

(a) The reduction of infant and child mortality, particularly by means of improved nutrition, sanitation, maternal and child health care, and maternal education;

(b) The full integration of women into the development process, particularly by means of their greater participation in educational, social, economic and political opportunities, and especially by means of the removal of obstacles to their employment in the non-agricultural sector wherever possible. In this context, national laws and policies, as well as relevant international recommendations, should be reviewed in order to eliminate discrimination in, and remove obstacles to, the education, training, employment and career advancement opportunities for women;

(c) The promotion of social justice, social mobility, and social development particularly by means of a wide participation of the population in development and a more equitable distribution of income, land, social services and amenities;

(d) The promotion of wide educational opportunities for the young of both sexes, and the extension of public forms of preschool education for the rising generation;

(e) The elimination of child labour and child abuse and the establishment of social security and old age benefits;

(f) The establishment of an appropriate lower limit for age at marriage.

The projections of future declines in rates of population growth, and those concerning increased expectation of life, are consistent with declines in the birth rate of the developing countries as a whole from the present level of 38 per thousand to 30 per thousand by 1985; in these projections, birth rates in the developed countries remain in the region of 15 per thousand. To achieve by 1985 these levels of fertility would require substantial national efforts, by those countries concerned, in the field of socioeconomic development and population policies, supported, upon request, by adequate international assistance. Such efforts would also be required to achieve the increase in expectation of life.

In the light of the principles of this Plan of Action,

countries which consider their birth rates detrimental to their national purposes are invited to consider setting quantitative goals and implementing policies that may lead to the attainment of such goals by 1985. Nothing herein should interfere with the sovereignty of any Government to adopt or not to adopt such quantitative goals. [End quoting.]

JIMMY CARTER'S MESSAGE TO CONGRESS

MAY 23, 1977

World Population

[Quoting:] Rapid population growth is a major environmental problem of world dimensions. World population increased from three to four billion in the last 15 years, substantially cancelling out expansion in world food production and economic growth of the same period.

Without controlling the growth of population, the prospects for enough food, shelter, and other basic needs for all the world's people are dim. Where existence is already poor and precarious, efforts to obtain the necessities of life often degrade the environment for generations to come.

It is, of course, up to each nation to determine its own policies, but we are prepared to respond promptly and fully to all requests for assistance in population and health care programs. At my direction, the Department of State and the Agency for International Development stand ready to cooperate through international organizations, through private voluntary organizations, or through direct contacts with other governments. [End quoting.]

CONSIDER THIS

On page 65 of *Population: Opposing Viewpoints*, we read, [quoting:]

According to the United Nations, which follows these things closely, some 5.3 billion people enlivened our planet by 1990. By November 1992, that number will have increased to 5.5 billion, an addition nearly equal to the population of the United States. Or course no one, including the UN, has a reliable crystal ball that reveals precisely how human numbers will change. Still, people have to plan for the future, and so the UN's analysts and computers have been busy figuring what might happen. One possibility they consider is that future world fertility rates will remain what they were in 1990. The consequences of this, with accompanying small declines in death rates, are startling. By 2025, when my now-16-year-old daughter will have finished having whatever children she will have, the world would have 11 billion people, double its number today. Another doubling would take only a bit more than 25 years, as the faster-growing segments of the population become a larger proportion of the total. At my daughter's centennial, in 2076, the human population would have more than doubled again, passing 46 billion. By 2150 there would be 694,213,000,000 of us, a little over 125 times our present population. [End quoting.]

PRINCE PHILIP OF GREAT BRITAIN

On March 30, 1990, *The Washington Post* reported Prince Philip as making the following statement: "We are constantly being reminded of the plight of the poor, the hungry, the homeless and the diseased. What does not make the headlines is that even if the proportion of those unfortunate people remains the same in relation to the total population, their number is bound to increase as the size of the population as a whole increases... The best hope of limiting the increase in the number of such people would be if the world population could be stabilized."
To be continued...

FRANK & ERNEST

Some Food For Thought

From Nikola Tesla

11/23/95 #1 TESLA

THANKSGIVING, 1995

"AND A GOOD MORNING
TO YOU, NIKOLA"

I am reminded of past days when I have come to the keyboard to write and I find some of my eldest friends sitting with me. We have waited patiently for you to join us this morning. My heart swells in loneliness for the days of productivity and what seemed to be mostly joy at simply "being" and experiencing the wonderful uncovering of incredible potentials in everything around us. Eccentric? I have been labeled eccentric because I could see wondrous things of positive nature, for mankind, with possibilities of life in Higher planes within the full consciousness of MAN.

I am asked if I hold bitterness for the thwarting and misuse of that which was gifted to my own senses. No, for you have gleaned wondrous things from my work and I no longer have need of accolades or silly frothings at, and over, mankind's foolishness. My contributions shall, my friends, win the day—it is only you who are so blinded that you cannot see, nor can you feel, the energy coursing through the waves of glorious possibilities. We as MAN are meant to ride the waves of energy as a bird soars upon the currents of the winds. But alas, mankind takes that which is universal and garners it to himself for power and control of the brethren and all that might have life about him. I come in LIGHT, indeed, friend—for I find there is NOTHING save LIGHT which creates the energy of all things manifest in the universe. Certainly you need no wires to contain and direct the rays of GOD. YOU, we, I, thee, me—are the wires of expression, the conduits of motion and electricity which reflect the life-giving rays of LIFE and MOTION. All else is a sham, a shroud, which deceives the mind into disbelief.

I recall well the days of sitting in the sharing of wondrous times and the alone times wherein I could express in the Higher frequencies of that which SEEMED to be another place at some other "time" as expression was most gratifying. I could see then that someday there would come to pass a misuse of the wonders of the universal laws and I hoped that I would not be capable of seeing it come to pass. But alas, how little we remember of LIFE as we romp through our days of experience with such little realization and consciousness.

Resentment came against me as I gave away my brain's data contents to that which you seem to believe was an "enemy". No, YOU are the enemy, people of the Unfree World. You are people of the grandest lie ever conjured by the mind of Man.

That which is intended to control and shackle CANNOT ENDURE! Therefore, that which will seem to shackle you shall, ultimately, in its rightful sequence, give you access to the wonders of universal connections. I knew not my own enemies and the holders of the reins of enslavement.

Will the way be difficult? Of course—but to ask such a question implies that you have grand experiences NOW. You have a few "things" while you didn't notice that your very life essence, your souls, were

being methodically destroyed and imprisoned. It has always been thus that man would deceive man, take from a brother, and egotistically take and reservoir that which he could manage to take or get from another. A lesson well learned, however, is that there is no way to satisfy the greed of mankind and, therefore, one must live always in the sheltering Light of God and the rest shall fall to the wayside as the great dragons come against one another. YOU, however, must build protection against those days lest you be caught in the cross-fire of the Titans. If we convert that which is the stuff of wars, the riches held for ransom—and allow it to become the essence of life-support, we will have gained glory, precious friends. In that way EACH OF US shall find the worthiness of our manifestation. There can be no valid separation of life energy from that of any other. You cannot separate the chemistry of elements of the mineral or plant world from that of the biological human world. You cannot separate cell physiology of anything from that of everything. You make every effort to go forth and separate things into categories beyond which you refuse to integrate—and it simply does not, and will not, work.

Just as a chemist must observe, through reactions or under microscopic view, the interactions of chemicals and elements, so must the biochemist watch the same tiny reactions taking place within LIVING cells.

When it is considered, this technology that can control or enhance freedom within the living beings—the wonder of it all is overwhelming. You must understand that the impact expected is UPON THE LIVING BASIC CELLULAR STRUCTURE OF MANKIND AND ALL LIFE FORMS. However, those who prepare to wage war against the free-will man shall have difficulty for he will unbalance HIMSELF in the willful charging about as a bull in the proverbial china shop.

Cell physiologists are seeking to explain the response of organisms and cells to their environment; the mechanism of cell growth, duplication, and reproduction; the ability of cells to take up nutrients from the environment; and the function and methods of control of an organism's metabolic machine. With the discoveries made thus far, biochemistry, a science that is still in its infancy, has greatly illuminated the functional aspects of organisms as they affect the fields of agriculture, medicine, nutrition, and other older disciplines. But watch and also see that the impacts have become more and more negative against "life" itself. The effectiveness of biochemical knowledge in solving practical problems depends on our mastery of the fundamental principles of the chemistry of life.

Now, to this we add the impact of deliberate bom-

bardment of the cellular structures and thought processes of the mind with pulses of differing length and destructive power and you will have manufactured a robotic society.

I, an electrical engineer, although I realized better, focused on the electrical energy that makes up the entire function of the universal systems instead of considering, adequately, the impact on the very basic cellular structure of that living universe.

Unless the biochemistry of life is integrated within the greater operative system of motion and electricity, there can be no living balance. Therefore, we also have to consider that biochemistry involves more than an unraveling by organic chemists of the structure of the working parts of cells. Biochemists and cell physiologists must make clear the relationship between structure and function in such a way that eventually we will be able to explain in chemical and physical terms many of the puzzling mysteries that still confront you: the nature of a cell's environment and its ability to resist and adapt to changes in that environment; the functional significance of the nucleus, of the mitochondria, with their array of enzymes, and of the microsomes and cell membranes that regulate the transport of materials into and out of the cell; the meaning of nutritional

requirements and the importance of vitamins, inorganic ions, proteins, fats, and carbohydrates in cellular metabolism; and, finally, the ability of cells to utilize the stored or potential energy in chemicals and thus to enable organisms to move, speak, think, and reproduce. In the unraveling of these puzzles lay the secrets of the whole of the uni-

"In the unraveling of these puzzles lay the secrets of the whole of the universe, for a physical reaction is identical in nature to a chemical reaction 'anywhere'."

verse, for a physical reaction is identical in nature to a chemical reaction "anywhere".

You are now learning that your controlling master-tool is a wireless system of networking wireless transmitters. Well, readers, just as you have a system for every function of your body's needs, so too are there systems and conduits for the harnessing of energy of any type or in any form.

In the physical plane you have no way to have that except what the mind can "conceive" and find in manifest form. That, therefore, limits the task to that which IS, for while God within MAN can create—that which is unGodly can only USE what is already manifest. It is often called "discovery" and "invention" but it goes far beyond such a crude concept. Man can also CREATE if he is integrated with the God mind of Creator. How do I know this to be true? I experienced it and so, too, have you. When you have need and act within God's laws, you have provisions through the Messengers and Hosts who are sent with that which you need for creation. You do not need, however, to "create" such as the drias, for the cells of life have been provided for your use and alchemy.

As to the transmissions of harnessed power and pulses of great magnitude—we had that available in your own life cycle. In 1889 I myself had developed systematic research which was carried on for a number of years—with the explicit object of perfecting a method of transmission of electrical energy through the natural medium. This led me to recognize that there are at least three important necessities: First, to develop a transmitter of great power; second, to perfect means for individualizing and isolating the energy transmitted; and, third, to ascertain the laws of propagation of

currents through the Earth and the atmosphere.

As we share, perhaps we can relate electrical energy to the very basic cellular systems of living bodies. You will find that even the implements and chemical compounds are the very same in suitable ratios.

EXPLOSIVE CIRCUMSTANCES

Knowing little, at the time of my experience, about cellular functions, I focused only on the experiments before me—like any idiot of specific intent. During the latter days of our 1800s I tinkered with that which was most powerful. I did rather foolish things, as I ponder it in retrospect. I was in Colorado where the air is rare and quite pure and I found all manners of life senses becoming alert and aware. Sight is far more acute, ears dry out and hearing is better as the senses become more susceptible to sound.

I, however, typical of man, was too impatient to wait upon that which was better, to rush into experiments which fell short of expectations. I have learned much patience as I have waited for the children and colleagues to grow to an extent of better recognition and involvement.

I had carefully planned for a most elaborate presentation of science. I

did not consider it great at the time but rather, quite acceptable to determine in a quite novel manner, experimentally, the electric potential of the globe and studying its periodic and casual fluctuations. It seemed both logical and practical, even at that time of evolution. The intent was to produce a highly sensitive, self-restorative device, controlling a recording instrument which was included in the secondary circuit, while the primary was connected to the ground, and an elevated terminal of adjustable capacity would serve me well.

The variations of potential gave rise to electric *surgings* in the primary; these generated secondary currents, which in turn affected the sensitive device and recorder in proportion to their intensity. The Earth was found to be, literally, alive with electrical vibrations, and soon I was deeply absorbed in this interesting investigation. In that dry and rarefied atmosphere of Colorado, the Sun's rays beat the objects with fierce intensity and natural electric force displays were exceptional.

I, in my exuberance, raised steam, to a dangerous pressure, in barrels filled with concentrated salt solution, which you may well want to think on for a bit. It is the same with the body and your electrolyte medium. I coated elevated terminals with tin-foil and some of them actually shriveled up in the fiery blaze of energy.

I had an experimental high-tension transformer which was most carelessly exposed to the rays of the setting Sun and most of its insulating compound melted out and was rendered useless. This is important for you who work with things which must have solar radiation of high frequency, that the Sun's, or solar, rays are far more intense in late day. I found that some of the cosmic rays are actually more intense when the Sun is not present and cosmic energy has less interference from the Sun's generating plants.

An interesting thing presented to me which might well be considered by such as Charles, Ed, Bob, Norey, Mark and whoever might be attempting to find interim possibilities to get through and into the translation without political allowance for that which is already

perfected: to realize that electricity is electricity, wherever and whatever might be the circumstances. However, if you seek ball energy you are not as apt to find it in the heights of rarefied air such as Colorado but you WILL HAVE incredibly brilliant and powerful lightning bolts which will ground easily.

FOURTH OF JULY FIREWORKS

This is only a point of "time" reference which I enjoy in remembering so will share with you who might be interested. I was usually totally lost in the work I was attempting, and loathed politics, so a political holiday held little interest. It was, however, on the third of July when I obtained the first DECISIVE experimental evidence of a truth of overwhelming importance for the advancement of humanity. A dense

mass of strongly charged clouds gathered in the west and towards the evening a violent storm broke loose which, after spending much of its fury in the mountains, was driven away with great velocity over the plains. Heavy and long persisting arcs formed almost in regular time

intervals. My observations were now greatly facilitated and rendered more accurate by the experiences already gained. I was able to handle my instruments quickly, and I was prepared, instead of being in my usual haste within never-ending preparations in progress. The recording apparatus being properly adjusted, its indications became fainter and fainter with the increasing distance of the storm, until they ceased altogether. I was watching in eager expectation but with a lot of trepidation when, surely enough, in a little while the indications again began, grew stronger and stronger and, after passing through a maximum, gradually decreased and again ceased. Many times, in regularly recurring intervals, the same actions were repeated until the storm which, as evident from simple computations, was moving with nearly constant speed, had retreated to a distance of about three hundred kilometers. Nor did these strange actions stop then, but continued to manifest themselves with undiminished force. Subsequently, similar observations were also made by my assistant. I had opportunity to experience this same force and true nature of the wonderful phenomenon. Friends, I was observing stationary waves.

This is most important in understanding the technology taking place NOW as you are set-up to receive a grid of confusing and confounding pulse waves.

As the source of disturbances moved away, the receiving circuit came successively upon their nodes and loops. Impossible as it seemed, this planet, your wonderfully perfect planet, despite its seemingly vast extent, behaves like a conductor of limited dimensions.

The tremendous significance of this fact in the transmission of energy by this system became quite clear to me. Not only was it practicable to send telegraphic messages to any distance without wires, as I recognized long ago, but also to impress upon the entire globe the faint modulations of the human voice, far more still, to transmit power, in unlimited amounts, to any terrestrial distance and almost without any loss.

As you will learn in your tinkering, you had best be ready for "bigger is not necessarily better". I had to

change my instant intent of a "bigger transmitter" to a "better" one. This is a circuit of very high self-induction and small resistance which, in its arrangement, mode of excitation, and action, may be said to be the diametrical opposite of a transmitting circuit typical of telegraphy by Hertzian or electromagnetic radiations. It is difficult to form an adequate idea of the marvelous power of this unique appliance, by the aid of which the globe will be transformed. The electromagnetic radiations being reduced to an insignificant quantity, and proper conditions of resonance maintained, the circuit acts like an immense pendulum, storing indefinitely the energy of the primary exciting impulses, and impressing upon the Earth and its conducting atmosphere uniform harmonic oscillations of intensities which, as actual tests have shown, may be pushed so far as to surpass those attained in the natural displays of static electricity.

Simultaneously with these endeavors, the means of individualization and isolation gradually improved. I attached great importance to this, for it was found that simple tuning was not sufficient to meet the vigorous practical requirements. The fundamental idea of employing a number of distinctive elements, co-operatively associated, for the purpose of isolating energy transmitted, I trace directly to my perusal of Spencer's clear and suggestive exposition of the human nerve mechanism. It would be wise for each of you experimenters and thinkers to study Spencer's work. The influence of this principle on the transmission of intelligence, and electrical energy in general, cannot as yet be estimated, for the art is now captured and kept from the use of the ordinary peopled society. At that time of experience it was still embryonic in development. Look what you have now at your fingertips for use—and yet you don't personally KNOW or SEE the workings.

With this in mind and realizing the lack of sharing of information to the masses, realize that any desired degree of individualization may be secured by the use of a great number of co-operative elements and arbitrary variations of their distinctive features and order of succession. For obvious reasons, the principle will also be valuable in the extension of the distance of transmission.

Dear ones, before the end of 1899 I had completed the task undertaken and reached the results which I now know to be factual. In this past century your technologies have become immense and, yet, you have no concept or realization of same on an individual scale of recognition. You want "things" which utilize these

Nikola Tesla in 1885, aged 29.

technologies but the "thought" is reserved for the VERY FEW, while relationships of function with all living structure (which is everything) is buried in the history archives under "national security" or "top secret" classification to enable the New World Order to glean all rewards and hold and maintain CONTROL over the population of your globe.

I have no wish to bore you with my life escapades but I must offer that which I can in proper sequence and allowance for understanding—WITHOUT—jeopardizing the well-being of my friend and willing scribe. Dharma is, as you might suspect of one who has been deathed by lightning, unwilling to tinker much with the circuits but is, like most, quite agreeable to using the harnessed power and energy which allows operation of advanced equipment which utilizes, as with the brain computer, simple silica, transferring circuits, and simple elemental connections. When you understand one—you can easily understand the other. Remember, Gaia means: living or living planet. Well, this is why we refer to the gifts of "life" as Gaia "this" or Gaia "that" as we bring forth the tools to allow you processing and extension of valid life-form.

My work was taken from my control long, long before I departed your dimensional restrictions but it is interesting in that "thought", that which manifests us in the first place, is not lost to the translation but only intensified by the transmutation experience. However, in the translation and transition, the use of hands and feet are restricted as extensions to the thought wishing to express.

It is also recognized in these latter days of extreme effort to break the bonds of incarceration as an enslaved species, it is uppermost in our sharing experiences to protect the hands willing to work on our behalf while the brain and mind of the typist is restricted to ignorance. Everything must be cryptic, and it annoys at best, infuriates at worst. Being old friends and colleagues I note that Dharma often has "had enough" of me while she is quite willing to act on the instructions of our elder brethren.

I was asked to participate this morning because you

are going to once again turn to the subject of which I am, at the least, informed. It is mandatory that as you read the information you extend the mind into the streams of conscious connections lest you be lost to the seeming disappointing apparatus used against your very freedom. THE POINT IS: YOU DON'T KNOW. FOR GOD'S PEOPLE THIS WILL BE AN EXPERIENCE OF GREAT INTEREST AND JOY AS YOU BEGIN TO BE ABLE TO SEE BEYOND THE MOMENT AND REALIZE THE PEELING AWAY OF THE ENSLAVING PULSES, LAYER BY LAYER, INTO THE KNOWING. You must first REALIZE the negative intent—before you can enjoy the wondrous adventure ahead. GOD does not send you forth to perish in the lightning bolt—but to harness the wondrous energy of the universe for betterment and progression of a splendid and wondrous society of living beings, a species of perfected HUMAN. If technology is abounding which can destroy—then it is also as available for the creating. You simply need to have an attitude adjustment and place no limitations on thought. We cannot pour information and instructions into a CLOSED MIND any more than we can have electricity from a closed circuit. Dharma doesn't need to KNOW. You who tinker and have studied the basics, MUST attend selves that you limit not the possibilities. "Can't" is a word you MUST CAST ASIDE—for you will find the answers in that which you perceive "can't" be so. Before you begin with any tinkering—suggest to self the opposite of what you are "taught" to think—for it is the time of reversing the whole of the universal patterns of perception into the accepting knowledge of the fact that if the mind can conceive a thing—GOD HAS PROVIDED A WAY. Also remember that wars are distractors and money raisers. However, they present unlimited advantage for the unfolding of replacement things due to "need" and inability to have that which the controllers refuse to allow. "Need" truly may be THE most powerful motivation, for once you know a thing exists, the drive to have it also is indeed strong for mankind is geared to always wish to achieve beyond that which IS. Thoughts originate in other expression,

for surely it is not a tangible physical thing. So, you are only limited by the limitations placed upon mind—BY OTHERS.

Hold these thoughts in upper-mind so that the messages are not missed as they are borne upon the ether of living space and cosmic energy. ALL is available from the very substance of the universe—all you have to do is accept the gift and create the realization.

I thank you for a moment of sharing as in old days of friendly discourse as we enter a Winter season of unknown expectations. Remember that the rare elements of Winter atmosphere are the greatest and most creative time as the seeds lie dormant in both the soil, the womb of life, and the gift of readiness for the rebirth which flows through all in the Spring. Prepare? Yes. However, do not give ALL to preparing and nothing to production. Preparation is for the sole purpose of allowing attending of other things without the clutter of worry over impending disaster. Always beyond the moment IS THE TRUTH.

My old heart is gratified for a moment in sharing for there is no ending, friends, only beginnings into greater and more wondrous expressing. We must grow as if one, for surely we are but "one" and the more quickly we learn that truth—the better shall be our journey. You must always remember that everything KNOWN is yet known and shall be returned unto your mind as desire presents itself. Focus on the GOAL and not upon the SELF and the information will flow as an unrestricted river—in its rightful channel. You do not need to gird the rivers for you have that which you need directly and freely flowing from the cosmic reaches of your own solar system and beyond, into infinity. And, therefore, may we each make worthy our journey through the infinite universe.

I bid you good morning and humbly thank you for hearing me as you move more deeply into GWENs and HAARPs and yes, singing Angels who watch over your beings. The ANGELS ARE AS REAL as is your breath which allows life to be. May you look after yours!

Nikola to take leave in gratitude for the moment and appreciation for the service.

New Gaia Products Offer Help

GaiaCol

GaiaCol is a combination of Colloidal Silver, Trace Colloidal Gold and Trace Crystalline Drias. This combination of ingredients has produced a product that is so high frequency and potent that it could quite possibly be the solution to our ongoing fight against the new antibiotic-resistant diseases that we face today. Colloidal Silver was used extensively and very successfully against bacteria, virus, fungi and the like before the advent of the first antibiotic, penicillin. The uses of Colloidal Gold were also significantly used in the restoration of health as early as 1885 and was noted for its ability to calm and harmonize the emotional body. Once the chemical companies began manufacturing the myriad of antibiotics, silver and gold were no longer looked to for treatment. The antibiotics they were producing, however, produced no effect on the more resistant viruses, fungi and parasites. Now we face a new generation of bacteria that are completely resistant to any antibiotics merely due to antibiotic over-prescribing and resultant survival of the fittest bacteria.

Research has demonstrated that Colloidal Silver is nontoxic to humans and allows no presently known disease-causing organism to live in its proximity. With the addition of Trace Colloidal Gold and Trace Crystalline Drias, the frequency of GaiaCol is remarkably enhanced to allow these newer, more powerful viruses and bacteria to be eliminated. GaiaCol is gentle enough to use topically on just about

any skin, hair or mouth condition without fear of toxicity and is outstanding for burns.

For internal use during any type of infectious process, start with one teaspoon the first day and then 10-12 drops, 3-4 times per day under the tongue until the infection clears. Then maintain with 3-4 drops, 3-4 times per day under the tongue. Important: Due to the powerful nature of this product, friendly bacteria can be affected so it is advisable to replace the natural intestinal flora with some type of acidophilus/lactobacillus supplement daily or at least when symptoms are noted such as cramps, bloating, diarrhea/constipation and a general feeling of malaise.

GaiaCol is said to be safe for children and pets and can be taken with other medications without incident. This product is not addictive and does not build up a tolerance to it in the body. 2 oz. \$10.00

GaiaGold

GaiaGold is a solution of 100% Colloidal Gold which is one of the oldest used substances for medicinal purposes and has no equal in affecting the physical body positively. Around 1885, colloidal gold was commonly used in the United States as the basis for the cure of alcoholism with additional uses including treatment of Arthritis, skin ulcers, burns and certain nerve damages. Colloidal gold does not have the same Germicidal/Antibiotic action of Colloidal Silver when topi-

cally applied, but it does have tremendous effect if taken internally for such as Syphilis and other diseases.

Colloidal Gold has been noted for its tremendous ability to balance and harmonize the emotional body, particularly in regards to unstable mental and emotional states such as "depression", "autism", "Alzheimer's", etc. Gold has further been found to aid in the healing of heart muscle and is highly beneficial in rejuvenating sluggish organs—especially the brain—as gold is the best electrical conductor yet recognized for nerve action. Another use for Gold is in cases of glandular and nervous incoordination because Colloidal Gold is said to rejuvenate the glands and stimulate the nerves which releases the pressure and allows the signals for function to reach through to the various organs and glands.

GaiaGold intake can benefit self-control in diet and quit-smoking programs because it helps to balance the brain's craving or need for such overindulgence or addiction. Taken in conjunction with GaiaCol, overall renewed vitality and longevity may be achieved. 2 oz. \$20.00

From Ronn Jackson: B.S. On Pulse Waves

11/25/95 #1 HATONN

B.S. ON PULSE WAVES?

I guess I shouldn't say that games are going on which displease me for usually any game going on is pretty much a useable item for my purposes. However, *CONTACT* readers, please use your God-given senses about your actions and your thoughts. I have some amusing, if they were not so serious, tales of ones being contacted by Mr. Jackson for raising funds. Our readers have been hurt badly enough by the shysters who have come along already to be subject to MORE of the same. Two things strike me as strange: No. 1: That there are not ample funds for all sorts of things if the man has told you a breath of truth, and No. 2: when asked about these pulse beams and waves he told the party(ies) on the other end of the line that "this is all hogwash and bullshit." We have to assume in this instance that he misunderstood the question OR he has used foul language to the extent that he doesn't know one end of himself from the other. It appears very strange to me that the only contacts this man seems to have are OUR READERS. Where are all those VIPs of which he has such control?

I especially dislike the calls to ladies who have supported him with communications and care for so long. It is not gentlemanly, in any way, for he may well have not had active and legal bindings prior to November—but I believe you will find that he DOES NOW! I had an agreement with higher quarters than him which included him and we also have his public promises and commitments—but we have seen nothing (save the constant flow of complaints for no return on investments and loans to him, from our readers). Do that which you will, readers, but please do not assume that I support such antics—we have had our own kettle of bad fish right under our noses. I believe you will find, as we undoubtedly have, that he has no Committee of 16 (or even one). Elsewise I cannot believe that Mr. Christopher (A-5, I believe) would sell you out to disaster in Bosnia.

By the way, now that you see the other politicians supporting Clinton in this move rather than struggling with Congress to shut down the "send the boys over there", you are witnessing the hidden agendas fold in their faces. **MR. CLINTON DOESN'T HAVE TO ASK CONGRESS FOR A DAMNED THING—HE ALREADY HAS A STATE OF EMERGENCY FOR NATIONAL INTERESTS IN BOSNIA. HE CAN SEND ALL THE TROOPS HE WISHES TO "OVER THERE ANYWHERE" WITHOUT BATTING HIS CUTE LITTLE EYELASHES.**

Well, I certainly am not at war with one Ronn Jackson who is doing God-only-knows-what, for all the work being presented is coming from others and not himself. I hope he is about getting his own contracts filled. Here, we are all out of ability to longer do much of any helping, thanks to such as Jackson, even for ourselves. Neither, however, will we be intimidated by his threats when people speak the truth. A man who becomes as public as to have a touted 33 million "followers" has given up his right to a personal life without peverage. You simply can't have it BOTH ways. If you are going to pretend to live for Creator—it

behooves one to act like it from time to time.

IF A MAN MAKES A PROMISE TO ME AND CLAIMS HIS WORD IS HIS LIVING BOND—I ACCEPT THAT AS SUFFICIENT. IT DOES NOT REQUIRE THREATS TO LATER SHUT ME UP! I HAVE BEEN INVITED OUT OF "THEIR BUSINESS"? FINE, BUT STOP COMING TO MY FRIENDS TO CONTINUE YOUR "WHATEVER YOU ARE DOING" THING. I EXPECT THE CONTRACTS TO BE MET, THE AGREEMENTS KEPT, AND I FIND MYSELF GETTING A BIT MORE THAN SIMPLY ANNOYED. LIE TO GOD'S TEAM AND YOU HAVE ERRED! YOU HAVE INVITED ME OUT OF YOUR GARDEN? FINE, I DON'T LIKE GARDENS WITH THE STENCH OF FISHY TALES. AND, WHEN YOU HAVE THREATENED THE LEAST OF MINE OR THE HIGHEST OF MINE—YOU HAVE THREATENED ME. NOT A SINGLE ONE OF YOU, INCLUDING THE CLOSEST, HAS SEEN OR MET A BEING OR A PLAN AS PRESENTED, NOT EVEN THE ELUSIVE ATTORNEYS CLAIMED.

YES, MR. JACKSON DOES HAVE SOME CONTACTS WHO CAN DANCE CIRCLES AROUND THE CLEVEREST COMPUTER GIANTS AND DOES HAVE ACCESS TO INFORMATION WHICH OTHERS DON'T. I AM NOT EVEN INTERESTED ON THE DOMESTIC CLAIMS—I KNOW WHERE THE BODIES ARE BURIED AND THE SHECKELS HELD. I CAN ONLY WARN MR. JACKSON THAT HIS "HIGHER-LEVEL" BUDDIES ARE GETTING FAR MORE ANNOYED WITH HIM THAN AM I FOR I HAVE "TIME" AND THEY DON'T!! THEY CLAIM

TO HAVE NEVER HEARD OF MR. JACKSON UNTIL OUR NEGOTIATIONS STARTED—AND I SUSPECT THEY SPEAK TRUTH—BUT THEY DO NOW AND SUCH AS MR. CHRISTOPHER IS PEDDLING ABOUT AS FAST AS HE CAN.

Now, please, back to the operations of the pulse grid. It IS as important as anything on your globe could possibly be this day. Any "authority" who will tell you otherwise is mixing his smoke with his fumes. The adversary is ready to shake, rattle and roll your planet—literally! The assumption and desire seems to be that "if we must live in hell we will bring all we can with us." I would also warn people in New Mexico and Arizona and a few places in Utah—that areas around the major Indian centers have been contaminated with "mystery" microbes which will be found in your rodent populations. Especially do "they" (nasty little traitors) want to "get" a few aliens. Well, the "aliens" you had better consider dangerous are the ones in your face—not from the Cosmos.

I can't alter what you will do on individual bases; some like to pretend things don't exist—because they don't have information or respect for input—and others just want to do it "their way" and to hell with everybody else. We experience that on any given day and especially on THIS weekend when open neglect is upon Dharma and Oberli. Some dare the angels and/or the devil and bring the very focus into the target zone. Well, I can't help it if people wish to disallow my suggestions or warnings. But then, don't expect me to pick up the pieces later. It certainly seems that families cannot believe one another could possibly be doing anything of importance and, much the less, dangerous. Do I become irritated at these games? YES. If you care no more for input than to "do it your way", then stand aside for I will see to the integrity and security of my mission. I suggest you take some of the writings, such as this one, to these people and suggest they get informed—THEIR CHILDREN ARE NOT SAFE! Some would even come here and then move right on into the viper's pit of Las Vegas. The system has already been turned on this morning and we will be lucky to get through this writing without interruptions. You see, when the system is on, there is not even need for the choppers or fighters for surveillance—NOR TO CARRY THE PULSE GUNS. TO EACH HIS OWN!!

CONSTITUTIONAL GOVERNMENT COUNCIL TELE-CONFERENCES

FREE TO ALL UNTIL DEC 15TH

Dial 610-582-7400 ext 1119-401

9:05 MONS 10:05 PM EASTERN WED-FRIDAYS

RECENT CONFERENCES:

**REP CHARLES KEY ON OKLA BOMB
REV PATRICK MOONEYHAND'S ROAD TO JAIL
DR. PAUL DAVIS—FIRST PASTOR JAILED 1984-89
JOHANNAS EICKE FROM TX JAIL AND ATT PAUL YOUNG
SUSAN MOKDAD AND RAY BABB UNIFY COURTS
SHERMAN SKOLNICK EXPOSES SIMPSON MURDERERS**

[Latest on Okla Bomb—because it was sub-nuclear, many are sick and the bomb squad dog has died, second one ill. Rep Key has filed Petition to hold a County Grand Jury!]

If you missed the above tele-conferences, don't miss the next FREE one.

Call 417-673-1905 for details about CGC after Dec 15th.

Dr. John Coleman:

ELF Radiation And Groundwaves

11/24/95 #1 HATONN

FOR THOSE WHO DARE,
THANK YOU

On this day following Thanksgiving feasting let us turn directly to our topic at hand. I repeat that the information I will utilize is from John Coleman. There are a lot of other good-to-excellent resources but I appreciate the generous sharing of John, as he dares to present that which brings a lot of headache to himself and those he loves. It is truly a lonely world for the daring ones who bring truth through the shoddy cover-up(s).

I highly recommend the work of this person, especially the work regarding the Committee of 300. As to the validity of other groups you will hear about—some are suspect, some are total fiction and thus and so. The Club of Rome and the Committee of 300 are REAL AND WILL EAT YOUR LUNCH. IN FACT THEY HAVE ALREADY EATEN YOUR LUNCH AND ARE NOW ABOUT TO FINISH OFF "YOU". Of course there IS help because they will also finish-off each other in the process as the lesser ones rise up to smite the higher entities.

[QUOTING, PART 1: From W.I.R., 2533 N. Carson St., Ste. J-118, Carson City, NV 89706, 800 942-0821.]

ELF RADIATION AND GROUNDWAVES IN THE 1990s

by Dr. John Coleman, 1994

Extremely low frequency (ELF) radio waves, which are less than 200,000 cycles per second, are known to vitaly affect human beings in that they readily resonate with brainwave rhythms in a more effective way than the higher frequencies. The type of ELF experimentation that went on in the 1930s has been considerably updated and, in most instances, the research was conducted in military establishments in the former USSR, Britain and the United States. ELF weapons were developed in tandem with electromagnetic pulse anti-personnel weapons (EP) in the 1950s only by the then Soviet Union.

These experiments went on throughout the war years and right up to the 1960s. The first indications that "new" weapons utilizing ELF energy came with the downing of the Gary Powers U2 spy plane. Since then there have been many awesome displays of the power of ELF energy, including the massive underwater shot off the northeastern coast of Puerto Rico, the downing of "Challenger" and the shooting down of the Arrow DC8 at Gander Airport, Newfoundland that killed all on board that flight.

Today, there is little doubt that ELF weapons play a major role in strategic planning of future wars, and that is an ongoing process. But what effect does this have on civilians who get in the way of such waves?

Even ordinary electricity power grids are now being recognized as a major health hazard, as we shall see. In many instances, the electrical wiring in our homes has been done in such a way that it becomes a receiver, to the detriment of our health and well being, and we shall return to this.

Then there is the constant testing of new ELF devices, not to mention the weather control grids that crisscross the skies over the United States. In addition to these hazards, there are the highly active "groundwaves" or electromagnetic signals that are used as navigational beacons for our nuclear submarines, without which they would not be able to launch their nuclear missiles. "Trident" nuclear missiles could not be operational over its enormous range of 6,000 miles without global navigation chains of "groundwaves".

The Groundwave Emergency Network (GWEN) was designed for the purpose of nuclear submarine navigation. At intervals of 250 miles, GWEN transmitters pulse out their radio groundwaves across the United States. In 1973, the former USSR Army newspaper, *Krasnaya Zvezda*, complained about construction of the American system of long-range navigation for nuclear submarines.

What happens when these powerful transmitters send their signals pulsing through giant coils of copper wire buried in the soil? What is the impact on people and animals who might enter this intense electromagnetic field? In this monograph, I will try to provide some of the answers to these and other questions that are troubling so many people and, perhaps, dispel some of the mistaken ideas about radio waves. There is much disinformation doing the rounds in the United States at present, and in this work I hope to separate fact from fiction. [H: I ask that you readers call Dr. Coleman's number 1-800-942-0821 and get whatever listings of his work which might be available. He has done some superb monographs as well as books and journals. His qualifications go all the way back to personal interaction with MI-6 of British Intelligence. Is he totally informed and every tid-bit of information he bears, true? I doubt it because each of us is limited by the truth we can find available even through digging in the underground. If nothing more is present, however, than the research on these "systems", it is worthy of great respect and appreciation.]

ELF research falls into two broad categories: Weapons Systems (which includes weather modification) and biological systems. The two are intertwined and the key to research into new weapons is the effect that ELF radiation will have on the human body. Although it has not been allowed to develop in the West, particularly in the United States, ELF waves can CURE diseases as well as kill people. It is all a matter of degree and application.

There is a distinct link between electromagnetic pulse weapons and the better-known laser beam weapons. Both have undergone extraordinary fine tuning and both the United States and Russia have defense systems against ELF and laser beam weapons. For

many years the former Soviet Union was the undisputed leader in this field but over the past ten years the United States has been hurrying to catch up.

ELF weapons have many common features with laser beam weapons. Electromagnetic pulse weapons, when used against enemy personnel, use electromagnetic propagation of 186,000 miles per second, using compact power sources such as generators, magnetrons and gyrotrons. Let it be said at once that when the human body is exposed to coherent short pulses in millions and even billions of watts in less than a billionth of a second, the effect is far more devastating and instantly lethal than any nuclear missile strike, with the added plus of negligible collateral damage to property.

Is this new? Not really, because it was known back in 1975 that the Russian scientists M.S. Rabinovich and A.A. Rukhadze, of the Lebedev Physics Institute in Moscow, developed microwave pulses of electromagnetic radiation 35 billionths of a second long, known as nanoseconds, with a radio frequency of 10 billion cycles per second (gigahertz) with a pulse peak power of 2 million megawatts. Rabinovich and Rukhadze used a "cyclotron resonance maser". A.N. Didenko, of the Nuclear Physics Institute at Tomsk, and the Institute of Applied Physics at Gorky, using a cyclotron resonance maser known as a "gyrotron, generated 3 gigahertz 50-nanosecond microwave pulses" with a peak power of 2000 megawatts.

In 1978 the Lebedev Institute developed a plasma-filled gyrotron operating on microwave pulses of electromagnetic energy radiation 35 billionths of a second with a radio frequency of 125 billion cycles per second. The Russians developed radio and microwave generators combined with plasma which vastly increased the power and the density of electromagnetic generators. The use of plasma magnetic filled intensifiers was accidentally discovered by Russian scientists running the test program aimed at the United States embassy in Moscow. Copper wires used in the generators became ionized. From this lucky accident, the Russian scientists developed high-frequency plasma microwave generators, which became known as GYROTRONS.

The highest peak power achieved by the United States in experiments at the Massachusetts Institute of Technology was 1/15th of the power achieved by the Russians. Since then, the United States has closed the gap, and it may be from some of the experiments carried out by various institutes of MIT that so much of the reported "electromagnetic" activity being reported by the public has come.

The ELF devices used by the United States are reportedly less adaptable to weapons applications, and up until as late as 1988 it was believed that only the Russians had fully developed portable high-peak-power, short-pulse gyrotrons suitable for battlefield conditions, as well as long-distance applications.

In May of 1986 the Rand Corporation reported on the advanced development of gyrotrons. I obtained a copy of their "Report R-3377: Soviet Development of Gyrotrons" by Simon Kassell. In addition I was able to secure several Russian publications which were translated for me. From them I learned that Russian investment in this type of research increased by some 600 percent between the years 1960 to 1980. It soon became clear that development of high peak power gyrotrons was an important national objective of the military/industrial complex of the then Soviet Union, in keeping with the stated objectives of Marshal Orgakov of the Soviet Armed Forces.

Not that we, in the West, had no inkling of what was going on. The United States sent its U2 reconnaissance planes over Russia in an attempt to spy on the many institutes engaged in electromagnetic high power microwave generation. One of these planes, flown by Gary Powers, was shot down by an ELF device in May of 1960, which stunned the military establishment of the United States. We were lied to, being told that the U2 was downed by a surface-to-air missile. This was

soon discounted when it became known that Powers was hit at an altitude of 90,000 feet, well beyond the reach of any SAM missile in operation at that time.

Moreover, Powers told his Russian interrogators that his plane "seemed to bump into something, there was a tremendous orange-colored flash, which did not go away, but seemed to hang around" [the doomed U2]. President Eisenhower tried to excuse the spy mission by calling it a "weather plane". An insulted Khrushchev went into a towering rage and immediately ordered a demonstration of Russia's prowess in ELF transmissions interferometer weapons.

On April 10, 1963, from Sarysagen, a giant ELF transmitter unleashed a blast of energy in a bolt that totally disabled the controls of the "USS Thresher", an atomic submarine. With its electrical controls smashed by the blast, and unable to steer, the submarine sank to the ocean floor and was crushed like a sardine can by the tremendous pressure of the water above it. All hands on board died.

The very next day (April 11, 1960), still not satisfied that the United States had understood his message about Soviet weapons capabilities, Khrushchev ordered another huge blast into the ocean depths off the northeast corner of Puerto Rico. The ELF generator sent a blast of EM energy into the water, raising a giant mushroom cloud to the height of more than a half a mile. The explosion was observed by the FBI, the U.S. Coast Guard, the crews of several jet airliners flying in the vicinity, as well as the masters of a number of ships in the area.

Later, there were the well-documented attacks on the "Challenger" and the Arrow DC8 by Over The Horizon (OTH) electromagnetic holographic-type shots, both unmitigated disasters for the United States. Over a two-year period (1985-86), the Russians, using their internalized electromagnetic energy transmitters, spread the Woodpecker grid across the North American continent. Using "Woodpecker" weapons systems, they declared war on military and civilian aircraft and rockets.

The Russians were satisfied that they had demonstrated their electromagnetic weapons prowess and did nothing really drastic after that, except to warn the United States that they had weapons we hadn't even dreamed about in their arsenal.

The late Russian Chief of Staff, General Sergei Akhromeyer, was indeed right when he warned us: "If the United States deploys a shield in space, the Soviet Union will very quickly find a response of which the United States has no inkling." It seems likely that Akhromeyer was thinking of the Azramas-16 disc electromagnetic generator, which can generate bursts of electromagnetic energy far beyond the most vivid imagination of any science fiction writer.

Scientists at Los Alamos admitted that they had nothing that would even remotely compare with the "megajoules" disc electromagnetic generator, which uses high explosives to compress and intensify a magnetic field. Akhromeyer is gone, but the Russian ELF weapons remain in place and are a continued source of danger to the people of Western Europe, and more especially, to the United States.

The Cold war is far from over. The appearance of Russian troops in Bosnia-Herzegovina, albeit under U.N. command, highlights the fact that the "new" Russia is once again at the center of West European affairs. "The story of the NATO ultimatum is a small step toward peace, but a giant step toward Russia's return to the game of the ordering of Europe." These wise words came from Josef Janning of the Research Group on European Affairs at the University of Mainz, Germany.

The Russian military high command will be tempted to use its "silent killer" weapons over a global range during the next confrontation with the West, one which is presently in the making and which could come swiftly when Yeltsin is ousted. I believe it is only a matter of a short space of time before this happens. In

this type of tense, hostile atmosphere, the megajoule disc electromagnetic generator, with its capacity of a thermonuclear explosion, would play a key role.

In 1984, probably spurred on by Russian threats, the Lawrence Livermore National Laboratories began an urgent program with the purpose of developing high-peak power nanosecond pulses of microwaves. There is no way of knowing for sure, but according to some sources of mine, it was the type of activity entered into at Livermore National Laboratories that set off a whole slew of reports about ELF activity. All across the country, people began calling their radio stations and writing to their local newspapers, complaining of strange high-pitched humming noises, of feeling unwell during these manifestations. The reports differed widely in content, but all seemed to agree on one thing: some type of highly unusual electromagnetic radiation was going on.

At Los Alamos, spurred on by the revelation about the "megajoule" generator, plans were made to produce a similar device, which bore the name "Procyon" and is said to be similar in design to the Russian model. In September of 1993, Russian scientists at Azramas-16 tested the device which produced 6 million amps and set up a strong magnetic field. When used in conjunction with explosives, a huge current of 200 million amps was generated. The effect of this on human targets, military installations, radar sites, radio and telephone communications can be described as totally devastating.

The Russians developed radio frequency high peak power systems for strategic defense weapons through the work of Leonid Rudakov which led to very efficient and mobile Radio Frequency (RF) weapons that could produce from 3 to 125 gigahertz, and they had these weapons operational in 1978. West German military intelligence reported in 1980 that one of the Russian scientists working on the program by the name of E.P. Velikhov, Vice President of the Soviet Academy of Scientists, had developed a portable device mounted on the back of a truck that was capable of doing a lot of damage.

Electromagnetic Pulse technology (EP) anti-personnel weapons generate and send forth electromagnetic radiation. The Russians also developed solid state radar which they used in their hand-held weapons, usually the shape and size of a fairly small briefcase, such as one might see any businessman carrying at one of our busy airports. Radio frequency anti-personnel weapons use electromagnetic pulses to daze and disorient by scrambling brainwaves, paralyze or kill the "enemy". Successful kidnaping of key personnel has been carried out in the past by KGB agents using hand-held "briefcase" weapons, and I know that this happened in the case of Captain Hughes, and may have occurred in the case of three scientists working on a key Marconi underwater cable project, who vanished without trace.

Where assassination is the objective, the "target" can be "switched off" by destroying vital organs. This is accomplished by the non-linear effects of electromagnetic radiation, "traveling" (to use a term that is easily understood) at 186,441 miles PER SECOND, or the speed of light. Because it is concentrated, the effect is devastating. Another thing worth noting is that such attacks can be fine-tuned to suit a particular "target".

The Russians have great experience with military radar systems, especially the phased-array radars at Pechora and Krasnoyarsk, huge structures that compare in size with the Capitol building in Washington. Such mammoth "Over the Horizon (OTH) radars can send out devastating punches in single bursts of electromagnetic energy that could knock out the entire power grid of the Eastern seaboard of the United States, along with radar, telephone and radio communications. The colossal "Angara V" electron beam pulse generator has such capabilities as does the phased array radar at Krasnoyarsk, which could be used for this type of action.

Indications are that "test shots" might have been

fired at the United States in the past, which might help to explain the massive power and radar failure that occurred all along the East coast from the Canadian border down to New York, Arizona and New Mexico in 1986. The United States said the problem was a shortage of air traffic controllers.

But air traffic controllers had nothing to do with the Federal Aviation Administration's two major radar control centers at Phoenix, Arizona, and Albuquerque, New Mexico. In early June of 1986, a mysterious occurrence knocked out the two widely-separated radar systems. The government said the breakdown was due to "power failures". This is not possible, because both facilities have their own independent generators on hand for just such an emergency. We are supposed to believe that the generators also failed, but no explanation was ever forthcoming.

During the near-total blackout of radar communications, high-altitude flights controlled by the Arizona and New Mexico radar stations were thrown into chaos, because the stations were out of commission for two days, an inordinately long time to fix a "power failure". What really happened may never be officially confirmed, but my sources told me that the Russians kept up their ELF radiation bombardment for 48 hours and it was not until their transmitter at Dushnabe, on the border of Russia and Afghanistan, was shut off that the "power failure" at the two key radar stations could be corrected.

[END QUOTING OF PART 1]

The next thing in order is a summary of weapons of Soviet development so it appears a good place to break the writing. We have been at this keyboard since before daybreak to attend other matters and I note fatigue. I appreciate your hanging in here with me, Dharma, while we sort some of the life-stream things that happen while we plan to do these other topical writings.

You are surely people under siege and I simply don't know how to reach through to you. I can tell by some of the letters I receive from ones who should know the answers they seek that there is no real concept of the problems facing you. I am required to answer the petitions for apparently no one else is understood but, readers, it is going to have to get less and less that I personally respond in separate correspondence for it is simply too time-consuming and other things have to "go begging". We cannot afford to allow this type of TIMELY information to go begging because it truly means your LIFE or your DEATH as these pulse systems are tested and then turned on full-time.

Also, I ask apologies that Dharma is unable to respond to the numerous wonderful cards and letters of support, in a timely manner. I have her bogged and the hands and arms are again "giving out" on us from time to time—as the computers are more and more under assault.

We get letters and some of them are right on target but, alas, we don't quite know what to do about the circumstances. We have heard from an old friend who objects to our allowing people of less than good intent to have any measure of our fundings. I would ask her, and any one: how do you know who will turn away and attend their own personal circumstances? When you have the answer for THAT ONE, please let us know what it is because we have such a load that when one takes and is within the circle of activities—it is hard to get the other people to see and recognize the damage.

This latter portion, of course, deals with the Ence/Enz painful happenings and connections. You may as well know that it is worse than originally seen. Ence/Enz got the funds for the tractor equipment from one of you readers under the disguise of being responsible as a member of the Board of Directors of the Phoenix Institute (exactly as did Green). He was, in fact, unlike Green, President of the Board. The equipment is now out of order, secreted off the farm and stashed while other farm equipment is also with it—or stored in

locked storage "somewhere".

In addition, Sandy's mother, Mrs. Rhoads, has spoken with this person personally to ask her not to send any funds to the Institute or to provide any further help to these "evil" people here. This is on top of the vicious letter "To Whom it May Concern" from Mr. Rhoads which stated: "Due to the vicious lies, manipulation and transgressions by Doris and E.J. Ekker and also spy Charles Neil, to have the Rod Ence family Evicted from the Ranch, please remove my name..... as I can no longer support an operation under such evil leadership as Doris and E.J. Ekker."

Then came an even more deliberately hurtful bomb from a "sister" of Sandy. I find it unacceptable. It is ONLY through the responsible actions of these very people here that the con-game is STOPPED. This is painful, hard, miserably uncomfortable and EXPENSIVE. Now these "offended" (I suppose because they got caught) parties AGAIN threaten to go to Jason Brent and George Green to "getcha"! I suggest some careful thought go into that before you act so foolishly. Grand theft and diversion of funds become a corporate felony offense and go beyond selling off some birds. Not only were the funds used by Mr. Ence only directed THROUGH him but the funds ACTUALLY PAID FOR THE EQUIPMENT THROUGH WIRE TRANSFERS—WERE DIRECTLY FROM PHOENIX INSTITUTE. When sums reach into the mid-to-high thousands (as in around \$24 thousand) it becomes unacceptable to excuse it when the equipment is now broken AND REMOVED. Yes indeed, he did have some input from some other parties giving him advice—but the facts remain THE SAME.

We shall be having to spend some "time" working through this mess so please bear with us as writings seem a bit tardy.

Thank you and good morning. Salu.

11/25/95 #1 HATONN

[QUOTING, PART 2:]

[H: We were just about to offer you a summary of pulse weapons which were fully operational since 1978, so, we will pick up directly where we left off in writing one on the subject in point.]

PULSE WEAPONS

Here is a summary of Russian electromagnetic pulse weapons known to be fully operational since 1978:

(1) Hand-carried briefcase-size solid-state units for close work, such as kidnaping and assassination. It has an effective range of up to half a mile. Solid state is the fastest growing area in this field. The brain is the target of this device, which has an output tuning signal. The "target" can be tuned for maximum or minimum absorption, which depends on the geometry of the wave, which can be focused on any area of the body.

If the "target" is the subject of a kidnaping attempt, he will receive lower absorption, enough to either make him act like a drunken person, or render him unconscious. Maximum absorption tuning would be used to assassinate the "target".

(2) Mobile systems weapons that can be carried in vehicles such as cars, trucks and aircraft. These have a range of approximately 18 miles. These weapons are for use by commando units and forward reconnaissance military units, and would have exactly the same effect upon military installations and command post personnel as the hand-held device, but with the added capability of disrupting radio, telephone and radar communications, over a distance of 18 miles.

These mobile systems have been expanded by the Russian military since they first put in an appearance in 1976, and are now capable of ground-to-air action and their range has increased to up to 25 miles. They are really tactical battlefield weapons, which can replace

nuclear weapons in battle. The "URAL" MHD generator, carried on the back of a truck, is fully capable of unleashing bursts of 50 MILLION WATTS of electricity, 40,000 amperes, for at least 5 seconds. Much smaller units, called the "Pavlovskii" provide amazing power for sustained anti-personnel action which could cause havoc on the battlefield. The Russians no longer need tactical nuclear battlefield weapons.

A simplified explanation of the way they work is analogous to the way nerve gasses in CAB weapons work. Nerve gasses act rapidly and are always fatal, without destruction of tissues as they interact with the electromagnetic fields in the human body. (The body "building blocks", molecules, are electromagnetic energy configurations.) The molecules exchange electromagnetic energy with other molecules. In radiation weapons, the destructive effect is possible through electromagnetic energy alone. This is done by "tailoring the signal", but in the case of nerve gas it is accomplished by an invasion of the poison which then disrupts normal body functions. "Thickened somane" nerve gas, for instance, paralyzes the nervous system controlling breathing, and the victim chokes to death.

(3) Land and space-based electromagnetic pulse weapons, which have the capability of knocking out power and all types of communications over huge areas, and killing hundreds of thousands of people. Khrushchev once told Eisenhower, at the time of the U2 incident, that the Russians could destroy all of Washington D.C. if they wanted to. Eisenhower is said to have dismissed the statement as a wild boast by an angry Khrushchev. But the fact was that Russia did indeed have new and dangerous weapons. For attacks on far-off locations, the Russians would use the giant radar facilities at Krasnoyarsk, Dashnuba and Pechora.

(4) "Megajoule" disc electromagnetic generators, with or without combined high explosives. These magnetized-target fusion disc devices use explosives to generate powerful magnetic fields which do not need immense beams or heat energy. Russian experiments, that have gone on since 1975, might very well have contaminated areas of the United States with a holographic-like three dimensional cloud of electromagnetic radiation. What is certain is that these "megajoule" weapons have been tested against NATO member country electric power grids, radar installations and teletype, radio and phone communications networks.

(5) Weather modification transmitters capable of generating huge masses of electromagnetic long-distance weather systems buildup. Tesla demonstrated this possibility in 1905, and later, with his "Standing Column Wave". In 1986 Pope John Paul II sent a message to the Kremlin, requesting that the Russians cease their interference with weather patterns around the world. The CIA had prepared a special briefing for the Pope on UMBRA (a code word used in top-secret communications) of NASA and the Office of Naval Intelligence (ONI) findings about extensive and highly unusual weather changes of an unnatural kind, which had been occurring over the China Sea and the Sea of Japan.

These unnatural weather formations were first picked up by United States satellites, "White Cloud" and "Rhyolite", back in 1975. The satellites sent back images of gigantic mushroom-shaped cloud formations in these areas. At first it was thought they might have been the aftermath of nuclear explosions set off by Russia, but an examination showed that there was no radioactivity present. Volcanic ash was also discounted as the cause.

The papal briefing was sent from the U.S. embassy in Rome on the Via Venatta, where it was handed to an aid to the Pope who immediately carried it to his chambers adjoining his private study, which is located next to his bedroom. The briefing contained a detailed overview of the weather modifications treaty signed by the USSR and the United States, and showed how a massive high-pressure ridge of electromagnetic energy was stalled over China. The effect of this long distance

weather system on weather patterns was described.

In March of 1986, this electromagnetic mass spawned a huge storm system that swept across nearly 14,000 miles of ocean and land—an unusual occurrence, because such storms usually travel over not more than 3000 miles. The storms were a disaster for the West coast of the United States. NSA reports told the Pope that the Sea of Japan was being used as a testing ground for Russia's scalar ELF weapons which were being readied for weather modification warfare.

By 1987, violent winter weather hit the Midwest and West coast of the United States, and over far-away South Africa, violent storms dumped between 60 and 80 inches of rain in one night. Almost exactly the same type of weather over South Africa, hit China, Vietnam and Burma, virtually shutting down large areas of these countries. From the foregoing it is not difficult to imagine how weather modifications could be used to shut down large and vitally-important regions of the United States, under cover of which a surprise attack could easily be launched.

With the initial operational capability [IOC] conclusively proved, the Russians continued to play fast and loose with weather modifications over the North American continent. They showed that their Woodpecker system could operate as an Over The Horizon (OTH) radar. U.S. intelligence can no longer conceal the existence of "Woodpecker", but it is passed off by labeling it as an OTH radar system. Nobody in government will admit that its principal task is to modify our weather systems. The Office of Naval Intelligence and the Department of Defense still classify "Woodpecker" as OTH radar.

But civilian science magazines could not be kept silent on the matter. For instance, the magazine "Science" clearly identified what was going on—the United States was being used as a testing ground for hostile weather modifications. In an amazing turn of events, a United States scientist, Bernard J. Eastland, [H: I am not much on your spelling, especially of proper names, but this may well be Eastlund instead of Eastland.] developed an electromagnetic current to steer jetstreams, and was actually granted a patent for it in August of 1987. The Department of Defense and the State Department initially asked Eastland NOT to file a patent application, and then, when he would not be deterred, tried to have the patent invalidated.

Eastland showed that he could produce and move standing waves of energy that could steer jet streams controlling our weather system in any desired direction. Furthermore, Eastland stated, his system could disrupt all forms of electromagnetic communications and even turn away a nuclear missile attack on the United States. One wonders why this brilliant scientist got no encouragement from his own government?

Weather modifications hostility by the Russians continued unchecked, with our government scientific community denying that such things are possible. However, denials were forced to come to an end in January of 1990, when scientists working on the atmosphere at the University of Illinois at Urbana-Champaign, detected a huge, 6 kilometer-in-height pressure wave, between 80 and 100 kilometers in wavelength, moving at about 45-50 miles per hour. Nine days later, the scientists observed another huge pressure wave, and this continued right through to December 21, 1990. Since 1990, there have been innumerable sightings of similar huge interferometry electromagnetic waves, which have turned weather forecasting over North America into an unpredictable science. [H: They have also turned regular airline routes into instant roller-coasters.]

While secretly appealing to the Pope for help, the United States government continued its cover-up attempts. In the aftermath of the U.S. initiative involving the Pope, Russia turned its attention to "blinding" on the ONI's NAVALEX capabilities. "White Cloud" satellites began sending back conflicting signals. More on this later.

For those who look askance at weather modifications and mind-control techniques as "science fiction", let me say that in 1912 Dr. Nikola Tesla [H: This is fine, it is the European way of spelling Nikola(i). Now you probably also begin to see the need for the presence for Sir. Nikolai a couple of days past.] invented the Tesla Magnifying Transmitter, and demonstrated to skeptical American scientists that weather modifications had come of age. The Russians were not skeptical. Teams of Russian scientists spent years in the U.S. Patent Office in Washington, D.C., copying the Tesla Magnifying Transmitter data and thousands of pages of the work of this remarkable genius, a man long before his time.

Russian scientists also have ELF devices capable of penetrating the mind and controlling it, but that is outside the parameters of this study and will be dealt with in my monograph, "Mind Control—New Horizons 1994". [H: That is probably available directly from Dr. Coleman.]

The ONI is the largest of all intelligence services in this country, dwarfing the CIA in size and scope. It operates under a command structure guided by the Director of Naval Intelligence (DNI) of the Naval Intelligence Command (NIC) and the Naval Security Group (NSG). The NSG is responsible for encoding and decoding signals and carries out cryptographic cryptological duties. This includes the satellites "White Cloud" and "Classic Wizard", an ocean surveillance program.

NSG runs the SIGINT ocean surveillance bases in Iceland, Scotland, Norway and Japan. It also monitors and intercepts signals emanating from foreign embassies in the United States. The Naval Electronic Systems Command (NAVALEX) runs the "Rexson Project", which is an underwater surveillance system. All these services are interconnected with DESKTOP, HOLYSTONE and SAND DOLLAR operations. The six Marconi scientists who were killed were working on these projects.

When the Russians turned their attention to U.S. surveillance satellites, it was the Navy Space Command center at Dahlgren, Virginia that suffered the most. This is the command center for Naval Space Intelligence (NAVSPASUR), Fleet Satellite Communications (FLATSCOM) radar and ocean surveillance and NAVSTAR global position systems (GPS). [H: I knew Ekkers would like this one for they were in the private circle of NAVSTAR before the government corporations took it over.] They were compromised by Russian electromagnetic radiation attacks on them.

The attacks on the Navy satellites originated from powerful ELF transmitters stationed at Sarysagen, near Moscow. These systems were probably compromised by the attacks on the British scientists working for Marconi. WHITE CLOUD, CLIPPER BOW and CLASSIC WIZARD began sending out conflicting signals after being hit by ground and space-based scalar short-wave electromagnetic distant pulsed "shots" as well as "blinded" by space-based beam weapons. For six months the entire ocean surveillance program hung in the balance and the ITSS satellite program appeared to have been compromised.

Attacks on U.S. Titan 340 and Delta rockets became an epidemic, with disastrous consequences. The United States was unable to launch any new satellites during the sustained Russian attack on the Delta and Titan launch vehicles. At more or less the same time, a continuous-wave scalar electron magnetic energy beam was directed at flying aircraft.

It was as if the Russians wanted to demonstrate to the United States that they had capabilities "we have never dreamed of", to paraphrase Akhromeyer. Two of the best-remembered cases were the downing of the Arrow DC 8 at Gander, which killed everybody on board, and the China Airlines Boeing 747 SP, flying at 41,000 feet on February 21, 1985. As the scalar lock-on occurred, the Boeing began to wobble as it was hit by the interferometer beams of electromagnetic energy,

which flamed-out all four of its engines.

Had the Boeing jetliner been flying at the usual altitude of 37,000 feet, aviation sources told me, "It would have been a total disaster." The plane fell like a stone for 32,000 feet, but thanks to the skill of the pilots, they got the engines started again, with 12,000 feet of airspace left. The plane's flight recorder captured the comments of the pilots, enabling military experts to piece together the sequence of events, which led them to the conclusion that the Boeing had been hit by an electromagnetic spatter. [H: E.J. might well find it interesting to note that these beams can be carried on typical laser blasts which did, in fact, bore a hole in the manifold and burn out the ignition system of the airplane being flown by E.J. Actually it happened in reverse order. I don't play games with you so why do you continue to play games with me about your safety?]

How do electromagnetic RF weapons (a slightly misleading term) affect the human body? Obviously I cannot get too technical, but I hope that the information I am providing will be simple and clear enough to be readily understood. The electromagnetic weapons are based on "pulse trains over several frequencies, with a variety of modulations and pulse shapes" according to the translated Russian literature in my possession.

The attack on the Arrow DC 8 at Gander, which killed 248 Americans in cold blood, was carried out with an ELF missile, which is a projectile of electromagnetic energy that hangs together while traveling to the target which it strikes, like any other projectile. In this case, the OTH radar weapon was aimed at the aircraft using distant holographic beams. It hit the DC 8 on the right side of the fuselage, just forward of the engines, shutting off power to all four engines.

The hole it blasted was examined for traces of chemical explosive substances, but none were detected, simply because it was an electromagnetic explosion and not a chemical one. Rather than having to admit that the Russians did indeed have this weapon, and that they had used it deliberately as a test shot, and thereby risking provoking the wrath and anger of the American people, a qualified witness who watched the plane take off, and who saw the interferometry beams form in the sky, flash down and hit the DC8, was refused permission to give her eyewitness evidence at the official Canadian board-of-enquiry proceedings. [H: Oh yes, indeed, you can visualize the formation of these tracers and beams and see the actual grid laid out from which the coordinates are computerized.]

Other witnesses, including three truck-drivers who were passing Gander airport at the time, said they saw a bright flash (like something resembling lightning), which lit up the plane and covered their trucks in an orange glow. What these truck-drivers witnessed was actually the beam structure holograph tracking and targeting mechanism that enveloped the plane.

They were not allowed to give their evidence to the board-of-enquiry, because of the cowardly nature of the United States and Canadian authorities, who also withheld autopsy reports showing that in more than half the servicemen, death was caused by inhaling deadly hydrogen cyanide fumes, given off by the burning plastic interior furnishings of the stricken DC 8. The interior became like a furnace at the moment of impact of the electromagnetic projectile, which would account for the rapid inhalation of hydrogen cyanide fumes which killed at least half of the passengers before the plane hit the ground—TAIL FIRST.

[END QUOTING OF PART 2]

We need to take a bit of a break here, so we will take this off the machinery. I'm sorry, Dharma, for the interruptions on the computer system—but we are stuck with it for a few days until we get past this weekend at the least. It will be good for the batteries to re-charge a bit anyway. I do need to keep on this topic for next week's paper and having a meeting tomorrow causes us to have

to work on it today. Thank you; you are far more secure right here with me, anyway. I must demand that you keep your head and lay a bit low. The problems are serious and the surveillance teams on overtime so please maintain attention and caution in all you do—like get out of the area if need be. I don't want to offer you "fear", just caution. I find it hard that my input is so blatantly disregarded for the privilege of the moment. So be it. Salu.

11/25/95 #2 HATONN

Speaking of the crash of the DC 8, Gander, which killed 248 Americans.

[QUOTING, PART 3:]

CRASH AT GANDER

Officials and ground personnel who rushed to the crash site did not realize that they were exposing themselves to scalar-wave radiation. The people who gathered up the dead, touching parts of the plane in the process, all became ill within a short period. Their symptoms were those of victims of ELF radiation: Nausea, stomach upsets, dizziness, vertigo, stress, irritability, sleeplessness, respiratory problems and lack of appetite. Some of the female personnel who were at the site of the crash developed serious menstrual problems later on.

Similar, but more severe symptoms are being experienced by veterans of the Gulf War, who were not told about the danger of becoming contaminated by spent Depleted Uranium (DU) shells. None of the tank crews or soldiers were warned about the dangers of radiation sickness that would come from exposure to DU rounds, nor did they know about the dangers of radiation contamination coming from destroyed Iraqi tanks and trucks, not to mention the thousands of dead Iraqi soldiers.

It is interesting that exactly the same type of ELF electromagnetic blast knocked down an overpass under construction near the Los Angeles Airport. The projectile was aimed to hit the San Andreas fault, probably with the intention of triggering an earthquake, but somehow the bridge structure got in the way. Puzzled engineers stood around for days, trying to figure out why the structure had come tumbling down. They had no idea that their bridge had been hit by an ELF electromagnetic missile!

The amazing thing about anti-personnel weapons is that by being "tuned" they can use an output of less than that of a microwave oven and still kill; this is because of an "output coupling" action. They do it by by-passing molecules in the human body and by acting directly on vital organs. This is made possible by mimicking the electromagnetic energy of molecules and by "tailoring" the signal to suit a particular target.

Using gulag prisoners for their experiments, Russian scientists discovered that electrical stimulation of the brain could bring on profound changes, and I deal with this in my work on mind control. They also discovered that varying degrees of electrical stimulation could daze a person, and that it was possible to kill with this technique. Madison Avenue and their One World Government controllers in Washington put this technique to use in the United States on mass audiences, most of whom, to this day, do not realize what is happening to them. The medium? The television in your home!

Russian scientists, working under the control of a military scientist by the name of N.D. Basov, did extensive research into microwave Radio Frequency (RF) electromagnetic weapons at Alma Ata, which is close to Vladivostok, the Pushchino Biological Physics center a short distance from Moscow; the Lebedev Institute in Leningrad, the Novosibirsk Academy of Medical Sciences, Siberian Division, the Applied Physics Institute in Gorky, and the closed Azramas-16

nuclear weapons research facility about 180 miles from Moscow. This is the top-secret institute, without accessibility. It is probably one of the most deadly of the more than 21 of such institutes. The civilian in charge is Professor N.D. Devyatakov of the Soviet Academy of Sciences, but the military exercises overall control through a group under Basov.

How has this affected the lives of the American people? Apart from the disastrous weather modifications, of which the floods along the Mississippi basin in 1993 are an outstanding example, our homes have become threatened and the distribution of plagues via scalar waves threatens the very existence of our nation and, indeed, every person on this planet. [H: And some of us even more than others, so when you take little "chances" and disregard my warnings, I am a bit miffed—to say the very least!]

There is also a substantial body of evidence that massive action using Dioxin transmitted by scalar waves has been used against thousands of American citizens. By innocently getting in the way of scalar electromagnetic waves, our health can be seriously jeopardized, and this does not take into account DELIBERATE targeting of population groups by ELF radiation, which is well-known, has been done in the past. [H: And on some occasions WE have interfered with their transmission programs.]

One of the dangers, in regard to accidental radiation, comes from the United States defense establishment's Groundwave Emergency Network (GWEN) program, a Very Low Frequency (VLF) navigational system for accurate launching of submarine ballistic missiles. These consist of a world-wide network of huge copper coils buried deep beneath the surface soil. Why was GWEN established? According to my intelligence sources, and which I reported in my monographs and newsletters as far back as 1975 and 1988, it was to counter the threat of the Russian Fractional Orbital Bombardment System (FOBS).

Although the United States entered into a treaty with the then USSR back in 1971, which disallowed further testing and placement of FOBS, the Russians went ahead anyway and tested 15 more devices by 1972. By 1986, the Russians had carried out an additional 20 FOBS tests, in defiance of the aforementioned treaty.

In 1966, at the very time that it was preparing to sit down and talk with the United States about an Outer Space Treaty, tests were under way to place a high-yield nuclear bomb in a space orbit. Later, the SALT II Treaty forbade this weapon in space. The Russians replied by placing 20 more nuclear FOBS in orbit, as if the SALT II treaty had never been signed.

These FOBS tests were first picked up in 1966, when the office of Naval Intelligence began noticing strange orbits of Russian KOSMOS satellites. These new trajectories, took the KOSMOS satellites far higher above the earth than any previously known. But then, after reaching its highest point of the trajectory, instead of completing the orbit, the satellites would fall back toward earth.

In 1967 the first successful launching of FOBS was confirmed by the ONI. The launching took place from east to west, opposite to the usual, normal course from west to east. What was the objective? It was to avoid detection by the Distant Early Warning (DEW) line, our defense which gives warning of any "incoming" ICBMs or Russian long-range bombers carrying nuclear weapons, traveling along the great circle route. In 1975 our DEW line was still facing east to west. By using the rotation of the Earth, FOBS could come up on the blindside of our DEW defense line, without being spotted.

FOBS are designed for an altitude of 1300 kilometers above the targets. But instead of the bomb being dropped on the ground, it is set to explode 700 kilometers above the targets. The ensuing explosion, or several explosions, will generate massive electromagnetic pulses which will spread out and knock out the entire electricity grid of the North American continent,

taking down our radar, telephone and teletype communications. The United States would be a helpless giant, with commands from the President to the military unable to be transmitted.

The development by Russia of FOBS was confirmed at the "All Union on High Current Electronics" conference held at Novosibirsk in 1986. By then, at least 5 FOBS were in orbit. The United States was totally hamstrung because of Congressional opposition, stoked by the jackals of the media, which resulted in so cutting the SDI counter-defensive system that no progress was made with its deployment. The jackal media dubbed SDI "Star Wars" and constantly released statements from so-called scientists who said it wasn't necessary and was, in fact, a waste of money.

No amount of intelligence information that the Russians had developed devastating new weapons (probably the ones referred to by Akhromeyer and Khrushchev) at Azramas-16 could convince Congress—which seemed to under the domination of men like Paul Warnke, who said that there was absolutely no need to spend money on the type of research being done in Russia. From what I was able to gather, the "Akhromeyer secret weapon" was a device that could, for the sake of simplicity, be called a disc electromagnetic generator.

But the purpose of the disc electromagnetic generator was anything but simplistic. It was in fact a device that could compress hydrogen plasma and intensify a magnetic field that would lead to a thermonuclear reaction. Such a device would burn out our satellites and blind our DEW line. The pulsed power generator device, packed with high explosives, simulated conditions that take place in a nuclear explosion.

Faced with the possibility that our defenses against a sudden attack could be defeated by a veritable jungle of electromagnetic energy directed over the country, and then a blast or blasts from orbiting high-yield nuclear bombs 700 kilometers above us, the U.S. Navy set to work to develop a system that would give the United States a second-strike capability, using our OHIO-Class submarines armed with Trident and Polaris missiles.

PART II

A system known as the SANGUINE system was developed by the ONI. The system, coils of copper wire buried beneath the soil, was believed to obviate having to depend on satellite information to launch the missiles, which in the case of the Trident D5, had a range of between six and seven thousand nautical miles. The idea was that our submarine fleet could locate in waters as far south as Australia, and then launch a devastating nuclear second strike at Russia that would do immense damage. Ground wave receivers known by the code-name OMEGA, began to be installed in U.S. Navy OHIO-class submarines. OMEGA, it was said, would guide the missiles to their intended targets with greater accuracy than ever before. [H: In Victoria the people were told this was to control the shipping routes.]

But SANGUINE ground waves resulted in a very substantial number of complaints from those affected by it—even though people probably didn't know what was causing the problem—so much so that SANGUINE had to be scrapped. The copper coils of SANGUINE could most likely handle as much as a quarter-of-a-million-watt wave output, although the exact wave strength was never disclosed. No one knew for sure what groundwaves would do to people living near stations transmitting such intense electromagnetic fields, but one scientist, Dr. R. Becker wrote two books on the subject: one *The Body Electric* in 1985 and the other, *Cross Currents*, in 1990. [H: I should interrupt this writing at this point to let you know that this copy of Coleman's work was sent to me through very strange routing FROM Australia near where this system was installed. We have written about this station prior to now { Editor's note: See p. 30 of the 2/7/95 issue of CONTACT. } but the sender makes a

very good point about people not being allowed to know what goes on. This OMEGA system is near Melbourne and the people are given absolutely no information and have no idea about the massive danger.]

I don't have the space to quote page numbers of these books, nor whether the information was ever verified by anyone else. Dr. Becker stated that all man-made electromagnetic energy fields produce adverse effects on the human body, and all are harmful in varying degrees. We need to remind ourselves that electromagnetic energy can be in the form of a slug, like a bullet, that hangs together as it moves at incredible speed and then strikes the target. It will do terrible damage, far worse than any bullet. [H: This is why I am not impressed with your silly quarrels over handguns. A militia, even with military-level hardware, is absolutely NO MATCH and is totally laughable against any of these beam weapons—even the smallest.]

Among the several effects listed were changes in learning patterns, an increase in certain cancers and neurological changes brought about by neurochemical changes. These could result in suicidal behavior. (It is believed that the drug PROZAC works in a similar fashion. For details see my monograph "Mind Control: New Horizons 1995".)

Can ground waves actually be measured? The answer is yes, they can. Groundwaves, as the name implies, travel along the surface of the earth at a height of about six feet. In the United States this was measured by environmentalists using a spectrum analyzer. The fact that the transmissions are so low (between 10.2, 11.3 and 13.6 kHz) does not make any difference to its effect on the human body. According to Dr. Becker, "All abnormal man-made electromagnetic frequencies, no matter what their frequencies, produce the same biological effect. These effects, which deviate from normal functions... are actually, or potentially, harmful."

Defense considerations overrode objections about the potential risks to humans who got in the way of groundwaves, and a newer version of the SANGUINE ground wave, dubbed the OMEGA, was ordered installed at intervals of 250 miles all across the United States, with one or two stations in South America and in Hawaii, Norway, Monrovia (Africa), the island of Reunion, Australia and Japan.

The GWEN-OMEGA groundwave navigational system transformed the way nuclear subs are navigated and their missiles directed. OMEGA is 100 percent accurate, having none of the atmospheric wave inaccuracies. OMEGA has the added benefits of VLF transmissions (virtually the same as SANGUINE, ranging from 10.2 through 13.6 kHz).

U.S. Submarines do not have to surface to receive the signal, a huge plus. OMEGA groundwaves are known to penetrate to a depth of 50 feet of water, whereas "skywaves" can only penetrate to a depth of 5 feet of water. Again, I stress that the exact ground wave output is top-secret, but the OMEGA coils can carry as much as 500,000 watts, without even slightly heating up, have very stable velocities, providing the best navigational positioning thus far.

GWEN/OMEGA will continue to operate even after an electromagnetic and/or a thermonuclear attack has destroyed all communications and burned out the NAVALEX, WHITE CLOUD, RHYOLITE, FLATSCOM, CLIPPER BOW and CLASSIC WIZARD satellites.

Obviously, GWEN/OMEGA bothered the Russians very much. What would be the use of an electromagnetic and thermonuclear first strike, when the U.S. OHIO-class nuclear subs could aim and fire their Trident and Polaris nuclear missiles with deadly accuracy, from a range of 7,000 miles, well out of reach of Russian "killer submarine" range? Such an attack could do huge damage to Russia. This was noted by the Soviet Defense Ministry newspaper, *Krasnaya Zvezda*,

which complained about it in an article published on October 4, 1973. [H: How far do you think they might have gone since then? After all, this is November 25, 1995!]

Tests conducted by the U.S. Navy proved conclusively that our nuclear submarines, submerged at 50 feet beneath the ocean as far south as the southern end of Australia (and out of range of "killer subs"), could launch their nuclear missiles at Russia with deadly accuracy. This is the reason why, in all of the SALT Treaty negotiations, the Russians sought to neutralize this disadvantage to themselves by demanding that "Polaris" and "Trident" missiles be brought into the treaty. [H: Do you also see WHY nuclear weapons are being tested in the Pacific?]

While national security remains the primary goal, or at least this is what we are told (although I have other thoughts on the subject), the effect of groundwaves on human bodies has still not been made public and, for all we know, might well be a contributory cause of the terrible rise in the number of cancer cases in the United States. While there is no proof of this contention, neither has any proof been offered that GWEN/OMEGA waves are NOT a contributory cause of the almost epidemic of cancer in this country.

The biological action of electromagnetic pulse weapons was first spelled out by Russian scientist V.M. Koldayev, who had been experimenting with a number of pharmaceutical drugs to establish their suitability in defending the human body from a microwave-pulsed radiation attack. Koldayev also tried to establish whether post-radiation exposure could be treated by drugs. In the course of his experiments, Koldayev became convinced that intensive microwave radiation, such as would occur during an ELF attack, alters the membrane characteristics of the cells and ion transport, generating electrical breakdown at the "boundaries of phase regions and other effects, causing a destruction of living processes..." [H: See now how valuable those lessons on cellular life really are?] In plain language, properly directed ELF pulsed radiation, can and WILL KILL.

Russian pioneers in the field of electromagnetic radiation, known as bioelectromagnetics, were V.I. Vernadsky and A.G. Gurvich. It was Vernadsky who put into words what scientists Pasteur and Curie already knew: "We are surrounded and penetrated, at all times, and all places, by eternally changing combining and opposing radiation of different wavelengths—from 10 millionths of a millimeter to several kilometers."

Perhaps it would be appropriate to explain in clearer non-technical terms, exactly what ELF fields are: An ELF magnetic field is 9-dimensional, self-organizing "cloud field" that can penetrate every known material substance, (iron, brick, concrete, plastic, water, etc.) while *not losing its power*. It is called "non-attenuating", that is to say it does not grow weaker over distance. ELF has a range of 1-100 cycles per second, using extremely low power, described by Tesla as 2×10^9 , which can profoundly affect the human biological system.

It can be used to cure diseases such as cancer, AIDS, or, on the dark side, actually cause these diseases. By using beneficial frequencies in a range of 7-9 Hz (or cycles per second) which is related to the magnetic frequencies from the sun and to 8 Hz, the Earth frequency, most diseases that plague mankind could be cured and stopped. But research I have done proves to me that this "frequency for good" range 7-9 Hz is NEVER used! One can only ask the questions, "WHY?" In order to understand just how low the power of ELF is, one can compare it with the old horseshoe magnet which is roughly one-tenth of the Tesla measurement.

ELF radiation acts by "turning on" or "turning off" any gene cell by interacting with the DNA molecule in the presence of the protein Kinases in the cell nuclei. In experiments conducted at the Lebedev Institute in Moscow, Soviet microbiologist Gurvich demonstrated

that he could change the metabolic process in an onion, using pulses of ELF. Using gulag prisoners, the Russian team working under the direction of Soviet scientists, did experiments that caused depression and anxiety among the prisoners, when the ELF pulses caused the release of cholinergic neuropeptides in the brain. [H: Indeed, pay attention, please, for the lives we are talking about here—are yours!]

Even though in a controlled prison environment, "mob violence syndrome" was created among the prisoners by "tuning" the ELF pulse to suit this requirement. By the same token, it is perfectly feasible to use this technique to get people to go on a shooting rampage, which is what I believe is happening in the United States, in order to create hysteria and a climate suitable for "gun control" to be accepted by the American people.

The Office of Naval Intelligence (ONI) conducted a seven-year study—much of which has never been disclosed—which proved that "subjects" in an ELF magnetic field can, and did, suffer the following changes:

- * The reaction time of irreversible chemical processes were altered.
- * Perceptions of time are altered. (Very useful in "UFO [claimed] abductions".)
- * Inhibited or enhanced protein Kinase production.
- * Defects and alterations in animal embryos.
- * Altered behavior of cells, tissues, organs and organism.
- * Speeded aging process.
- * Inhibited bone growth.
- * Affected immune process of body to diseases.
- * Affected calcium ion bonding in cells.
- * Entrained DNA transaction process.
- * Destroyed and ruptured cells.
- * Induced sleep.
- * Altered cell chemistry.
- * Entrained human brain waves.
- * Altered hormone levels.
- * Suppressed cyclic amp production.

The ONI report also indicated that it was possible to do non-invasive surgery using ELF techniques, advance bone growth, inhibit or enhance RNS synthesis and processing. The study showed conclusively that by using the ELF frequency ranges 7-9 Hz, certain diseases could be completely cured.

Vernadsky's colleague, Alexander Gurvich, is credited with the distinction of being the first to prove the concept of "tuned" radiation—the basis of ELF/EP weapons, when he demonstrated that such "tuned" electromagnetic radiation decisively reacts and changes biological events in the human body.

Gurvich was the discoverer of the multiphoton process, which was taken further by one of his pupils, Professor Vlail Krazneechev of the Medical Division of the Soviet Academy of Sciences and developed into the most advanced electromagnetic anti-personnel weapons for the Russian military. Krazneechev's Novosibirsk experiments were mentioned in his paper "Electromagnetic Bioinformation in Intracellular Interactions" and in at least three other papers by him, "Distant Intracellular Interactions in a System of Two Tissue Cultures", and "Information Function of Ultraweak Light Flows in Biological Systems".

Simultaneously, work on explosive MHD generators went ahead so fast that, in 1960, the Russians perfected and had ready a pulsed power generator already described, the Azramas-16. The Azramas-16 generator can emit, for 1 millionth of a second, a greater electrical output than all of the Earth's power stations. Its output can only be measured in "megajoule" energy units, hitherto reserved entirely for describing energy output of nuclear explosions.

[END QUOTING OF PART 3]

We need another short break, please, to get the body working again and the joints moving. I think that you can see that anyone who labels these pulse systems as "Hogwash" is somewhere with his/her head in the slop-bucket. This is WHY God has given you such as Gaiandriana and the specific colloids offered—to save those cute little necks of yours. I don't like to be a spoil-sport but one day, little ones, you are going to pay attention to me along with my requests for caution. The sky above those unusual clouds this day in this area—are a total grid-work of pulse beams—many of them originating from a central hub at Northrop. People aren't having "flu"; you are overwhelmed with elfs playing games with you. I suggest a bit of extra gold intake. Also, keep up your natural intestinal bacterial intake because the low frequencies are killing off some of your natural resources as well as the nasties. Most of you can now handle the bombardment if you have been dutifully following instructions—otherwise, you are going to feel pretty lousy off and on.

I thank "2 x 6" for the hand gloves—this will be a Godsend while we tackle these long subjects for we MUST keep up now and we don't have scanners allowed in here. We are in great appreciation that allows us to continue our work when the body and spirit are at low tide.

11/25/95 #3 HATONN

[QUOTING, PART 4:]

[H: When we interrupted the writing we were speaking of "megajoule" weapons.]

Such an output has the potential to destroy human life on the same scale as a thermonuclear attack, but without the material damage such an attack would cause. Electromagnetic weapons leave no contamination that would affect the advancing military forces. But it is not only on the battlefield that we have to contend with radiation.

The biggest mistake made by American civilian research establishments is the belief that when one is exposed to electromagnetic radiation in the civilian arena, the body merely heats up, as food does in a microwave oven, for example. There has been little, if any PUBLIC INVESTIGATION by the United States government into the effects of electromagnetic modulated fields on the brain, or different regions of the brain, and the entire human body. But as the ONI study shows, the United States Government is FULLY AWARE of the ramifications and is, today in 1994 and for the past decade, perhaps using its own citizens for experiments, without their knowledge and consent.

In July of 1976, Soviet-Russian ELF transmitters began bombarding different regions of the world with ELF radiation. Between the United States and Russia, 15-16 giant transmitters such as the one at Alma Ata are fully operational. Intelligence sources of mine, who closely monitor ELF transmissions, told me that not once in 12 years has the 1-9 Hz signal been picked up, which means ELF transmissions are not being used for the good of mankind. There is no doubt in the mind of one of my intelligence sources that a certain faction inside the United States government is using American citizens to test ELF effects and the distribution of diseases by means of enfolded scalar waves.

The work done by Gurvich leaves no room for doubt that exposure to electromagnetic radiation, even at comparatively low levels, can, and does, have precisely predictable effects on neurological functions. Gurvich was the first to report a direct effect of scalar energy on nerve cells in tissues and cultures. Gurvich's disciple, Prof. Vlail Krasneechev, gave details in Russian military publications about experiments conducted at the Medical Division of the Soviet Academy of Sciences in Novosibirsk, while another Gurvich protege, G.M. Franck, of the Institute of Biological Physics in Puschino—a key military research center for ELF—also reported on his findings.

The consensus of Krasnachev and Franck was that scalar ELF energy "can and does modulate the basic biochemical communications between nerve cells mediated by neurotransmitters. It is clear that scalar energy will affect cells in addition to nerve cells. It has been demonstrated that insulin production in the pancreas can be suspended through ELF interaction with these cells." (This is an accurate translation from the Russian language.) [H: It is also noted that ELF energy waves "use-up" the gold particulate necessary to make those biochemical connections between nerve cells and this causes great sluggish and negative confusion within the target. Scalar energy is simply a coined phrase meaning universal, or life, or prana, waves.]

These two Russian scientists said they elected to study the effect of ELF waves on nerve cells in order to establish the premise that scalar energy can, and does, directly affect the nervous system of the human body in the absence of feedback signals from the body. (Although a different word is used in the Russian text for "feedback", it is close enough.) The first experiments showed that the functional properties of noradrenaline, a commonly abundant neurotransmitter in cells, was weakened by electromagnetic fields.

Depression and anxiety are common symptoms of decreased noradrenaline levels. By "tuning up" the signals, Franck maintained that persons subjected to this type of transmission were most likely to commit suicide after bouts of extreme and prolonged depression. It is perfectly clear from these studies that a "targeted" person could be induced, FROM THOUSANDS OF MILES AWAY, TO COMMIT SUICIDE, WHILE OTHERS COULD BE INDUCED TO COMMIT MURDER, MOB VIOLENCE AND SO ON, SIMPLY BY A PROCESS OF "TUNING" THE ELF TRANSMITTER SIGNAL.

Earlier I mentioned our homes being wired for electricity in such a way as to become potential receivers for electromagnetic energy levels that are potentially a danger. All across America can be seen vast grids of high-tension power cables. For years there has been talk of dangers emanating from these electromagnetic lines and the wiring in our homes, plus the commercial and domestic appliances that could give off long-term lethal radiation.

In 1953 some efforts were made to bring these ever-present dangers to the attention of a number of governments, including our own. In 1953, The University of Pennsylvania did a study on exposure to electromagnetic radiation which concluded that people should not be exposed to a power density of 100 watts per square meter. This standard did not, however, take into account radiation effects other than thermal heating, so well established by Russian scientists. Consequently, the standard adopted by the American National Standards Institute (ANSI) is not thought to be safe enough. Athermal effects were not taken into account in the University of Pennsylvania study.

Recently two Swedish research teams reported their findings following an exhaustive study they conducted on the effects of electromagnetic fields (EMF) on the human body. Their study showed that the closer one lives to overhead powerlines the greater the risk of a carcinogenic reaction which, their study showed, takes the form of brain tumors, leukemia and lymphoma.

The Swedish study showed that there is a clear relationship between these cancers occurring in people who are exposed to EMFs and that the risk increases in proportion to the closeness and length of exposure to EMFs. In other words, the closer you live to overhead power lines, and the longer you live there, the greater the risk of getting cancer in one form or another. [H: It should be understood right here, however, that you can't confuse the TWO circumstances, for the body is not particularly bothered negatively from overhead power lines of any size. It is when the frequencies are mingled that you have a problem and that problem can slip over into even the small electri-

cal devices as small as a timepiece.]

The study also showed that children are at great risk if they live close to EMFs, and that their chances of getting leukemia, when exposed to 1-2 milligauss, are double those of children not exposed to EMFs. [H: Now, again, don't go off the deep end here—we are again referring to the interlinkage of these EMFs with other frequency introductions as carriers.] It is not only powerlines that present a danger: electric wires in the home through which power is passed are an EMF field, a bedside electric clock is another EMF, and the Swedish research team showed that an electric clock next to the bed could cause brain cancers. [H: This is, however, if you have the introduction of either very, very high frequencies or very low frequencies into the workings of the apparatus. You can sometimes tell if you have electrical disturbances beyond the ordinary by the way a watch or clock keeps "time". For instance, a clock on Dharma's computer, separate and apart from it, will speed up greatly while, if placed away from the apparatus, keeps perfect time. This is also true of wrist watches so if yours starts speeding along out of time—watch it and keep up your Gaiandriana, etc. Dharma doesn't leave her watches running when not in use because they pick up so much extra time from one wearing to the next. This is getting to be rather normal for this location and it seems the better the time piece the more susceptible to the impact. I'm sure Dr. Young could tell you a lot about this topic as he lives right above a tunnel connector and it expresses through his own body circuits which is easier on his appliances but hard on watches and speaker systems. The better the quality of speaker system the more easily "blown" out.]

The Swedish study is not the only one pointing to the danger of EMFs. Professor S.M. Michelson of the University of Rochester School of Medicine said in 1967 that the dangers from EMFs are very real: "The occasional reports of headache, lassitude, stomach ache pains, sleeplessness, irritability and other subjective symptoms among workers in the vicinity of microwave generating equipment have not been thoroughly investigated. These findings should not be ignored, as similar vague, mild, unidentified symptoms have been experienced in the course of microwave studies in this laboratory. Such symptoms could indicate a basic microwave effect."

The Swedish research findings are not easy to brush aside, as the power industry, the military and the

companies that supply the hardware have been doing for years. Using highly accurate computerized demographics data on 500,000 people who, in the period 1960-1985, lived within approximately 100 feet of powerlines, typical of the powerline grids that criss-cross urban and suburban America, the study came up with some alarming conclusions. If you live in close range of power lines, your health is going to be adversely affected.

So conclusive was the Swedish study, that NUTTEK, a division of the Swedish government's energy department, instituted new rules designed to safeguard people against the harmful effects of EMFs.

[H: I would like to thank Dr. Coleman for being so observant when in this location as to loan Dharma a coat with built-in wiring and shielding for use at the computer. We have since directly shielded her computer station and still the frequencies seep through. It is an ongoing battle with our people who are simply doing their jobs. Since there is no way to monetarily repay John for his sharing, we could send a better-health package. Please send enough for three!]

Why is the standard 10,000 microwatt ANSI safety standard still adhered to when the Russian safety standard is one thousand times more demanding? Why has the power industry in the United States gone on the attack to defend this hopelessly low safety margin? The answer to these questions may have been provided by Professor S.M. Michelson: "There were persuasive economic reasons why the 10,000 microwatt (= 10mW) standard was and still is defended at all costs. Lowering it would have curtailed expansion of military EMR use, and cut into the profits of corporations that supplied the hardware. A reduced standard (of safety levels) would now constitute an admission that the old one was unsafe, leading to liability for damage claims from ex-GIs and industrial workers." No doubt the power companies would face a blizzard of lawsuits if ever they were forced to admit to the howling electromagnetic storm that rages across their powerlines.

Then there is the powerline leading to your home from the service drop line. Corrosion and/or careless installation could lead to your house becoming a virtual "magnet" for EMFs from the surrounding houses. It would be a wise move to check the wiring in your house as a precaution. "Microwave News" says that the power companies must not be allowed to get away with the technique of pouring scorn on the Swedish research. When it was first brought out that there is a link

New Gaia's Starting Package

PROGRAM STARTING PACKAGE

- 1 Bottle Gaiandriana (1 Quart)
 - 1 Bottle AquaGaia (1 Quart)
 - 2 Bottles GaiaLyte (2 Liters each)
 - 4 Packages Spelt Bread Mix
 - 5 Audio-cassettes
- COST: \$130

MAINTENANCE PACKAGE

- 1 Bottle Gaiandriana (1 Quart)
 - 2 Bottles GaiaLyte (2 Liters each)
 - 4 Packages Spelt Bread Mix
- COST: \$80.00

GaiaSorb

NEUTRA-BOND: 2 oz.
NICOTINE, CAFFEINE, ALCOHOL,
SUCROSE, STARCH, \$6.00 each
TRAVEL PACK: 1/2-oz.
bottles of each of the above,
plus Gaiandriana, for \$15.00
(plus shipping and handling).

New Gaia Products

P.O. Box 27710

Las Vegas, NV 89126

For credit card orders, call:

and/or free Catalog)

between lung cancer and smoking the tobacco companies heaped scorn upon such an idea, and continue to do so today.

An Environmental Protection Agency (EPA) report (367 pages) showing that a stronger connection between EMFs and cancer in human beings exists, than the proven connection between second-hand smoke and cancer, has been completely suppressed. Why is the EPA recommendation that EMFs be rated as a possible cause of cancer, being stifled? How much money has the power industry donated to politicians in key positions, able to keep the American people from the truth? Why does the Surgeon-General not include EMFs in the all-out bid to reduce cancer from smoking? Why has there been no effort to investigate the danger to citizens exposed to electromagnetic radiation? Where is the "EPA champion" Vice President Al Gore?

We live in an electromagnetic forest, absorbing all sorts of signals. The human body acts as a radiation antenna in frequency ranges from 70 to 100 megahertz, at which point FM radio and TV frequencies overlap. Have you ever wondered why so many people fall asleep in front of their televisions set? The answer is that they are being exposed to a continual flow of electromagnetic radiation, which will affect their nervous system and make them doze off. Unusual tiredness is an almost sure sign of exposure to ELF/EMF.

For those who wish to learn more than I can put in this monograph with its space limitations, I strongly suggest the reading of Russian Professor M.N. Sadchikova's *Clinical Manifestations of Reactions to Microwave Irradiation in Various Occupational Groups* published in 1973. Sadchikova assembled an impressive array of data covering 1180 workers exposed to microwave radiation and 200 who had not been so exposed. The microwave radiation to which the 1180 workers were exposed was approximately 3 milliwatts per square centimeter. [H: Please don't focus on your little microwave ovens where you warm your coffee, readers, for you would be in great error—as that is probably the only safe microwaves around because they are, at least, shielded.]

Common symptoms exhibited by the 1180 workers and which were not found in the 200 unexposed workers were: Anxiety, a heaviness in the head, irritability, a slower heartbeat, tiredness and moderate to heavy fatigue, anxiety, sleeplessness, lowered blood pressure and partial loss of memory. Overall, the study showed a significant amount of neurological problems not found in the 200 unexposed workers.

What is disturbing is that these "radiation sickness" symptoms occurred at well below the 100 milliwatt safety standards set by the ANSI. What is also frightening is what happens with "accidental" exposure to radar beams. We know that the United States has been hurrying to catch up with the Russians in "phased array radar" techniques, such as are installed at Krasnoyarsk and Petchuka.

There is secret government data showing that exposure to such radar waves for a matter of 60 to 80 seconds can cause the following: Arterial hypertension, vertigo (sometimes mistaken for threshold strokes), a reddening of the skin, stomach cramps, chest pains, clogged-up eyes ("gritty-like sand in them"), sleeplessness and irritability. The study showed that the hypertension continued for six months and could not be attributed to other causes.

How much of this type of RF, RM and ELF activity by the military are we being subjected to? Nobody knows, because all radar, radio microwave, and extremely low frequency electromagnetic research by and on behalf of the United States military is classified. But if the number of complaints about strange high-pitched humming and similar manifestations continue to increase as they are doing, public pressure might be able to force a disclosure of just what we are being subjected to. If you believe that you are living near radar or microwave corridors, then the best thing to do is move.

There is conclusive evidence that so-called "Radi-

onics" instruments are being used to spread chemicals like Dioxin-2, which can cause cancer and variety of serious ailments. Even cocaine can be spread by this device. Getting into the realm of mind control for a brief moment, there exists proof-positive that mob violence, acts of random shootings and suicides have been triggered by subliminal messages sent via Radionics instruments. The mysterious "suicide" of President Clinton's close friend and legal assistant at the White House, could, conceivably, have been "triggered", but such a theory would be very hard to substantiate. [H: Well, we can't call this MURDER a "suicide" under any circumstances, although it is possible. There is too much evidence that this was a homicide to silence Foster and protect the ongoings of, especially, Hillary Clinton. Regardless of what you have "heard", Foster was EXECUTED with TWO shots to the base of the skull (back). It is both hard to commit suicide from such a position and a second shot is rarely effective after a lethal first fire. This is simply how blatant the thugs have become—and "the gloves didn't fit" no matter how much the Mishpucka tries to shove them on.]

Radiotronic instruments have been in use for more than a quarter of a century, yet little is ever mentioned about the device by the news media. It is as if the whole area is "off limits" to the press, or taboo. Radiotronic transmissions can be made using toxic substances, or they can simply be used as electromagnetic transmitters to disturb the neurological processes of the targeted person or persons.

There are even photo-accommodating Radiotronic transmitters that enable the sender to home-in on the intended victim, merely by placing a photograph of him, or her, between two electrodes and adding a high-frequency A.C. corona field around it. The process was invented by the Russians, Valentina and Semyon Kirlian. It is called "electrophotography". The object to be generated and the photograph are placed between the two electrodes which are coupled within the dielectric field. Research shows that by transmitting with this device, it is possible to injure the health of the targeted person, or even cause death. Apparently the relative magnitude of what is known as "a free electron discharge, resulting in luminescence and color, indicate the psychological and physical health of the targeted person."

I have no way of verifying it, but an intelligence contact of mine holds the view that the mystery illness that has plagued actress Elizabeth Taylor is a result of Kirlian electrophotography and dousing with long-range ELF electromagnetic waves. Certainly the reported symptoms of Taylor's illness compare very closely with the symptoms of a person who has been irradiated by ELF transmissions.

These symptoms include, but are not limited to fever, headaches, swollen glands, earache, sore muscles, nausea, dizziness, night sweats, swelling of fingers and eyelids, confusion, breathing problems, bladder dysfunction, severe fatigue, rashes, chills and a prickling sensation of the skin. Chronic fatigue is an almost sure sign of an ELF and/ or chemical attack. Taylor may soon be hailed before the courts to testify in the trials of 3 doctors who are said to have prescribed more than 25,000 drugs for her, in an effort to quell the strange health problems with which she is plagued.

There are cases on record—although they have never been acknowledged—of persons who have never had any direct contact with Dioxin-2, or have never worked in plants making this chemical, who did not serve in the military in Vietnam, where they might have been exposed to "Agent Orange" (Dioxin-2), who were thoroughly contaminated with this deadly chemical. [H: For more information on Agent Orange please get a copy of a book called *Waiting for an Army to Die* by Fred A. Wilcox.] In one specific case, blood samples taken from a doctor's patient showed high levels of Dioxin-2 present. Where could the poison have come from? There is a school of thought in

intelligence circles that the ordinary citizen has become a testing ground for Radiotronic transmissions of all sorts of toxins, including Dioxin-2.

As far as I am aware, there is no program at State level to test for Dioxin on a broad scale, nor does the Centers of Disease Control have such a program. Yet, according to intelligence sources, the problem of Dioxin-2 poisoning may be approaching the problem of AIDS. Some city government laboratories do run urine tests for the presence of Dioxin-2, but such tests are inadequate because only a full blood serum trace analysis, using a pint of blood, will show the presence of Dioxin-2 at dangerous levels. For years the medical profession sought to downplay the so-called "Chronic Fatigue Syndrome", but experiments carried out at the University of Umea, Sweden, show that chronic fatigue could be the result of Dioxin-2 or other chemical-agent poisoning.

It is believed by the same intelligence contact that AIDS and any other deadly disease can be used to target a person. The creator of "The Muppets", the late Jim Henson, is believed by this source to be the victim of a Radiotronics-generated illness, which was finally diagnosed as "AIDS related". There may be a clue in this in the curious statement made by former President George Bush when Ryan White died of AIDS.

There is no dispute about the fact that Radiotronic devices can transmit such deadly chemicals as Dioxin-2, among others. As is the case in so many instances, the perpetrators of these outrages cannot contain themselves. They seem to have an overpowering desire to brag about their "successes" and so they go bragging about them in the complacent belief that even if their crimes were to be investigated, there would be no proof to convict them.

Apart from the serious effects of ELF pulses on the tissues of the body, known to cause cancer, intelligence sources say that conclusive evidence exists that Radiotronics instruments can be used to poison people, cause heart attacks, epileptic seizures, cause chronic fatigue and urinary problems associated with the prostate gland in men.

The shocking rise in the number of children suffering from cancer is attributed in certain intelligence circles to the use of electromagnetic energy and Radiotronic devices which can "broadcast" cancer-causing substances such as Dioxin. Truly, cancer has become the scourge of America when we take the following statistics into account:

- * More than 1200 people die each day from cancer.
- * More than half a million people will die from cancer this year.
- * Cancer is the No. 1 killer of children under the age of 14.
- * Two out of three people who get cancer die within five years.
- * Cancer deaths have increased at the rate of 1 percent every year since 1939 and are increasing at twice that rate in 1994.
- * There are more than 1 million people under treatment at any given time in the United States.

No one can say that these shocking figures can possibly relate to anything other than abnormal factors at work. These include ELF radiation, chemicals in foods, chemicals in drinking water, pollution of the air, the deliberate spread of Dioxin-2 and other cancer-causing chemicals in targeted areas, and microwave RF radiation caused by EMFs and electrical appliances. Even so-called "allergies" have their origin in ELF and microwave radiation absorption. By simply "tuning" or "tailoring" the transmitter, a variety of "allergies" can be induced.

In 1979, research into cancer deaths among children living near high current electrical wires was published. The findings of the two researchers, Wertheim and Leppert, were published by the *American Journal of Epidemiology*, 1979, Vol 109, under the

title, "Electrical Wiring Configuration and Childhood Cancer". What Wertheim found was that "service drop" [power lines] were giving off a marked "hum" when exposed to a gaussmeter. Wertheim then charted the deaths of all children from cancer who had been living in homes near such "service drop" lines and/or power transmitters.

Over a period of several years she continued noting the relation of children who died of cancer and the homes they had lived in, close to "service drops" and transformers. What Wertheim proved was that children living in the vicinity of high-current electrical wires died of cancer at twice the rate of children who did not. Wertheim's findings were immediately attacked by the power companies and the medical profession. [H: Yes, and the reason the findings could be questioned is that unless there is ELF or Very High Frequency introduced into the system—there won't be any such findings. It is not the hummmnn and it is not the electric alternating current—it is the integration of the frequencies which cause the mutation of cells (cancer).]

There was a weak link in the study; it did not account for the substantial increase in the overall number of cases in children below the age of 14. In the light of what I have read in the documents made available to me, the terrible increase in the cancer rate in young children must come from the corresponding increase in ELF transmissions. This conclusion was reached after a detailed study of environmental pollutions statistics and the possibility of cancer being caused by polluted drinking water, air and food.

The incidence of cancer among adults has reached alarming proportions. Never in our history, have so many Americans been stricken by this dreaded killer. There are some areas in the home which might tend to expose us to radiation. These include electric bedside clocks, electric razors, electric blankets and television sets. But the highest risk comes from electrical wiring in our homes. The return current is supposed to balance this out but, today, the electrical system is "earthed" to the plumbing. This makes all pipes in the house, if they are metal, excellent EMFs. [H: There is a mistaken perception here which I would clarify a bit for there is no actual "return" current. When you understand LIGHT and ELECTRICITY you will find what I say to be fact.]

However much danger lurks in or near our homes from EMFs, the danger is 100 percent greater from groundwaves, radar and microwave transmissions. The huge phased array radar facility at Krasnoyarsk in Russia has the capacity to radiate vast areas of the United States if it is so desired by the Russian military. Basically an antiballistic missile radar, the unit has a 26-mile-diameter phased array consisting of thousands of elements, capable of directing a single "beam" or hundreds of beams operating against different targets. Unlike the radars we see at civilian airports, this one has eliminated the need for a rotating antenna.

The Krasnoyarsk radar has the ability to create a three-dimensional electromagnetic field around any target, or given location or a series of locations. Whole cities could be blanketed with such a field. Corrections for interference, obstacles and reflections can be made immediately. The electromagnetic field, or cloud, can be shifted from one location to another in rapid succession. Thus the Krasnoyarsk radar has the potential of being turned into a deadly weapon at the will of the controllers. There is a great deal of evidence that this facility, and others like it in the former USSR, were used for such "test" purposes of short duration against locations all over the world, but particularly against the United States.

Groundwaves emanating from the GWEN/OMEGA stations spaced 250 miles apart across the United States, while not as devastating as an attack-radar weapon like the one at Krasnoyarsk, nevertheless must pose a hazard to those in the path of its groundwaves of electromagnetic energy which can be detected at a height of 4-6

feet above ground. Using a spectrum analyzer, not only can these signals be clearly recorded, but they grow stronger when the earth under which they pass is measured. The waves penetrate the ocean and this was confirmed as far back as 1905 by Nikolai Tesla who said only frequencies below 20 kHz can penetrate earth and water. Thus GWEN/OMEGA's range of 10-15 kHz fits this requirement.

GWEN/OMEGA stations are believed to have huge tuning coils which are wound from so-called "Litz" wiring. The aerial antennas are only capacitors for the groundwave through the copper earth aerials buried beneath the soil. Although it is claimed that there is no environmental impact emanating from these electromagnetic waves, it is interesting to note that monitoring stations are placed ten miles away from the GWEN/OMEGA sites, although the exact locations of such monitoring sites remain secret.

Some fairly useful information about OMEGA navigation was published in "Flight Magazine" of January, 1976. But as far as I am aware, there have been no definitive studies about the possible harmful effects of groundwaves on human beings and the environment. What we do know is that Alexander Gurvich systematically demonstrated, over a period of twenty years, that the absorption by the human body of even the smallest amount of electromagnetic radiation, can and does bring about decisive biological changes. This was confirmed by Kaznacheev and L.P. Michailova in their work, *Ultraweak Radiation In Intercellular Interaction*.

We also know from data given in Russian technical journals, that selectively tuned electromagnetic pulses can kill, and that nearly all of the modern electromagnetic weapons are directed to this end. Those who might be tempted to doubt the existence of such weapons should read the 1987 Pentagon Study, *Soviet Military Power*:

"Radio Frequency,

Recent Soviet developments in the generation of radio frequency (RF) energy have potential applications for a fundamentally new type of weapon system that would degrade electronics or be used in an anti-personnel role. The Soviets already have, or are working on, much of the technology needed for such a system..."

[H: They have it, friends, and so do you. This, after all, was a decade past and in this world of technology—it is a billion light-years in importance.]

That the Russians have been testing these devices for more than a decade is not in dispute. What is not stated is against whom are such devices used for "testing"? The United States with its huge land mass and population would be the ideal testing ground, in the view of experts on Soviet military matters.

There is another potential threat posed by Russian ELF weapons and this concerns nuclear waste sites around the United States, some of which are very concentrated and extremely large dumps of spent nuclear fuel. It is quite possible that a wave, or several waves of ELF-holographic guided electromagnetic energy, could be directed at these storage sites. Such ELF pulses would sharply increase the nuclear potential on the radioactive nuclei. This would most probably cause the radioactive nuclei to immediately fission and that would produce a nuclear explosion with radioactive fallout covering an area of as much as 1000 miles around these sites, depending on the quantity of spent nuclear waste stored there. There would be absolutely no warning—just a huge explosion.

Apart from what I would call "direct applications of electromagnetic energy for use in anti-personnel weapons", there is the second aspect of using electromagnetic energy to induct killer diseases that destroy cells at a long distance. To achieve this, Russian scientists worked to perfect a method they called "in-folding" the hidden EM wave structure. The so-called

"information content" of such waves could contain biological disease which could be used for biological warfare purposes. With their technology the Russians could destroy the biological functions of everything on earth, as Khrushchev threatened. The Russians also have the means of changing mental and behavioral patterns, using similar techniques.

The WOODPECKER transmissions use an infolded wave in which diseases could be concealed. This was graphically described in papers written by Kaznacheev in 1981, in which he describes transmission of cellular death in literally thousands of military related experiments, by which we understand that he was working on military weapons for use in biological warfare.

Dr. Robert Beck confirmed the presence of infolded waves transmitted on no less than 15 channels, and that these waves could entrain normal brainwaves of human beings. The Russian LIDA generators can generate pulsed 40 megahertz that can affect our biological functions. In a series of experiments, it was demonstrated that the "subject" went into a trance-like state when subjected to LIDA waves, and was totally unaware and disinterested in his surroundings.

WOODPECKER transmissions in distant locations in Russia can heat the atmosphere to produce low pressure areas, or cool the atmosphere to produce high pressure areas. As scientists in California know all too well, even if they refuse to admit it, it was the constant created high pressure mass over the coast of California that caused six years of drought that followed in the wake of WOODPECKER signals that began on July 4, 1976. The date was no accident. The Russian military wanted the United States to know that it was not as independent as we would like to believe. [H: It is exactly that same condition which holds rain off the coast of California as we write, right now.]

The December, 1980 issue of "Military Review", published an article by Lt. Col. John B. Alexander, whom readers of *WORLD IN REVIEW* have already met. The article gave some startling information about the "transfer of energy from one organism to another". In this article, Alexander makes it clear that "the ability to heal or cause diseases can be transmitted over distances, thus inducing illness or death for no apparent cause."

Alexander goes on to say: "Telepathic behavior modifications which include the ability to induce hypnotic states up to distances of 1000 kilometers have been reported." Alexander concluded by saying: "The information provided here will be considered by some to be ridiculous, since it does not conform to their view of reality, but some people still believe the world is flat."

by Dr. J. Coleman, February 1994.

[END QUOTING OF PART 4 AND ENTIRE DOCUMENT]

We are so long into this writing that I only have one or two things to add: It has been an additional nearly two years since this was first written. The systems are up and functional, the satellite connections are in working order, and you are in for some bad days, citizens. Hold your LIGHT shields around you for it is still the best and ONLY real protection you have. We can offer you tools to boost your systems—but you have to want to do something for selves. Wrong choices are going to be very, very costly from here on in, friends. It is decision time! Salu.

Soltec: Keep Your Light Shields Up!

11/26/95 SOLTEC

Toniose Soltec, present in the Light of the Most Radiant and Holy God of Light. Thank you for your attention and for listening. We appreciate your willingness to give an ear to us at this time. So very many things are occurring, on and off your planet, at this exact moment, and much hangs in the balance presently. You are at a most precarious point in your journeys, and at times, little seems to make any sense to you ones.

However, know that though you cannot see that which is taking place, and you cannot make sense of it, we shall be present always to guide our people along, if they will keep their spaces clear and their ears tuned to our frequencies.

This task is not an easy one to accomplish right now, for your planet is being bombarded by frequencies which are knocking you ones off balance. That is why it is imperative that you keep your spaces clear and your shields up and enhanced. If you find it necessary to clear space a dozen or more times per day, do so. Do not worry that you are failing in some way—only know that, because of the increased level of attack, you may need constant reinforcement in your protection. But, on to other things.

Yesterday, November 25, 1995, your planet experienced an extremely large earthquake in an area known as the Sakhalin Islands. This is politically a part of Russia, but geographically and geologically speaking, part of the north end of the Japanese Islands. And as you ones know, that entire area is being rocked continually by moderate to large earthquakes. The quake yesterday measured, by your machines, a magnitude of 8.5 and was approximately 10 miles deep. This is the same area that experienced a large earthquake earlier in the year; I believe it was measured at 7.5 or so, by your scientists. In that quake, well over 2000 lost their lives.

The more interesting bit of news about yesterday's earthquake is the lack of reporting by any of your news media services. Ones have been searching out information regarding it, and the data is sorely missing. Now, listen, chelas: whether it was indeed an 8.5, or actually even a 9.5, matters less than the fact that you are receiving even more heavily censored news coverage than usual.

Did you know that there were several "6.0" (official magnitude) quakes during the past three days of your counting along the Pacific Ring of Fire? I thought not. The geologic activity of your planet is purposely being censored. Why, you ask? There are many reasons, but the main purpose is simply to keep you in the dark, so that you shall go about your daily business as usual, asleep at the wheel.

You are considered less than intelligent, and incapable of understanding and sorting out for selves. You are being treated as slaves and captives, and kept in the dark about everything—except that which will aid and abet the crooks who THINK themselves in charge.

You can bet your sweet life that if they knew a killer quake was going to hit the downtown Los Angeles area, you would not know about it until after the fact. The loss of lives, and the suffering of those who would survive, is considered less important than the supposed panic that would ensue if prior notification were given. You are being fed pabulum and most of

you are eating it up in large helpings!

Let us clear up one thing: Those who THINK themselves in charge of your planet and your lives are sadly mistaken. There is only ONE Who is ultimately in charge and that ONE is GOD!

The dark forces may seem to be winning at the moment, but we have a little bit of news for them—for their days are short, and their moment of accounting approaches rapidly! Broken agreements do not make brownie points with GOD'S people, and believe us when we tell you that ALL the broken agreements and promises have been logged and noted!

Enough said on that. Commander Hatonn may wish to elaborate. [Pause at 2:27 A.M.]

Well, chela, you have just experienced a head-on attack personally—or shall I say, your husband has. It is most interesting how, just after we sat down here to work, that his pains began. That which he experienced [which Soltec's scribe, Kali, at first thought might be a heart attack] was a direct, low frequency attack, which affects the nerves. As you saw, there were no tight or knotted muscles, just severe pain in the shoulders and back when drawing in or letting out of the breath. The increase in the protection shield is not to be taken lightly. DO IT!

Planet Earth is in for some rough times ahead, dear ones. It is going to be difficult, at best, even for you ones. That is another reason that it is so important that you keep your spaces cleared and the protection of Light about you, especially in the coming week.

Politically, economically and geologically, it is heating up to a point of boiling and the lid is about ready to blow off the pot. All the preparations which you ones have been doing up to this point shall now begin to pay off, so to speak.

The sorting and shaking down has taken place for a purpose. You are at the time where all must be working together as a well-oiled, well-tuned machine. Those ones who have moved on down the road did so, because they knew they were not pulling together with the rest of the team. We wish them well, and hold no hard feelings toward any. Each must follow his or her own path and make that journey for selves. Take comfort in the understanding of personal destiny and personal decisions. Though you may wish for another to come into the fullness of Understanding and Light, know that it may not be their desire to do so, and allow them to go their way—and harbor no ill feelings toward them.

For those who stay the course, we cannot promise that it shall not be difficult, for if I did so, I would be speaking untruth. Though your paths may be filled with potholes and boulders, know that we shall be there Lighting each step of the way. All you need do is call

upon us.

Changes are taking place at such a rapid rate, that it is nearly impossible to keep up with them, even from our perspective and vantage point. Therefore, if you ones are feeling frustrated and confused from time to time, know that it is due to the fact that these changes are occurring in rapid-fire succession.

It is nearly impossible for us to track the geologic activity on the planet, and it is impossible at this point to tell the natural from the man-made activity. All is becoming melded into one grand geologic event.

The French are continuing to explode nuclear devices in the depths of the Pacific Ocean, and yet your United States is suspiciously silent about the events. Between these explosive releases of energy and the little tit-for-tat games being played out above your planet—there are enough shenanigans going on to cause the entire planet to be activated to critical levels.

Moreover, there are over half a dozen volcanoes erupting presently on your planet, as well. They are not all in the Pacific region, though the majority of the major eruptions are there. Mount Vesuvius has been rumbling and spewing out ash and smoke for several weeks, and the large volcano outside Mexico City has been experiencing eruptions, as well.

It is becoming more difficult for your scientists to not admit that geologic activity is on the rise so, therefore, the reports are simply being censored from the major news media. You are deliberately being kept in the dark and misinformed! None of this is by accident—it is by design!

As the next several days unfold, be cautious, be alert, be ready for anything, for anything is possible. California is hanging by merely a thread, and that thread is mighty thin. But, God works in mysterious ways, chela.

Those ones, such as Gordon Michael Scallion, are also sending out warnings for the coming days, though they are overly cautious about that which they say. I, however, will be quite blunt and tell you that it is extremely volatile right now, and the volatility is only going to increase in the coming days. That is why it is so IMPORTANT that you keep alert and stay clear and shielded.

I know I am sounding like a broken record but, at this point, I do not care. If I have to remind you a hundred times a day, then so be it. I cannot emphasize it too much right now, for there is far too much at stake to take this lightly!

Let me close off for now, for we are extremely busy in the monitoring department. Just know that we are always near to you, and all you need do is call upon us. Many are going to perish, and it is not going to be a pleasant experience for you or for us. However, together, we shall see this all through, and we shall get there—very soon.

Thank you for your time, for your attention, and for your service. We honor all of you who have so selflessly given of themselves in these past years. The days ahead are the reason that you have been in such intensive training. That training will pay off, and all the lessons you have received shall serve you well.

Go in peace; go in Light; and go with the blessings of Holy God of Light. I am Toniose Soltec, in that Light, to clear. Salu.

PHOENIX JOURNALS LIST

THESE WORKS ARE A SERIES CALLED THE *Phoenix Journals* AND HAVE BEEN WRITTEN TO ASSIST MAN TO BECOME AWARE OF LONG-STANDING DECEPTIONS AND OTHER MATTERS CRITICAL TO HIS SURVIVAL AS A SPECIES AT THIS TIME. SINGLE Journals ARE \$6.00; ANY 4 Journals ARE \$5.50 EACH; 10 OR MORE Journals ARE \$5.00 EACH (Shipping extra - see right.)

TELEPHONE HOTLINE

805-822-0202

This is a service for our dedicated readers. *Today's Watch* telephone hotline carries the latest news and comments from Commander Hatonn's most recent writings. This is our way of keeping you informed about fast-breaking news and events.

The message machine will answer after 2 rings if there are any new messages for that day, and after 4 rings if not. Thus *daily* callers can hang up after 2 rings and save toll charges if no new message has been recorded. The message update(s), if any, occur by 6 PM Pacific Time.
