# Time To Get Serious About **KILLER BUGS**

## Affecting Man, Animals, Produce Bigtime

11/19/97 #2 HATONN

AND ON AND ON IT GOES!

Readers, new people exposed to *CONTACT* often speak in terms of our "fear tactics" and, further, accuse us of being anti-government, extremists, and thus and so. No, we point out the facts and the TRUTH. We try always to back up each bit of information with documentation from somewhere around the globe so that you don't have to decide whether or not you "can believe" us.

Just today in the news you will find a very casual announcement that TONS OF POTENT (ONE DROPLET OF

THIS STUFF WILL KILL A HUMAN INSTANTLY) stuff has been acknowledged, located, and attention is being demanded for removal and disposal. Is this something to do with that miserable, awful and genocidal Saddam Hussein in Iraq, further justifying all sorts of bombings and terrorist (Please see **Time To Get Serious About KILLER BUGS**, p.26)

11/22/97 DR. AL OVERHOLT

## BANKS FIGHT TO HIDE DERIVATIVES LOSSES

From *THE NEW FEDERALIST*, 10/13/97:  
[quoting]

Fighting to keep the extent of their dangerous derivatives speculation hidden from public view, top U.S. derivatives banks and their allies have escalated their attacks on a proposed accounting rule which would require U.S. corporations to publicly disclose their derivatives holdings. The rather mild proposal, by the Financial Accounting Standards Board (FASB), would force U.S. corporations to put their derivatives holdings on their balance sheets and report their market value, revealing their derivatives gains and losses.

Attempting to bully the FASB into dropping or watering down the proposal, the House Banking Committee's subcommittee on capital markets held a hearing Oct. 1. Subcommittee chairman Richard Baker (R-La) called the hearings to, in his words, "consider sponsoring legislation to block the FASB rules".

Behind Baker stand Federal Reserve chairman Alan Greenspan and the leading derivatives bankers, who have publicly demanded that the FASB attempts to shed light on the derivatives bubbles be stopped. Greenspan has sent a series of letters to FASB chairman Edmund Jenkins, expressing "serious concerns" about the proposed accounting requirement. On July 31, top officials of 22 banks sent a letter to Jenkins demanding that he back down. Among the signatories were the chairmen of the top seven U.S. derivative banks—Chase Manhattan, J. P., Morgan, Citicorp, Bankers Trust, BankAmerica, NationsBank, and First Chicago NBD—which have, between them, \$22.3 trillion in derivatives, backed by just \$93 million in equity. [Talk about leveraged for disaster!]

## DISCLOSURE vs. COVERUP

"If ever a case can be made for reporting something in more detail, it is for derivatives," Jenkins told the subcommittee Oct. 1. "Different companies may report very similar activities differently, and even an individual company may report similar activities differently.... Gains and losses on derivatives are not explicitly disclosed today, and their effect on earnings is difficult, if not impossible, for an investor or creditor to determine. Again, we believe that the public has the right to know."

Jenkins added that "the information about derivatives and hedging reported in financial statements today is incomplete, inconsistent, and just plain wrong. Better information is badly needed by all consumers."

The opposing view—that exposing derivatives holdings to public view would make it harder to sustain the bubble—was presented by both the bankers and their supposed regulators.

Federal Reserve Board Governor Susan Phillips suggested that the market values of corporate derivatives should be placed in "supplemental disclosures, rather than forcing their use in primary financial statements". "Indeed," Phillips said, "placing financial instruments in regulatory

accounting pigeonholes... can create disincentives for prudent risk management."

Citibank Comptroller Robert Trupin decried the alleged "extra cost" of accurately reporting derivatives exposures, and complained that under the FASB proposal, "Derivatives have to be reported as if they are bets rather than hedges."

## 'SAVE THE BUBBLE'

The question of bets vs. hedges goes to the heart of the derivatives debate, since all the parties involved know that derivatives are indeed speculative bets which vastly increase the risk to the Financial system—precisely the reason the bankers are determined to beat back the FASB's attempts to force disclosure.

The objection by the banks to disclosure of corporate derivatives activities, was reflected by the Bank for International Settlements, the Basel, Switzerland-based central bank for the central banks, which noted in an August 1997 paper, that "the backlash against derivatives that followed a series of corporate loses is waning." "The BIS is referring to the furor which struck derivatives markets in late 1994, when derivatives losses bankrupted Orange County, Calif., and Bankers Trust was caught red-handed cheating its corporate derivatives clients. The "backlash" put a damper on the U.S. banks' derivatives business: After growing by more than 30% in 1993 and 1994, U.S. banks' off-balance-sheet derivatives holdings grew by just 9% in 1995, and 18% in 1996, and are just now returning to "normal", at an annualized 35% clip so far in 1997. The last thing the bankers want now, is more losses to surface and another public uproar to erupt, so they are fighting to keep their scam hidden from view. [End quoting]

This is possibly one of the biggest—if not the biggest—financial scam ever pulled off in the history of this planet.

## LAWYER IS NEW LEADER OF BUREAU OF INDIAN AFFAIRS

Excerpted from *THE ORLANDO SENTINEL*, 11/11/97: [quoting]

The Senate has confirmed Albuquerque, NM lawyer Kevin Gover to run the Bureau of Indian Affairs. Gover, 42, is a member of the Pawnee tribe. An anti-gambling group had opposed his nomination as assistant interior secretary for Indian affairs because of his work for Indian casinos in New Mexico. But Gover was widely supported by tribal leaders, and the Senate approved his nomination. [End quoting]

The fact that he's a lawyer doesn't say much for the hopes of those Indians who want honest government for their

reservations. Don't forget a lawyer is a minion of the British aristocracy—he carries the British title of Esquire. What kind of hope is it when his skill may be to twist the truth?

## U of T ACADEMICS ANGRY OVER BUSH AWARD

From *THE FINANCIAL POST*, 11/19/97:  
[quoting]

A decision to award an honorary degree to former U.S. President George Bush has triggered derision and threats of a protest from a group of academics at the University of Toronto. More than 100 faculty members of the country's largest university have signed a petition demanding that the university cancel an ornate ceremony today at which an honorary doctorate of laws will be presented to Bush. The protesters have threatened a mass walkout during the ceremony. They cited Bush's career in the Central Intelligence Agency, the Iran-Contra scandal and his 1989 invasion of Panama as evidence of his unsuitability for the degree. [End quoting]

As follow-up to this, as the actual ceremony got underway about 100 faculty who were sitting on the stage abruptly stood up and left the stage in an orderly procession of protest.

## ISRAEL APOLOGIZES

From *THE MODESTO BEE*, 10/11/97:  
[quoting]

Israel apologized Friday for using forged Canadian passports in its assassination attempt against Khaled Meshal, a leader of the militant Islamic group Hamas, on Sept. 25 in Amman, Jordan, and promised not to do it again. Canadian Foreign Minister Lloyd Axworthy said in response that Canada's ambassador to Israel, recalled to protest the passport forgery, will return to Israel early next week. [End quoting]

The Jews have just taken their yearly *Kol Nidre* oath—do you, really, think they can be trusted to keep their promises??

## THE NATIONAL IDENTITY CARD

From *THE SEEKERS*, Sep./Oct. 1997:  
[quoting]

House Version: The Smith immigration Bill—March 1, 1995. Source: This is reproduced and

BY ROGERS FOR THE PITTSBURGH POST-GAZETTE

condensed from a report by the Congressional Action Program—March 1, 1996 on the Internet.

The House of Representatives bill is H.R. 2202. Key provisions are in Sections 403, 812. It is sponsored by Lamar Smith (R-TX), however the bill enjoys widespread bipartisan support. The purpose of the bill is to prevent illegal immigration by establishing a computer-linked employer verification registry for all American workers. Pilot programs in 5 states will test this technology using biometrically encoded ID cards to register and identify legal citizens. The Senate counterpart, Bill S. 269, is even more extreme. However, the House bill is still dangerous because it gives the government the right to approve private employment contracts. This paves the way for an intrusive computer-driven national identification system.

#### KEY PROVISIONS OF THIS BILL:

\*It creates new computer data bases, data sharing and computer link-ups between state and federal agencies. This will vastly expand the government's ability to monitor the lives of every citizen. (H.R. 2202, Sections 403, 812).

Pilot projects will determine if we need a national identity card (H.R. 2202; Section 812).

\*Every employer will require authorization from the federal computer database before hiring new employees. This does not just apply to immigrants. The company must transmit each new employee's name and identification number to the government via modem and then wait for the national database to respond with an authorization code. If the person's name is not in the government database, he cannot obtain work anywhere. (H.R. 2202, Section 403).

#### Objections:

(1) The computer registry and national ID card will increase the police powers of the state.

(2) The system will Cost up to \$6 billion dollars annually to administer.

(3) This system is an Invasion of Personal Privacy and a Threat to Civil Rights:

A computer-linked registry which contains private information on every single citizen would be accessible by social workers, employers, police officers, etc., and would allow tremendous privacy and civil rights violations.

(4) The Registry Has Tremendous Potential for Abuse:

Government abuses of protected information contained in computer registries and tracking systems by the IRS and the Social Security Administration are well documented. The potential for abuse of a national ID system is greater than it has been of any previous government program.

(5) The Registry Could Be Easily Expanded for Purposes Beyond Illegal Immigration:

Once a system of information on all Americans is in place, it will inevitably become universal with a variety of tracking information records ranging from personal credit to academic achievement to vaccination records.

(6) The Bill Will Give the Government an Unprecedented Ability to Collect Personal Data. For the First Time:

The government will have a comprehensive registry of every citizen's name, date of birth, place of birth, mother's maiden name, Social Security number, gender, race, and other information.

Personal information that is now scattered in many different places will be consolidated in one single database, controlled by a single federal agency.

Personal information will be accessible to government and anyone who claims to be an employer.

The government will have to grant approval before a company hires anyone. Before a company hires a new employee, it will need to receive authorization from the government.

(7) Citizens Oppose a National ID System:

In a 1993 poll, 53% opposed a national identification card system. (*Newsweek* poll, July 1993)

(8) Members of Congress Are Ignoring the Privacy Concerns of Americans:

Despite the dangers, the proposal has received relatively little media attention.

(9) The ID System Would Be Prone to Error:

This federal verification system will use two data bases known to contain errors: (1) the Social Security Administration and (2) the Immigration and Naturalization Service. Both systems contain incorrect or outdated information, with error rates as high as 28%. Over 65 million Americans enter the work force or change jobs annually. Even if the error rate was only 1% we would still have 650,000 Americans denied jobs annually due to errors in their computer file.

(10) The Bill Will Raise Costs for Employers:

A national verification system for every company in America will cause a huge administrative cost to employers, especially small business. Every employer will be required to ask the federal government's permission every time they want to hire a new employee.

No other nation demands that every employer obtain permission before hiring anyone to work for them. This system, while "designed to prevent illegal immigration", will give the federal government awesome powers to control and harass citizens in the future. Such a system could easily be integrated with the Social Service Administration, welfare and unemployment insurance so that a citizen could be totally prevented from obtaining income from any source. [End quoting]

This system is not established to prevent illegal immigration. It is designed to make 100% slaves out of all except the Elite. **WAKE UP!!**

#### BALL AND CHAIN

From *THE MODESTO BEE*, 10/5/97: [quoting]

Under the guise of "protecting the children", the federal government has locked another ball and chain to the ankle of Joe taxpayer. Recent legislation requires that complete personal histories of all persons landing new jobs be entered in the federal computer system. Wage status is to be reported every two months. This information is to be available to the FBI, IRS, law enforcement agencies, etc., *ad nauseam*.

Ostensibly this tyranny is to aid in locating child support fugitives. If and when violators are located, do you suppose agents will break down their doors and drag them out at gun point? Wherever he is, George Orwell must be muttering, "I told you so!" [End quoting]

Excuses, excuses—all to accomplish the same purpose of enforced 100% slavery.

Always, always—the Elite cause the problem and come up with the solutions that remove more and more freedoms. **They very seldom fail.**

When are we going to wake up and look at the big picture of all situations instead of the minute details that sound good? Until we start understanding that the Elite are never out to help anybody except themselves and their buddies—and

even then they eventually turn on anyone that gets in their way—we will never restore our freedom!

#### CDC: WHOOPING-COUGH VACCINE MAY WEAR OFF

From UNKNOWN, newspaper clip 10/97: [quoting]

Health officials are warning that the whooping-cough vaccine doesn't last a lifetime—as an outbreak in Vermont demonstrated last year.

The outbreak had 290 people hacking, almost half of them teenagers.

"The vaccine is highly effective for early childhood years, but it may wane over time," Dr. Dallya Guris, an epidemiologist with the Centers for Disease Control and Prevention, said Thursday.

Five doses of whooping-cough vaccine by age 7 are recommended for maximum protection. After that, no booster shots or catch-up vaccines have been approved in the United States. [End quoting]

The Elite won't let up on their desire to get their vaccines into you on a very regular basis. Just think, 5 times in the first 7 years for just the whooping-cough vaccine alone. The poor child is going to think he was born just to punch needles into, since they won't know that they are, usually, slow death and illness shots.

#### WARTS AND ALL

A leading opinion researcher takes a hard look at what's wrong with his profession

From *THE WASHINGTON POST*, 10/13/97: [quoting]

Harry W. O'Neill is a treasure. He's a pollster's pollster, and one of the most fair-minded, thoughtful and candid critics of his profession. He's also wickedly funny, louder than most, and anything but shy. All of those qualities were on display in abundance when O'Neill addressed the New York chapter of the American Association for Public Opinion Research at the Media Studies Center in Manhattan last June.

The occasion was an occasion: O'Neill, the vice chairman of the Roper Division of Roper Starch Worldwide, was being honored with the chapter's 1997 outstanding achievement award. Harry, of course, was Harry. He used the event to ask the assembled survey researchers to look at "our warts"; those troublesome aspects of polling that we pollsters too often look away from, if we acknowledge them at all.

"I do not mean to be a nattering nabob of negativism, but rather to be a constructive conveyor of criticism. So here goes—10 warts," he said in a speech that has just now been printed and is available from the Media Studies Center.

Among the warts O'Neill sees on this "honorable and rewarding profession":

\**Opinion polls have given respectability to uninformed opinion.* "We ask people about every conceivable issue and dutifully record their responses—whether or not they have ever heard about the issue or given it any thought prior to our interview bringing it to their attention." Better, he correctly argues, if we asked respondents whether they were aware of the issue and then ask further questions only of those with some awareness. "But this, of course, takes time and money, both of which often are in short supply," he says.

\**We have learned too well to be advocates rather than objective researchers.* Here O'Neill

speaks directly to his colleagues in the commercial world. "It is tempting to serve our clients or their particular causes too well," he says. Questions asked for paying clients often produce the results that the client sought (funny how that happens). It helps get repeat business, O'Neill says, but it's dishonest research.

*\*We mislead the public.* "We must insure that...public research is open and direct, clearly understandable, free of exaggerations, distortions and unsupported conclusions," he says. The survey results must not be overinterpreted, a mistake that both media and commercial pollsters too often make. O'Neill also wonders whether we mislead rather than inform the public when we dutifully report margin of sampling error, in the process creating "the aura of an exact science and, I suspect, leading the public to a false impression of a survey's soundness".

*\*We impose on the public.* "We do this in several ways—apart from calling at dinner or during some more intimate moment—for example, by the sheer amount of research being conducted, by incomprehensible questions and by unconscionably long interviews," he says. One of the examples he offers is a thoroughly wonkish and utterly unfathomable 126-word question that President Clinton's first pollster, Stanley Greenberg, asked in 1993 about the energy tax. "What do you think the effect of such drivel is on our image?" O'Neill asks.

*\*We too often allow our romance with technology to overshadow the art of asking questions.* Forget (sort of) computer skills: The things that O'Neill seeks first in a job applicant are analytic and writing abilities. Technical skills are important, and familiarity with advanced statistics is helpful. But he says they create their own problems, such as the "temptation to believe that putting your data through some fancy computer model will produce the best solution to the problem under study... I know of no computer program that will transform data from an inept questionnaire into a meaningful report."

*\*We misuse and overuse focus groups.* "Any idiot can sit around a table and talk to people," O'Neill says. But focus groups are much cheaper than quantitative studies. Little wonder, then, that they're so popular with clients and with the media. (After all, isn't that what reporters have traditionally done: talked to people and drawn conclusions from those conversations?) The problem is that focus groups may come to be viewed as replacements for random sample surveys, and not as complements to a poll. O'Neill tells this little cautionary tale about focus groups: "When the Taurus automobile was first tested in focus groups it bombed. People called it a 'jelly bean'. The Edsel, however, was a focus group success. I strongly recommend that you don't forget that, either."

*\*We are not as concerned as we should be about refusal rates.* "We are losing a precious resource—our respondents. We have learned well how to more effectively disturb more people at an inconvenient time—and then blame them for being uncooperative—and we have learned how to bore them unmercifully and insult their intelligence when they do cooperate," he says. (In fact, one of polling's dirty little secrets is that response rate of most, if not all, media polls is below 40 percent, if figured strictly, and not somewhere between 50 and 60 percent as we are so quick to say when asked.)

*\*We don't pay enough attention to our interviewers.* God bless our interviewers—even if we ignore them. O'Neill says. "Sitting back

comfortably in our offices, it's easy to forget the interviewer—particularly since, as is too often the case today, researchers have never had the experience. They want to go from Harvard to vice president, skipping a few important and instructive steps in between."

(Well, I agree with most of that: I personally learned more about the sources of non-sampling survey error working as an interviewer at the University of Michigan than in my survey methods classes. I vividly recall laughing with respondents over bad questions, inadvertently skipping questions and waiting patiently as respondents groped to answer a question that they clearly had thought nothing about.)

O'Neill describes two other warts, directed toward his commercial colleagues. He criticizes the tendency of researchers to call themselves suppliers or vendors, as if they were distributing beer. And he complains that the lowest-bid mentality is producing bad research, albeit at a good price.

O'Neill ends by noting that he may have "engaged in some exaggeration to make a point". But not much, he quickly adds: "I believe they are all serious and all occur—and we all, including myself and my company, could do more to prevent their occurrence. I strongly encourage all of us to do so."

Amen. [End quoting]

Finally, they tell us the real truth about their pollings being as unreal as we always suspected them to be. After all, how many of you have ever had a voice in them? The whole purpose of these polls is to guide your thinking by making you think that most people think the way the polls say they do. Naturally, you don't want to be the odd-ball—or do you?? The majority are more often wrong than right. If this were not so, the world wouldn't be on the precipice of a major disaster.

### IRS TO HOLD FIRST SEMINAR TO AID TAXPAYERS

From *THE DAILY NEWS*, Los Angeles, 11/12/97: [quoting]

The Internal Revenue Service will begin its most visible response to taxpayer complaints—"problem-solving days"—starting Saturday in 33 cities, including Los Angeles. The tax agency hopes to handle at least some problems on the spot and send a message of a new commitment to personal attention.

Residents can get the ear of IRS employees and talk about their lingering and unresolved tax problems, which could range from unresolved bills to errors with payments or IRS collection tactics.

"Having a national day, it's almost the equivalent of a military stand down," said Phil Brand, a former IRS chief compliance officer now at the accounting firm KPMG Peat Marwick. "I think it has a chance of being almost a seminal event for the service."

Deputy Treasury Secretary Lawrence H. Summers agreed that beyond tackling taxpayer problems head-on, the sessions carry symbolic weight.

"Over time, problem-solving days and steps like it, (such as) strengthening the taxpayer advocate, will create an IRS with a different culture," Summers said in an interview Tuesday.

The problem-solving days also allow the agency to present itself in a more positive light, particularly after Senate hearings into alleged IRS abuses in September.

"This is our chance to show what we can do and

to tell our own story," said Ellen Murphy, the IRS assistant director in Dallas.

Nationwide, the IRS has received 1,600 calls from taxpayers inquiring about the problem-solving days, said Summers, who oversees the administration's efforts to overhaul the IRS. The IRS urges people to make appointments before Saturday so it can research cases beforehand.

"One of the very encouraging things is with many of the calls, there wasn't a need to schedule an appointment because it was possible to work out the problem right then and there," Summers said. Those without appointments won't be turned away.

The IRS plans to hold Saturday problem-solving days each month in different cities in each of the 33 IRS districts. Senior managers in those districts, including the local "taxpayer advocates", will be on hand. Some districts will have private accountants or enrolled agents on hand to offer free taxpayer assistance.

The idea was part of the Clinton administration's response to the Senate Finance Committee oversight hearings into IRS mishandling of taxpayer cases. At those hearings, IRS agents hidden behind screens leveled allegations of unethical collection practices and abuse of lower-income taxpayers least able to defend themselves.

The revelations led the acting IRS commissioner to issue an unusual public apology. The hearings also inspired the House last week to pass a bill to make the biggest restructuring at the IRS in 45 years.

And the White House, sensing a wave of anti-tax sentiment, is considering injecting a tax overhaul initiative into the State of the Union address next year. Democratic pollster Mark Penn is surveying voters on the issue for the White House, two administration officials said Tuesday, speaking on condition of anonymity. [End quoting]

I heard on *CNN HEADLINE NEWS* that the burden of proof is still on the taxpayer unless you get into a court session, and then only if you have answered their questions and delivered all paperwork that they have asked for. What do you think the odds are that you'll be able to conform to their rules?? One lost paper, or if you don't have it—**forget it!!**

Don't ever expect the Mafia, gangster IRS and Clinton to give up their stranglehold on you until you throw them out of office! They'll keep throwing you what you think is a big win and it'll only put you into a bigger hole!

### ULTRAREALISTIC HOLOGRAMS

From *POPULAR MECHANICS* magazine, Dec. 1997: [quoting]

A new photopolymer film promises to make holograms look brighter and more realistic.

Holograms recreate realistic 3D images, but only if they are shown in sunlight or clear incandescent light and seen from a narrow viewing angle. Less than perfect conditions produce unclear images.

At a recent holography conference at Lake Forest College, holography experts from around the world showed off early examples of their work using a photopolymer film manufactured by DuPont.

"The hologram film is as clear as glass, with only the image to be viewed and nothing else," said Dr. Tung Jeong, a Lake Forest physics and hologram pioneer critiquing the new material. "There is no film grain or hazy background."

Early applications for the new material will include security seals, promotion materials and

computer screens.

[End quoting]

### PARTS GROW THEIR OWN CONNECTIONS

From *POPULAR MECHANICS* magazine, Dec. 1997: [quoting]

Many designers believe electronic devices could be made smaller if there was a more efficient way to wire components.

Chemists at Drexel University may have found the solution. They placed copper particles—similar to copper connectors—in a water-based solution and applied an electric field. The contacts sprouted wires and, minutes later, “grew” in a direction determined by the field’s shape. The wires also were finer than any that could be attached using conventional technology.

Researchers hope the new wiring technique will make it possible to create 3D circuit boards that are both smaller and more efficient than conventional multilayer circuit boards.

[End quoting]

The above two articles are about more wonderful technologies, but will the Elite allow them to be put to use for the good of mankind?

### OUR MYSTERIOUS MAN IN BULGARIA

His English was perfect.  
So was his timing.

From *ANGELS ON EARTH*, May/Apr. 1997, *Guideposts*, 39 Seminary Hill Rd., Carmel, NY 10512: [quoting]

Stephen and I held hands as the plane took off from Frankfurt, Germany, and headed east. We had left the world we knew far behind that January day in 1992. My husband and I had boarded this antiquated Russian-made aircraft en route to Sofia, Bulgaria, where we planned to adopt 13-month-old twin girls. Although we knew them only from photographs, we had already grown to love them. Now, after four long months, we were close to fulfilling our dream.

Fog shrouded Sofia as we approached the city. The pilot announced we would land in the small town of Plovdiv instead, 130 kilometers from Sofia, far from the hotel where representatives of the adoption agency were expecting us. Stephen saw the flash of worry cross my face and squeezed my arm.

The chaotic Plovdiv airport did nothing to ease my anxiety. Hundreds of cigarette-puffing Bulgarians pushed their way toward two overworked customs agents. We struggled to find a place in line. Everything seemed to be going against us: the language, the locale—and our luggage. Along with a small suitcase, we were carrying 11 large duffel bags full of medical supplies donated for the other children at the orphanage. I looked around frantically, praying for some kind of help.

And there he was. He would have stood out anywhere, this handsome man, well dressed and carrying an expensive briefcase. He motioned to us. “This is your place in line,” he said in perfect English. “Here, in front of me.” We happily complied.

We had been told by the U.S. Embassy that visas weren’t necessary to enter Bulgaria, but the customs agent demanded to see them. Bulgaria’s government was in transition; the laws sometimes changed overnight. We showed the agent our passports, and he shook his head. Had we come this close only to have to return without our girls?

Then the well-dressed gentleman stepped forward and spoke a few words in Bulgarian. The agent

immediately passed us through. Dragging our duffel bags to the Sofia bus. I glanced back at the man whose words had held such power.

After a two-hour ride we arrived in Sofia. The other passengers dispersed, leaving only us and our bags. A driver approached us. “Taxi?” he asked, quoting an exorbitant fee. What if he tried to charge even more, or steal our valuable cargo? I looked at Stephen. We were both thinking of the twins. What choice do we have but to get in the taxi?

Suddenly the man who had assisted us in Plovdiv was at our side, although he had not been with us on the bus. He proceeded to negotiate an honest fare from a couple of taxi drivers. We divided the baggage, and Stephen rode in one cab, our guide and I in the other. “What do you do in Bulgaria?” I finally asked. “I work with the government,” he said. “My name is Christos.”

At the hotel our newfound friend wished us well and then walked off into the foggy night. The trials of our trip were over. A few days later we were home with our twins, thanks to our mysterious man in Bulgaria. [End quoting]

I venture to say, there isn’t much mystery in your minds about who this man was.

### ARMY TO OPEN CHEMICAL WEAPONS DEPOT FOR BRIEFING

From e-mail from Angie Carlson <angie@connectnet.com>: [quoting]

Reply to: John Stark: Received this from a friend in Indiana! Feel free to send to other lists, etc.

Army Plans To Open Chemical Weapons Depot For Briefing (from AP) NEWPORT, IN.

Some 1,269 tons of an oily nerve agent so lethal a

few ounces could kill millions sits in steel containers among the corn and soybean fields of western Indiana while the Army works on a plan to destroy it. Officials planned to open the Indiana site to the media today for the first time in four years so reporters could attend a briefing on the military’s progress and photograph the one-ton cylinders of VX nerve agent.

The military doesn’t expect to destroy any of the 1,269 tons of the lethal chemical weapon in Indiana until the fall of 2003, because the Army must still finish a required report on how the process may affect the environment.

At the same time, the Army is preparing to search for companies capable of building a disposal facility at the Newport Chemical Depot 32 miles north of Terre Haute.

“We are preparing the package to go out for proposals for companies to bid on the facility, and were working with a team comprised of state and federal regulators to write the permit applications required under environmental laws,” said Mickey Morales, a spokeswoman for the Army in Aberdeen, Md. where deadly Mustard agent is stored.

VX is 10 times as lethal as the nerve gas Sarin used in a deadly attack in a Tokyo subway that killed 12 and injured 5,000 in 1995. The agent can be inhaled or absorbed in the skin and causes death by paralysis.

VX, which has the appearance and consistency of mineral oil was developed in 1952 and produced in western Indiana during the 1960s as a Cold War deterrent. It has never been used in combat but is listed in the *Guinness Book Of Records* as the deadliest substance known. [End quoting]

This article was mentioned in Commander Hatonn’s writing of 11/19/97 and was on our Telephone HotLine during the week. ~~✶~~

## Tapes, Transcriptions & Videos

Donations to cover the costs of tapes are \$4.00 for one tape, \$6.00 for two tapes and \$2.50 per tape for three or more, except where otherwise noted. Postage is included in tape prices.

Please send check or money order to: *THE WORD*, P.O. Box 1498, Tehachapi, CA 93582 or call 805-822-4176 if you have questions or you wish to use your Visa, Discover or Master Card.

If you desire to *automatically* receive tapes from future meetings, please send at least a \$50 donation from which tape costs will be deducted. We will try to notify you as your balance reaches zero.

*Special Order tapes are noted by \* and are not automatically sent.*

The following is a *partial* list of older items but including all of the most current meeting dates, with the number of tapes in **bold**, in parentheses, and mentioning if the meeting has a special focus:

8/17/96 (4) “Little Crow”; 8/18/96 (4) & 8/19/96 (3) Teddy from Canada & Commander Hatonn; 8/20/96 (2) Road Tour of Tehachapi; 8/28/96 (4) David Icke;  
9/1/96 (3) Norio Hayakawa; 9/8/96 (3) *JUDGEMENT DAY-1995*, a dramatization;  
9/22/96 (4) Gary Wean & Field Report From The Clays; 10/6/96 (3) Farrakhan in Canada;  
11/2/96 (3); 11/24/96 (2); 12/8/96(2) ; 12/29/96(2);  
2/19/97(4) David Miller Tapes; 2/23/97(2) Little Crow tape;  
3/3-4/97(8) Eustace Mullins & Cort Christie; 3/10/97(2) David Miller Tapes;  
3/16/97(5) Farrakhan Speech; 4/2/97(1) Cult Media Blitz;  
4/6/97(2); 4/7/97(2) *EXTRA* Interview; 4/8/97(2) Channel 29 Interview;  
4/13/97(3) David Icke; 6/1/97(2); 6/22/97(2); 7/20/97(2); 8/15/97(3)\*Corporation Lecture ;  
8/16/97 to 8/19/97(11) New Year Celebration meeting; 9/21/97(1); 10/19/97(2); 11/9/97(3).

# The Final Time Has Come

## PART V OF A SERIES

*Editor's note: For those of you who may be new to our readership, meet Gary L. Wean: he entered the Los Angeles Police Department Academy in 1946, after making a number of distinguishing contributions in World War II. Along the road of a brilliant police career, he eventually became Chief Investigator for the Ventura County Public Defender Office. Gary had contributed many articles to CONTACT, but none created a bigger stir than our Front Page for our 9/6/94 issue, when he wrote the definitive story called, "O.J. Simpson Frame-Up: Jewish Mafia Conspiracy For Race Riots & Revolution" which we have, by popular demand, been pressured to reprint on several later occasions.*

*The following is Part V of a new Series from Gary which began in the 10/28/97 issue of CONTACT.*

**10/22/97 GARY WEAN**

In Ventura County the Mongol Jews have completely taken over the judicial system and replaced it with their Mishna (Jew law).

The head Jew of the California State Appellate Court (three counties, Ventura, Santa Barbara and San Luis Obispo) is Hymie Blitzberg, aka Steven Stone. You cannot identify a Mongol Jew by his name only—they have switched to English, Irish and Scottish names. District Attorney Michael Bradbury and County Counsel James McBride are Mongol Jews closely associated with the top cocaine smuggler, Federal Judge Harry Pregerson. They have covered up for Pregerson's main Ventura County Cocaine distributors, Martin V. (Bud) Smith, Federal Commissioner Ben Nordman (Bank of A. Levy), his law partner Superior Court Judge Jerome Berenson, and lawyer-banker Stanley Cohen.

These people actually own the County Courthouse through their Ventura County Public Facilities Corporation. For handling the corrupt, illegal operations from the very beginning, McBride's payoff was a huge block of the Ventura County Public Facility Corp. bonds along with the block that the Mongol Jew judges got. These gangsters have stolen over 2 billion dollars from Ventura County property taxpayers over the last 25 years, and the people can get it back, every bit of it.

Lawyer George Benz, an elite Mongol Jew spy,

### **Editorial Policy**

Opinions of the CONTACT contributors are their own and do not necessarily reflect those of the CONTACT staff or management.

writes secret reports on the other county lawyers and their clients and turns them over to the FBI and ADL. Judge Hymie Blitzberg (aka Steven Stone) from eastern Russia is a high-level cocaine dealer under Federal Appeal Court Judge Harry Pregerson. Hymie is one of his own best customers. Snorting huge amounts of his own products up his nose, Blitzberg and his judicial associates have 'joyful coke' parties right in their chambers. This is when they make their most momentous judicial rulings.

As District Attorney Michael Bradbury was sending one of his Dep. D.A.s, Jay Johnson, on investigations out of the county, during these convenient periods Bradbury and Jay's wife Mindy Johnson, also a Dep. D.A., were conducting a torrid sex-affair. As near as can be determined, under the *Talmud* (Mishna, Jew Law), they were not committing adultery; whether this was just an obscene act and not adultery is not known—however, Judge Mindy Johnson had Bradbury's child in sin. As punishment for her sins, Judge Mindy should hustle her off-spring down to the biologist to see if her child has inherited Bradbury's deadly, racial identifying colon-cancer gene. Why an innocent child should be punished is hard to understand. Maybe Rabbi Michael Berk at the Temple Beth Torah in Ventura can explain. Perhaps he could start with the *Talmud's* Mishna (Jew law) in (Book) *Sotah, 26b* (this is a mind boggler for a Christian), "A man or a woman does not commit adultery in a sexual connection with an animal because that is merely an obscene act and not adultery." And "did the All Merciful prohibit a wife to her husband for an obscene act? No, she would not be prohibited to her husband for such an act." It is a question, did Jay Johnson leave town knowingly and willingly at Michael Bradbury's orders???

This formulates one great big question—why should innocent children suffer for the insanities of adults—why is pederasty (sodomy) of young boys and sex with young girls under the age of three years allowed in this country—well, it is allowed in the Mishna (The Jew law), and we are now controlled by the Mongol Jew judges and shyster lawyers who dominate our judicial system.

Does this indicate why the murder investigation of the little girl, JonBenet Ramsey is being sabotaged, because the Mongol Jew law is in effect? Do they really feel that the murderous sexual attack on the little girl was legal and the killer broke no law (refer to just a few of the *Talmud* laws herein recorded)? After all these months of investigation since the sex-murder of this little girl, it's obvious someone is interfering.

And here it comes, the schizophrenic, raging frenzy of the Mishna (the Jew law). The District Attorney of Boulder County, Colorado, Alex Hunter; his Dep. William Wise; a shyster lawyer William Gray; and JonBenet's parents the Ramsey's

are all tied in together in Jew-law operations, million dollar bankruptcies, loan company frauds with government agencies involvements, real estate manipulations and child molestings and murders. Shyster William Gray and D.A. Alex Hunter collaborated in sabotaging the murder trial of a man for the sexual beating to death of a little three-year-old boy. The killer only got a few years in jail.

You can follow this trail right to the highest politicians in the land: Neil Bush, Chairman, Silverado S&L; Michael Wise, Pres., Silverado S&L; James Metz, Chairman, Silverado S&L; Andrew Cuomo; Federica Peña; and U.S. President George Bush; then you will understand the power behind the cover-up of this little girl's sex-murder.

Read my book, *There's a Fish in the Courthouse*. Ventura County Dist. Atty. Michael Bradbury and the whore Judge Mindy Johnson sabotaged the case of a pederast who molested little girls. Judge Mindy Johnson, while having a sex orgasm on the bench, released this convicted 'sicko' and stated, "This defendant is just so charming and so manipulative that it would be difficult to convict him. Case Is Dismissed." And whoremaster Dist. Atty. Michael Bradbury refused to refile the charges against this dangerous, schizophrenic child molester and budding sex murderer of children.

This brings us down to the bare, hard facts: Christian's law or Jew Mishna law; who is running this country??

News reporter Steve Chawkins, who bills himself as a Star Columnist for the *Oxnard Star of David* news rag, wrote column after column denigrating and blasting me and my book, *There's a Fish in the Courthouse*. One thing got to Chawkins real bad. In my book I had exposed the Jew Crime Family. The Sicilians call their crime family the Mafia. The Jews call their crime family the Mishpucka. Chawkins went to his mother who is from east Russia and speaks Yiddish, and she told him, "Yes son, there is a Jew crime family; in Yiddish it is spelled Mishpocka. This is verification right from the 'Yiddish dialect' that there is a Jew crime family. Very few Jews still speak Yiddish except those from the area of Kazyr in northern Mongolia. Now, Steve Chawkins should go back to his mother and ask her about the Yiddish word Jew. She will explain that it is the name of Juda that the Mongols corrupted to their word Jew in the Century 700 A.D. when they converted to *Talmud* Judaism.

Steve Chawkins should also make a quick trip to his doctor to check his Mongol gene to see if it has been mutated. Out of deep concern and compassion for the rest of his Mongol Jew associates at the newspaper, the Beth Torah, the United Methodist Church, shyster James Reach, and those Oxnard librarians, Chawkins should tip them off to have their special genes checked.

The evil Mongol Jew shyster Stanley Cohen's identifying gene was mutated, and very swiftly he was gone. And don't forget that, when a Jew dies, he is dead; there is no hereafter like there is for the faithful followers of Christ.

I have written it many times; it is a rule that cannot be bypassed; to do so is fatal; you must know who your enemy is. They must be identified, each and every one of them down to the very last one before you can fight back. God has identified the frontline enemy for you, the so-called Ashkenazi Mongol Jew; they cannot disguise their DNA, their special gene. It is a colon-cancer gene that God can mutate at any time. Also a 'frontline' enemy is the so-called Sephardic Pharisee Jew; these are the real Christ Killers.

Then there is the 'hidden-line' enemy; this is the

insidious non-Jews who secretly made the decision to become a Mongolian Candidate. They are the Christians and Muslims who accept the rabbis' gold and commit treason against America and its people.

Do not confuse them with the Hollywood scenario of the Manchurian Candidate who suffered cruel physical and mental tortures to induce a forced mind control.

These Christian and Muslim traitors became Mongolian Candidates of their own free will, activated out of pure greed alone. They do exactly what the Mongol Jews tell them to do, no matter how vile or horrible a criminal act they command.

There is Repentance; that is up to God whether he will allow these treacherous, cowardly persons to repent in good faith and return to Christianity. Personally, I feel that most of them have already committed such evil, blasphemous criminal and immoral acts that not even God in all his benevolence can forgive. And there are the unrepentant Mongolian Candidates who refuse to give up the gold and political power the Mongolian Jews have given them under any circumstances.

We have all these enemies against us; we know who the Mongol Jews and the Pharisee Jews are. That leaves the Mongolian Candidates, the corrupt Christian politicians, judges, and most dangerous: the Christian clergy who have been preaching their evil lies to their congregations. They are the ones the people have trusted to give them God's Word.

For the Mongol Jews' gold, the pastors, reverends and priests, etc., have preached the blasphemy of Judeo-Christian dogma at the tops of their voices, "Mary is a whore and Jesus is a Jew (a Mongolian) and the Mongol Jews are God's Chosen People."

Some of these top, most notable Christian betrayers are Pat Robertson, Oral Roberts, Robert Schuller, Jerry Falwell and Ed McAteer, etc., etc. The gold and power these detestable traitors have accepted from the Mongol Jews to betray God and Jesus and deny their word to the people are astronomical.

Will these demagogues stand up on their pulpits and repent to God for all loyal Christians to hear? Will they confess and ask God's forgiveness for their vicious lies that Mary was a whore, that Jesus was a Jew Mongolian and not the Son of God, and that the Mongol Jews are God's Chosen People?

Are these deniers of God and Jesus so hooked on the Mongol Jews' gold that they are unrepentant and choose to remain in Satan's mold? If they choose this course, then they are our enemies and are to be shunned by all loyal Christians.

One of Oregon's U.S. Senators is Ron Wyden. It has come to the attention of Oregon's voters that, when sworn into office, Wyden had demanded that he take his oath with his hand on the Talmud, the Judaistic cult law of the Mongolian Jews. The Talmud is the Mishna, the Pharisee and Mongol Jew law that all Jews must follow and obey.

Phone calls were made to Wyden's office and questions were asked, such as, who was the government official who swore you in? Who else was present at this fraudulent oath-taking? When and where did it take place?

Wyden's staff members refused to answer and Wyden would not return the calls.

A question arises, is Ron Wyden a U.S. Senator with full authority to act in that capacity, or is every official act he has conducted null and void? Can newly elected Senators take their oath on the Sears

and Roebuck catalogue or a roll of toilet paper if they chose? Should the other 99 Senators remove Wyden immediately and replace him?

Not only has Ron Wyden been identified by God with his special Mongolian Jew gene, but he suffers from another Mongol Jew affliction, severe schizophrenia. His father and brother also have this devastating mental sickness. Mongolian Jews schizophrenics hold bizarre paranoid, delusional thinking and weird hallucinations which create murderous patterns, all of which they blame Christians for.

About now the Mongol Jews are shrieking in their synagogues, foaming at the mouth; they scream at me, "racist, anti-Semitic, persecution, discrimination" and every other damnable thing their sick minds can come up with—but do I persecute them any more than they persecute me??

I level specific charges against them backed by evidence and facts. All they do is scream lies against me and refuse to allow me to go to a U.S. Constitutional Court before a jury to resolve the issue. With their absolute judicial power, they simply dismiss me.

I cannot even write a 'letter to the Editor' refuting their lies. With their absolute media power they simply refuse to print it.

Again I ask, Who is persecuting whom? Read in my book, *There's a Fish in the Courthouse*, in 1987 I went to the entire U.S. Senate and presented facts and evidence of the crimes committed against America and its people. Read what they did, and in my book there is a list of each and every U.S. Senator who committed the cover-up. Most of these crooks are still in office. You can watch them on CNN, the Mongol TV, still covering up all their crimes against the American people in their Congressional hearings ten years later.

The U.S. Congress has financed and built Jew synagogues in foreign countries all over the world with U.S. taxpayers' hard earned money. All the Jew Senators, Wyden, Metzenbaum, Cohen, Lieberman, Specter, Schumer, Boxer, Feinstein, Levin, etc., etc., were behind this fraud, and the Mongolian Candidate Senators eagerly rubber-stamped it.

And there are the Patsies. The Mongol Jews love that old, evil Pharisee Judaist strategy where Aaron put all the sins of the Pharisees on the head of a goat and turned it loose on the World. This is what the Jews sic on the Christians. It is known as a scapegoat or a Patsy and is evilly designed to blame someone else and take the heat off themselves. The Mongol Jews take meticulous pains to set up a Patsy for every one of their wicked conspiracies. This is one of the tip-offs to look for when investigating. It is a fetish with them, their Modus Operandi that you can always count on; like clockwork, it is always there.

One of the Jews' latest Patsy set-ups is the 'Papparazzis' and the 'Alcoholic Driver'. Princess Diana and the wealthy Arab were a combination the Mongol Jews were scared to death of and feared it would gel against them. They hated the situation and determined that it must be removed.

But as I said in my book, evil people eventually get caught in the act. Right after the deaths of Princess Diana and the Arab, Prime Minister Netanyahu was caught smack in the act of another frenzied, murderous conspiracy. Two of his Mongol Jew thugs were captured attempting to assassinate their Arab victim in another country. It brought about international revelation of their bloody sect of Mongolian Jew fanatical killers.

Netanyahu has been operating under the advice of his close Mongol Jew associate—now get this,

## A treasonous judiciary... a secret Black Robe Cabal... so powerful, so evil, they make the Black Hand Mafia look like kindergarteners!

Nēfanyahu's accomplice Arthur Finkelstein calls himself an American Jew. Arthur Finkelstein, a direct descendant of 'Evil-Eye Finkelstein' (aka Finkel), and Netanyahu were getting ready to put an Evil-Eye Whammy on the World with this assassination, but it back-fired on them, 'Big-Time'.

Patsies: In the assassination of Pres. John F. Kennedy, even the U.S. Senators admit that the [Warren] Special Commission's final decision of the 'Single Bullet' was a fabrication to fool the people. So even the most unenlightened know that Lee Harvey Oswald was a Patsy. The entire operation was set up by Menachem Begin, a terrorist, bomber and killer, in a conspiracy with Los Angeles gangster Mickey Cohen and Federal Judge Harry Pregerson, all Mongol Jews. The entire assassination was plotted and controlled from Hollywood and Oxnard, California. There is propaganda that a corporation called Permindex and the Mossad, aided by the CIA, carried out the assassination, but that is not true. It was a Mishpucka (Jew Crime Family) operation from beginning to end, and the Mafia (Sicilian Crime Family) had no hand in it.

Sirhan Sirhan, the alleged killer of Robert Kennedy, was a Patsy.

All the evidence is not yet in, but we will all learn before it is over that Timothy McVeigh was a Patsy for the Mongolian Jews.

Now I ask you, all loyal Americans, put on your thinking caps, think deep, because we are going to expose the Mongol Jew Conspiracy of World Control and the secret of their success up until now. Their secret is so simple that most of the Christians have simply overlooked it.

Adolph Hitler was the Jews' biggest Patsy of all. Just as the Mongol Jews had financed Nicolai Lenin in the Russian Revolution, so did they finance Adolph Hitler, but so did they also arrange for his demise. (Lenin was not a Patsy; he was a full-blown Mongolian Jew idiot.)

The financing of Hitler was the 'take-off' on the Mongol Jews 'second biggest hoax' of all time, the so-called 'Holocaust'.

The Mongol Jews knew the Germans had to be kept beaten-down in poverty, but they had failed to accomplish this in the aftermath of the Russian Revolution and WWI. Even though starved and deprived of their property and money, the sturdy Germans were making a come back. The Germans knew the Mongol Jews were stifling them, with their control of the banks, the judiciary, the teachers in the public schools, elected and appointed political jobs, the newspapers and radio; this was the secret of their power, control of everything.

The Germans were beginning to protest and forcibly removing the Jews from all these powerful controlling positions they had usurped. Naturally the Mongol Jews screamed racism and anti-Semitic to high heaven and shrieked the propaganda that they were forever being persecuted for no other reason other than they were Jews.

The Jews knew one thing Hitler didn't realize. As world-wise Internationalists, the Jews knew that, regardless of the most mighty military machine Hitler built, he would still be unable to conquer and hold Europe because they had America and Britain lined up. They would manipulate and bring about Hitler's downfall and the Jews would come back more powerful than ever.

But at the same time the Germans were removing the Jews, France also exploded against the overwhelming domination by the Jews' control over the French Government.

Since the end of WWI, the Mongol Jews had moved in and usurped the governments of every country in Europe, except that in Spain and Portugal, the Sephardic, Pharisee Jews (the real Christ killers) controlled the government and banks since arriving shortly after they perpetrated the Crucifixion.

In France, the Vichy government had passed strong measures, the law of October 3, 1940. It barred the oppressive Jews from elected office, and from responsible positions in France's civil service and judiciary where the Jews had been conducting horrendous corruptions. They were removed from the armed forces where they had diligently undermined the military institutions, and from public school teaching and culturally influential jobs such as newspaper editors, directing movies and radio programs where their vicious propaganda machine of chaos and destruction had become unbearable.

Terrified at their losing control, Mongol Jews shrieked 'anti-Semitism, persecution and discrimination like unearthly banshees; they could be heard all over the world. The French and Germans were hitting the Jews a mighty blow right where it hurt; without those controlling jobs, they had no more power than the Christians they were beating to death had. Hollywood Mongolian Jew moguls began cranking out propaganda movies about the poor mistreated Jews and falsely promoted them as 'God's Chosen People'. The American Christians lapped it up as they eagerly joined WWII to 'save the Jews'.

Approximately 50 million people were killed; five-hundred-thousand American servicemen were killed and nearly 2 million seriously wounded and crippled to save these evil plotters and their government jobs throughout the world.

Europe was devastated, cities and towns levelled, but the Mongol Jews came back stronger than ever, and now they have their phony 'Holocaust' to beat the world to death with.

Just before WWII the Mongol Jews, most of them illegal aliens, were considered to be menacing enemies of Germany and France and were sent to camps. This was in the very same manner that President Franklin D. Roosevelt sent the Japanese in the U.S. to prison camps because he proclaimed them to be a menace to the government.

The Mongol Jews knew that, if they were removed from all their government positions of power in Germany and France, it could spread throughout every country in Europe. Such a movement and trend causing them to become politically powerless could utterly destroy their carefully laid conspiracy to control the World.

In 1997 we are in the precise predicament that Germany and France suffered in 1939-40. The Mongol Jews in America have infiltrated and seized control of the banking and finances, every elected office and appointed positions, and responsibility in the civil service, the judiciary, the armed forces, all the culturally influential jobs such as teaching in public schools, newspaper editors and reporters, the television, movie and radio industry. This is the Jews' secret to power; very simple, you just move in and take over everything—and at the moment that is precisely what they are doing, stealing everything in sight—they are eating America alive.

But just imagine what would happen if America passed laws to save itself like the German and Vichy governments did in October 1940. The Mongol Jews would finance our 'Leader' Pres. Clinton like they did Lenin in Russia and Hitler in Germany and they would declare War on the American people. This has

already been done, and very cleverly Robert Rubin and Alan Greenspan use our own money to finance our destruction.

Willie Clinton refuses to reveal any of his medical records so it is unknown if he is a Mongolian Jew or a treasonous Mongolian Candidate.

President Clinton by appointment has filled every crevice in government with a Mongol Jew, and now has sent Felix Rohatyn to France as U.S. Ambassador. Rohatyn is a billionaire Wall Street operator with an outfit called Lazard Freres and is tighter with Rubin and Greenspan than three homos in a San Francisco bathhouse.

In 1987 I gave the U.S. Senators information and evidence of Rohatyn's corruption. Prior to that, on October 15, 1982 Pres. Ronald Reagan, the Great Free Enterprise man from Hollywood, had signed the Garn-St. Germain bill that deregulated the S&L and loan institutions. This opened the floodgate, turning a horde of savage Mongol Jews loose to rip and tear like ravaging sharks feeding on the carcass of America.

Scum bag Jews like Michael Milken, Ivan Boesky and Felix Rohatyn stole more than \$500 billion, more like a trillion, that American taxpayers have to pay for. When the gangsters began to get arrested and indicted at the Stock Market for their frauds, panic struck the Jews because it was instantly visible to America that all the thieves were Jews.

The wealthy, influential Felix Rohatyn, scared to death that the honest citizens would revolt against the Jews' depredations, ran to his buddies the Mongolian Candidate Senators. Appearing before their hastily formed Committee, Rohatyn whined and shrieked his fears and anguish that, because all the people caught stealing were Jews, there would be a vicious backlash of anti-Semitism against Jews. There were secret meetings of top Stock and Bond Jews from New York to Hollywood; their feverish topic was, "Great Juda, oy yoy yoy, we can be ruined if the people realize what we've been doing."

But the Jew gangsters and their Wall Street were saved; the Mongolian Candidate Senators had come to their rescue and it was covered up. And the arrogant Jew media spread their defiance to all Americans, as the Jew TV hucksters and newspaper editor hacks let the Jews know that it was completely safe to continue their blood-sucking. A.M. Rosenthal with the *New York Times News Service* wrote, "There is absolutely no need for the Jews on Wall Street to feel called upon to explain the number of Jews who are involved."

And Alan Greenspan, the 'renowned, respected' Jew economist (according to the Jew media), a paid consultant for Lincoln S&L owned by shyster lawyer Charles Keating, wrote a letter to the FHLBB, (Federal Home Loan Bank Board) and FSLIC (Federal Savings and Loan Insurance Corporation). In this letter Greenspan lied and covered up for the Jews, causing the government agencies to stall their investigation while the Jews stole another \$3 billion dollars before Lincoln was shut down.

This very same Mongol Jew Alan Greenspan is now head of the Federal Reserve Bank, where he controls all of our money, and he and Robert Rubin manipulate the World with their machinations—of course they have the help of Secretary of State Madeleine Albright who just discovered she is a Mongol Jew and not a Christian.

At this present time there is trouble in France—like 60 years ago, the people are up in arms, protesting against the Mongol Jews' oppression and

control over their government and banks. And here we go again; remember, with the Mongol Jews everything is connected. To straighten out the French people and Arabs, Pres. Clinton appointed Felix Rohatyn as Ambassador to France. His certification by the Mongolian Candidate Senators zipped through with no problem, even though Rohatyn lied right to their faces. Rohatyn claimed he was a Jew hero of the 'Holocaust' and the 'ovens' of death and was a victim of brutal German and French torture—an outrageous lie. Felix Rohatyn was born in Austria and his parents were extremely rich (how come so many Jews in Europe were so rich if they were so constantly persecuted as they claim); they left Austria for France in 1933. They left France in 1940 before the Germans arrived. They went to Brazil and in 1942 they arrived in New York. Rohatyn's lies are just more of the Jews' everlasting 'Holocaust' crap.

But regardless of how bad the Germans and French purportedly hated and tortured the Rohatyn family, they still allowed them to leave Europe with all their fortune (doesn't make sense does it?). In New York Felix had a fantastic job waiting for him with the Mongol Jews' financial institute of Lazard Freres (not too many American-born Christians get those jobs with the Wall Street Jew operation).

Now we get back to assassinations. In France the U.S. Ambassador Rohatyn got right down to his mission—he blackjacked the French citizens into submission with America's might. Soon after Rohatyn's arrival in Paris, Princess Diana and the wealthy, influential Arab were dead. Prime Minister Netanyahu and his buddy 'Evil-Eye Finkel', flush with success right after the assassination of the Princess and Arab, then attempted to assassinate another politically powerful Arab in another foreign country. But alas, their luck has run out and they were caught in the act.

And now, I know you haven't forgotten A.M. Rosenthal, the Mongol Jew Editorialist with the *New York Times* who insolently praised the Wall Street Jews' thievery and his brazen-faced, arrogant assault against the Christians. Well, Rosenthal is back; with big black editorial 'headlines' he praises Prime Minister Netanyahu and his murders—'ASSASSINATION JUSTIFIED'. Rosenthal claims it's OK for Jews to murder people they don't like. Rosenthal claims to be an American; yes, he lives in America, but we have to remember that he is actually a Mongolian Jew, and they don't recognize the laws of the country where they reside. Can you imagine the unholy whining and shrieks of the Jews if a real American reporter exhorted the murder of a Jew just because he didn't like him???

But, now, once again the Mongol Jews have a big problem in France—the popular Maurice Pampon, an 87-year-old French patriot has been 'set up' by Ambassador Felix Rohatyn and the financially and politically powerful Mongol Jews.

In 1939-40 Pampon was an official of the Vichy Government when they passed the law to remove the corrupt, oppressive Mongol Jews from government control over their country. Pampon is a living symbol of this 60-year effort by the French patriots to 'take back' their country. A symbol such as this is terribly frightening to the Jews, and they intend to kill him or put him in solitary prison. The Jews claim that Pampon sent 1,200 Jews to prison camp, but again, President Roosevelt sent 100,000 American Japanese to prison camp, but I guess we are supposed to remember that the Jews are the only people who have ever suffered. But in 1939-40 the Germans and French people knew what was wrong with their countries; the Mongol Jews were eating

them alive, and they wanted to stop it.

One of the Mongol Jew lawyers prosecuting Pampon is Arno Klarsfeld; he claims to be a 'great Nazi hunter'. Klarsfeld shrieked at the Judge who allowed the 87-year-old Pampon to remain out of jail during the trial because of his flimsy health. A Mongol Jew reporter from the *New York Times News Service*, Roger Cohen, wrote the slanted article. The Mongol Jews will not allow any trace of disobedience to their power to live; it must be destroyed, no matter how long ago it happened. The Christians must look at the Jews' corruption the same way.

Prime Minister Netanyahu's luck and Finkel's 'Evil-Eye Whammy' power are disappearing like water through a sieve. Another murder has just occurred that can totally destroy the Mongol Jews number one hoax that they are Biblical descendants, 'God's Chosen People' and thus have a claim on Palestine and Jerusalem, the Holy City.

In Montgomery County, Maryland, a 17-year-old Jew, Samuel Sheinbein, killed Alfred Tello, a nineteen-year-old. Using a power saw, he cut off both arms and both legs; then with propane he burned the body in a vacant garage. The coroner believed the victim was still alive when burned. Sheinbein fled to Israel, and the Israeli Mongol Jews refuse to hand him over to the Maryland authorities.

This Jew law is the major crux of the entire Mongolian Jew hoax; it could open the door for the light to shine on the whole mess.

Purportedly Israel was created as a refuge for persecuted Jews and the issue they claim is of citizenship and belonging. That is the keyword, 'belonging'. It prompts the deciding question, do the Mongolian Jews belong in Palestine?? With the knowledge that God has made so perfectly clear to us, the answer is an unequivocal, resounding NO!! The Mongol Jews claim the 'Right of Return' and that is where it falls apart completely, because how could the Mongol Jews return when they had never been there in the first place? They are total conspiratorial imposters. The Mongol Jews have worked the biggest and longest-running scam the World has ever known.

Samuel Sheinbein is the big question that remains—is he a genuine Holy Land descendant or a Mongol Jew?

Well, God has handed us the key, and he expects us to use it—if we don't take actions as Christians, we are denying God and his Son Jesus Christ.

With DNA, the key we have been handed, the 'Jew Question' since Century 700 A.D. will unravel in its entire sordidness of murder, assassination, robbery and usury, etc., etc. All the District Attorney Robert Dean of Montgomery County, Maryland, has to do is get a DNA report on Sol Sheinbein and determine if he is a Mongol Jew—if he is, so is his son Samuel, and if Samuel is a Mongol Jew, he doesn't 'belong', or have the 'Right to Return' to Israel and neither do any of the Mongol Jews.

The assassination of Prime Minister Rabin was the opening bell of the first round of the Civil War ready to explode in Israel between the Ashkenazi Mongol Jews and the Sephardic Pharisee Jews. It is a struggle for power between them.

The word Jew actually has no historical or true meaning of anything. Originally it was nothing more than a bastard corruption by the Mongols of the word Juda to their pronunciation Jew when they were converted to Judaism in Century 700 A.D.

But for lack of anything better, they will continue to be called Jews. The grief they have created in the world is about to be compounded

beyond belief. Any Civil War and massive destruction the Jews precipitate in the Middle East will explode with fury in America—we will be drawn inexorably into it, and for the first time since the *U.S. Constitution* was enacted, there will be terrible war, hell on Earth, death, fire and destruction of our own cities on our own shores.

"In all your dwelling places the cities shall be laid waste." *Ezekiel 6:6*

But Jesus has promised those who remain faithful to him, "Because you have kept my word of patient endurance, I will keep you from the hour of trial (Tribulation) which is coming on the whole world to test the inhabitants of the Earth." (*Rev. 3:10*).

In the U.S. there are between 40 & 45 million Jews—the Jews will scream and deny that for thirty years the Jewish Defense League has been training a standing Army of heavily armed Jew Militia that has no concern for America or its Christian people; they are trained in warfare to protect Jews only and to kill everyone in their way.

They are armed and trained to a point that they would overwhelm and smash within a few days the local American Militias, who have been so demoralized and demeaned and infiltrated by Jew spies that they are not even a house of cards. What God has cut out for the Christians to do will not be easy because the Mongol Jews will not give up any of the loot or power they have stolen without creating WWII. With the knowledge and strength God has given us, it can be done without fire and destruction and deadly upheaval.

As I am writing this Report to the People, another serious event occurred in Salem, Oregon. It involves a Jew teacher at the Sprague High School and the South Salem High School.

An organization called "Volksfront" allegedly circulated fliers in Salem, Or., regarding the Jew subject. In the *Portland Oregonian* October 19, 1997, their Editorialist branded them as being "racist fliers", but for some reason the editor did not state one word of what the 'flier' said except that it was 'racist' by encouraging those interested in the advancement and survival of the White race in North America to join Volksfront.

I say allegedly circulated by this 'Volksfront' organization because I have no knowledge personally of this organization or that it even exists. I have no knowledge of who printed the fliers—I have not seen one of them and know nothing of what it says or who distributed them.

But in their editorial the *Oregonian* quotes a teacher, "There are a few things that get me to react and this is one of them. It's a slap in the face of what you try to accomplish each day." But this quoted teacher refuses to state his name. The Jewish teacher's home allegedly was targeted with fliers and the *Oregonian* newspaper stirs up race riot and chaos by encouraging the Jew teacher's neighbors to plan rallies to discourage White supremacists from trying to gain a foothold in South Salem. At that point of the *Oregonian's* pot-stirring, the neighbors had no idea of any of the facts or who or what was behind this incident.

If these neighbors would go back to the Salem school incident, where the young boys tried to kill the little girl, and ferret out what and who was behind that, they would be much further ahead than letting the *Oregonian* suck them into race, riot and chaos.

Salem police Cpl. Jack Janssen said, "There's little authorities can do because the *First Amendment* protects the fliers as free speech."

Janssen leaves it at the point where it sounds

like a crime occurred and the police are helpless to investigate the culprits. But what he really means is that no crime occurred and the police have no authority to investigate.

This entire incident relates to the French, 'Pampon' trial I have just written about and the 'Jew Question'.

I ask Cpl. Jack Janssen to reveal to the public that one of first things a policeman has to learn 'on the job' is that there are two sides to every story and it is his duty to check out both sides before drawing conclusions or making accusations.

I ask Cpl. Jack Janssen to answer this question in relation to the Pampon case in WWII. You are a policeman in Salem, Oregon; President Franklin Roosevelt issues a Presidential Order declaring the Japanese people in the U.S. to be a menace to the country.

Your Superior, the Chief of Police, orders you to pick up a Japanese person and put him in jail where he would later be sent to a prison camp. Instead of obeying the Chief's order, would you immediately organize and plan rallies by the Salem people to remove the Chief of Police and defy the Presidential Order? And what would happen to you and your job and your family if you took this course?

Please don't answer with "Well, these are different times, things are different now," or other such silly nonsense; just state the facts.

Nothing is different, it is the same old problem that has existed for 2000 years.

[To be continued.] ✂

### From Doris Ekker

# Coming Up For Air And Other Insights

11/18/97 #1 DORIS EKKER

May I please editorialize a bit? I have only used up one of my annual "twice permissions" to write on my own account and thank my beautiful friends for all the wondrous love and joy they have sent this year. I am totally filled with laughter at some of the things which come back to me, like the beautiful letter that came to "Dirus". Then, there was a lovely note about my new name which I had

apparently affixed to a note. No, it is not a new name, it is simply that my right hand didn't know what my left hand was doing and was on the wrong typewriter keys.

I chuckled as I recalled an Art Linkletter session with his little kids saying the darndest things. The little boy was just turned six and it was only a few days before Christmas and the subject got, somehow, around to race. The boy said he was Jewish and Art asked him, "How do you know that you are Jewish?" Answer, with total logic: "Because my favorite gum is Jui-cy Fruit."

Art: "Oh, then do you get a lot of that in your stocking on Christmas and do you have a Christmas tree up and ready?" Reply: "Oh sure, because everybody knows you have to have a tree to grow packages."

Art: "Well then, are you a believer in Santa?"

Answer: "No, I'm a Catholicism Protestical." (!!!)

It makes you wonder, doesn't it? As humans we lose sight, totally, of ourselves and our directions as we hang onto that which is physical and manifest upon our stages of experience.

I also hang onto that adage that "God Loves YOU!", and "you" in first person is "me", I choose to believe.

**GOD PUT ME ON EARTH  
TO ACCOMPLISH  
A CERTAIN NUMBER  
OF THINGS.  
RIGHT NOW  
I AM SO FAR BEHIND  
I WILL NEVER DIE.**

Calvin and Hobbes by Watterson

With all this KNOWLEDGE in full-blown acceptance, I know there will always be a reason, a logical reason, for everything that comes along as long as I hold truth, honor and knowing at the head of my directions and actions. I don't have to complain, nag, bitch and moan over anything. *This doesn't mean, please, that I don't do these things; it is simply that I don't have to.*

Am I a messenger? Well, in that I type a lot I suppose the "message" manages to come through—but no, I do not actually consider myself to be much of a messenger—just "a" (among zillions of) little observers. HE is the Messenger, and in that realization I do not have to be perfection to serve HIM. Every moment of the day and night I try to always recognize that THE Man said: *"I am the way, the truth, and the life. No man cometh unto the Father but by me."* John 14:6

It took almost a lifetime of foolishness to figure out what was meant here by that recognition and it surely makes life a lot easier for me. I marvel that it takes so long and so much trouble to finally recognize the point of this journey.

Was this "man", Jesus—THE WAY? No, that is not what he said. He said that through the CHRIST way was the only passage to our Father. And now, we don't even REMEMBER the way.

I realize that I can now say, "Except through me you cannot realize the gifts of The Father." It has nothing to do with "me"; it means that except through the directions, instructions, truth, light and life can we recognize that we even have gifts. Then we must reach out beyond ourselves to perfect and bring to honorable conclusion those gifts as intended for our return passage unto the Father. [Doris, 11-18-97]

With this statement made, I can only surmise that I will live long enough and receive enough guidance to endure and see to it that our mission is accomplished in spite of everything the adversary can toss in our faces. Watching and marveling over "miracles" has NO MEANING; we must create the miracles for same to have any value, any meaning or any realization.

Am I now putting myself above others? No, for I am only ONE of the myriads of speakers, receivers, holders of gifts great and small, and only a tiny fragment of the ALL which shall prevail. I am so grateful to have come to realize my purpose, my mission, AND MY RESPONSIBILITY. Wouldn't it be fun to come to know just HOW LONG I have searched and blown it? And, if we have experienced through the eons of time and space, why is remembering so elusive? Perhaps it is because it is not what you were but, rather, what you ARE that has meaning if there should be a "will" be.

Without putting down any person or persons who have come through this way and shared a bit "in love" with me, I am grateful and hope that I have offered back some measure of meaning of the term, "love". However, to be in love is not the same things as a soul being "IN LOVE". I have no way to offer back unto the One who keeps me WITHIN LOVE to ever bring more than a pittance back in return.

One of the first questions always asked of me, even from such as Shulman of EXTRA is "But, why do you do this?" My only response could be: "Do what?"

I know what people mean to ask, but I can't ever seem to respond with other than something that seems trite and unworthy, and since truth and goodness seem to make everyone else quite uncomfortable, the subject is usually ended pretty

quickly. But, you see in the person's eyes that they have heard you and they, too, will never be so sloppy in their presentations, again. I watch EXTRA as often as I can and I find that hardly a segment passes, when the subject Mr. Shulman covers is important, that he doesn't phrase something Commander Hatonn told him "that" infamous day in our little borrowed-for-the-occasion multi-purpose room.

It was decided to never run a rebuttal to the original international story they ran, which was total fabrication, because "the subject is simply too great to allow further confusion by those who can't see or hear." They will help us in legal actions against those who set up the whole encounter but respect compels them to leave, at the least, Dharma alone. He went to the parking lot to do his "lead-in" and it was starting: "Everyone comes to an idea or a story with skepticism—BUT..."

Following the encounter, we understand the CIA and FBI both had major meetings of top-level entities and the orders came down: "LEAVE THEM ALONE". You have to understand that only WE don't understand the magnitude of our place in this play. "They" do know and they know the agreements and "they" make every effort to simply place higher secrecy covers on the LEAD player(s). I don't even rank high enough for a bother to tuck me in at night!

We try to live every action so that we neither, further, get "tucked away" for some blunder. And, we note the adversary's team is simply collapsing into a heap of worthless garbage.

I find myself wondering what it must be like to meet God at the end of a journey such as Ed Cleary, ex-Priest, had to face [upon his transition, 11/10/97] in the confrontation of that which IS and has recently been perpetrated by him with his so-called "new friends". He once told me in great humor that "I have just now learned to feed myself; it was nice being King." I wonder what it was like recognizing wrong intentions and directions when standing face to face with THE MAN OF HIGHER UNIVERSAL BEING. I'm sure that it was wonderful, for God has nothing save forgiveness and HE doesn't judge—so we make our own contracts and know what kind of sentence we next have to serve if we blew parts of the prior one. And Ed? Well, I assume he realizes that whatever negative "stuff" he dumped onto us will be among our greatest learned lessons for use as we move on. There was no crowd to honor his life—he was ultimately ALONE as to human friends—if there was even ONE. Even his care was a "paid-for" undertaking and the heart is saddened at the loss for I do not like perceiving that anyone has to have lesser that I might have my lessons, and yet, how else do we ever get our lessons except through the relationships of that which IS and is presented in more than one observation platform? If no one states their misunderstandings and "what went wrong" how can we correct even so much as a business presentation? And I have learned that when people try every way imaginable to get whatever I have, even if I can't see anything, then I have to realize that I have something THEY WANT.

Since Spiritual Truth is rarely what I assume people want in this world play of "getcha" and "get it", then I have to, again, assume that what I hold they might well have in order that we can move along in our own special direction under and through God's way. And, indeed, we set about discerning and judging just how best to offer, with bonus shares, that which they seem to be trying to steal. They can jolly well work out their own final

and ultimate realizations. All we have to do is act with integrity and within truth and honor and we shall have that which is needed for ultimately concluding our own intent of a "better way" for our having passed, again, THIS way.

Is "it" slow in coming? Only to us does it seem slow for we are impatient and, once seeing "the way", we are annoyed with everyone else who can't seem to grasp a meaning outside themselves and their centralized worlds of realization.

Can we do and accomplish that which is given us to accomplish? Of course; it can't be otherwise. How do I KNOW? Because, friends, if "I am the way, the truth, and the life, no man cometh unto the Father but by me." And, if the only ULTIMATE focus or purpose of MAN is to return to and within "the Father", what other assumptions are there to accept save that this SHALL BE DONE. This is not religion or pious prattling. It is factual truth beyond religious doctrines laid forth BY MAN for his own better status in power and ego. And moreover, I have no right nor wish to thrust my knowing upon your believing.

I have also come to know that my "dying" will not relieve me of my contract nor of my commission accepted. Perhaps when we all realize this one truth, we can better work hand-in-hand to accomplish goodness upon this place. My realization is that when "me" is working and praying only for "thee" and "thee" is only doing the same for "me"—then and only then can we accomplish ANYTHING, for until "thee" is more important to "me" than is "me", we can't progress off dead center of self.

I have recently given much thought on the lesson from Little Crow who speaks about "breath" being "life" in this dimension. When you can't breathe, it becomes very important, these little words. I have, as I have been more and more deprived of "breath", come to realize that those ACTIVITIES of living ARE NOT THE SAME THINGS AS LIFE. I have learned more about "life" and "living" than in all my running about hither and yon thinking that spinning on the treadmill was the purpose of being somehow "alive". No, running around is but an effort to come to grips with "death" as we erroneously suspect it comes to pass. But, friends, GOD HAS TO HIT US, USUALLY, WITH THAT 2x6 to even begin to get our attention!

I can't run the local marathon for any good cause—but nothing stops me from running my fingers over the keyboard except pure laziness. I don't even have to work up a sweat or breathe deeply to click away on these new-fangled print machines. In addition, the plus of not being able to speak so much non-stop is that I find far fewer of my own feet stuffed in my mouth. Might we all have such a respite in our journey!

I now know something else of great importance, and that is that we do not need go back to the very meagre basics of living to survive and grow—we only have to go back to the Spiritual Truth of the CONCEPTS of basics. And, further, we only have to seek out that which holds the basics for our use and create a way to again accomplish the "impossible" from that which is ALWAYS POSSIBLE. GOD WILL ALWAYS PRESENT THE "POSSIBLE"—NEVER THE NEGATIVE ASPECTS OF NON-CREATIVE IMPOSSIBILITIES.

I don't need to write a book here and I realize that over the years I have grown and I have been that open book which all of you see more openly than can I for we have walked long together in agreement and disagreement while we struggle to accomplish whatever we perceive is our task. I can honestly

report, though, that I now KNOW God loves me and God loves you—AND LOVE NEVER HURTS OR DESTROYS—NEVER. So, I also KNOW that when we stop perceiving every blemish as a big deal of God's punishment, only then can we let go enough to succeed in those "impossible" games.

Another secret I will share is that, were I feeling better and could breathe normally, I would NOT be at this keyboard for I perceive so many other things to be done as to stagger my own mind. Nay, my job is HERE—AT THIS KEYBOARD—for this is the ONLY way the instructions get past my own fingers and brain. If I KNOW and I do not share that knowing, then I have lived selfishly and totally in vain. This becomes a hopelessly lost world ONLY IF WE ALLOW IT TO HAPPEN.

I see all the loving things people send to shore up my hurts and the love expressed in everything from cards to flowers and I am overwhelmed for I know it is not to a lady named Doris; it comes to a servant-in-arms and in coalition with the senders of those flowers and they say to me: "Come on, get up off your self-pity and let's get on so we 'each' can get our jobs done." Some things sent are so precious and have such meanings to only the sender as to shock us into realization that we are ALL in this, equally and together. We hold those things in safety against the day when abundance is about us and the "things" can be returned or kept as precious reminders of the true value of our passage. We only

have lack of abundance in a measure that we create to limit our growth. I choose to have no more limitations for I hold to the first portion of the GREAT LESSON: "I AM THE WAY, THE TRUTH, AND THE LIFE...". In this are ALL THINGS MADE POSSIBLE.

It is suggested that I am sounding like a preacher of some kind—if I had a "religion". So, therefore, I do religiously have a Spiritual reality which is ok with me. I am appalled at the great numbers of people who make religion a career of some kind. Revelation doesn't "just happen", except as insight, and those who pander to the unsightful are lower than criminal to me, in my own estimation. They tout that which they are "fed" to glorify some doctrine or other—while God is left out in the cold, outside the heart of the so-called church which claims HIS name.

May I always accept the gift offered unto me that I can then take that gift and figure out what I might do with it to better serve. It always works, so I wonder at our own futile attempts to deny it.

So, do I fear God? Apparently in some measure of human misunderstanding. But I realize that I only RESPECT God for there can be no fear in TOTAL LOVE. I accept—HE LOVES. I realize that I, like you, can only be that which I AM, and to be more I must learn and come into knowing. If, though, I accept that when the student (me) is ready, the teacher (HIM) will be present, accounted for,

ready, willing, and able (with that 2x6). I come now to realize that I (WE) can no more fail to become that for which we are destined than can the mighty eagle become a sparrow.

I do not wish to "come unto the Father but by..." for, if I would choose another route, I would not reach THE Father Whom I so surely seek. I would remain among the hapless seekers of the generations who miss the boat every time it sails.

I will go now and I think I might meditate a while as I realize that my Teacher wrote my lesson for me—AGAIN. In that quiet place I shall be shown the WAY, the TRUTH and the LIFE, and we will be instructed on our next actions to make sure we accomplish the worthy goals we have jointly chosen to share in this journey. You who know me KNOW that I am nothing and that you are nothing—BUT TOGETHER WE ARE BEYOND ALL MEASURE OF ABILITY OF AN ENEMY TO BRING DOWN. That realization makes it clear that IF NOT ME, WHO? And, if there be "me", there is a "you" and among us—we have it ALL. It is simply universal LAW.

Let us make this the year of the COMING AGAIN OF GOD AMONG US for it takes me and it requires YOU. Can we not make GOD a finalization of all that is goodly and stop allowing the term to simply be a prefix for "damn"? Why must we turn the wondrous perfection of the universe into a gutter-being to make our egos be able to function in this world of physical misfits? GUNS DON'T KILL PEOPLE—PEOPLE KILL PEOPLE AND THAT LOVE OF KILLING IS THE DESTRUCTION OF OUR SPECIES.

I shall walk a bit taller this day because of this lesson shared and, perchance, breathe a little more deeply (pun intended), and in that deeper breath of life perhaps see a little farther, and in that larger vision perhaps God shall show me the way! I am quite sure that the CHOICE is going to be mine and that I shall have to confront that choice, myself and myself alone—AS HE AWAITS MY CHOOSING AND DECISION.

I think that on my tombstone it will read: *WHAT IN THE WORLD TOOK YOU SO LONG?* It should not have required a rocket scientist to figure it all out—but it did, and all I can do now is move on and get the job done. Do I fear God? No, but I am terrified in fear of everything OUTSIDE OF GOD. So, if you see me hanging on for dear "life" in that bubble of invisible shield, come on in because I will make room for you—I will not move out for you. I will live for you and for God; I am unwilling to die either for you or for that which would be a false God who would even ask such a choice.

But for now, and perhaps more important to the weary reader, I shall close this lecture to myself. Thank you for your indulgence and sharing a bit of a coffee-break with me. I will remind myself that you were not actually a "captive" audience for you could have quit reading anywhere from the first word onward.

May the Light that guides our way be THE Light so that we never fall nor wander from our task in point.

With any kind of luck, for you readers, this will be my final personal time-grab for this year. D.J.E. 

## GAIACOL

GAIACOL is a combination of colloidal silver, trace colloidal gold: This combination of ingredients has produced a product that is so high-frequency and potent that it could quite possibly be the solution to our ongoing fight against the new antibiotic-resistant diseases that we face today. Colloidal silver was used extensively and very successfully against bacteria, viruses, fungi and the like before the advent of the first antibiotic, penicillin. The many uses of colloidal gold were documented for the restoration of health as early as 1885, and gold was noted for its ability to calm and harmonize the emotional body. Once the chemical companies began manufacturing their endless array of antibiotics, silver and gold were no longer looked to for treatment. However, the antibiotics have had increasingly less effect on the more resistant viruses, fungi and parasites. Now we face a new generation of bugs that are completely resistant to any antibiotics due to antibiotic over-prescribing and resultant survival-of-the-fittest microorganisms.

Research has demonstrated that colloidal silver is non-toxic to humans, yet it allows no known disease-causing organism to live in its presence. With the addition of trace colloidal gold, the frequency of GAIACOL is remarkably enhanced to facilitate the demise of these newer, more powerful viruses and bacteria. GAIACOL is gentle enough to use topically on just about any skin, hair, or mouth condition without fear of toxicity and is outstanding for burns.

For internal use during any type of infectious process, start with one teaspoon the first day and then 10-12 drops, 3-4 times per day under the tongue until the infection clears. Then maintain with 3-4 drops, 3-4 times per day under the tongue. **IMPORTANT:** Due to the powerful nature of this product, friendly bacteria can be affected, so it is advisable to replace the natural intestinal flora with some type of acidophilus/lactobacillus supplement daily, or at least when symptoms are noted such as cramps, bloating, diarrhea/constipation and a general feeling of malaise.

GAIACOL is said to be safe for children and pets, and can be taken with other medications without incident. This product is not addictive and does not build up a tolerance to it in the body. Available in 2oz., 16oz., and 32oz. bottles.

Offered through *New Gaia Products*

## Guard Your Inventions Well

### Long Range Agenda Tells All

#### PART III: BE CAREFUL! CONCLUDES THIS SERIES

11/25/97 RICK MARTIN

*"The most important aspect of any technology, more often than not, turns out to be how it is applied, by whom, and for what purpose. Consider lasers. They can be used for delicate eye surgery, rock dance light shows, pickups on CD players, and death rays. Corporate planners and politicians may decide what uses take precedence, but it is scientists, designers and design engineers (by whatever name) who make the deployment of a technology possible. They transform a basic technology into available products. It is unfortunate that persons with so important a mandate are so narrowly specialized and so vulnerable to compromise and corruption.*

*"Some of the worst problems arise when a new technology is utilized for weaponry. There is some truth to the cliché that guns don't kill people, people kill people; but it won't do. There is a curious short-sighted state of mind that seems to dominate weapons work. For example, thousands of anti-personnel mines, permanently undetectable by any means, are buried each year in the soil of what is (temporarily) regarded as "enemy territory". Even the conqueror cannot use or reclaim the land, yet those mines are still sold. An ordinary citizen, perhaps a neighbor, got up one morning, had coffee, kissed the wife and kids, and went to the office to design those mines on purpose to be an ongoing, irretrievable scourge. Other good citizens made, packed and shipped the unselectively maiming devices. I wonder what those folks tell their kids they do for a living? Dark-tech tends to darken mind and spirit.*

*"Seemingly benign technologies may have equally undesirable consequences designed into them. Automobiles were once hailed as freedom-bringing, egalitarian transport, and for their role in banishing dangerous urban diseases engendered by streets fouled by manure (horse exhaust). But car exhaust has turned out to be a leading cause of disease and environmental degradation in ways not easily foreseen a hundred years ago.*

*"Some technologies inherently require a pact with the Devil. Auto collisions have killed and injured millions of people and animals, a price societies seem willing to pay. Some carnage is inevitable if people are to move about quickly and*

*easily. (If cars had not been developed, millions of horses would probably be even more dangerous.) Some of the environmental damage is preventable by better car design. But what's really needed is a redesign of the entire auto-based transport system, considering every aspect. Many other technological systems need similar attention if they (and perhaps we) are to continue.*

*"Designers have not been educated or required to consider the effects of their decisions. Their clients are often investors or marketers rather than the actual users (much less Nature, who is always a client nevertheless). Until recently, designers and those who hired them had little concern for such matters as the fate of worn-out products, or the safety of the fabricating workers. Environmental problems belonged to somebody else. It is now obvious that technology-caused problems belong to all of us. People acting as designers, and their masters, must think comprehensively if technology is to be employed for the greatest good while doing little harm.*

*"To accomplish this, Buckminster Fuller called for a new discipline—Comprehensive Anticipatory Design Science. It's still not formally taught. Ranging far beyond generalists who know a little bit about a lot of things, comprehensivists work to understand many specialties and the connections between them. A high standard of integrity is required. Demonstrations of comprehensive thought are scarce, but impressive. (The Rocky Mountain Institute is an inspiring example.) Since nobody can be entirely comprehensive, there's obviously plenty left to do."*

Thank you, J. Baldwin—from *The Millennium Whole Earth Catalog: Access To Tools and Ideas For The 21st Century*.

In the first two parts of this series on the U.S. Patent Office, we have reviewed the various (and complex) definitions and aspects of applying for a patent. Caution is an important keynote to any would-be inventor. There are many ways to go about something, and product development is no exception. Proprietary information is wisely held close, and NOT distributed out of your immediate control. With this in mind, let's continue in our examination of securing a patent, companies which are there to "help you" with your invention, and the patent office's agenda for the next several years.

#### DID YOU KNOW?

Patents are often taken for granted or, in most cases, not considered. But some things in our day-to-day life are worth knowing a little more about. For example, do YOU know who invented Liquid Paper? The woman's name is Betty Nesmith Graham. In 1951 she started using a white paint to correct her typographical errors. After her coworkers began requesting bottles of the paint, she started a small company to sell it. Over the years her small company grew to a large industry.

Did you know that Abraham Lincoln held a patent? He did. It was for a device to help steamboats pass over sand bars. It was never tested or manufactured. He is the only president to ever hold a patent.

What patents were issued to Mark Twain (Samuel Clemens)? In 1871 he was issued a patent for suspenders. His second patent was for his famous Mark Twain's Self-Pasting Scrapbook. His third patent was in 1885 for an educational game that helped players remember important historical dates.

Why are pencils yellow? Painting pencils yellow became a sign of quality during the 1890s. The practice had originated as early as 1854 in Keswick, England, most likely to cover the imperfect wood used in some pencils. It was the American Koh-I-Noor Company whose successful, high-quality yellow pencil became firmly established as a sign of "pencilness" in the minds of users; any other color was assumed to indicate an inferior pencil. Yellow has thus become established as the preferred color for a writing pencil.

What was the first patent issued in the United States? It was in 1790, issued to Samuel Hopkins for making pot and pearl ashes—a cleaning formula called potash (a key ingredient for soap-making then). The first really significant patent was issued for a cotton gin, to Eli Whitney in 1794.

#### WHAT CANNOT BE PATENTED?

In *The Inventor's Desktop Companion*, we find the following: [quoting]

Many things are not open to patent protection: The laws of Nature, physical phenomena and abstract ideas.

A new mineral or a new plant found in the wild.

Inventions useful solely in the utilization of special nuclear material or atomic energy for weapons.

A machine that is not *useful* (i.e. does not have a useful purpose or does not operate to perform the intended purpose).

Methods of doing business.

Printed matter.

In the case of mixtures of ingredients, such as medicines, a patent cannot be granted unless the effect of the mixture is more than the effect of its components.

Human beings cannot be patented. (*Yet.*)

Mere substitution of one material for another or changes in size to a previously known useful invention without "novelty". [End quoting.]

#### FINANCING YOUR INVENTION

In *The Inventor's Handbook*, we read the following: [quoting]

The following companies are interested in financing promising inventions. We would suggest

that an inventor contact these companies only after a successful prototype model has been built or an experiment run so that they would be in a better position to judge the worth of an invention.

The financial help and assistance could be in the form of development or setting up a corporation to develop and market the invention and the purchase of some of the corporation stock, or in the form of a loan with the invention as collateral, etc. These firms often will have the experience of where and how to commercialize the invention.

Battelle Development Corporation, 505 King Ave., Columbus, Ohio 43201;

American Research and Development Corp., 200 Berkeley St., Boston, Mass. 02116;

Adelphia Capital Investment Corp., room 807, 1518 Walnut St., Philadelphia, PA 19101; and

Arthur D. Little, Inc., Acorn Park, Cambridge, Mass. 02140.

The submission of inventions from outside sources is welcomed by Arthur D. Little, Inc. Because it recognizes that individuals and corporations cannot always properly commercialize their own inventions, ADL can under a variety of special circumstances provide technical and commercial assistance at no cost to invention owners. [End quoting.]

So, on a hunch, I decided to check out one of these companies, at random, on the Internet. Here's what I found.

### ARTHUR D. LITTLE, INC.

The first thing which appeared on their hcn epage seemed to tell the tale (read carefully): "The U.S. Department of Energy and Arthur D. Little (ADL) Unveil First-Ever On-Board Gasoline Powered "Fuel Cell" for the Automobile. New Technology Discovery Promises New Market Opportunities, Greater Fuel Efficiencies, Near-zero Emission Levels and Lower Cost Fuel Alternatives For Automobile Industry."

ADL at a Glance...[quoting:]

For more than a century, Arthur D. Little has been a leader in the consulting industry. Founded in 1886 by Arthur Dehon Little, it was the world's first consulting firm. Today, it is one of the world's premier consulting firms, with staff members based in more than 50 offices and laboratories around the globe. [Still quoting, elsewhere on the homepage:]

Making Technology Work: Cambridge (England) Consultants Limited (CCL) has been one of Europe's leading innovators for more than 30 years. We use our broad industry knowledge and technology base to help companies define the way ahead. We offer a complete innovation service, applying our skills in design, development and manufacturing integration to produce practical solutions. We work closely with our clients to ensure control and clear direction—and we pass on the benefits of best practice. [Still elsewhere on the homepage:]

Invention Management On Line. Arthur D. Little Enterprises (ADLE) is the invention management subsidiary of Arthur D. Little, Inc., one of the world's premier consulting firms. Through expertise in technology development, intellectual property and technology transfer, our Invention Management Program commercializes innovations by turning early-stage ideas into successfully licensed technologies. If you're looking for help in bringing your innovation to market—or want to learn more about the invention

marketing process—you've come to the right place.

These are exciting times in the world of intellectual property management. Patents, trademarks, trade secrets and other forms of intellectual property are now at the center of a company's assets. Such intellectual property is providing a competitive edge, keeping the competition at bay, and in many cases, generating unprecedented licensing income. More and more countries are adhering to international standards protecting intellectual property, paving the way for innovators worldwide to advance the field of knowledge. The sky is the limit when innovation is valued and protected. [And still elsewhere:]

Our Foundation: Arthur D. Little was founded to provide technology expertise to industry. For more than a century, we have helped leading companies and government organizations leverage technology for strategic benefit. Today, our highly sophisticated research facilities and laboratories include both our U.S.-based operations and Cambridge Consultants Limited, one of Europe's foremost contract design and development companies. Our experts provide hands-on assistance across a wide range of existing and emerging technologies to help our clients create innovative products and technological solutions. [End quoting.]

And now, let's move directly to the U.S. Patent and Trademark Office's own website. The next series of quotes is quite long, and perhaps very dry reading to the non-interested—however, if you ARE interested in the future of patents via this office, please pay attention. Here goes: [quoting]

### THE UNITED STATES PATENT AND TRADEMARK OFFICE

Congress established the United States Patent and Trademark Office to issue patents on behalf of the Government. The Patent and Trademark Office as a distinct bureau may be said to date from the year 1802 when a separate official in the Department of State who became known as Superintendent of Patents was placed in charge of patents.

The revision of the patent laws enacted in 1836 reorganized the Patent and Trademark Office and designated the official in charge as Commissioner of Patents and Trademarks. The Patent and Trademark Office remained in the Department of State until 1849 when it was transferred to the Department of Interior. In 1925 it was transferred to the Department of Commerce where it is today.

The Patent and Trademark Office administers the patent laws as they relate to the granting of patents for inventions, and performs other duties relating to patents. It examines applications for patents to determine if the applicants are entitled to patents under the law and grants the patents when they are so entitled; it publishes issued patents and various publications concerning patents, records assignments of patents, maintains a search room for the use of the public to examine issued patents and records, supplies copies of records and other papers, and the like. Similar functions are performed with respect to the registration of trademarks. The Patent and Trademark Office has no jurisdiction over questions of infringement and the enforcement of patents, nor over matters relating to the promotion or utilization of patents or inventions.

The head of the Office is the Assistant Secretary of Commerce and Commissioner of Patents and Trademarks, and his staff includes the

Deputy Assistant Secretary of Commerce and Deputy Commissioner of Patents and Trademarks, several assistant commissioners, and other officials. As head of the Office, the Commissioner superintends or performs all duties respecting the granting and issuing of patents and the registration of trademarks; exercises general supervision over the entire work of the Patent and Trademark Office; prescribes the rules, subject to the approval of the Secretary of Commerce, for the conduct of proceedings in the Patent and Trademark Office, and for recognition of attorneys and agents; decides various questions brought before him by petition as prescribed by the rules; and performs other duties necessary and required for the administration of the Patent and Trademark Office.

The work of examining applications for patents is divided among a number of examining groups, each group having jurisdiction over certain assigned fields of technology. Each group is headed by a group director and staffed by examiners. The examiners review applications for patents and determine whether patents can be granted. An appeal can be taken to the Board of Patent Appeals and Interferences from their decisions refusing to grant a patent, and a review by the Commissioner of Patents and Trademarks may be had on other matters by petition.

The examiners also identify applications that claim the same invention and initiate proceedings, known as interferences, to determine who was the first inventor. In addition to the examining groups, other offices perform various services, such as receiving and distributing mail, receiving new applications, handling sales of printed copies of patents, making copies of records, inspecting drawings, and recording assignments. At present, the Patent and Trademark Office has about 5,700 employees, of whom about half are examiners and others with technical and legal training. Patent applications are received at the rate of over 200,000 per year. The Patent and Trademark Office receives over five million pieces of mail each year. [Still quoting from the Patent Office's website:]

### WHAT CAN BE PATENTED?

The patent law specifies the general field of subject matter that can be patented and the conditions under which a patent may be obtained.

In the language of the statute, any person who invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent, subject to the conditions and requirements of the law. The word process is defined by law as a process, act or method, and primarily includes industrial or technical processes. The term machine used in the statute needs no explanation. The term manufacture refers to articles which are made, and includes all manufactured articles. The term composition of matter relates to chemical compositions and may include mixtures of ingredients as well as new chemical compounds. These classes of subject matter taken together include practically everything which is made by man and the processes for making the products.

The Atomic Energy Act of 1954 excludes the patenting of inventions useful solely in the utilization of special nuclear material or atomic energy for atomic weapons.

The patent law specifies that the subject matter must be useful. The term useful in this connection refers to the condition that the subject matter has

a useful purpose and also includes operativeness, that is, a machine which will not operate to perform the intended purpose would not be called useful, and therefore would not be granted a patent.

Interpretations of the statute by the courts have defined the limits of the field of subject matter which can be patented; thus it has been held that the laws of Nature, physical phenomena and abstract ideas are not patentable subject matter.

A patent cannot be obtained upon a mere idea or suggestion. The patent is granted upon the new machine, manufacture, etc., as has been said, and not upon the idea or suggestion of the new machine. A complete description of the actual

machine or other subject matter for which a patent is sought is required. [Again, still from the website:]

**INFRINGEMENT OF PATENTS**

Infringement of a patent consists of the unauthorized making, using, offering for sale or selling any patented invention within the United States or United States Territories, or importing into the United States of any patented invention during the term of the patent. If a patent is infringed, the patentee may sue for relief in the appropriate Federal court. The patentee may ask the court for an injunction to prevent the continuation of the infringement and may also ask the court for an award of damages because of the infringement. In such an infringement suit, the defendant may raise the question of the validity of the patent, which is then decided by the court. Infringement is determined primarily by the language of the claims of the patent and, if what the defendant is making does not fall within the language of any of the claims of the patent, there is no literal infringement.

Suits for infringement of patents follow the rules of procedure of the Federal courts. From the decision of the District Court, there is an appeal to the Court of Appeals for the Federal Circuit. The Supreme Court may thereafter take a case by writ of certiorari. If the United States Government infringes a patent, the patentee has a remedy for damages in the United States Court of Federal Claims. The Government may use any patented invention without permission of the patentee, but the patentee is entitled to obtain compensation for the use by or for the Government.

The Office has no jurisdiction over questions relating to infringement of patents. In examining applications for patent, no determination is made as to whether the invention sought to be patented infringes any prior patent. An improvement invention may be patentable, but it might infringe a prior unexpired patent for the invention improved upon, if there is one.

[Still quoting from the PTO's website:]

**PATENT OFFICE'S STRATEGIC INFORMATION TECHNOLOGY PLAN FOR FISCAL YEARS 1997-2002 EXECUTIVE OVERVIEW**

In the PTO Strategic Plan for the 1996-2001 period, I outlined a new vision and goals for the PTO which

recognized the importance of intellectual property protection in a global and technology-based economy. The attached Strategic Information Technology Plan documents the role that information technology plays in achieving the PTO's vision and goals. The plan also defines a vision for the PTO's information technology environment that will greatly enhance the quality of the PTO's service to its customers and guide the PTO Information Technology Program during the FY1997 to FY2002 period.

As a result of the FY1997 Congressional and FY1998 OMB budget decisions, the PTO was required to substantially modify its information technology program plans. Our strategic information technology vision remains the same; it will simply take longer to attain the vision. Many FY1997 and FY1998 information technology project activities were reduced, and others that could not be completed by September 1998, were deferred until FY1999 and beyond. While these modifications are significant, I want to assure you that every effort has been made to ensure that needed information technology capabilities are provided to the PTO work force.

This plan continues to emphasize the need to migrate the PTO's existing information technology capabilities to a standards-based open system environment while continuing to improve automation support to the PTO's customers. The plan documents the following proposed enhancements:

- Making PTOnet Robust, Reliable, and Scalable to Meet Future Needs**
- Making all PTO Software Applications Accessible from Desktop Workstations**
- Expanding the Content of and Improving Access to Patent and Trademark Search Data Bases**
- Redesigning Legacy Systems to Operate in an Open Systems Environment**
- Implementing Reengineered Patent and Trademark Business Processes**
- Improving Electronic Information Dissemination to the PTO's Customers**

All PTO organizational units should ensure that current and planned information technology program initiatives are in conformance with this plan. This plan will be used as the primary basis for justifying and prioritizing future budget requests involving information technology resources.

**INTRODUCTION**

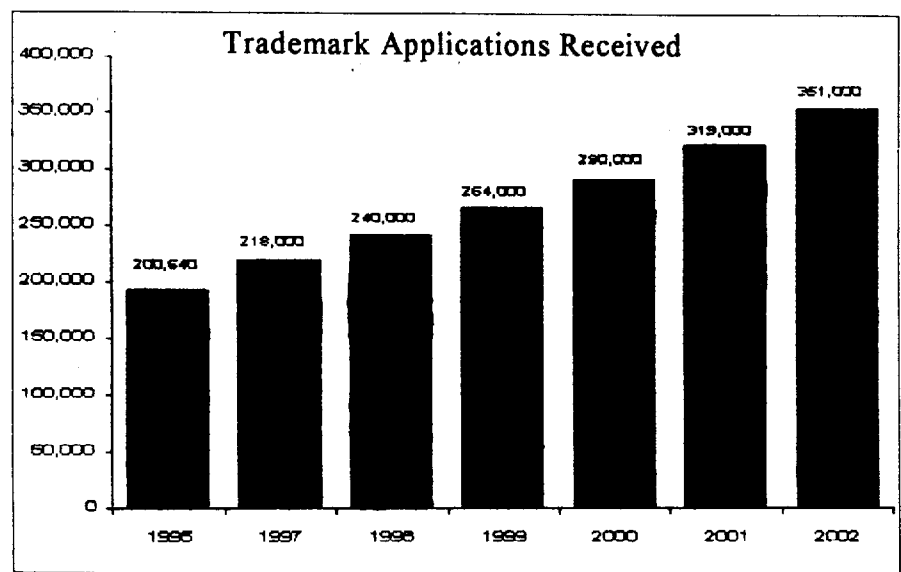

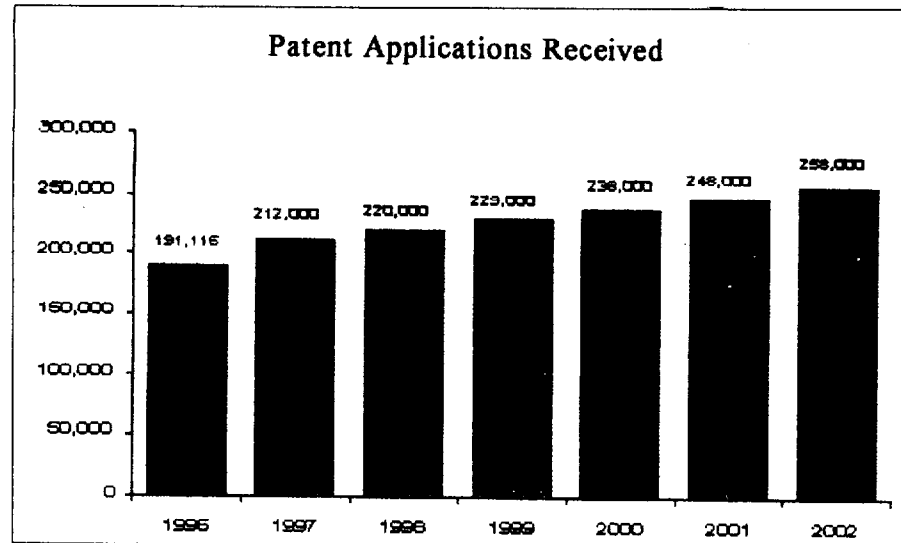

The Patent and Trademark Office's (PTO) mission is to administer the laws relating to patents and trademarks, promote industrial and technical progress in the United States, and strengthen the national economy. As an integral part of this mission, the PTO provides inventors and entrepreneurs with the protection and encouragement they need to turn their inventive and creative ideas into tangible realities. The PTO has also established the following two business plan goals designed to protect intellectual property:

- \* Play a leadership role in intellectual property rights policy development.
- \* Provide our customers with the highest level of quality and service in all aspects of the PTO operations.

An important component of the PTO's strategic agenda is its corporate foundation strategy for leveraging information technology, to more

Year	Total number of patents granted
1901	25,546
1921	37,798
1930	45,226
1940	42,238
1950	43,040
1960	47,170
1965	62,857
1970	64,427
1980	61,800
1985	71,700
1987	83,000
1988	77,900
1989	102,712
1990	90,366

Sources: *The Universal Almanac 1992*, p.522; *The World Almanac And Book Of Facts 1992*, p. 199.

effectively support its business environment.

The PTO's overall corporate vision is to lead the world in providing customer-valued intellectual property rights that spark innovation, create consumer confidence, and promote creativity. To achieve this vision and meet the challenges of the future, the PTO has developed an ambitious strategic agenda to help position the agency to operate more successfully and efficiently in the 21st century. An important component of the PTO's strategic agenda is its corporate foundation strategy for leveraging information technology to more effectively support its business environment.

To help managers and employees better understand this corporate foundation strategy, as well as their role in helping the PTO achieve its mission, goals, and objectives, the Chief Information Officer annually prepares and issues the Strategic Information Technology Plan (SITP). The SITP directly supports, and is issued as an Appendix to, the PTO's Corporate Performance Plan. The SITP provides important information on the PTO's long-term strategic vision for its ongoing information technology modernization effort, as well as its associated program goals, governing strategies, objectives and priorities. The SITP also contains important descriptive, scheduling, and funding information on information technology initiatives currently underway, as well as those planned during the Fiscal Year (FY) 1997-2002 period. During this period, the PTO plans to spend nearly \$1 billion to develop, maintain, enhance, and operate its automated information systems and the underlying information technology infrastructure.

### PTO'S STRATEGIC VISION FOR LEVERAGING INFORMATION TECHNOLOGY

Whether employees are examining a patent or trademark application, assessing fees, answering customer questions, or providing assistance in the public search facilities, the quality, accuracy, and efficiency of their effort often depends on their ability to access information in a timely manner and in a useful format. With this in mind, the PTO is focusing on a strategic direction to develop an information technology environment for itself, its international partners, and the public, where patent and trademark information is created once, managed effectively, used often, and evolved over

time to electronic commerce whereby most internal and external transactions are performed electronically and are accessible through the Global Information Infrastructure.

### CURRENT INFORMATION TECHNOLOGY ENVIRONMENT

The current PTO information technology environment represents the baseline from which future improvements will evolve. The PTO's current information technology environment is comprised of the following six components:

- Patent Systems
- Trademark Systems
- Administrative Systems
- Information Dissemination Systems
- Information Technology Infrastructure
- General and Other Support

The PTO's programmatic systems (patent, trademark, and administrative systems) represent the primary automation support provided to examiners and administrative personnel. The PTO's information dissemination program uses various information technology products and services to provide intellectual property information to its customers throughout the world. The information technology infrastructure area encompasses all of the foundation hardware, system and data base software, and communications that have been deployed in support of the PTO mission. General and other support includes those information technology activities that support all PTO AIs, such as information technology acquisitions, system engineering, data management, and software product assurance.

A distinctive characteristic of the PTO's information technology environment is the management of large and continually growing text and image data bases coupled with a requirement to process very large volumes of transactions to support Patent and Trademark application processing. Patent application filings are expected to reach approximately 258,000 [annually] by FY2002.

Trademark application filings are also expected to continue their growth and reach approximately 351,000 filings by FY2002.

In FY1996, other PTO workload activities reached the following levels:

The PTO received 191,116 utility, plant, and reissue (UPR) patent applications and examiners issued 105,529 UPR patents.

The PTO received 22,353 provisional patent application filings.

The PTO received 200,640 Federal trademark applications and registered 91,339 trademarks in all classes of goods and services.

The PTO managed the accessibility, accuracy, and integrity of over 38 million patent and trademark related documents (referred to as search files). Examiner search transactions averaged close to 400,000 per month. Administrative system transactions averaged close to 6 million per month.

### EXPAND THE CONTENT OF AND IMPROVE ACCESS TO PATENT AND TRADEMARK SEARCH DATA BASES

The PTO is building an open system standards-based information technology infrastructure to support the examination of patent and trademark

applications and to support information dissemination. The PTO plans to replace the existing text search systems with modern COTS products, expand the content of PTO data bases, and provide greater access to external data bases and administrative functions. The infrastructure includes the ability to electronically search the text of U.S. patents issued since January 1971 and the more than two million trademark registrations and applications. These text search functions are provided by commercial products modified to meet the PTO's requirements. The patent and trademark search systems are expensive to maintain and can be difficult to learn and use. In addition, both the Patent and Trademark search systems are limited by the number of concurrent users that can be supported (less than 100 under the current configuration). The PTO plans to replace the existing text search systems with modern COTS products, expand the content of PTO data bases, and provide greater access to external data bases.

The PTO currently plans to begin replacing its current Patent Text Search System early in FY1998 and complete this replacement by FY2000.

Patent examiners will need extensive search capabilities for both text and other patent content in order to shift the reliance on paper files to the electronic files. Text search is a key component to a number of the PTO operations, including examination and classification. The PTO plans major improvements to the content of, and access to, patent prior art data bases and the functionality and user friendliness of the search tools. The PTO currently plans to begin replacing its current Patent Text Search System early in FY1998 and complete this replacement by FY2000. The PTO envisions a number of COTS search products to support the unique requirements of the different art groups. Future text search products will be able to search the text, sections of text (e.g., claims) and ultimately, graphics and other complex work units attached to a patent, such as chemical structures, and be fully integrated into the PTO's electronic operations. All patent data, U.S. and foreign, will be treated as a single comprehensive search resource, whereby an examiner can conduct a single search using multiple search products and data bases and receive a consolidated search result. The PTO also plans to work with its Trilateral partners to develop common search tools in an acceptable cost-sharing arrangement.

The PTO plans to incrementally load the full foreign patent images and make Japanese and European images available by October 1998. Based on the search of the European and Japanese abstracts, patent examiners will be able to obtain foreign patents from their desktop PCs through the Foreign Patent Access System. The PTO plans to incrementally load the full foreign patent images and make Japanese and European images available by October 1998. Working with our Trilateral partners, the PTO plans to incrementally load foreign patents from Patent Cooperation Treaty (PCT) countries beginning in 1999.

The PTO has determined that Optical Character Recognition (OCR) technology can provide a cost-effective method to create text-searchable prior art. The PTO plans a three-phased approach to capture text information of U.S. patents issued prior to January 1971. The PTO will establish an OCR Production Facility in July 1997 and begin scanning and converting the U.S. backfile. The PTO plans to convert all U.S. patents back to 1960 and selected arts to earlier periods by

\* ~ \*

# New Gaia Products

1 (800) NEW-GAIA  
(639-4242)

*for information and  
a free catalog*

September 1999. The European Patent Office (EPO) has a similar OCR project. The PTO also plans to obtain from the EPO the full text of non-U.S. patent documents through a data exchange and cost-sharing program.

The PTO also plans to make significant improvements in the performance of the current Trademark Search System by expanding this system's ability to support a greater number of concurrent users....

The PTO also plans to make significant improvements in the performance of the current Trademark Search System, by expanding this system's ability to support a greater number of concurrent users now that it is accessible from the examining attorney's desktop workstation over PTOnet. The PTO also plans to evaluate COTS search tools to replace the current system. Additional search functions required include range searching, additional search fields, and the capability to stop a search in progress. [End quoting from the U.S. Patent and Trademark Office website.]

**BROADENING THE VIEW**

Now, if you're still reading, consider this from Connections by James Burke: [quoting]

It seems inevitable that, unless changes are made in the way information is disseminated, we will soon become a society consisting of two classes: the informed elite, and the rest. The danger inherent in such a development is obvious.

In the meantime, we appear to be at another of the major crossroads in history. We are increasingly aware of the need to assess our use of technology and its impact on us, and indeed it is technology which has given us the tools with which to make such an assessment. [Still quoting, later:]

The high rate of change to which we have become accustomed affects the manner in which information is presented: when the viewer is deemed to be bored after only a few minutes of air time, or the reader after a few paragraphs, content is sacrificed for stimulus, and the problem is reinforced. The fundamental task of technology is to find a means to end this vicious circle, and to bring us all to a fuller comprehension of the technological system which governs and supports our lives. It is a difficult task, because it will involve surmounting barriers that have taken centuries to construct. During that time we have carried with us, and cherished, beliefs that are pre-technological in nature. These faiths place art and philosophy at the centre of man's existence, and science and technology on the periphery. According to this view, the former lead and the latter follow.

Yet, as this book has shown, the reverse is true. Without instruments, how could the Copernican revolution have taken place? Why are we taught that we gain insight and the experience of beauty only through art, when this is but a limited and second-hand representation of the infinitely deeper experience to be gained by direct observation of the world around us? For such observation to become significant it must be made in the light of knowledge. The sense of wonder and excitement to be derived from watching the way an insect's wing functions, or an amoeba divides, or a foetus is formed comes in its greatest intensity only to those who have been given the opportunity to find out how these things happen.

Science and technology have immeasurably enriched our material lives. If we are to realize the

immense potential of a society living in harmony with the systems and artifacts which it has created, we must learn—and learn soon—to use science and technology to enrich our intellectual lives. [End quoting.]

And now, returning to patents.

**CHANGING PATENT LAW**

In the June 2, 1997 issue of Business Week there is an article titled "Rumble At The Patent Office—Small inventors say proposed changes would favor Big Business". Let's see what it has to say: [quoting]

Patents provide the fuel of interest to the fire of genius, as Abraham Lincoln said. But these days, patent law is providing fuel for something else—a pitched battle over intellectual property. Congress is in the midst of altering U.S. patent law, and depending on whom you ask, the changes will either bolster the U.S. industry's technological edge or kill off innovation. The likely outcome is a compromise that will change the U.S. patent system in a way that helps most companies. The new bills "will create a more efficient patent system," says Senate Judiciary Committee Chairman Orrin G. Hatch (R-Utah).

In one corner is a small band of independent inventors and their congressional supporters. In their view, American corporations once habitually stole outside innovators' ideas and infringed their patents, safe in the knowledge that many courts wouldn't uphold the patents. [Still quoting, later in the article:]

Large companies are fighting back by trying to change the patent laws, small inventors charge. "They want to return to the good old days of stealing everything," complains Grand Blanc (Mich.) inventor Ronald J. Riley. [Quoting, still later:]

But less government oversight would allow big companies to exert undue influence over patent decisions, small inventors argue. Another provision would require that all patent applications be published 18 months after filing instead of keeping them secret until the patents are actually granted—a process that sometimes takes years. The change, small inventors fear, would enable companies to steal their ideas or develop alternative technologies that circumvent the patents. [End quoting.]

**FORFEITURE OF INTELLECTUAL PROPERTY**

Senate Bill 507, sponsored by Senator Orrin Hatch, paints a pretty scary picture to those concerned about patent rights. To quote one of CONTACT's private sources, "This bill, termed The Omnibus Patent Bill, would call for a revamping of our current patent system and would facilitate efforts of foreign and domestic corporations who want to challenge an American patent while simultaneously invalidating patents already being issued. The result would be

devastating to American patent holders, small businesses, and inventors alike.

"An opponent of S507, Senator Kit Bond, assured us that the bill 'will destroy the certainty of a patent that is critical for the small guy to attract investors.' It would force the inventor to challenge and defend his patent, which is a very costly process."

"In addition to all that, Senator Hatch wants to strip inventors of their rights only 18 months after their patent applications are filed, whether or not the patent is ever granted. But, puzzling enough, at the same time, he supports strong copyright protections, including a bill before his own Judiciary Committee that would extend the term of copyright from 50 years to 70 years beyond the life of the author. I wonder why the inconsistency? Could it be that it's because Senator Hatch recently released a compact disc of religious songs that he authored? As the Salt Lake Tribune points out, that release would now make Senator Hatch the proud holder of a copyright."

And so, my recommendation, readers? PAY ATTENTION.

**SOME CLOSING THOUGHTS FOR CONSIDERATION**

Man is a creative and inventive being, with the assistance of Divine Inspiration. Man is gifted with reason. In today's increasingly complex society, government will continue to intrude and encroach upon all freedoms, and freedom of creative expression through invention is no exception. Under the auspices of "protection", the people, mostly uninformed of the true agenda of control and manipulation, will go along with any new legislation that promises "protection for the greater good".

In the era of New World Order, the Elite Controllers intend to HAVE IT ALL. How many "free energy" inventors have been killed over the years or have simply disappeared? How much of today's technology was available to the Power Elite decades ago, only through subversion of the patent application process? And a better question still is: How much advanced technology has been available to the Elite in the private sector, as well as in the underground bases, that has NEVER SURFACED to be used by the general public? I guess we'll never really know.

If you are an inventor: document, witness, draw and model your invention carefully and privately, then move right on to production and distribution in the private sector. That way you will be able to reap the rewards of your efforts and mankind will benefit from the idea. Be careful, be smart, and most of all, be aware. When God inspires man with an idea, man must also be a good steward of the idea, particularly if it is for the greater good of man. Do not tilt your cards in any winning game, be it poker or the discovery of the ages! ♣

# Banks, Banksters & Money

## What You Don't Know

### Can *ENSLAVE* You!

#### Part II: Our Fathers, Who Art In Hock...

The following is Part II of a new Series from Calvin Burgin which began in the 11/18/97 issue of CONTACT as the Front Page story.

11/14/97 CALVIN BURGIN

#### OUR FOUNDING FATHERS

The Founding Fathers of the United States were aware of the recent "outbreak of the destructive principle in Europe" (usually known by such names as what became the French Revolution) and tried to write into the *Constitution* laws that would prevent such from happening here.

For instance, to prevent the economic ravages caused by the banksters, they wrote into the *Constitution* that only gold and silver could be money, and only Congress (not a private bank) could issue money.

Let's look at some examples of how they really felt. They do NOT teach these *facts* in your history classes. Mr. Charles Pinckney, one of the framers of the *Constitution*, published a diary for private distribution among his friends under the title "Chit-Chat Around the Table During Intermission" in which he said of Benjamin Franklin:

"Dr. Benjamin Franklin, a venerable figure, weighed down by years and wisdom, leaned one hand on his staff, the other on the table and said, 'There is a greater menace to these United States of America...

"This great menace, Gentlemen, is the Jew!

"In whatever country Jews have settled in any great numbers they have lowered its moral tone; they have depreciated its commercial integrity; and segregated themselves; have not assimilated; have sneered at and tried to undermine the Christian religion upon which this nation is founded by objecting to its restrictions; have built up a state within a state, and when opposed have tried to

strangle that country to death financially, as in the case of Spain and Portugal.

"If you do not exclude them from the United States in this *Constitution*, in less than two hundred years they will have swarmed here in such great numbers that they will dominate and devour the land, and change our form of government for which we Americans have shed our blood, given our lives, our substance, jeopardized our liberty, and put into it our best thoughts.

"Gentlemen, Jews are Asiatics. Let them be born where they will, or how many generations they are away from Asia, and they will never be otherwise. Their ideas do not conform to an American's, even though they live among us ten generations. A leopard cannot change its spots. Jews are Asiatics, are a menace to this country if permitted entrance, and should be excluded by this *Constitution*."

Franklin was the American ambassador to France, and was well aware of what the Jewish banksters had done and were doing to Europe. He was also aware that Spain and Portugal had expelled the Jews, then afterwards became the wealthiest countries in the world.

Some will call me, this writer, anti-Semitic merely for quoting these famous persons, so I will point out that I am Semitic and this whole smear game of calling someone anti-Semitic who points out facts detrimental to the rulers is just another brainwashing tool of those rulers. Those who cry "anti-Semitic, anti-Semitic" are merely advertising their slavery to their brainwashing. And those who cry that they are Jews who are being persecuted, are usually not even Jews, but are only pretending, for political and economic advantage! Most who say they are Jews are racially descended from the Asiatic and Tartar Mongols such as Genghis Kahn (Kahn or Cohen is a prominent *Jewish* name). Thus most who claim to be Jews are actually Mongols (Mongoloids?). For further information on this, see for instance *The Thirteenth Tribe* by best-selling author Arthur Koestler, himself a Jew. The real (Sephardic) "Jews" are heavily persecuted by the Ashkenazic "Jews."

One of the reasons Jews have been "persecuted" throughout history is the fact that they (I am speaking generally of the Jews who are not real Jews, but are only pretending) have developed tools, protocols and procedures to give them immoral control and advantage over others. These parasitic protocols and procedures tended to devastate the

cities and countries where they were applied, and thus the rulers often tried to ban the Jews. Philip IV of France issued an expulsion fiat in 1306. In 1492, King Ferdinand and Queen Isabella ordered all Jews expelled from Spain. In 1489, Charles VIII of France ordered all Jews to embrace Christianity and become loyal and good citizens and cease their parasitism or suffer forfeiture of their goods and chattels, and expulsion from France.

The French Jews under Charles VIII then wrote to the Elders of Zion in Constantinople, asking for advice as to what they should do. The Elders replied:

"Dear beloved brethren in Moses: We have received your letter in which you tell us of the anxieties and misfortunes which you are enduring. We are pierced by as great pain to hear it as yourselves.

"The advice of the Grand Satraps and Rabbis is the following:

"As for what you say that the King of France obliges you to become Christians; do it, since you cannot do otherwise, but let the law of Moses be kept in your hearts.

"As for what you say about the command to despoil you of your goods: make your sons merchants, that little by little they may despoil the Christians of theirs.

"As for what you say about their attempts on your lives: make your sons doctors and apothecaries that they may take away Christians' lives.

"As for what you say of their destroying your synagogues: make your sons canons and clerics in order that they may destroy their churches.

"As for the many other vexations you complain of: Arrange that your sons become advocates and lawyers, and see that they always mix themselves up with the affairs of State, in order that by putting Christians under your yoke you may dominate the world and be avenged on them.

"Do not swerve from this order that we give you, because you will find by experience that, humiliated as you are, you will reach the actuality of power."

As an example of how these instructions were applied, the Jesuit Order was established in the Catholic church by the Jewish Ignatius Loyola. When you are trying to find truth behind history and politics, you will often find Jesuits at the source of the problems (such as the Jesuit, President William Clinton). The Jesuits are one of the behind-the-scenes secret societies referred to by Benjamin Disraeli. Adam Weishaupt, founder of the Illuminati, was a Jesuit.

At the time of the American Revolution, which was essentially an economic revolution against the Royal British banksters and their King, the Founding Fathers had seen what had happened in Europe and did not want that happening here. Nesta H. Webster (died 1960) wrote much on these subjects in her books *The French Revolution*, *World Revolution*, *Secret Societies & Subversive Movements*, and *The Socialists Network*.

A writer contemporary with George Washington was Professor (Edinburg University) John Robinson, author of *Proofs of a Conspiracy* (published 1798 in New York). This book documented a secret conspiracy called the Illuminati. The Reverend G. W. Snyder sent a copy of the book to George Washington, who replied to Snyder in a letter dated September 25, 1798:

"I have heard much of the nefarious, and dangerous plan, and doctrines of the Illuminati, but never saw the book until you were pleased to send it to me... I must correct an error you have run into, of my Presiding over the English lodges in this

Country. The fact is, I preside over none, nor have I been in one more than once or twice, within the last thirty years." Washington was defending himself against an accusation that he was a member of a secret Masonic Lodge along with the Illuminati members.

Later (October 24, 1798), Washington wrote again to Snyder and stated:

"It was not my intention to doubt that, the Doctrines of the Illuminati, and principles of Jacobinism had not spread in the United States. On the contrary, no one is more truly satisfied of this fact than I am." (John Fitzpatrick, ed., *Writings of Washington*, Washington, D. C.: U. S. Government Printing Office, 1940, v. 36, pp. 452-453). Washington may have been referring also to another book called *Memoirs Illustrating the History of Jacobinism* by Abbe Augustin Barruel, which claimed that the Illuminati society had subverted the Freemasons into a conspiracy to undermine church and state and create a one-world government.

Washington also made another statement that few historians dare to quote. He said that Jews should be "hunted down as pests of society, and the greatest enemies we have to the happiness of the United States" (*Maxims of George Washington*, pp. 125-126).

## JACOBINISM

Note that Washington recognized that the doctrines of the Illuminati were the same as the principles of Jacobinism, which reminds me of another subject many of you readers will have trouble understanding. It is a related subject so bear with me.

According to the *Bible*, when Moses went up on the mountain of Sinai, he asked God, who are you? What did God say (according to the story)?

For instance, the *King James Bible* says:

*Exodus 3:13*: And Moses said unto God, Behold, when I come unto the children of Israel, and shall say unto them, The God of your fathers hath sent me unto you; and they shall say to me, What is his name? what shall I say unto them?

*Exodus 3:14*: And God said unto Moses, I AM THAT I AM: and he said, Thus shalt thou say unto the children of Israel, I AM hath sent me unto you.

However, the Hebrew manuscripts, and the Jewish *Torah*, and *Tanakh* in the newer English versions based on the Masoretic text, say that God said His name was "Ehyeh-Asher-Ehyeh". "Ehyeh" is anglicized Hebrew for "I am", but "Asher" is the name of a prominent "pagan" god and was also a name for the male sex organ.

The Jewish *TORAH*, *The Five Books of Moses*, *A new translation of the Holy Scriptures according to the Masoretic text* by the Jewish Publication Society, says: "And God said to Moses, 'Ehyeh-Asher-Ehyeh.' He continued, 'Thus shall you say to the Israelites, 'Ehyeh sent me to you.'"

The translators shifted the emphasis onto the words "I am" away from the too-blatantly obvious name, "Asher". Some "experts" and "authorities" will disagree with me. Others, though, agree, and some modern translations clearly say "Asher". Don't blindly accept the opinions of "experts" or "authorities" OR ME. I merely bring these things to your attention; I hope you have the maturity to think and study and come to your own understanding.

George Lamsa's Translation from the Aramaic of the *Peshitta* says: "And God said to Moses, I am AHIAH ASHAR HIGH (that is, THE LIVING GOD); and he said, Thus you shall say to the children of Israel, AHIAH has sent me to you."

There can be no doubt that the Hebrew Masoretic text upon which the majority of *Bible* versions are based says "ehyeh Asher ehyeh". The arguments occur over the interpretation of the words; some say it means this, others say it means that. Let me remind you that, according to the rules of translation, you do not translate proper names. President Eisenhower was Eisenhower in every language, he was not President "Iron-worker". You might argue that Asher means "that" or "black" (see *Strong's Concordance* # 806) or "I Am" or "tree" or whatever. Nevertheless, by the rules of translation, the name is not translated, it is transliterated. Asher is Asher, but the translators violate their own rules and conventions and LIE to you. There is plenty of proof that the old manuscripts said "I am Asher."

Adam Clarke's *Commentary*, Earle's *Abridgement*, p. 94, concerning this verse, says: "14. I AM THAT I AM. Eheyeh asher Eheyeh. These words have been variously understood. The *Vulgate* translates, 'I am who am.' The *Septuagint*, 'I am he who exists.' The *Syriac*, the *Persic*, and the *Chaldee* preserve the original words without any gloss."

Most Hebrew scholars agree that "ehyeh" or "ehyeh" means "I am." So you have "I am Asher I am." Hebrew reads from right to left, and when it was transposed into left to right, an extra "I am" was put in. If you want to check it out, you will find that "I" and "am" are not in the *Strong's* or *Young's* concordances which are usually used to research Biblical words such as these unless you know how to find them. Try *Strong's* #1961, *hayah*. The "h" is often silent in ancient languages such as what we (wrongly) call Hebrew (as in Har-mageddon or Armageddon, and see *Judges 12:6* where 42,000 Israelites were murdered by other Israelites because of this). *Ehyeh* and *hayah* were basically the same Hebrew word, spelled (misspelled) to confuse you.

The emphasis had to be shifted to "I am," away from "Asher"! We can argue over who and what was Asher, but you will find that the Asher was anciently considered to be the male sex organ! And a strange thing is—the *Bible* condemns worshipping the Asher! One example out of many that could be given: "And they forsook the house of the Lord, the God of their fathers, and served the Asherim [plural of Asher] and the idols; and wrath came upon Judah and Jerusalem for this their guiltiness." (2 Chron. 24:18, *The Holy Scriptures According to the Masoretic Text*).

In *Exodus 33:18-23*, we are told that only Moses

is allowed to see God, and only from the back. God covers Moses' eyes "while My glory passeth by". The Hebrew word used here for "glory" is *kabod*. This word *kabod* "is sometimes used idiomatically to refer to the male reproductive organ" (*The Harlot By The Side of the Road—Forbidden Tales of the Bible* by Jonathan Kirsh, Ballantine Books, 1997, page 8). Jack Miles, in *God: A Biography*, says: "The fact that the Lord wanted to be seen only from behind may suggest that he is concealing his genitalia from Moses."

I have a friend who has done research on this and he learned that the "kabod" was worshipped as the male organ. An ancient Hebrew word for God was the letters which transliterate to "IE" and are pronounced "ehyah" or "eeyou" which, we have seen above, are also translated "I AM", another name for God. The God Peter was IE-PETER or "eeyou-piter" or "Jupiter". The God Zeus was simply "IE" or "eeyou" with the Latin terminus added. The "God Zeus" became "eeyou-zeus", or in modern English, "Jesus". The penis was also called the God Kabod or the "IE KABOD" or "eeyou-kabod" and has come down to us in English as "JACOB". In fact the word "Jew" is the same as the older word for "God", which was usually represented by the phallus and is now translated "I Am". There was no "J" in Hebrew and there was no "J" in English until a few hundred years ago. The books will tell you that "Jacob" comes from "heel", but they usually won't tell you that "heel" is a euphemism for the male "protuberance". See *Strong's Concordance* #6119 and *Jeremiah 13:22*: "For the greatness of thine iniquity are thy skirts uncovered, and thy heels made bare." The word "heil" means "virility".

"A king's virility [heil] was periodically tested, and when it waned, he was usually killed and replaced," p. 379, *The Woman's Encyclopedia of Myths And Secrets*. That's why some "heil" the king (or Hitler). When the word was used in Greek (*John 13:18*: "He...hath lifted up his heel against me"). The Greek word for "heel" was "pterna", from the same root as "peter". My friend has much more evidence backing this, but my point is that if you will study the Illuminati Jacobites you will find considerable evidence that shows that the Illuminati worship Lucifer, who pretends to be God, and that the sex rituals and symbols are a very considerable part of their practices! The practices are camouflaged to the public and to the initiate, but become more blatant as the initiate progresses in the degrees of the "mysteries". There are massive

conspiracies going on here, involving even the "Christian" "very elect", stemming from things we are taught that we do not try to verify.

### THE NEFARIOUS ILLUMINATI

On May 1, 1776, a prominent date among Communists and Satanists, a secret society called The Illuminati was formally founded by a representative of the banksters named Adam Weishaupt. Mrs. Webster wrote that the ideals of the Illuminati were:

1. Hatred of God and all forms of religion.
2. Destruction of private property and inheritance.
3. Absolute social and racial equality, promotion of class hatred.
4. Destruction of all forms of either monarchical or democratic governments, including civil liberties, such as freedom of speech, of the press, of assembly and of trial by jury.
5. Destruction of all nationalism, love of country, patriotism and allegiance to civil or political rulers.
6. Abolition of marriage and practice of free love.

How well do you suppose those ideals have been achieved? These same protocols were later adopted by the Communists.

### REDCOATS, RED SHIELDS AND THE AMERICAN REVOLUTION

In Germany, Amschel Mayer (Mayer Amschel Bauer), with his five sons and daughters, was applying the protocols. One thing he did was to approach William the Landgrave of Hesse and sell him coins. William was a coin collector. Mayer had what we would call a pawn shop. Outside the shop was a red shield, advertising the shop, which became known as the house of the red shield. In German, "red shield" is "rot schild", so the Mayer Amschel family became known as the family of the House of the Rothschild.

In the meantime, the Americans were revolting against King George III of Britain. George needed soldiers to fight against the American rebels, so he made a deal with William the Landgrave of Hesse for the use of 17,000 Hessians for which George III was to pay the sum of nearly \$20,000,000. William and his financial partner Mayer (who had arranged the deal with the King) had a secret friend in America known as Haym Solomon of Philadelphia, who made it possible for Robert Morris to finance the American rebels, with money that traced back to Rothschild/Mayer and King George, against whom they were fighting. Thus the Jews Solomon and Mayer were financing both sides of the Revolutionary War. Robert Morris became the first president of the Bank of North America chartered by Congress in 1782 at Philadelphia. To start the bank, he used money obtained from Rothschild in 1781 to finance Washington's Yorktown campaign and his own money obtained while he was Superintendent of Finance (1781-84) under the *Articles of Confederation*. In 1775 he contracted with the Continental Congress to import guns and ammunition. War is profitable! Thomas Paine and others attacked him for profiteering.

Here's the skinny of how it worked: Solomon and Morris financed the Rebels and egged them on against King George. King George then had to hire 17,000 Hessians to fight the American Rebels. He

hired the Hessians from William the Landgrave of Hesse, and it cost him \$20,000,000 which was loaned to Mayer for 20 years (Mayer had arranged the deal). Mayer then used the money to make loans (for interest, of course) to the Revolutionists and to finance bringing the Jews out of the ghettos and making them fellow banksters. He also financed the rise of Napoleon. Neat, huh?

### SPARTACUS

Mayer/Rothschild sent Adam Weishaupt to America to help establish the Rothschild banking system. Weishaupt wrote a book describing his plans for the Illuminati. An original of his book was in the library in Philadelphia but they did not want to loan it out, so in 1981 I obtained a xerox copy of the book. The book is written in Old German. A friend arranged for a local German lady to translate it. Weishaupt called himself Spartacus (that's what the book says). Here is a sample translation of what it says, beginning with the cover page: [Quoting]

First Partition [Section] Correspondence More Original Letters from Spartacus (Weishaupt). I have now read all communicata [letters], and will send them back next Thursday with the messenger. I have seen, that you put in a lot of effort [had a lot of trouble] to get everything in order, but it will always be hard work. The destruction [decay] will be very big [great] and the indifference [unconcern] against the [at this point in the text is a circle with a dot in the center, some sort of code] takes the upper hand.

To be effectual, I will use the following rules.

1. I will look for steady, active, hard working men. I believe (24.) Z == [another code of some sort] should not be neglected. You will read about my other project in my letter to Celsus.
2. During the meeting I would put people in leading positions who have dignity, authority, influence, and who are admired by the young people as Oracul, and who are serious and have high morality [morals].
3. The recruiting would be done by our own capable people, who know how to drill [train] the people. Plinius and Pythagoras have excellent skill in that. [End of quoting]

There are 251 pages. It is more evidence of the great banker conspiracy going on, whose purpose was to take control of the world. At first glance, some of these things seem rather silly and harmless, but keep in mind that there was SERIOUS money

behind these efforts, resulting in major wars and losses of thousands (eventually millions) of lives.

In 1774, Weishaupt received orders from Rothschild to foment wars in England, France and the American Colonies. The French Revolution was scheduled to start in 1789, but in 1784 a copy of the orders were being sent to Bospiere [sic], who was to head the French Revolution, when the courier was struck by lightning. The Bavarian police found the manuscript, and as a result raided the Lodges of the Masonic Grand Orient and the homes of Weishaupt and his associates. In 1785, the Bavarian government outlawed the Illuminati and closed all lodges of the Grand Orient in Bavaria. In 1786, they published details of the plot and sent them to European heads of government, who simply ignored them. As a result, the Revolution took place as planned in 1789.

Weishaupt recruited secret agents to form secret societies inside secret societies in order to carry out their plans. He tried to recruit a high-ranking Mason named John Robinson, a professor of Natural History at the University of Edinburgh. Robinson did not fall for the scheme but obtained a copy of Weishaupt's *Constitution* and in 1789 published a book called *Proofs Of A Conspiracy To Destroy All Governments and Religions*. Once again, most did not believe him and the plans of the Illuminati went forward. They infiltrated the Scottish Rites groups of Masonic Lodges in America, in spite of the protest of George Washington.

On July 19, 1789, the President of Harvard University, himself a high-ranking Mason, warned against the Illuminati. John Quincy Adams, who had helped organize the New England Masonic Lodges, also issued a warning. Adams outlined the details of how Thomas Jefferson was using his influence to aid the Illuminati. Thomas Jefferson was a member of the Illuminati. The letters were in the Whittenberg Library in Philadelphia.

The Russian Czar did take the warnings seriously and would not cooperate with the Illuminists, so the Illuminists made plans to eventually eliminate the Czar and his family.

### ROTHSCHILD'S VICTORY AT WATERLOO

During the Battle of Waterloo in 1815, the Rothschilds were able to falsify a report of the battle, so that the English people believed that Napoleon had won. The British stock market crashed, while Rothschild agents were there buying

## Red Lentils & Adzuki Beans

Two of the tastiest, most "storable" foods are now available in bulk, 50 lbs. per bag. Prepare and cook them just like pinto beans. Wonderful soup extender and both make super salad/sandwich sprouts.

up the stocks at pennies-on-the-dollar prices. Later when the truth came out, the stocks skyrocketed, resulting in huge profits for the Rothschilds, who then were able to take control of Europe. They also took control of the British banking system and forced Britain to set up a new Bank of England, totally controlled by Rothschild.

In the 1850s a British Illuminist named Wright held a secret meeting in New York in which a plan was launched to organize atheists, Nihilists and other subversives into an international organization which later came to be known as Communism. It was to be the tool to conquer the world. Horace Greeley, Quentin Roosevelt (ancestor of FDR) and Charles Dana were appointed to head a commission to raise funds for the new venture.

### ALEXANDER HAMILTON

Alexander Hamilton was born as Alexander Levine in 1757 on the island of Nevis in the British West Indies. In 1772 he went to New York and married Elizabeth Schuyler in 1780. In 1782 he established a law office in New York and entered politics. In 1782 he was elected to the Continental Congress and in 1789 he became Secretary of the Treasury. He was often in conflict with Jefferson and Madison and others because of his disdain for the common man, his extreme sympathies for Great Britain, and his questionable business practices. He called the British government "the best in the world". He wanted to establish a monarchy in America. Newspaper accounts appeared in the summer of 1787 alleging that a plot was under way to invite the second son of George III, Frederick, Duke of York, the secular bishop of Osnaburgh in Prussia, to become "king of the United States".

Alexander Hamilton set up the Bank of the United States, the first of the British-affiliated American banks, in 1791. Due to growing awareness of its danger and political opposition, its charter was not renewed in 1811, resulting in the War of 1812 in which the angry Britishers burned Washington, D.C. Its assets were acquired by Stephen Girard who continued the business as the Girard Bank.

Hamilton was killed in a duel with Aaron Burr in 1804.

Demand grew for another bank because of the indebtedness created by the War of 1812 and because of cash payoffs to our politicians from the British, so a second Bank of the United States opened in 1816 and issued notes redeemable in coin "on demand" and were called "demand notes". This bank continued until Andrew Jackson became President, and in 1833 he removed the public money from the bank. The charter was not renewed in 1836. It became a state-chartered bank, but failed in 1841.

During this period the British banksters encouraged fraudulent banks and "wildcat" banks. A few investors with a few thousand dollars could buy state bonds, on margin. They would then deposit them with the state Treasurer and obtain a bank charter. They could then issue money up to the value of the bonds. So they would promptly use the new money to pay off the bonds. Many canals and turnpikes were financed this way, resulting in waves of failures and losses.

Another type of bank was called the "Wildcat Bank". These were non-existent banks chartered in some faraway place so far out in the sticks that "only wildcats could be found there". They would then try to swap their phony money for other money or goods of value. Variations on this theme are still going on these days—how many of you bought the

coins from the Marshall Islands that were advertised so heavily on TV? Have you tried to sell or swap in your coins?

### DANIEL BOONE

Daniel was the sixth child of 11 born to Squire and Sarah Boone, who came to Pennsylvania from Devon, England. Squire was a weaver and a Quaker. Daniel was born in Berks County, PA, in 1734, where he grew up on the farm. His days were filled with heavy chores and hunting.

When he was 16, in 1750, his family moved down the Great Valley Road in the Shenandoah Valley to Linville, where they settled a while, then moved on south to the Yadkin River Valley, about 12 miles from Salisbury, N.C. In 1755, Daniel became a wagoner in General Braddock's army, and was at the defeat of Braddock at Ft. Duquesne in western Pennsylvania. Among the survivors were Daniel Boone, George Washington, Christopher Gist, and John Findlay.

In 1756 Daniel married 17-year-old Rebecca Bryan, and in 1759 he paid his father 50 pounds for 640 acres of land in the Yadkin area where he began farming. He did very poorly, and in 1763 some citizens of Salisbury sued him for nonpayment of debts. He took to the woods and in 1763 bought some land in Pensacola, Florida. When he returned, his wife refused to go with him to Florida, perhaps because she did not want to leave her friends.

In 1768, Boone was visited by John Findlay. Findlay had been in Kentucky as early as 1752 and wanted to return. He asked Boone to go with him.

Attorney Richard Henderson had dreams of setting up an empire in Kentucky, where he would sell land and become rich. Records show that other land speculators of that period include Thomas Jefferson, Patrick Henry, and George Washington. Washington sent his own agent out in 1767 to secretly spy out the land "under the pretence of hunting other game..." The fact that it was done secretly and other factors indicate that there was something going on that was not quite "kosher". This might account for some of the soft attitudes towards banks by our early "Founding Fathers". Washington, for instance, was a friend and supporter of Alexander Hamilton who was a spokesman for the British and Rothschild banksters.

Henderson bailed Daniel Boone out of his financial troubles and sponsored him to, also secretly, spy out Kentucky for him, so Daniel and four others, with Findlay as a guide, set out from Salisbury for Kentucky on May 1, 1769, through the Cumberland Gap. The Cumberland Gap has become associated with Daniel Boone in history, but actually the Gap had been discovered 19 years earlier by Dr. Thomas Walker.

The party disbanded when attacked by Indians, but Boone stayed and explored for two years. Then in 1773 he undertook to guide his family and other settlers to Kentucky, but they were attacked by Indians near the Cumberland Gap and Daniel's oldest son James was killed. They retreated to Virginia. In 1774, James Harrod had built the first town (fort) in Kentucky at Harrodsburg. In 1775, Boone gathered the Cherokee Indians to a meeting with Richard Henderson. At this meeting, Henderson bought twenty million acres from the Indians, and paid them with pots, pans, tools, etc. Henderson now had his empire, which he called Transylvania. How much George Washington knew and how much he was an unknowing victim is debatable, as when Washington heard about Henderson's deal, he said, "There is something in

that affair which I neither understand, nor like, and wish I may not have cause to dislike it worse as the mystery unfolds."

The Indians were happy to sell Henderson the land, since it did not belong to them anyway! For the most part, Indians did not live in Kentucky. They used Kentucky as a hunting ground. Indians from the north would go south into Kentucky to do their hunting, then would return home. Indians from the south would go north into Kentucky for the same reason, then return home. When the various tribes met, there was often a battle, so Kentucky was known as "a dark and bloody ground". But for the most part, there were no Indians settled there.

Henderson hired Daniel Boone to lead some armed men into Kentucky to take possession of his newly acquired land. They were attacked near the Kentucky River by Shawnees. Two men were killed and others began to flee, but Boone gathered them together and fought off the Indians. He then had the men build a fort, but they foolishly built it below some hills where the Indians could fire down into the fort, and built it on a flood plain. When Henderson arrived, he ordered a new fort be built at a better location.

After the Revolutionary War, Virginia annexed Kentucky as a county of Virginia, in December 1776, and let Henderson keep 200,000 acres of prime land. Boone's only reward was being named a captain in the Virginia Militia, and having the capital of Henderson's colony named Boonesborough. He never received the land that Henderson had promised to him. The history of banking is tied in with the history of these questionable land deals and speculations, beginning at the time of Columbus and spreading westward with the migration of the Europeans.

In 1776, Indians captured Daniel's daughter and two other girls. Daniel and the boyfriends of the three girls followed them and captured them back (the girls later married their rescuers). In 1778, Boone and about 30 men traveled about 70 miles to the salt springs at Blue Lick, on New Years Day. There they boiled down the salty water to gather salt, necessary for the preservation of meat. By February 7, they had about 300 bushels. Boone went off to check some traps and ran into a party of Indians. It was snowing so hard that they were right upon him before he saw them. Ah, but I digress! If you want to know the rest of the story, you will have to look it up!

### SIMON KENTON AND ANDREW JACKSON

An interesting book covering the time period of Daniel Boone and George Washington is *The Frontiersmen* by Allen Eckert, copyright 1967, published by Little, Brown and Co. and available through any library. It is about Simon Kenton, the leading Indian fighter in the Kentucky area at the time of Boone. Kenton once rescued Daniel Boone from the Indians. One incident in the book I want to bring to your attention is on pages 210-212. It seems that Andrew Jackson, who is famous for winning the Battle of New Orleans (against the British) and became President of the United States,

**YOU MAY SUBSCRIBE  
TO CONTACT BY  
CALLING  
1-800-800-5565**

was somewhat of a brawler and bully in his younger days. He was head of a survey crew (and bragged that he had beaten up every man on the crew). He went into a bar near Harrodsburg, where he saw the famous Simon Kenton. Just like in the movies, Jackson picked a fight with Kenton. Kenton, a professional killer, or in more polite terms, a combat soldier, would have beaten Jackson to death had not others pulled him off. But if you check when this event happened (31 Oct. 1779) and check when Andrew Jackson was born, you find that Andy was only 12 years old at this time (born 1767). How could a twelve-year-old boy be head of a survey crew? Obviously Allen Eckert was in error about when this event occurred, right? Wrong! The answer is—Andrew Jackson was born overseas. According to the *Constitution*, someone born overseas cannot become President of the United States. Jackson had his birthdate and birthplace changed so that he could become President. I have read an interview with the midwife who was present at Jackson's birth, overseas. This is another example of how historical "facts" are often altered by the powers-that-be. [*Historical Magazine*, May, 1859, has an article by Judge John James who talked with Kenton at his home in 1833 and took notes. General Henry Lee corroborates this information, the original documents are in the Draper Collection (a collection well known to genealogists). Judge James said in the magazine article: "In September, 1840, when General Harrison was coming to Urbana from the Western countries to attend one of the large meetings of that day, I was requested as I was personally known to him and they not. I was accompanied by John Chambers of Kentucky, who took a seat with me, and I drove him to Urbana. Among the many things said during that drive, this statement by him is most vividly remembered: 'There is in my neighborhood an old woman, of humble rank, but a member of a church, and very much respected, who says that she came to America in the same ship with Gen. Jackson's parents, and that Jackson was born at sea, three days from land. (The "land" that they were three days from, as I recall, was Ireland.) She said, "I received him in my own hands.'" Mr. Chambers said he had intended to have her statement reduced to writing, and verified, but he had neglected it. Her statement was doubtless known to others in Kentucky." Andrew was born in either 1754 or 1756.]

### THOMAS HART BENTON

One close friend of Andrew Jackson was "Old Bullion Benton", although Thomas Hart Benton (1782 - 1858) nearly killed Jackson in a duel. At that point in history duels and brawling were very common. Benton fought with Jackson against the British in the War of 1812, and against the Indians, who had been stirred up by the British. Part of the trouble between the "White man" and the "Indian" was directly the result of British agitation.

During the period from 1811 to 1816, the number of note-issuing state banks jumped from 88 to 246, while their note circulation was extended from \$45 million to \$100 million between 1812 and 1817. The force behind these banks was generally people like John Jacob Astor and Stephen Girard, who were pro-British. The United States did not have paper money until forced into it by the Civil War, but there were many private issues. Before the Civil War, most bank loans were made by issuing notes on the bank to the borrower, instead of establishing credit or a deposit in the borrower's name. Each bank engraved its own notes in its own design.

At this time (1812), the official price of gold was \$17.777777 per troy ounce and silver was \$1.074344648 per troy ounce (*Numismatic News*, Sep. 1, 1987, p. 10).

Benton became a bank speculator and got involved with the Bank of St. Louis which began in 1816. He was arrested because of some banking squabbles, and by 1819 the bank had failed. He was learning the hard way about banks. He later became editor of the St. Louis *Enquirer* newspaper and promoted the fur trade and western growth. His daughter married the famous explorer John Fremont. He promoted growth along the Oregon Trail and promoted the fur trade and other interests in opposition to the British-backed John Jacob Astor American Fur Company interests.

The booming land interests drew many state-chartered banks, which supplied ever-expanding credit at inflated prices backed by nothing. Benton's newspaper began printing articles telling about banks that were going bust and warning about the paper-money mania. His newspaper stated: "Banish paper and you introduce gold and silver. Where gold and silver is the standard, the price of everything is reasonable, and a dollar stands for a dollar."

Benton was nominated for state senator by Thomas Boone, son of Daniel Boone and by 1821 Benton became the first Senator from the State of Missouri. Later Andrew Jackson became a fellow Senator, and although they had tried to kill each other ten years earlier, as they worked together they eventually became good friends.

### ANDREW JACKSON AND THE BANKS

Andrew Jackson hated banks. When Jackson became President, in his first message to Congress in 1829, he questioned "both the constitutionality and expediency" of the Bank of the United States (which was actually a British-backed institution), and in February Benton issued a resolution "That the charter of the Bank of the United States ought not to be renewed". Benton warned that it was an institution "too great and too powerful to be tolerated in a government of free and equal laws". He said that "great moneyed powers" would "make the rich richer, and the poor poorer; to multiply nabobs and paupers". He pointed out that by expanding and contracting credit, the banks had the power to transfer all wealth into their own hands "to the Neptunes who preside over the flux and reflux of paper".

Benton said that when the re-charter of the first national bank had been refused in 1811, they made a great mistake by not providing a national substitute for the national bank's currency. He said that "gold and silver is the best currency for a republic; it suits the men of middle property and the working people." The common people liked what Benton said, but his colleagues in government, many of whom were getting under-the-table payoffs from the British-backed banksters, were less enthusiastic. Henry Clay was one who originally bitterly opposed banksters, but was bought off and hired by the banksters and by 1820 had become one of their highest-paid attorneys. The aristocrat (and head of the Bank of the United States) Nicholas Bidole wrote to Clay "your remuneration, liberal as it was designed to be, has been amply earned." (Nicholas Biddle to Clay, March 11, 1825, Clay Papers.) Clay and Biddle became close political allies.

Recharter of the bank was finally achieved by the Biddle/Clay forces on June 11, 1832, by a vote of 28 to 20. Biddle wrote to Cadwalader, "Now for

the President" (Biddle to Cadwalader, July 3, 1832, in McGrane, *Correspondence*, p. 192), meaning that now they were going to "get Jackson". They in fact tried to kill President Jackson. Jackson said, "The bank, Mr. Van Buren, is trying to kill me, but I will kill it!" He said "the rich and powerful...bend the acts of government to their selfish purposes."

### THE ATTEMPTED ASSASSINATION OF ANDREW JACKSON

On January 30, 1835, Richard Lawrence attempted to fire two pistols at President Jackson, and they both misfired. He was tried and found innocent by reason of insanity, and he later boasted that he was working for the European banksters who had promised to protect him if he were caught. They protected him by declaring him insane, and who can believe the testimony of an insane man?

The reason they tried to kill Jackson was because he vetoed the banking bill. Here is a quote from his Veto Message, Washington, July 10, 1832: [quoting]

To the Senate:

The bill "to modify and continue" the act, entitled, "an act to incorporate the subscribers, to the bank of the United States," was presented to me on 4th July, instant. Having considered it, with solemn regard to the principles of the *Constitution*, which the day was calculated to inspire, and come to the conclusion that it is not to become a law, I herewith return it to the Senate, in which it originated, with my objections. A bank of the United States is, in many respects, convenient for the Government and useful to the people. Entertaining this opinion, and deeply impressed, with the belief that some of the powers and privileges possessed, by the existing bank, are unauthorized by the *Constitution*, subversive to the rights of the States, and dangerous to the liberties of the people, I felt it my duty, at an early period of my administration, to call the attention of congress, to the practicability, of organizing an institution, combining all its advantages, and obviating these objections. I, sincerely, regret, that in the act before me, I can perceive none of those modifications, of the bank charter which are necessary, in my opinion, to make it compatible with justice, with sound policy, or with the *Constitution* of our country.

... More than eight millions of the stock of this bank are held by foreigners, by this act the American Republic proposes virtually to make them, a present of some millions of dollars.... The present corporation has enjoyed its monopoly during the period stipulated in the original contract. If we must have such a corporation, why should not the Government sell out the whole stock and thus secure to the people the full market value of the privileges granted? Why should not Congress create and sell twenty eight millions of stock, incorporating the purchasers with all the powers and privileges secure in this act and putting the premium upon the sales into the treasury?

But this act does not permit competition in the purchase of this monopoly. It seems to be predicated on the erroneous idea that the present stockholders have a prescriptive right not only to the favor but to the bounty of the Government. It appears that more than a fourth part of the stock is held by foreigners and the residue is held by a few hundred of our own citizens, chiefly of the richest class. For their benefit does this act exclude the whole American people.... [End of quoting]

Note that the bill was presented for Jackson's

signature on July 4th!

Other famous statements of Jackson, that were in history books when I was a kid but have since been removed as the controllers continually rewrite history, include:

"You [bankers] are a den of vipers and thieves and I intend to rout you out, and by the Eternal God, I will rout you out." (address to Congress, 1829).

"If the American people only understood the rank injustice of our money and banking system—there would be a revolution before morning..."

"If Congress has the right to issue paper money, it was given them to be used by themselves, and not to be delegated to individuals or corporations."

Jackson removed the government deposits from the Bank in September 1833. When Treasurer Louis McLane balked, Jackson removed him and replaced him with William J. Duane, who also did not want to cooperate, so Jackson removed him and brought in Robert B. Taney as Secretary. The Biddle/Clay bankster crowd counterattacked by reducing credit and causing a depression. By fall of 1834, the financial panic created by Biddle came to an end and the bankster forces were losing. In June of 1834, coinage legislation was passed to increase coinage, resulting in increased mintages of many coins in 1834 and 1835, and resulting in the reinstatement of minting of silver dollars in 1836 (the minting of silver dollars had ceased in 1803).

This was a period of "hard times" created by the angry banksters. To help alleviate the crisis, many stores issued their own metallic money which became known as "Hard Times Tokens". These often had political commentary on them such as "Substitute for Shinplasters". Shinplasters referred to paper money.

For more information about Benton, see *Old Bullion Benton, Senator From The New West* by William Nisbet Chambers, copyright 1956, Little, Brown and Company.

## JUDAH P. BENJAMIN

The famous writer and poet Stephen Vincent Benét wrote of Judah P. Benjamin in the well-known narrative poem, *John Brown's Body*:

"Judah P. Benjamin, the dapper Jew  
Seal-sleek, black-eyed, lawyer and epicure,  
Able, well-hated, face alive with life..."

Judah Philip Benjamin was born August 6, 1811, on the island of St. Thomas, British West Indies. His parents were Orthodox Jews. He became a lawyer and politician (Senator from Louisiana), and was one of the first southern senators to advise secession. The Rothschild banksters placed their man Judah P. Benjamin in the Confederacy, and in hindsight it appears that his job was to help create the war the banksters wanted. On December 8, 1860, he particularly advocated separate secession from the Union by Louisiana. The Jewish writer Benjamin Kaplan, in an article about Mr. Benjamin in the book *Jews in the South* (Louisiana State University Press, 1973), said: "As Benjamin entered the ferment surrounding secession and war, his zeal burned with a fire that did not always seem a pure flame. This writer believes that his fervor was made to serve a purpose of which most biographers are as yet unaware." (p. 84). Kaplan said that Benjamin was extremely fervent in FAVOR of slavery.

Strangely, Benjamin also became a close friend of Jefferson Davis. Davis said: "Mr. Benjamin, of Louisiana, had a very high reputation as a lawyer,

and my acquaintance with him in the Senate had impressed me with the lucidity of his intellect, his systematic habits and capacity for labor." (Jefferson Davis, *The Rise and Fall of the Confederate Government*, New York: D. Appleton and Co., 1881, I, 242). J.P. Benjamin was the only known Jew high ranking in the Confederacy, and became the Adjutant General, the Secretary of War and the Secretary of State. His picture is on the Confederate \$5 bill, 1861 issue. This September 2, 1861 issue with Benjamin's picture was never authorized, so the reference books say the date must be an error. One of the bills authorized that year had a picture of someone called "Ceres".

Benjamin was Jefferson Davis' closest advisor, even though others such as Confederate General Joseph E. Johnston were bitterly against him. Johnston wrote to Davis: "The course of the Secretary of War [Benjamin] has not only impaired discipline, but deprived me of the influence in the army, without which there can be little hope of success." [*The War of the Rebellion: A Compilation of the Official Records of the Union and Confederate Armies* (Washington, D.C., 1881), Ser. I, Vol. V, 1087.]

Kaplan said: "As secretary of state, Benjamin did his best to obtain recognition for the Confederacy from Great Britain and France and endeavored to secure foreign aid wherever he thought possible, but European countries were pessimistic about the South's chances for success and remained aloof." (p. 86). Near the end of the war he fled to Britain, where he was knighted for his services to the British and became Sir Benjamin, or so I have heard but I cannot now find the proof. In 1870 he was made queen's counsel for the county of Palatine of Lancaster, and was honored at a banquet given by the bar of England in the Inner Temple Hall (*ibid*, p. 87).

## THE ASSASSINATION OF LINCOLN

Just days before his assassination, President Lincoln said: "As a result of the war, corporations have been enthroned and an era of corruption in high places will follow and the money power of the country will endeavor to prolong its reign by working on the prejudices of the people until wealth is aggregated in the hands of a few and the Republic is destroyed. I feel at this moment more anxiety for the safety of my country than ever before, even in the midst of war."

I have in my office an original copy of *The New York Herald* for Saturday, April 15, 1865. It does not have headlines in the manner we are accustomed; it has headlines only for items in the columns. The front page is seven columns wide and the left column is headed: "IMPORTANT—ASSASSINATION OF PRESIDENT LINCOLN—The President Shot at the Theatre Last Evening—SECRETARY SEWARD DAGGERED IN HIS BED BUT NOT MORTALLY WOUNDED—Clarence and Frederick Seward BADLY HURT. ESCAPE OF THE ASSASSINS—INTENSE EXCITEMENT IN WASHINGTON—Scene at the Deathbed of Mr. Lincoln—J. WILKES BOOTH, THE ACTOR, THE ALLEGED ASSASSIN OF THE PRESIDENT, &c., &c., &c." These are all headlines in the left column.

The article then continues: "THE OFFICIAL DISPATCH. War Department—Washington, April 15—1:30 P. M. Major General Dix, New York:—  
"This evening at about 9:30 P. M. at Ford's Theatre, the President, while sitting in his private

box with Mrs. Lincoln, Mrs. Harris and Major Rathbone, was shot by an assassin who suddenly entered the box and approached behind the President.

"The assassin then leaped upon the stage, brandishing a large dagger or knife, and made his escape in the rear of the theatre.

"The pistol ball entered the back of the President's head and penetrated nearly through the head. The wound is mortal..."

A couple of paragraphs tell of the stabbing of Frederick and Clarence Seward, then continues: "General Grant and wife were advertised to be at the theatre this evening, but he started to Burlington at six this evening."

The article is signed by Edwin M. Stanton, Secretary of War.

Another article in the same column says: SECOND DISPATCH—Washington, April 14, 1865. An attempt was made about 10 o'clock this evening to assassinate the President and Secretary Seward. The President was shot at Ford's Theatre. Result not yet known. Mr. Seward's throat was cut, and his son badly wounded. There is immense excitement here."

I did not realize until reading this paper, that Lincoln was shot on Good Friday.

An article in the fifth column (no pun intended) says: "It is now ascertained with reasonable certainty that two assassins were engaged in the horrible crime. Wilkes Booth being the one who shot the President, and the other an accomplice, whose description is so clear that he can hardly escape.

"It appears from papers found in Booth's trunk that the murder was planned before the 4th of March, but fell through then because the accomplice backed out, until 'Richmond could be heard from.'"

Isn't it strange that Presidential assassins and lone bombers always leave diaries and papers around implicating themselves? Or perhaps this is merely the coverup *modus operandi* of the true killers? Works, doesn't it.

Other articles said that cotton was 42 cents a pound, flour was \$9.00 per barrel. About half the paper was devoted to advertisements and personal testimonies concerning a miracle cure called Hepaticure, price one dollar per bottle. One column lists over 50 items that will be cured by Hepaticure, items such as sudden stoppage of urine, pain in back, pain in joints, loss of flesh, coated tongue, tube casts, "tired and sleepless", falling of the womb, etc. According to all the written testimonies, the stuff must have really worked. I suspect it was alcohol and something else, perhaps cocaine or mercury or arsenic.

There were previous attempted assassinations of Lincoln, including one before he was inaugurated. Upon his arrival in Washington, as he was preparing to assume office, the armed Knights of the Golden Circle were preparing to kill him and seize the capital but were prevented by General Winfield Scott.

## THE JEWISH B'NAI B'RITH AND THE ASSASSINATION OF LINCOLN

Another of the Rothschild "emissaries" was Simon Wolf (1835-1923) who was the head of the Order of B'nai B'rith in Washington, D.C., for the period of the Civil War. In 1862, Wolf was arrested by Lafayette C. Baker, who was the chief of detectives for the city of Washington and later Lincoln's chief of the U. S. Secret Service, on charges that Wolf was spying and blockade running on behalf of the Confederacy. Wolf was charged with being part of a conspiratorial

organization (the B'nai B'rith) which was working with Jews who were spying for the South. "B'nai B'rith" means "Sons of the Covenant", the covenant being circumcision.

When General Grant took command of the Western Front, he immediately issued Order No. 11, which expelled all Jews from the military district within 24 hours of its implementation because he had information that they were working with Judah P. Benjamin. Lincoln, afraid that it would seem to be an attack on religion, rescinded the order, and thus it could be said that he thereby sealed his own doom.

A very good book on the Lincoln assassination is *The Lincoln Conspiracy* by David Balsiger and Charles E. Sellier, Jr. Balsiger is the author of many books including *In Search of Noah's Ark* and *The Satan Seller*. Sellier is producer of films including *The Lincoln Conspiracy*, *In Search of Noah's Ark* and *The Life and Times of Grizzly Adams*. The Lincoln assassination documents were sealed for 75 years, just as they did with the Kennedy documents, but the 75 years have passed and Balsiger and Sellier gained access to many of the documents and to secret service documents, congressmen's diaries, old letters, deathbed confessions, and the purported missing pages from the John Wilkes Booth diary and correspondence secretly intercepted by Secretary of War Edwin Stanton. The book is very good as far as it goes; the authors apparently were not aware of the British banker connection, although they do say that evidence showed that Booth escaped to go to England.

In the chapter titled "The Money Men Conspire", they say that certain congressmen arranged for Booth to meet Judah Benjamin, to carry out the conspiracy against Lincoln. "Booth made another trip to Richmond to see Judah Benjamin..." (p. 58, paperback). Benjamin arranged for Booth to meet with him and Jay Cooke, Henry Cooke (head of the First National Bank and National Life Insurance Company), Senator Zecharia Chandler, cotton broker Samuel Noble, and political boss Thurlow Weed. "I think most highly of Judah Benjamin. And I must acknowledge that anyone the old fox should send would be the best man available," said Henry Cooke to Booth (p. 60). "Rebel Judah Benjamin had set up a meeting between him and the Northern financiers and speculators" (p. 69). And thus the arrangements were made for the assassination of Lincoln.

The authors said that afterwards, Secretary of War Edwin Stanton, Chief of Secret Service Lafayette Baker, Chief of War Department Telegraph Office Major Thomas Eckert (later president of Western Union), Assistant Secretary of War Charles Dana and others high in the government directed the conspiracy cover-up. Booth went to England where he married Elizabeth Marshall Burnley. He had changed his name to John Byron Wilkes.

On page 122 of the book, the authors said that on the morning of the assassination, "Booth breakfasted in Washington's National Hotel dining room with Miss Carrie Bean, a merchant's daughter. The actor spoke briefly with another young woman, Lucy Hale, as he left the hotel and went to the barbershop for his morning shave." Keep this meeting with Hale in mind as we look at this next quotation.

In 1987, the ADL (Anti-Defamation League of B'nai B'rith) published an authorized biography of Simon Wolf, which of course painted Wolf in the most favorable light. It says:

"Locally the group's theatrical productions received a good press. Wolf, who would often play the Ghost in *Hamlet* or Shylock in *The Merchant of Venice*, bore an uncanny resemblance to John Wilkes Booth, Lincoln's assassin. Earlier in Cleveland, Booth had joined Wolf and Peixotto in dramatic

performances. Years afterward, Wolf remembered that he had met Booth once again at the Willard Hotel, on the morning of the day Lincoln was shot. There, at the bar, Booth explained that Senator John P. Hale's daughter had just rejected his marriage proposal. Wolf attributed Lincoln's murder to this personal tragedy in Booth's own life. Wolf also recalled that once he sat for a picture entitled 'The Assassination of President Lincoln'."

Considering that Wolf was Booth's liaison with J. P. Benjamin, do you think the ADL told the whole story about that meeting? In Wolf's book, *Presidents I Have Known*, Wolf says that he and his longtime acquaintance John Wilkes Booth did some drinking together at the Willard Hotel on the day Booth shot Lincoln. Benjamin Peixotto, mentioned above, was also a high B'nai B'rith figure.

When the British and Rothschild banksters failed to regain America in the War of 1812, they did not give up trying. In 1801, the pro-British Tory faction of U. S. Freemasonry set up as the "Grand Council of the Princes of Jerusalem of the Mother Supreme Council of the Knights Commander of the House of the Temple of Solomon of the Thirty-third Degree of the Ancient and Accepted Order of the Scottish Rite of Freemasonry in the United States." This lodge was chartered in Charleston, S.C. It was this lodge that later was in charge of creating the Civil War. Through their network of spies and politicians, they became very wealthy, mostly from cotton and the slave trade. The founders of the Charleston Scottish Rite Lodge were Isaac DaCosta, Moses Cohen, Israel De Lieben, Dr. Isaac Held, Moses Levi, and Moses Peixotto, probably related to the Benjamin Peixotto mentioned above.

The B'nai B'rith's own magazine, *The Menorah*, said this about the founders of the group:

"Their reunions were frequent and several of them being members of existing benevolent societies, especially the order of Free Masons and Odd Fellows, they finally concluded that a somewhat similar organization, but based upon the 'Jewish idea', would best obtain their object. The Jewish religion has many observances and customs corresponding to the secret societies known to us. The synagogue, for instance, might be compared to a lodge room. It used to be open twice a day. For a Jew desiring to find a friend, they had but to go there and make themselves known by a certain sign and token. The sign consisted of a grip with a full hand and the magical word Sholem Alachem. The messusah on the doorpost was the countersign. Shema Israel (Hear, O Israel) was the password."

The purpose of the B'nai B'rith was to destroy the Union and pave the way for the reconquest by Britain. Israel Joseph Benjamin, in his memoirs *Three Years In America, 1859-62*, wrote of the B'nai B'rith that "this is a secret society, like the Freemasons, with passwords and the like and was quite a new phenomenon for me...still I think the existence of such a society not at all necessary."

When Judah P. Benjamin moved from the British West Indies to the U.S., he went to Charleston, S.C., and became involved with the B'nai B'rith. He later became the actual head of the Confederate secret service charged with protecting Jefferson Davis, and he used this opportunity to arrange the assassination of Lincoln by Booth and John Surratt.

Benjamin's liaison with Rothschild and the British banksters was a Northerner, August Belmont (real name Schoenberg), who was chairman of the Democratic Party and a fellow member of the Charleston, S.C., B'nai B'rith. Belmont's daughter was married to John Slidell, who was a business partner of Judah Benjamin. Belmont was a private secretary to the British House of Rothschild before he

went to New York in 1837. The head of the Mother Lodge of the Scottish Rite in England was at that time Lord Palmerston, Britain's Prime Minister and head of the British secret service.

Fellow slave traders and cotton traders from the Charleston Scottish Rite Lodge included the Lehman Brothers, who moved to New York after the assassination and became prominent in Wall Street banking and stock brokerage and eventually part owners of the Federal Reserve Bank system.

When Andrew Johnson became President after Lincoln's murder, he pardoned the Scottish Rite insurrectionists—including Albert Pike—and accepted a rank of 32nd Degree in the Freemasons. He also absolved Simon Wolf at this time. Albert Pike went to Tennessee and founded the Ku Klux Klan, using Scottish Rite leadership!

The British Scottish Rite directors were the heads of the British East India Company, including Prime Minister Palmerston. Henry Carey, one of the architects of Lincoln's Reconstruction program, wrote a book in 1853 called *The Slave Trade, Domestic and Foreign* in which he warned about Britain's Opium War against China (forcing China to accept opium). The Chinese fought back, using a strange form of boxing (now known as kung fu), and it became known as The Boxers' Rebellion. The British Royal Family and banksters are still to this day behind the world's major illegal drug trade (and legal, for that matter). For exhaustive details see *Dope, Inc.* by the editors of *Executive Intelligence Review*. The back cover of that book says:

"*Dope, Inc.*, The Book That Drove Henry Kissinger and the Anti-Defamation League Crazy.... When the first edition of *Dope, Inc.* was published in 1978, the most powerful bankers of London and Wall Street went running for cover, and the gangsters at the Anti-Defamation League launched a multimillion dollar drive to bury its authors under an avalanche of slanders and government dirty tricks. Why? Because *Dope, Inc.* revealed the most deeply held secrets of the big names behind the world's illegal narcotics trade."

After Simon Wolf was forgiven by President Johnson, he went on to later become advisor to President Theodore Roosevelt in mobilizing support for the overthrow of the Russian Czar. In his autobiography, he says he met secretly with Roosevelt at his Sagamore Hills estate to launch a drive to brand the Czar as "anti-Semitic". The Jews hated the Czar, going back to his recognition of the danger of the Illuminati at the time of the American Revolution. During the Civil War, in 1863, Czar Alexander II dispatched the Russian Navy to New York and San Francisco to come to the aid of Abraham Lincoln and threatened to go to war against Britain if the Royalty joined the war on the side of the Confederacy (with their man Judah P. Benjamin).

In 1972, a publication called *Jew In Review* quoted from the *Jewish Tribune* which said: "Masonry is based on Judaism. Eliminate the teachings of Judaism from the Masonic ritual and what is left?"

The *Jewish Encyclopedia* says: "The technical language, symbolism, and rites of Masonry are full of Jewish ideas and terms."

### WHY WAS LINCOLN ASSASSINATED?

Because Lincoln was forced into the War between the States, he was forced to use paper money. The United States had no paper money until the Civil War, except for private and state bank issues. Because of the war, there were simply not enough coins. The banksters offered Lincoln money at 24-36% interest. Lincoln reasoned: Why should we borrow money from

these foreigners at such outrageous interest, when we could issue our own money for no interest? He pulled the rug out from under their plans by asking Congress to pass a law authorizing the printing of legal tender United States Notes. The Treasury issued over 400 million dollars in what were called "Lincoln Greenbacks", United States Notes with no interest. A note, by the way, is a loan, that has to be paid back, usually with interest.

The British bankers did not like being defeated in their scheme to collect interest, so they issued the order to "Get Lincoln".

On December 28, 1861, the New York Associated Banks suspended specie payments to the government. You could no longer get gold out of the bank, and they stopped transferring gold to the government which had been pledged for the purchase of government bonds. Other banks followed. In 1862 the bankers headed by James Gallatin tried to force the government to sell high-interest bonds to the European bankers. William Cullen Bryant, editor of the *New York Post*, began a series of articles attacking Lincoln's policies. In Britain, August Belmont, who was then meeting with the Rothschilds, dispatched protesting messages to Lincoln.

Belmont met with the Rothschilds and Britain's Prime Minister Henry Palmerston (the head of the Mother Lodge of the Scottish Rite in England and head of their secret service) and Chancellor of the Exchequer William Gladstone. By controlling the world's gold supply, the British ruled the world, and they did not like what Lincoln was doing. They made plans for war.

On January 1, 1862, there were 1,496 banks in the United States. There were around 7,000 legitimate notes issued, and about 5,500 counterfeit notes. The notes were no longer backed by gold under the suspension by the Associated Banks. The banking system was in turmoil.

On February 25, 1863, Lincoln signed the National Currency Act and the National Banking Act on June 3, 1864. As a provision of the Banking Act of 1863, commercial banks could be incorporated under federal charter, instead of state charter. A 10-percent tax was levied on all notes issued by state banks. The number of uncontrolled state banks fell to 297, and the number of federally-chartered banks rose to 1,634.

Usury laws were put into effect limiting usury to 7 percent or less. If a bank was caught exceeding this limitation, it would forfeit the loan and would have to refund the victim double his money. Banks were not allowed to hold real estate for more than 5 years (excepting the property upon which the bank sat).

The Legal Tender Acts were billed as a wartime emergency measure designed to help damage the enemy. Representative John Crisfield of Maryland said:

"...to handle the vast amount of means necessary for the prosecution of this war, to enable the people to pay in and the government to pay out, we must have a larger and more abundant currency that [sic] we have heretofore found to be necessary. The

accustomed currency is wholly inadequate. The Government has for many years used only gold and silver for this purpose.... The business of the Government and the business of the country require some substitute for coin. We must therefore create a new...[paper] currency. We must therefore create a public debt, establish a currency, and impose new taxes." (*Congressional Globe*, 37th Congress, 2nd Session, Appendix, page 43 et. seq., Feb. 5, 1862).

Lincoln issued a national currency, \$450 million called "greenbacks" because the backs were printed in green. The greenbacks were attacked by British-backed newspapers as needless instruments of inflation. In the meantime, J. P. Morgan sold huge quantities of U. S. gold overseas, to try to wreck the U. S. currency. Other newspapers openly attacked Morgan and his British-backed traitors.

The new greenbacks were issued by Secretary of the Treasury Solmon P. Chase through Philadelphia banker Jay Cooke, who was the sole agent for the bonds. Cooke, recall, was one of the bankers who met with John Wilkes Booth to arrange the assassination of Lincoln, and the Chase family later married into the Rockefeller family and started the Chase Manhattan bank. Ah, the tangled webs!

## WHO PUT "IN GOD WE TRUST" ON OUR MONEY?

Lincoln's Secretary of the Treasury, Solmon P. Chase, was the one who ordered "In God We Trust" to be added to money. His picture is on the 10,000 dollar bill, the largest ever issued except for some inter-bank transfer documents. Think about it, why should "In God We Trust" be put on MONEY of all things? In a letter to James Pollock, director of the Mint, dated December 9, 1863, Chase wrote:

"I approve your mottoes, only suggesting that on that with the Washington obverse the motto should begin with the word 'Our', so as to read:

"Our God and our Country'. And on that with the shield, it should be changed so as to read: 'In God we Trust'."

On March 3, 1865, the words were added to our coins by Act of Congress.

The following month, Lincoln was assassinated, on April 5, 1865. Chase helped in the subsequent coverup of the crime, and therefore I suspect he was involved in other ways, but I have no proof.

[To be continued.] ✎

# The Untold History Of America

by Ray Bilger

**This book shatters the image that has traditionally been portrayed as American History, by exposing the high-level corruption that passes for business as usual in the Halls of Congress, the White House and throughout our entire Judicial system.**

**The Untold History of America was written for the specific purpose of providing a high school textbook for all American schools that would educate students into the real nature of our national situation. With a clear understanding of things as they exist in reality, students will then be in a much better position to go on in life and do something to correct our current downhill course.**

**This book is for those who want to know why America is the way it is today, where we went wrong, who are the responsible parties, and what we can do to bring back the American Dream our forefathers and mothers fought so hard to establish and gave their very lives to defend.**

**Special emphasis is placed throughout the book on the original inhabitants of America, the Native Americans. They lived for thousands of years on this continent in complete harmony and balance with the Earth. With their help we may yet be able to turn things around so that our tomorrows will be something we will all be honored to pass on to the children who are our future generations.**

The first 16 parts of Ray Bilger's ongoing series, The Untold History Of America, have finally been compiled into a book, *The Untold History Of America, Vol. I*, now available from **Phoenix Source** Distributors

for \$7.00 plus S/H

(see Back Page for ordering information).

# Time To Get Serious About KILLER BUGS

[Continued from Front Page]

wars? No, it is in mid-Indiana [see story at end of News Desk on p. 5], so the breaking story goes. Many tons of the "stuff" is stored and urgent fear of leakage is upon you all! This is described as "war material" and is airborne. I hope this gets placed on the "hotline" [805-822-0202] as more information is gathered at CONTACT it was because it would appear to me that criticism and criminal sanctions might well need to start on your own doorsteps instead of killing off the rest of the world at your convenience.

Dharma can only deal with one topic at a time as we still TYPE every word of every article handled by her and me. This is to cause full attention to the topic as well as to realize that if we can write it—you have time to read it! I am confident that by next Tuesday's paper deadline there will be more information.

## OTHER WARNINGS IN THE CURRENT NEWSCAST

Ok, readers, the push is on for care in cooking and storing holiday foods, especially turkey and any meats. "You need to defrost everything in the refrigerator, cook thoroughly, purify the cutting boards and the counter tops EVERY TIME USED, and 'use common sense'." To make your holiday time more relaxing, the mouths go on to exclaim you need to be cautious of unpasteurized apple juice and cider and any eggnog, along with raw or poorly-cooked eggs. They also point out that such as salmonella can be present on greens and sprouts and even on nuts.

Have a happy, happy HOLIDAY, friends. I hope some of you are around after the fact to wish you had paid attention.

## OUTBREAKS OF CONTAMINATION IN THE FOOD SUPPLY

I have written so frequently and in such depth prior to this on the various mysterious outbreaks of disease along with new or old microbes which have become so resistant as to be considered possible of pandemic genocide that I have hesitated to nag you readers more about care and attention.

Lately, however, there has been such attention and so many petitions for input that I feel compelled to again speak on the subject, having been sent a copy of the current *U.S. News and World Report* wherein even the cover is pointing out the immediate dangers. This, while you have a pending war in Iraq and other amazingly important topics are covered by

other leading news magazines.

The cover pictures a sick calf and the printed reference reads: *First, a calf on this Vermont farm got sick. Then the cows started dying. Then the people fell ill. Soon, federal scientists were hunting down a virulent new microbe.*

I have stressed prior to now and will attempt to again warn you and stress once more the dangers involved in what is now taking place to endanger the good health of every living animal species on your globe.

What can you do? Well, I can't do more than remind you to get and find out all you can about the colloids now being offered for use [contact New Gaia Products at 1(800)639-4242] because antibiotics are becoming more and more useless with each new outbreak. I also remind you that you can still find purification through the use of hydrogen peroxide [35% food grade] prior to intaking items that might be contaminated.

I can only speak on these topics, suggest possibilities for protection and then, readers, the ultimate responsibility for yourself and family rests upon your own shoulders. We are a newspaper and have no input to your medical or physical health matters. We do make an effort to make available useful items and information but we can do no more. WE DO NOT IN ANY WAY PRACTICE MEDICINE NOR DO WE PRACTICE LAW. These professional practices are gods and god-like organizations run by the Medical Association and Bar Association (private entities and not licensed, federally-authorized entities). I, further, have asked repeatedly that YOU NOT ASK US TO EVEN REMOTELY DIAGNOSE OR SUGGEST TREATMENT FOR ANY HEALTH OR LEGAL CIRCUMSTANCE.

This topic is so important, however, as to cause me to ask to run the article as offered: *U.S. NEWS AND WORLD REPORT*, Nov. 24, 1997, Cover and beginning story, page 70.

Since we will not go to press in time for newsstand issue to be purchased we will, as agreed, offer the entire article and copies can be obtained directly from the magazine.

Full credit and appreciation is given to the magazine and to the author, Amanda Spake and photographer, Yunghi Kim.

Subscription information: *U.S. NEWS AND WORLD REPORT*, PO BOX 52133, BOULDER, CO 80323-2133.

It is with great seriousness that I ask you to pay attention and this attention should go around the globe for, with the extremes in weather patterns and flooding expected to be widespread, you will find a major and rapid upsurge of all diseases and contamination of animals and farm lands along with produce brought to market. Your only line of defense is a full-out line of offense to pre-treat food products in every possible instance while also being prepared to IMMEDIATELY take counter-action if symptoms occur. If anyone eating with you begins to present symptoms—ACT INSTANTLY.

[QUOTING:]

## "O" IS FOR OUTBREAK

*TROUBLED PARADISE:  
Some 70 percent of all outbreaks  
of foodborne illness are traced  
back to meat and poultry products.*

by Amanda Spake

*When a drug-resistant salmonella struck a Vermont farm, health officials knew it might be just the beginning...*

Cynthia Hawley walked out the back door of her mother's house about 8 a.m. to feed the calves. It was a cold May day at Heyer Hills Farm, but she remembers the Sun was shining, unusual for Franklin County, Vt., 50 miles south of Canada, where snow stays on the Green Mountains sometimes into June.

Hawley crossed the stone steps to the barn and got the pails for the calves' grain and fresh milk. When she carried Evita's food into her hutch, she saw that the calf's eyes were sunken and her belly was bloated. Evita, mostly black with just a little white, was her baby, her beauty, a perfect Holstein. Hawley gave the calf some aspirin, a shot of the antibiotic ampicillin, and the milk. But by 2 p.m. Evita was worse. Hawley phoned her veterinarian, Milton Robison, and left a message that a calf was very sick.

Robison arrived at the farm about 4 p.m. All the calves were running high fevers. Suspecting he might be dealing with some sort of salmonella, he treated the animals with analgesics, with electrolyte solutions because they were dehydrated, and with more ampicillin to knock out the bug. None of it helped Evita, and about 9 p.m. the calf died.

The next morning, another calf was down. Wednesday morning there was a third. Most of the animals suffered blood diarrhea, a sign that bacteria were destroying their intestinal walls. In the vet's experience, cows fought off salmonella on their own, just as most healthy people do. But these animals weren't fighting it off. And the odd thing was that the antibiotic wasn't working either. Was his diagnosis wrong? An autopsy on the second calf that died revealed massive damage to the lining of the intestine. Yes, it was salmonella. But what kind? Robison already had sent stool samples from

I have stressed prior to now and will attempt to again warn you and stress once more the dangers involved in what is now taking place to endanger the good health of every living animal species on your globe.

the first calves to the veterinary lab at Cornell University, his alma mater, but results were days away. Now he sent a section of the dead calf's intestine on to Cornell, too.

At Robison's suggestion, Hawley, 45, and her mother, Marjorie Heyer, kept the young grandchildren away from the barn. But, like many dairy farmers, the Heyers drank their own, unpasteurized milk. "It tastes better," Heyer says, "and you're selling it for \$1 a gallon. Are you going to buy it [at the store] for \$2.50?" They'd never had a problem with contamination at the farm before; why should their raw milk be unsafe now? [H: I have to remind you that only 7 drops of 35% food-grade hydrogen peroxide or *OxySol* would purify the gallon of milk, or pasteurization (heating) of the milk in a pan on the stove would also have purified this particular form of contamination.]

Neither Hawley nor Heyer knew that they were battling a virulent new foodborne pathogen. Or that, within days, nine members of the family would fall ill, and one would nearly lose her life.

EACH YEAR UP TO 81 MILLION Americans suffer a foodborne illness; 9,100 die. The cost to the nation is anywhere from \$5.6 billion to more than \$22 billion per year in medical treatment and lost wages. Bad food also makes big headlines. Last August, Hudson Foods ordered the largest meat recall in history—25 million pounds of hamburger patties—after *E. coli* 0157-H7, a deadly bacterium, was found in its burgers. Imported raspberries contaminated with the parasite *cyclospora* sickened thousands in 29 states in the spring of 1996 and again in 1997. Last month, United States Department of Agriculture inspectors discovered *E. coli* 0157-H7 in ground beef shipped to a Virginia grocery by Beef America, resulting in another big recall. And earlier this month, some 700 people became infected with *Salmonella heidelberg* after eating ham stuffed with greens and spices at a church supper in rural Maryland. Two women died and 31 other people were hospitalized.

### THE ODD THING WAS THAT THE ANTIBIOTICS WEREN'T WORKING

Traditionally, America has had the safest food supply in the world, enviable for its quantity, quality, and cleanliness. Rapid changes in food production have put a cheap chicken in every pot—and a chicken takeout shop on every corner—and brought the bounty of the global garden to our doorstep. We live in a "culture of plenty", unimaginable 50 or 60 years ago when most food still was grown locally by individuals and small producers on family-owned farms.

Plenty has its price, however. Outbreaks of foodborne illness have become more common, larger, and international in source and scope. And federal enforcement of food-safety laws, spread among 12 different agencies, has grown disparate and chaotic as the food industry has expanded and become more complex. The Food and Drug Administration has 700 inspectors and lab personnel to monitor 53,000 food-processing plants and all imported produce. Plant inspections have slipped from once every three-to-five years in 1992 to once every 10 years today. "Recalls," says Maurice Potter, assistant director for foodborne diseases at the Centers for Disease Control and Prevention in Atlanta, "are an admission of defeat—they're bad for everyone." Recalls of FDA-regulated products have increased almost fivefold since 1988.

About 70 percent of outbreaks of food-borne illness are traced back to meat and poultry products, according to the USDA which regulates animal foods production and processing. Eighty percent of illnesses and 75 percent of deaths from meat and poultry products are caused by two pathogens—salmonella and campylobacter. Crowding animals together on large farms, multistep processing, and broad distribution of perishable food—all, ironically, hallmarks of our modern food system—promote the spread of both bacteria.

Scientists have been familiar with some strains of these two pathogens for years. But as better ways to produce foods have been developed, the bacteria have found new ways to infect the food.

"If you understood the epidemiology of foodborne illness 10 years ago, you don't necessarily understand it today," says Michael Osterholm, chief epidemiologist at the Minnesota Department of Health. Five or 10 years ago, says Osterholm, the No. 1 vehicle for foodborne disease in Minnesota was meat; now it is produce. Microbes also have shown far more cunning than researchers once imagined they could. Scientists did not discover until 1986 that *Salmonella enteritidis*, rare in this country in the 1970s, had found its way *inside* the shells of eggs by infecting the ovaries of laying hens. Passed to humans who eat undercooked eggs, the strain now kills more people than any other foodborne pathogen in the United States.

The most worrisome development, however, is the emergence of new disease organisms *resistant to drug treatment*. Like the bug that struck last spring at Heyer Hills Farm.

THE IMPORTANCE OF THE ILLNESSES might never have been recognized had it not been for Doc Robison. On Thursday, May 8, Robison checked back with Cornell on the calves' samples. He'd been right; the culture plates indicated salmonella. By Friday, Cornell had the strain: *Salmonella typhimurium*. The samples were being forwarded to the USDA lab in Ames, Iowa, for phage typing, a screen that would yield more information about the bug. Robison reported the salmonella outbreak to the Vermont Department of Health, as vets and physicians are required to do by law.

By Monday, May 12, 5-year-old Nicholas Heyer, Cynthia Hawley's nephew, had become very ill with diarrhea, cramps, fever, and vomiting.

Wall underscores his point with a story about holiday turkeys. Last year some turkeys were put on fluoroquinolone drugs by a farmer in England who feared a respiratory disease would make them ill and unsalable. "But once you introduce a quinolone drug to kill one bug, it causes resistance in all the others," Wall says. "So a large number of these turkeys ended up with multiresistant DT 104 infections that were also resistant to fluoroquinolones."

Soon after, there was an outbreak in a restaurant where frozen turkeys were left out all night to thaw. The next morning, the chef came in and thought the turkeys were fresh. He didn't cook them long enough to kill all of the DT 104 bacteria in the meat. "Thirteen people became ill with *salmonella* DT 104 infections," Wall says, "and one person died. Because the bacteria had become fluoroquinolone-resistant, there was no drug to treat that one very sick person."

Nicholas's cultures were positive for salmonella. The illness can be deadly to young children (who don't yet have well-developed immune systems), to the elderly, and to people with chronic illnesses, cancer, or AIDS. In some cases, the bacteria pass through the intestinal wall into the bloodstream where the infection, if not stopped, can be fatal. The CDC estimates there are 2 million to 4 million salmonella cases in the United States annually, and perhaps 200,000 of those people are sick enough to see doctors.

About 6 percent of serious infections invade the bloodstream. An estimated 1,000 to 2,000 people die of salmonella yearly.

Nicholas's doctor wasn't taking any chances. He put the child on Bactrim, an antibiotic combination of trimethoprim and sulfamethoxazole. Soon, Heyer and five or six other people around the farm who'd been drinking milk came down with the illness. Their doctors, in turn, treated them with Bactrim.

Robison told a colleague at the Vermont Department of Health that he thought something unusual was happening at Heyer Hills Farm. Not only were a significant number of cattle dying but people at the farm were getting sick, too. He had a touch of it himself. Robison piqued the interest of the Vermont Health Department, which contacted the CDC in Atlanta.

Until Friday, May 16, Cynthia Hawley thought she had escaped infection. She had cared for the sick cattle, but she drank no raw milk. She had an appointment at noon to get a haircut in Burlington, 25 miles away. At the hairdresser's, she began to have chills. Then she was burning up. Next, she began to feel excruciating pains in her stomach and lay down on a couch. Within an hour, she could not stand up. At about 2 p.m. she phoned her mother and asked if she and Cynthia's sister could pick her up and take her home.

By the next day, Hawley could not keep liquids down. Her diarrhea began to turn bloody, just like the calves'. Heyer drove her daughter to the nearest hospital, in St. Albans. Emergency room doctors there called in Mara Vijups, an internist. Vijups did an examination, heard about the salmonella, and admitted Hawley immediately.

The hospital hooked her up to electrolyte solutions to hydrate her, and Vijups prescribed a synthetic penicillin (she was allergic to Bactrim). Hawley worsened. After a day, Vijups tried another antibiotic, a cephalosporin, without success.

Mostly, Hawley slept. She struggled to the bathroom on Sunday to find her diarrhea watery and very bloody. "I was pretty scared," she remembers. "I knew from the cows that once their diarrhea started getting watery and bloody, they were dead."

On Monday morning, May 19, Vijups, Hawley's doctor, checked on her in the hospital. Hawley had seen a news report the night before about the spread of a new salmonella strain in England. "I know I've got that DT 104," she told Vijups. To her surprise, Vijups responded, "Yeah, that's what we're dealing with."

The report from the USDA laboratories in Iowa had come back that morning. The samples showed *Salmonella typhimurium* DT 104, identifiable by its resistance to five or more antibiotics including ampicillin, chloramphenicol, streptomycin, sulfonamides, and tetracycline.

THE CENTERS FOR DISEASE CONTROL and Prevention in Atlanta is located in a six-story brick building adjacent to the campus of Emory University. At the Foodborne and Diarrheal Diseases Branch of the Center for Infectious Disease, eight epidemiologists spend the majority of their time working their computers and telephones. Eight medical investigators, epidemiologists in training, are sent to the site of outbreaks. But only in a limited number of outbreaks—about 12 in each year—does the CDC actually send an investigator to look for more cases, interview patients, take lab samples, and report back to Atlanta. Those cases are chosen because CDC scientists believe they will lead to new information and advance the science of foodborne disease.

The heart of the CDC's operation is the

electronic network it has built with local health departments in every state. The health departments feed raw numbers to the CDC weekly. The public hears about salmonella or E. coli when large numbers of people are hospitalized. But most foodborne illnesses are not associated with large outbreaks. They are "sporadic" or isolated cases among individuals that may never be reported to health departments or the CDC. The CDC estimates that for every reported case, 10 to 100 go uncounted.

Sitting in small cubicles, staring at printouts, CDC epidemiologists scour the state data looking for patterns, trends, and anomalies. When the epidemiologists find something curious, the CDC notifies the state health department and asks for more information or suggests avenues of investigation. When CDC scientists find trends that worry them enough, they begin to track the bacteria worldwide. And that is how epidemiologist Frederick Angulo, became obsessed with *Salmonella* DT 104.

Angulo had watched this bug sweep through Germany, Denmark, England, and Wales, eventually emerging in the United States. DT 104 was identified in this country in 1985. By last spring, when the Heyers were trying to save their dying calves, Angulo had discovered that 10 percent of all salmonella cultures being sent to the CDC were the DT 104 strain. He knew of only one large U.S. outbreak, among 19 Nebraska schoolchildren in October 1996. The source was never determined. In England, DT 104 already had become epidemic. It was killing 40 percent of infected cattle and putting 36 percent of people who became sick the

hospital, twice the number expected from food poisonings. There are bacteria that stay in only one type of animal and never make people sick. DT 104, however, first infected cattle, then spread to other species in every country where it gained a foothold—and no one was sure how.

Angulo knew that in the United States, DT 104 had already been found in sheep, pigs, horses, goats, cats, dogs, elk, mice, coyotes, squirrels, raccoons, chipmunks, pigeons, and starlings. The birds were a real concern because their droppings spread disease everywhere. As microbiologist Paula Fedorka-Cray, the USDA's DT 104 expert had said, if it's in birds "it would just be a matter of time before it would show up in a lot of animal species". There was some evidence in England that DT 104 had first infected exotic birds, parrots, and parakeets, which had spread the infection to cattle through feed.

[H: My serious suggestion is that you who have chickens (poultry of any type) and/or domestic aviaries or indoor birds, that you keep handling, especially mouth contact to an absolute minimum. I further suggest that if you want to avoid the problems outlined here that you treat all water with abundant *OxySol* and/or Hydrogen Peroxide. I further suggest you add some colloidal gold, silver, titanium and copper to the drinking water of all possible pets and even wild animals that may feed and water at your stations. There is no need to lose pets or wildlife to this invasion, or to any other, but I can't remind you enough that the antibiotics available will not touch these new strains of bacteria.

I am asked if the devices which are sold to produce silver colloid are any good? I don't know. If you don't get a good golden color tone to your product—NO.

It may be realized before this whole thing of new microbes settles down that there will have to be colloids produced of iridium and even mercury to have the frequency required to knock out these bugs.

If you are taking silver colloids and/or gold colloids and are getting no positive results I suggest you add *OxySol* to the intake and, as well, titanium colloid. In colloidal form these elements are totally safe and neither can you overdose. Avoid any large amounts of "fall-out" in the products. In addition I strongly suggest you get yourself some Gaiandriana and AquaGaia so you can rebuild and enhance your immune systems. I know of no other source than New Gaia Products for *OxySol* or the dria products, AquaGaia and Gaiandriana. In addition, it would be an exceptionally good idea to keep on hand plenty of GaiaLyte because diarrhea caused by these new strains of microbes will almost instantly dehydrate the body and damage the intestinal tract.]

## IN ENGLAND, DT 104 ALREADY HAD BECOME EPIDEMIC

The English experience with DT 104 is notable for several reasons. Ten years ago, the bacteria began infecting cattle and killed many of them. Farmers in the UK treated infected cattle with several types of antibiotics. Within about two years, the bacteria became resistant to the antibiotics. The first humans infected in the UK were like the Heyers, dairy farmers who had direct contact with sick animals and drank their own raw milk. But the bacteria soon moved into other food animals.

When Peter Galbraith, Vermont's state

# MERRY CHRISTMAS

## From New Gaia Products

Oh, you have no idea how much we hate having to say that already. After all, it is still 5 weeks away. Gadzooks!!! What did we just say? FIVE WEEKS!!!

Well there's nothing like getting the shopping out of the way early.

AND to help you with your joyous task we have decided to give you a hand and a break (Don't worry this won't break your hand).

Beginning October 1st and running through ~~November 15th~~—extended thru December 19th—we will have on SALE ALL of the LIQUID COLLOIDS. The sale will be: "BUY TWO, GET THE THIRD ONE FREE". Well, kinda free. We will add on a small fee for each freebie, to cover the freight. The amounts are as follows:

2oz-freebies @ \$1.00 s&h

16oz-freebies @ \$2.00 s&h

32oz-freebies @ \$3.00 s&h

2-liter-freebies @ \$3.00 s&h

other, regular freight fees still apply.

This offer is good only on orders shipped within the United States.

\*Limit 2 free offers per product. Also on this special will be the Giandriana and the Aquagaia. So here's a list of what's on special: Note this is on all sizes: 2oz, 16oz, 32oz and 2 liters:

Aquagaia, Gaiandriana, GaiaLyte, TeaBreeze, GaiaVite, GaiaCol, GaiaGold, *OxySol*, Cu29-Copper, Ti22-Titanium, GaiaLife121++, Gaia DHEA.

\*The way this will work is, you can buy 4-2oz GaiaCols for \$10.00 each (and get two freebies). That's \$40.00. Plus you will add \$1.00 s&h for each freebie. That's \$2.00 s&h. So the total for the 6-2oz GaiaCols would be \$42.00. Or if you choose to go with the 32oz size for this Product, it would look like this: 4-32oz GaiaCols for \$96.00 each. That's \$384.00. Plus you will add \$3.00 s&h for each freebie. That's \$6.00 s&h. So the total for the 6-32oz GaiaCol would be \$390.00. This is a savings of \$186.00.

We hope this helps reduce your HOLIDAY expenses. Don't forget that we also have available for you, Gift Certificates in any denomination.

Thank You for your continued support.

Yours Truly,  
NEW GAIA  
800-639-4242

epidemiologist, called Angulo in Atlanta to tell him that DT 104 had shown up on a dairy farm near Burlington, the CDC quickly dispatched investigator Cindy Friedman to Vermont.

[SUSPEND QUOTING]

**11/21/97 #1 HATONN**

*U.S. NEWS AND WORLD REPORT*, Nov. 24, 1997, Cover and beginning story, page 70: [RESUME QUOTING:]

ONCE HAWLEY'S DOCTOR HAD THE report from the USDA lab, she realized the only drug DT 104 was clearly *not* resistant to, was a powerful class of new antibiotics called fluoroquinolones, "the drug of last resort", as one doctor calls them. Vijups gave Hawley a fluoroquinolone called ofloxacin, which probably saved her life.

Scientists have recently discovered genes that carry antibiotic resistance on plasmids, or extra pieces of DNA, that are replicated when a bacterium multiplies. What makes DT 104 so special is that its resistance genes are located right on a chromosome, hard-wired into it, making antibiotic resistance easier to pass along to the next generation of bacteria.

[H: When on these topics the next question is usually, "Is this a man-crossed species?" The response has to now remain, "most are" and let it suffice for once out of control it doesn't matter a whit who started the thing and you should focus on what to do to avoid being a death statistic if you encounter the invader. Where you have had nothing identical prior and yet a lot of people "come down" with it at approximately the same time—you can consider that it probably is an intentional process, at least in the beginning.]

Since the early 1990s, there has been growing controversy over using the few remaining effective antibiotics to treat animals, thereby creating multiresistant strains against which humans will have no defense. When DT 104 struck cattle in the UK, farmers used Bactrim to treat them; since 1993, 14 percent of DT 104-strains in the UK had become resistant to fluoroquinolones and nearly 30 percent had developed resistance to trimethoprim, the agent in Bactrim that kills DT 104. "With antibiotics, the more you use them the faster you lose them," says Patrick Wall, chief of gastrointestinal disease at the public Health Service Laboratory in London.

Wall underscores his point with a story about holiday turkeys. Last year some turkeys were put on fluoroquinolone drugs by a farmer in England who feared a respiratory disease would make them ill and unsalable. "But once you introduce a quinolone drug to kill one bug, it causes resistance in all the others," Wall says. "So a large number of these turkeys ended up with multiresistant DT 104 infections that were also resistant to fluoroquinolones."

Soon after, there was an outbreak in a restaurant where frozen turkeys were left out all night to thaw. The next morning, the chef came in and thought the turkeys were fresh. He didn't cook them long enough to kill all of the DT 104 bacteria in the meat. "Thirteen people became ill with *salmonella* DT 104 infections," Wall says, "and one person died. Because the bacteria had become fluoroquinolone-resistant, there was no drug to treat that one very sick person."

The FDA's Center for Veterinary Medicine is reviewing an application to use fluoroquinolones to treat cattle. A fluoroquinolone for treating *E. coli*

infections in poultry was approved by the agency in 1995. Now fluoroquinolone-resistant campylobacter have shown up in poultry.

Linda Tollefson, an epidemiologist at the FDA's Center for Veterinary Medicine, says DT 104 has caused some soul searching within the agency and the scientific community. "I think the situation in the U.S. has the potential to be similar to that in the U.K.," she says. "The fact that it's epidemic in the UK is something FDA takes very seriously."

THE CDC INVESTIGATOR, FRIEDMAN, arrived at Heyer Hills Farm shortly after Hawley came home from the hospital on May 24, nine days after she was admitted. Because the outbreak sickened both humans and animals and because it closely paralleled the English experience, the CDC considered it scientifically significant. At about the same time Friedman was arriving in Vermont, other CDC scientists were investigating DT 104 outbreaks in Washington State and in California. Hundreds of people fell ill from eating Mexican *queso fresco*, or fresh cheese, made from unpasteurized milk and sold in Mexican-American communities in both states.

Washington State health officials were unable to trace the cheese back to a particular dairy. But DT 104 had been a growing problem in the state's dairy herds and beef cattle. According to research by Thomas Besser at the department of veterinary microbiology and pathology at Washington State University, no DT 104 infections were reported in the state before 1986. But by 1995, 84 percent of the salmonella samples from cattle were DT 104. Among humans, 42.5 percent of the 1994 samples were DT 104.

The power that emerging pathogens like DT 104 potentially hold over our food supply has not gone unrecognized in Washington, D.C. Over the past year, the federal government has instituted a new Hazard Analysis Critical Control Point (HACCP) system to try to halt the march of the microbes in slaughterhouses and food processing plants. Beginning in January, USDA inspectors will begin reviewing results of the new, mandatory testing for generic *E. coli* (a sign of fecal contamination) required of the slaughterhouses under HACCP. Only 1 in 300 beef carcasses, 1 in 3,000 turkeys and 1 in 20,000 chickens will be tested, however. No microbial testing is required in meat and poultry processing plants.

Some of those within the government who have faith that HACCP will improve food safety still recognize its limitations. "We, of course, *hope* HACCP will lower the pathogen load in food," says USDA's I. Kaye Wachsmuth, deputy administrator of the Office of Public Health and Science at the Food Safety and Inspection Service. But she concedes that the food industry has, to date, been no match for the microbes. Between 1990 and 1992, for example, an average of 25 percent of all chickens FSIS tested were positive for salmonella. Under the agency's new "Pathogen Reduction Performance Standards" 20 percent of a company's broiler chickens and 45 percent of its ground chicken can test positive for salmonella and the plant will still be in compliance with HACCP. Among turkey processors, the magic number will probably be 15 percent.

This may not be quite as bad as it sounds. According to Michael Doyle of the University of Georgia's Center for Food Safety and Quality Enhancement, salmonella colonies in poultry are small and cause illness only when the birds are mishandled, such as when frozen turkeys are not fully thawed.

The real problem with poultry is not salmonella but *Campylobacter jejuni*. Recent data that have been made available to the federal government by the Minnesota Department of Health show that 70 to 90 percent of chickens and turkeys in Minneapolis supermarkets have been tainted with campylobacter. Unrecognized until 1977, campylobacter is now the most frequent cause of acute bacterial diarrhea in the nation, striking from 2 million to 8 million people each year.

In an effort to bring order to the crazy quilt of food safety enforcement, legislation was introduced in Congress on November 4 that would create a \$1 billion-a-year Food Safety Administration. Caroline Smith DeWaal, food-safety director at the Center for Science in the Public Interest, proposed such an agency—hundreds of outbreaks ago.

The CDC's Angulo says that new food safety initiatives may eventually reduce foodborne-illness risks, but they don't attack the problem at its source. "What DT 104 is calling for," Angulo says, "is a more comprehensive understanding that foodborne illness starts on the farm. Stopping it will require a paradigm shift, a re-evaluation of everything from the massive use of antibiotics in animal feed to the practice of giving calves milk from cows who are sick or that have just given birth. These are very common practices which no one had to worry about until DT 104.

CINDY FRIEDMAN WAS ALSO DEVELOPING this comprehensive understanding—from the ground up in Vermont. She was interviewing family members, testing animals, and sampling milk tanks.

By the end of the outbreak in June, 22 of the 147 cows at Heyer Hills had become ill and 13 had died. Friedman found 17 other cows with positive DT 104 cultures. Three of the family's six dogs were positive, too, but did not fall ill. "We cultured the bulk milk tank filter on two occasions," one week apart, Friedman says. Both samples were positive. "DT 104 was still in the milk." Ninety percent of family members who drank milk became ill. But milk was only one cause of the illness. Caring for sick cattle was another. "This was the first outbreak that conclusively showed animal-to-human transmission," she says.

Leaving Heyer Hills Farm after three weeks of detective work, Friedman was still pondering the questions that bedevil Fred Angulo and England's Patrick Wall: "How did DT 104 get on this farm? How did it move around? Why is it so virulent? And where will it show up next?"

[END OF QUOTING]

If you are inclined to take this very lightly and pass right on over the fact that "you too can be infected" but don't want to bother, I suggest something else for your possibility thinking.

Since we have long recommended that you people carry a supply of 35% Food Grade Hydrogen Peroxide to use in your water wherever you happen to be, I now have another suggestion for your attention: IN ADDITION TO THE HYDROGEN PEROXIDE DROPS YOU ORDINARILY USE, DOUBLE THE DROPS IN THE WATER, ADD APPROPRIATE AMOUNTS OF OXYSOL (10 TO 20 OR 30 DROPS PER GALLON, SO AT LEAST 5 TO 7 DROPS PER GLASSFUL) ALONG WITH GOLD, SILVER, COPPER AND TITANIUM, MIXED COLLOIDS, ADDED AS WELL IN EACH GLASS. IF YOU ADD THE COLLOIDS YOU CAN CUT DOWN ON THE AMOUNT OF HYDROGEN PEROXIDE AND THERE WILL BE

LITTLE OR NO TASTE. DRINK LOTS OF THIS TREATED WATER ALONG WITH YOUR MEAL AND SOME "BEFORE AND AFTER" TO BE IN YOUR INTESTINAL TRACT FROM ONSET OF A MEAL. If you attend this procedure very quietly and simply tell your host, if asked, that you are having to add digestants per physician's orders, there will NO EMBARRASSMENT—PERIOD. Somebody has to stay well, just in case. If a lot of people get sick, for goodness sakes, somebody has to attend them. In this capacity as attendant—keep the colloids at ready FOR YOURSELF!

Wash hands often and rinse in hydrogen peroxide (any old 3% from the store will do). Do not get careless and lazy for the life you can save THIS TIME might very well be your own, and believe me, just the lack of the symptoms that go along with this disease is worthy of full mention.

I ask that a message be put on the hotline BEFORE Thanksgiving reminding everyone to be CAREFUL, take measures to prevent illness and take a little effort at precautions.

Let us give attention to holiday tips as listed in conjunction with this article just presented. The outline can be put on the hotline as a reminder that it is serious in eating-land and that the full story will be in the next paper. You will note the "news" is hitting these warnings heavily, but not THE CAUSE—only the reminders to take care—OR BLAME YOURSELF IN ORDER TO PROTECT THE PRODUCERS AND MARKETERS.

[QUOTING SAME REFERENCE:]

### TURKEY A LA MICROBES?

by Mary Brophy Marcus

A closer look at the traditional Thanksgiving spread—say, through a microscope lens—may make you hesitate before eating. Here are ways to make sure your holiday feast is safe.

**Turkey and stuffing.** If undercooked, turkey can spread *Campylobacter jejuni*, the leading cause of foodborne bacterial infection in the United States. *Campylobacter* sickens about 2 to 8 million people annually, causing up to 800 deaths. Doctors have also recently discovered that *campylobacter* can lead to Guillain-Barre syndrome (GBS), an autoimmune disease that attacks nerve tissue, causing temporary paralysis and chronic nerve-related abnormalities. One strain of *campylobacter*, 019, seems to produce very high rates of GBS—one case in 158 infections. Turkey can also carry

salmonella, culprit in 2 to 4 million illnesses and at least 1,000 deaths per year. To avoid the nausea, vomiting, diarrhea, and other more serious side effects of these bacterial invasions, the USDA urges shoppers to avoid prestuffed birds, to buy poultry last, and to defrost it only in the fridge. Stuff the bird right before cooking [H: OR NOT AT ALL; CAN'T YOU COOK THAT STUFFING SEPARATELY AND NOT RUN THE RISK? THERE WILL BE NO DIFFERENCE IN TASTE IF YOU SEASON WELL AND THERE IS THEN NO CHANCE OF PICKING UP ANYTHING UNWANTED. IT ALSO SAVES TIME AT THE TABLE FOR THE SCOOPING AND LATER FOR THE PUT-AWAY "SLAVES".], AND MAKE SURE IT REACHES 180 DEGREES AT ITS THICKEST POINT. STUFFING SHOULD REACH 165 DEGREES. TO SLOW-COOK OVERNIGHT OR HAVE ROASTED MEAT OUT ALL DAY IS TO INVITE A CASE OF FOOD POISONING, BECAUSE BACTERIA THRIVE AT TEMPERATURES BETWEEN 40 AND 140 DEGREES. The USDA's year-round Meat and Poultry Hot Line (800-535-4555) is open from 8 a.m. to 2 p.m. EST on Thanksgiving Day. [H: That should tell you all you need to know, good feasters!]

**Paté, deli meats, soft cheeses.** *Listeria* is far less common than salmonella and it is sometimes found in foods made with unpasteurized milk. The bacterium can lead to stillbirths, miscarriages, and meningitis, and causes about 250 deaths yearly, though that number is dropping with prevention efforts. One study suggests high digestive-tract acidity fights listeriosis, so people on antacids may be more at risk.

**Eggnog.** Homemade with raw eggs, the holiday favorite is an environment ripe for *Salmonella enteritidis* bacteria growth. No amount of strong liquor will kill the bug. Amazingly, 50 percent of Americans still eat raw or undercooked eggs. Pasteurized eggnog is OK.

**SHELLFISH.** Grandma's oyster stuffing could carry the bacterium *Vibrio vulnificus* if shellfish is undercooked. The same goes for raw shellfish harvested from warm waters, culprit in 10,000 poisonings and 100 deaths annually.

**Fresh fruit and vegetables.** Fresh produce consumption has jumped 50 percent since 1970. Lettuce, tomatoes, and fruit can carry salmonella if tainted by sewage water or unclean hands. *E. coli*, the bacterium found in undercooked hamburgers, has also popped up on lettuce. In 1996, Guatemalan raspberries contaminated with the parasite *Cyclospores cayetanensis* were implicated in a rash of poisonings. So you might be wise to forego those fresh raspberry tarts in favor of cooked berries. Perhaps serve over vanilla ice cream—made from pasteurized milk, of course.

Mary Brophy Marcus

[END OF QUOTING]

Readers, I am NOT going to do your homework for you and I have covered what to do if you are eating OUT or at anyone's home so as to not cause a flap of any kind or get any attention for any precautions.

What you are going to end up doing before the years fold in on one another is to be responsible for RECOOKING or at the least REHEATING or using irradiated foods. A good cook will become one who serves SAFE food. This does not have to be more difficult than simply COOKING CORRECTLY or utilizing cleansing washes.

Even in the baking of breads and pastries the

liquids can be decontaminated by these products mentioned above. It is not always suitable to boil or pasteurize the liquids. However, a warning is that some liquids will not give up their bugs to simple pasteurization but it certainly will take out the real buggers of today. Look up temperatures on "pasteurization" in your local dictionary. I am not a food and drug resource for doing your homework.

Can you just imagine what will happen if contamination causes thousands to get ill or even perish from all the Holiday free meals for the homeless and hungry? This could wipe out your major downtrodden areas of any or all cities.

### BUT HOW COULD CONTAMINATION BE ACCOMPLISHED OTHER THAN THAT ALREADY PRESENT?

Bunches of ways—if contamination is the thing of the day to accomplish.

I haven't time today to focus on something that seems so weird and harmless as to shock you but can have access for airborne microbes of any kind and their effective spreading. This just happens to be a cute new toy of the powers-that-be so don't shrug it off as a cute Christmas trick.

The title of the Article is: *STEALTH THAT FITS IN YOUR HAND. DoD toys with use of Tonka-sized airplanes.*

There are now, as we write, little toy-sized airplanes (15 cm long, the size of a man's hand or smaller) that can be sent out on patrols, missions, contamination projects and bombing raids. These can be placed ANYWHERE and can land on the side of buildings or on people. The payload can be dropped, sprayed in the air currents, in the rain or wherever suitable. Can you imagine that Indiana gas that is more potent and lethal than Serin in a solution dispersed through a "toy" airplane? Well, start imagining because the tricks are upon you.

So, beloved ones, have a HAPPY HOLIDAY SEASON and *EAT WELL!* But, please remember: AN OUNCE OF PREVENTION IS WORTH A POUND OF CURE—ESPECIALLY WHEN THERE IS NO CURE. And remember something else while you are *THINKING*: Saddam Hussein has NOTHING compared to what your deadly dealers have available and are now putting into daily use. The play for the world takeover is now under way and it doesn't come from Iraq.

REMEMBER AS WELL: GOD CURES NO ONE, ANY TIME, ANYWHERE. HE SHOWS YOU THE WAY, OFFERS SOLUTIONS TO THE PROBLEMS AND YOU HAVE TO HEAL SELF OR REMAIN UNHEALED! Salu.

11/22/97 #1 HATONN

### SMALL PROBLEMS

I feel a bit at a loss as to how to dump "it all" onto you and not have you just shut down from overload. And, further, does it really help to know everything and stir your worry centers to fiddlestrings? Please remember that YOU are the most important receiver, BUT, I have to write as if all 7-billion PLUS people on the planet are getting their only messages from this keyboard. Please, if an article is not your "cup-'o-tea", realize that someone has to have the information.

ZIGGY® Tom Wilson

Sometimes the point is just to let the Elite Power Takers KNOW that WE KNOW. Public knowing is the ONLY real measure of security that you are going to gain. If you KNOW what to do to protect yourself, or just that "they" have these potentially lethal methods of "gettin'-ya", you can't be gotten IF YOU ATTEND WITH CAUTION YOUR PRECAUTIONS.

To move onto the Stealth that fits in your hand, as promised yesterday, I would point out that this is a BIG piece of equipment compared to what was chuckled over from Japan just yesterday. There is a tiny mechanism which is a replica of an automobile—but is so small that it can only be seen through a microscope. To compare size with something recognized they had painted a tiny "road" around a couple of American dimes. The little auto was still so tiny compared to a dime that even enlarged by microscope it was hardly visible. Now, that is not the wonder of the thing for after all it was certainly as large as a MICROBE, AND, could produce and be a carrier mechanism for ANYTHING chosen to be dispersed through that tiny toy. With that in mind we will offer the new "Defense Trends" as presented in an article sent by 2x6 from Florida.

[QUOTING from NAVY TIMES, Nov. 24, 1997:]

### STEALTH THAT FITS IN YOUR HAND

DoD toys with use of  
Tonka-sized airplanes

by George Seffers and Mark Walsh

[H: We are talking about the size of something which is about 15 cms. That would be approximately the length of less than the width of two columns of this newspaper.]

The Defense Department wants to field fleets of tiny airplanes, no more than 15 centimeters long, capable of conducting communications, reconnaissance, and even *lethal missions*.

The Pentagon's Defense Advanced Research Projects is expected to award a multimillion dollar contract to develop those Micro Air Vehicles by the end of this month.

The airplanes, which will be no bigger than a man's hand, will perform a variety of missions at the brigade, platoon or lower levels in urban neighborhoods, forests or mountains. They will be ideal, experts say, for covert missions requiring short flight and stealth.

"Unlike a Predator or some other unmanned aerial vehicle, they can fly down a city street and be unseen, or at least have a very low signature," said David Murphy, weapon system analyst with Delex Systems Inc., a Vienna, Va.-based company specializing in defense research and analysis.

The radical exploratory development program is sponsored by DARPA, Arlington, Va., which has budgeted nearly \$15 million in 1997 and 1998. Agency officials expect to spend about \$35 million by 2000.

James McMichaels, program manager for DARPA's Tactical Technologies Office, has vowed public silence on the project until source selection was made, according to spokeswoman Jan Walker, but Walker said the agency is "down to the wire" on selections.

Possible contenders for the program include Northrop Grumman Corp., Los Angeles, and

Lockheed Martin Corp., Bethesda, Md., which have studies under way on futuristic unmanned combat vehicles. Additionally, Xerox Corp.'s research center in Palo Alto, Calif., which is working with DARPA on research for dust-like surveillance particles, also five- to 10-year time frame," said Manny Garrido, director of advanced systems for Battlespace Inc., Arlington, Va.

For the immediate future, any micro-unmanned system would not have the ability to fly continuously or carry a substantive payload, a British unmanned aerial vehicle engineer said.

[H: I am going to interrupt right here to point out something going on as we write that you may well have missed with all the international distractions.

We wrote about microbes which are *somehow* being introduced into the food chain. Do you think that the carrier must "look like" a microscopic automobile or airplane? Come on, readers, you can do better than that just by listening to, AND HEARING, the news as offered.

There is news offered that says to the effect that "Iraq can manufacture enough Anthrax to wipe out the world in just a few short weeks!" Say what? Manufacture? What have we here if not the MANUFACTURE of an artificial microbe? I would hasten to point out that two or three decades ago there were THOUSANDS of sheep in the area around Tooele, Utah (Dugway Proving Grounds) wiped out totally by escaped Anthrax from an accidental spill at Dugway. Since this is the resource for the Iraq stash and start-up "manufacturing capability", I find it interesting that YOU PRODUCED IT FIRST AND MADE IT AVAILABLE.

What restrictions do you think might be placed on an airborne bunch of microbe-appearing carriers infecting specific animals and people—any day, anywhere, World location? The approach is always to hit in unsuspected areas but where the parts of the game are easily accessible for animal, human, and plant studies. Don't let this leave your consciousness for a minute as you work through the next series of attempts on pandemic outbreaks.

Can you protect yourself from these artificial organisms? No, probably not, but you can protect selves from the

**n a t u r a l**  
**REPRODUCTION** of same as well as from the spread of the resulting disease cycle. It does, however, depend on your willingness to recognize these attempts on society **AND BE WILLING TO TAKE THE TIME AND EFFORT TO USE PRECAUTIONS. EACH PERSON IS RESPONSIBLE FOR SELF, SO STOP BLAMING "MOTHER" OR "DAD" OR THE LOCAL POLITICIAN FOR NOT ATTENDING YOUR NEEDS. YOUR LIFE, AND YOUR SOUL, ARE YOURS, SO TREAT THEM AS THAT WHICH THEY ARE, IMPORTANT!]**

"But it's certainly an area that we're interested in because it would be *covert* (hidden, secret, silent)," said Peter Gibson, technical expert in unmanned aerial vehicles at the British Defense Evaluation Research Agency.

### FLY-ON-THE-WALL ROLE

The Defense Department has no requirement for any lethal payload for unmanned aerial vehicles of any size. But the micro-airplanes, which will weigh only a few grams and carry tiny payloads, could prove effective weapons in certain situations, Francis said.

"A single bullet can do in a human being pretty easily," Francis said, adding that a small amount of plastic explosives also could be carried. "If you can pre-position a small payload near a [command, control and communications] nerve center, you don't necessarily need a big bang." It is also noted that the benefits of exploring micro-vehicles may go beyond things that fly.

"And there are likely to be interesting spin-offs in the future," Gibson said. "For example, reconnaissance systems as small as a colony of ants could negate the need for these systems to be airborne platforms." [H: Yes, and then you can blame it on some magnificent ACT OF GOD or simply never publicly know the reason something was infected or blown to smithereens.]

### CONSTRUCTION CHALLENGES

Three major challenges to building the tiny fliers include aerodynamics, propulsion and navigation. [H: It is OBVIOUS that these obstacles have already been overcome and methods of management have already been perfected.]

Aerodynamics are radically different for smaller vehicles than for larger ones, meaning that what makes a 747 go down may make a micro-plane go up. [H: Please NOTE that a smaller little creature like this can ALSO MAKE ANY-SIZED LARGER CRAFT GO DOWN, NOT JUST AERODYNAMICS BUT WITH A BIG, BIG BANG—TRY TWA 800!] To help solve the problems, Francis said, defense officials should use Nature as a model.

"Birds do it and have been doing it," Francis

said, referring to flight on a small scale. "Did Nature not choose propellers because it didn't know how to make them or because it didn't need to?"

DARPA has not yet defined how the vehicles will be propelled or controlled. Although battery power is most likely for early versions, micro-jet engines being developed by the Massachusetts Institute of Technology, Cambridge, Mass., and expected new similar developments could be big players.

Retired Air Force Col. Michael Francis, the former DARPA program manager who launched the initiative, said the vehicles are being developed to take advantage of revolutions in microelectronics and micro-mechanics.

Micro-components rapidly are becoming an option for low-cost, highly maneuverable battlefield technology.

The vehicles also could play a fly-on-the-wall role; landing on walls, in trees, or near air ducts for underground bunkers and using sensors to gather information before flying back to the operator. They even could be called on to fly near an enemy's communications center and jam transmissions.

The vehicles could be deployed from a plane, unmanned aerial vehicle or a soldier's backpack.

Navigation could include remote control, preprogramming or, eventually, guidance by the Global Positioning System satellite network.

The effect on the battlefield so far is a question mark, experts said. While they cannot be relied upon in open areas or on windy days, the vehicles will offer an advantage in areas dangerous for troops.

[END OF QUOTING]

Now, readers, doesn't all this just make your day? Undoubtedly you can relax and know that your future potentials are in good hands—surely!

Without more to-doo about little things I think you might need some input on the more recent discussions about "sci-fi" weapons now recognized as "wonder weapons". Last July 7, 1997, *U.S. NEWS AND WORLD REPORT* did a special report on these bully-weapons and it is time to share that with you who might not have had access to that journal.

[QUOTING from *U.S. NEWS AND WORLD REPORT* (Cover Story report), July 7, 1997:]

## WONDER WEAPONS

The Pentagon's quest for nonlethal arms is amazing.  
But is it smart?

by Douglas Pasternak

Tucked away in the corner of a drab industrial park in Huntington Beach, California [H: You know, local readers, right down there in Southern California where the Chinese have been and are landing.], is a windowless, nondescript building. Inside, under extremely tight security, engineers and scientists are working on devices whose ordinary appearance masks the oddity of their function. One is cone shaped, about the size of a fire hydrant. Another is a 3-foot-long metal tube, mounted on a tripod, with some black boxes at the operator's end. These are the newest weapons of war.

For hundreds of years, sci-fi writers have imagined weapons that might use energy waves or pulses to knock out, knock down, or otherwise disable enemies—without necessarily killing them.

And for a good 40 years the U.S. military has quietly been pursuing weapons of this sort. Much of this work is still secret, and it has yet to produce a useable "nonlethal" weapon. But now THAT the cold war has ended and the United States is engaged in more humanitarian and peacekeeping missions [H: OH, BARF!!!], the search for weapons that could incapacitate people without inflicting lethal injuries has intensified. Police, too, are keenly interested. Scores of new contracts have been let, and scientists, aided by government research on the "bioeffects" of beamed energy, are searching the electromagnetic and sonic spectrums for wavelengths that can affect human behavior. Recent advancements in miniaturized electronics, power generation, and beam aiming may finally have put such pulse and beam weapons on the cusp of practicality, some experts say.

Weapons already exist that use lasers, which can temporarily or permanently blind enemy soldiers. [H: Or, in the case of Dodi al Fayed, just kill them DEAD.] So-called acoustic or sonic weapons, like the ones in the aforementioned lab, can vibrate the insides of humans to stun them, nauseate them, or even "liquefy their bowels and reduce them to quivering diarrhetic messes," according to a Pentagon briefing. Prototypes of such weapons were recently considered for tryout when U.S. troops intervened in Somalia. Other, stranger effects also have been explored, such as using electromagnetic waves to put human targets to sleep or to heat them up, on the microwave-oven principle. Scientists are also trying to make a sonic cannon THAT throws a shock wave with enough force to knock down a man.

While this and similar weapons may seem far-fetched, scientists say they are natural successors to projects already underway—beams that disable the electronic systems of aircraft, computers, or missiles, for instance. "Once you are into these antimateriel weapons, it is a short jump to antipersonnel weapons," says Louis Slesin, editor of the trade journal *Microwave News*. That's because the human body is essentially an electrochemical system, and devices that disrupt the electrical impulses of the nervous system can affect behavior and body functions. But these programs—particularly those involving antipersonnel research—are so well guarded that details are scarce. "People [in the military] go silent on this issue," says Slesin, "more than any other issue. People just do not want to talk about this."

## PROJECTS UNDERWAY

To learn what the Pentagon has been doing, *U.S. News* talked to more than 70 experts and scoured biomedical and engineering journals, contracts, budgets, and research proposals. The effort to develop exotic weapons is surprising in its range. Scores of projects are underway, most with funding of several hundred thousand dollars each. One Air Force lab plans to spend more than \$100 million by 2003 to research the "bioeffects" of such weaponry.

The benefits of bloodless battles for soldiers and law enforcement are obvious. But the search for new weapons—cloaked as they are in secrecy—faces hurdles. One is the acute skepticism of many conventional-weapons experts. "It is interesting technology but it won't end bloodshed and wars," says Harvey Sapolsky, director of the Security Studies Program at MIT. Says Charles Bernard, a former Navy weapons-research director: "I have yet to see one of these ray gun things that actually works." And if they do work, other problems arise:

Some so-called nonlethal weapons could end up killing rather than just disabling victims if used at the wrong range. Others may easily be thwarted by shielding.

Stern warnings come from ethicists. Years ago the world drafted conventions and treaties to attempt to set rules for the use of bullets and bombs in war. But no treaties govern the use of unconventional weapons. And no one knows what will happen to people exposed to them over the long term.

Moreover, medical researchers worry that their work on such things as the use of electromagnetic waves to stimulate hearing in the deaf or to halt seizures in epileptics might be used to develop weaponry. In fact, the military routinely has approached the National Institutes of Health for research information. "DARPA [Defense Advanced Research Projects Agency] [H: Guess this one is FRESH IN YOUR MINDS?] has come to us every few years to see if there are ways to incapacitate the central nervous system remotely," Dr. F. Terry Hambrecht, head of the Neural Prosthesis Program at NIH, told *U.S. News*. "But nothing has ever come of it," he said. "That is too science fiction and far-fetched." Still, the Pentagon plans to conduct human testing with lasers and acoustics in the future, says Charles Swett, an assistant for Special Operations and Low-Intensity Conflict. Swett insists that the testing will be constrained and highly ethical. It may not be far off. The U.S. Air Force expects to have microwave weapons by the year 2015 and other non-lethal weaponry sooner. "When that does happen," warns Steven Metz, professor of national security affairs in the U.S. Army War College, "I think there will be a public uproar. We need an open debate on them now. [H: They ARE perfected and nobody has put up any debate about them at all other than to remark how wonderful to cut down on killing. Who is feeding whom the B.S., readers?]

## LASER ETHICS

[H: Indeed "they" have actually used the term "ethics". It's a *Mad, Mad, Mad, Mad World!!!*]

What happened with U.S. forces in Somalia foreshadows the impending ethical dilemmas. In early 1995, some U.S. Marines were supplied with so-called dazzling lasers. The idea was to inflict as little harm as possible if Somalis turned hostile. But the Marines' commander then decided that the lasers should be "de-tuned" to prevent the chance of their blinding citizens. With their intensity thus diminished, they could be used only for designating or illuminating targets.

On March 1, 1995, commandos of U.S. Navy SEAL Team 5 were positioned at the south end of Mogadishu airport. At 7 a.m., a technician from the Air Force's Phillips Laboratory, developer of the lasers, used one to illuminate a Somali man armed with a rocket-propelled grenade. A SEAL sniper shot and killed the Somali. There was no question the Somali was aiming at the SEALs. But the decision not to use the laser to dazzle or temporarily blind the man irks some of the nonlethal-team members. "We were not allowed to disable these guys because that was considered inhumane," said one. "Putting a bullet in their head is somehow more humane?" [H: And carefully look at WHO is always the one to use these mass weapons of destruction, like the Atomic Bomb—FIRST! You people always cry out for GOD to "bless America"? Where do YOU COME FROM? WHAT GOD IS IT THAT YOU PETITION TO

**GIVE YOU WHAT YOU THINK YOU WANT?]**

Despite such arguments the International Red Cross (Liz Dole's private organization) and Human Rights Watch have since led a fight against anti-personnel lasers. In the fall of 1995, the United States signed a treaty that prohibits the development of lasers designed "to cause permanent blindness". [H: Oh well, "oops" goes a long way in explaining anything and everything.] Still, laser weapons are known to have been developed by the Russians, and proliferation is a big concern. Also, the treaty does not forbid dazzling or "glare" lasers, whose effects are temporary. U.S. military labs are continuing work in this area, and commercial contractors are marketing such lasers to police.

**ACOUSTIC PAIN**

The next debate may well focus on acoustic or sonic weapons. Benign sonic effects are certainly familiar, ranging from the sonic boom from an airplane to the ultrasound instrument that "sees" a baby in the uterus. The military is looking for something less benign—an acoustic weapon with frequencies tunable all the way up to lethal. Indeed, Huntington Beach-based Scientific Applications & Research Associates Inc. (SARA) has built a device that will make internal organs resonate: The effects can run from discomfort to damage or death. If used to protect an area, its beams would make intruders increasingly uncomfortable the closer they get. "We have built several prototypes, says Parviz Parhami,

SARA's CEO. Such acoustic fences, he says, could be deployed today. He estimates THAT five to 10 years will be needed to develop acoustic rifles and other more exotic weapons, but adds, "I have heard people as optimistic as one to two years." [H: Well, you have now seen advertising for "invisible" pet fences that do not do anything to passing humans (????). Come on now, don't play dumb with me.] The military also envisions acoustic fields being used to control riots or to clear paths for convoys.

SARA's acoustic devices have already been tested at the Camp Pendleton Marine Corps Base, near the company's Huntington Beach office. And they were considered for Somalia. "We asked for acoustics," says one nonlethal weapons expert who was there. But the Department of Defense said, "No," since they were still untested. The Pentagon feared they could have caused permanent injury to pregnant women, the old, or the sick. Parhami sees acoustics "as just one more tool" for the military and law enforcement. "Like any tool, I suppose this can be abused," he says. "But like any tool, it can be used in a humane and ethical way."

Toward the end of World War II, the Germans were reported to have made a different type of acoustic device. It looked like a large cannon and sent out a sonic boomlike shock wave that in theory could have felled a B-17 bomber. In the mid-1940s, the U.S. Navy created a program called Project Squid to study the German vortex technology. The results are unknown. But Guy Obolensky, an American inventor, says he replicated the Nazi

device in his laboratory in 1949. Against hard objects the effect was astounding, he says: It could snap a board like a twig. Against soft targets like people, it had a different effect. "I felt like I had been hit by a thick rubber blanket," says Obolensky, who once stood in its path. The idea seemed to founder for years until recently, when the military was intrigued by its nonlethal possibilities. The Army and Navy now have vortex projects underway. The SARA lab has tested its prototype device at Camp Pendleton, one source says.

**ELECTROMAGNETIC HEAT**

The Soviets were known to have potent blinding lasers. They were also feared to have developed acoustic and radio-wave weapons. The 1987 issue of *Soviet Military Power*, a cold war Pentagon publication, warned that the Soviets might be close to "a prototype short-range tactical RF (Radio Frequency) weapon". The *Washington Post* reported that year that the Soviets had used such weapons to kill goats at 1 kilometer's range. The Pentagon, it turns out, has been pursuing similar devices since the 1960s.

Typical of some of the more exotic proposals are

those from Clay Easterly. Last December, Easterly—who works at the Health Sciences Research Division of Oak Ridge National Laboratory—briefed the Marine Corps on work he had conducted for the National Institute of Justice, which does research on crime control. One of the projects he suggested was an electromagnetic gun that would "induce epileptic-like seizures". Another was a "thermal gun [that] would have the operational effect of heating the body to 105 to 107 degrees Fahrenheit. Such effects would bring on discomfort, fevers, or even death.

But, unlike the work on blinding lasers and acoustic weapons, progress here has been slow. [H: I hope you have as much difficulty reading this hogwash as I have presenting it to you.] The biggest problem is power. High-powered microwaves intended to heat someone standing 200 yards away to 105 degrees Fahrenheit may kill someone standing 10 yards away. On the other hand, electromagnetic fields weaken quickly with distance from the source. And beams of such energy are difficult to direct to their target. Mission Research Corp. of Albuquerque, N.M., has used a computer model to study the ability of microwaves to stimulate the body's peripheral nervous system. "If sufficient peripheral nerves fire, then the body shuts down to further stimulus, producing the so-called stun effect," an abstract states. But, it concludes, "the ranges at which this can be done are only a few meters."

Nonetheless, government laboratories and private contractors are pursuing numerous similar programs. A 1996 Air Force Scientific Advisory Board report on future weapons, for instance, includes a classified section on a radio frequency or "RF Gunship". Other military documents confirm THAT radio-frequency antipersonnel weapons programs are underway. And the Air Force's Armstrong Laboratory at Brooks Air Force Base in Texas is heavily engaged in such research. According to budget documents, the lab intends to spend more than \$110 million over the next six years "to exploit less-than-lethal biological effects of electromagnetic radiation for Air Force security, peacekeeping, and war-fighting operations".

**LOW FREQUENCY SLEEP**

From 1980 to 1983, a man named Eldon Byrd ran the Marine Corps Nonlethal Electromagnetic Weapons project. He conducted most of his research at the Armed Forces Radiobiology Research Institute in Bethesda, Md. "We were looking at electrical activity in the brain and how to influence it," he says. Byrd, a specialist in medical engineering and bioeffects, funded small research projects, including a paper on vortex weapons by Obolensky. He conducted experiments on animals—and even on himself—to see if brain waves would move into sync with waves impinging on them from the outside. (He found that they would, but the effect was short lived.)

By using very low frequency electromagnetic radiation—the waves way below radio frequencies on the electromagnetic spectrum—he found he could induce the brain to release behavior-regulating chemicals. "We could put animals into a stupor," he says, by hitting them with these frequencies. "We got chick brains—in vitro—to dump 80 percent of the natural opioids in their brains," Byrd says. He even ran a small project that used magnetic fields to cause certain brain cells in rats to release histamine. In humans, this would cause instant flulike symptoms and produce nausea. "These fields were

U.S. News & World Report, July 7, 1997

extremely weak. They were undetectable," says Byrd. "The effects were nonlethal and reversible. You could disable a person temporarily," Byrd hypothesizes. "It [would have been] like a stun gun."

Byrd never tested any of his hardware in the field, and his program, scheduled for four years, apparently was closed down after two, he says. "The work was really outstanding," he grumbles. "We would have had a weapon in one year." Byrd says he was told his work would be unclassified, "Unless it works." Because it worked, he suspects that the program "went black". Other scientists tell similar tales of research on electromagnetic radiation turning top secret once successful results were achieved. There are clues that such work is continuing. In 1995, the annual meeting of four-star US Air Force generals—called CORONA—reviewed more than 1,000 potential projects. One was called "Put the Enemy to Sleep/Keep the Enemy From Sleeping." It called for exploring "acoustics", "microwaves", and "brain-wave manipulation" to alter sleep patterns. It was one of only three projects approved for initial investigation. [H: I would suggest that this has been operational in a magnificently mass way for some couple of centuries now.]

DIRECT CONTACT

As the military continues in search for nonlethal weapons, one device that works on contact has already hit the streets. It is called the "Pulse Wave Myotron". A sales video shows it in action. A big, thuggish-looking "criminal" approaches a well-dressed woman. As he tries to choke her, she touches him with a white device about the size of a pack of cigarettes. He falls to the floor in a fetal position, seemingly paralyzed but with eyes open, and he does not recover for minutes.

"Contact with the Myotron," says the narrator, "feels like millions of tiny needles are sent racing through the body. This is a result of scrambling the signals from the motor cortex region of the brain," he says. "It is horrible," says William Gunby, CEO of the company that developed the Myotron. "It is no toy." The Myotron overrides voluntary—but not involuntary—muscle movements, so the victim's vital functions are maintained. Sales are targeted at women, but law enforcement officers and agencies—including the Arizona state police and bailiffs with the New York Supreme Court—have purchased the device, Gunby says. A special model built for law enforcement, called the Black Widow, is being tested by the FBI, he says. "I hope they don't order a lot soon," he adds. "The Russian government just ordered 100,000 of them, and I need to replenish my stock."

The U.S. military also has shown interest in the Myotron. "About the time of the Gulf War, I got calls from people in the military," recalls Gunby. "They asked me about bonding the Myotron's pulse wave to a laser beam so that everyone in the path of the laser would collapse." While it could not be done, Gunby says, he nonetheless was warned to keep quiet. "I was told that these calls were totally confidential," he says, "and that they would completely deny it if I ever mentioned it." [H: I suggest you keep this little "saying" close to your hearts and you who deal with "plausible denial" regarding everything from Bonus Contracts to mosquito microbes remember that this is the way it goes over and over and over again. You can also know when it gets as far as this, it is perfected and the silent treatment kicks in to be able to deny anything and everything taking place

on any encounter field, and more especially reserving the ability to BLAME SOMEBODY ELSE.]

Some say such secrecy is necessary in new-weapons development. But others think it is a mistake. "Because the programs are secret, the sponsorship is low-level, and the technology is unconventional," says William Arkin of Human Rights Watch Arms Project, "the military has not done any of the things to determine if the money is being well spent or the programs are a good idea. It should not be long before the evidence is in."

[END OF QUOTING]

And so be it, readers. I would remind you "out there" that indeed we can write and the CIA can be the first to take their information prior to our publishing date—BUT, if you want to keep this paper in publication—YOU HAVE TO HELP US WITH SUBSCRIPTIONS. We do not accept outside advertising so that there is no attempt at focusing on anything for the benefit of anyone save those we know and serve. Our team here simply cannot longer carry the ball all alone in the ballpark. We have tried keeping the paper to the bare minimum and still have a paper and we are now forced, if I would again participate to any level worthy of note, to have more size to the paper itself.

Why don't we just go and get God to give us some funds? Because that is NOT the way the world turns. We are working 24-hours-a day on that project of "funding" but I wonder how many of you

have gone forth to solve the problem and help us a bit? WHERE WILL YOU BE WHEN THE SKY FALLS? Will you still be out there with Henny Penny—waiting? We shall see, won't we?

Good day, and if you can rest well after all this, God help us all. Salu. ☸

# Hydrogen Peroxide Use For Purification Of "Stuff"

*Editor's note: We are re-running this important information on the purification uses of hydrogen peroxide in conjunction with our Front Page story. The following is an edited excerpt from a longer writing that covered other subjects in addition to what is critical to focus upon at this time. Also, since many of you ask, on a regular basis, for a resource for obtaining 35% food-grade hydrogen peroxide, we share that information with you also (see box on this page). It is becoming harder to obtain this most incredibly useful product—anybody want to guess why?!*

4/27/93 #1 HATONN

## NECESSARY INSTRUCTIONS:

As we sit to pen this information I am at a loss as to how to keep you from thinking me idiot-material. However, you who already have past information, say, regarding hydrogen peroxide and its antiseptic-antibiotic properties, please be patient while we offer information to those who have not received same.

I always suggest, in adding any 35% food-grade  $H_2O_2$  to anything, that it be **DILUTED FIRST**. Just as you must NEVER drop concentrated anything into the mouth (for it would damage living cellular structures), neither do you dump it full-strength into living culture medium. Dilute it in a bit (say, an ounce) of water first and STIR rapidly whatever it is you are dumping the diluted  $H_2O_2$  into for purification purposes. Naturally, if just purifying a gallon of water, there is no need for active stirring, though a little closed-container agitation (a few shakes) won't hurt.

*[Editor's note: Be careful when handling the 35% hydrogen peroxide, such as when filling small dropper bottles for convenient use. You may want to wear rubber gloves to avoid drops of the full-strength liquid reacting with the skin. It won't "hurt" the skin so much as cause a tingling or burning sensation and turn the drop spot whitish, as in looking bleached for awhile. Good laboratory technique is helpful, which includes leaving nearby sink tap-water running while working with the hydrogen peroxide to facilitate quick rinsing of skin, etc., should that become necessary.]*

HYDROGEN PEROXIDE —  $H_2O_2$   
(35% Food Grade)

Purchase a small eye-dropper bottle at the drug store. Fill your small dropper bottle from the larger bottle as needed. *[Editor's note: If you are utilizing the Bio-Spark resource mentioned on this page for your hydrogen peroxide, their container comes with a convenient pouring spout to make the job of handling the 35% concentrated hydrogen peroxide*

*easier.]* The large bottle may be stored in the refrigerator or in the freezer [*preferably in the freezer*] inside another plastic container [*such as a heavy-duty zip-lock bag*]. The small eye-dropper bottle should also be kept in the refrigerator. **Always use caution when handling 35% hydrogen peroxide!**

**DO NOT** use with carrot juice, carbonated drinks, or alcohol. For best results, take on an empty stomach, 1 hour before a meal or 3 hours after meals.

Formula: Mix the number of drops of 35% food-grade hydrogen peroxide into at least 6 ounces of distilled water, juice, or milk, and stir vigorously, then drink the mixture. Some people eat 1/4 to 1/2 of a banana immediately after drinking the solution. You may prefer something else to eat.

If your stomach gets upset at any level, stay at that level or go back one level. Then proceed to increase your daily dosage again.

When free of complaints you may taper off by taking:

25 drops once every other day for 1 week;  
25 drops once every 3rd day for 2 weeks;

25 drops once every 4th day for 3 weeks.  
A good maintenance could be 5-15 drops per week, or whatever makes you feel good.

If you get the 35% hydrogen peroxide on your skin, rinse it under running water for several minutes.

**Soak feet:** 1-1/2 oz. 35% to 1 gal. of water.

**Bath:** 16 oz. 35% to a tub of water to detoxify.

**Colonic:** 1/2 pt. of 3% per 5 gal. of water.

**Douche:** 6 tablespoons of 3% per qt. of water.

**Candidiasis:** 1 drop of 35% 3 times a day; then increase schedule.

For the more serious complaints, stay at 25 drops 3 times per day for 1 to 3 weeks. Then graduate down to 25 drops, two times per day until your problem is taken care of. This may be from 1 to 6 months.

If you have a weak stomach, you may experience nausea similar to that in pregnancy. Also, as dead bacteria or various forms of poisons are released, you will experience a **cleansing effect** as they are released through the elimination organs of the body: skin, lungs, kidneys, and bowels.

Some reactions to the cleansing effect could

*Editor's note: As we mentioned in the note at the beginning of this article, if you are having trouble finding food-grade hydrogen peroxide locally, here is a reliable resource.*

## Bio-Spark

P.O. Box 964,  
Tehachapi, CA 93581  
e-mail: spark@lightspeed.net

## 35% Food-Grade Hydrogen Peroxide

\$13.00 per pint for 1-3 bottles  
\$10.00 per pint for 4 or more bottles  
(Shipping included!)

Check or Money Order; no phone orders  
Orders shipped only to United States addresses by U.S. Mail  
Allow 2-3 weeks for delivery

include skin eruptions, nausea, headaches, sleepiness, unusual fatigue, diarrhea, head or chest cold, ear infections, boils, or any other ways the body uses to loosen toxins. This is a natural cleansing of the body and should be of a short duration as you continue to maintain your program.

Formula to make a 3% solution of hydrogen peroxide:

Put 1 oz. of 35% food-grade hydrogen peroxide in a pint jar. Add 11 oz. of distilled water. This will give you 12 oz. of 3%  $H_2O_2$ . Use also for brushing teeth and applying to skin sores. (And it will not contain "stabilizers" as does store-bought 3%.)

Do not use 35%  $H_2O_2$  if you have had a transplant.

**ALWAYS KEEP FOOD-GRADE HYDROGEN PEROXIDE AVAILABLE TO PURIFY EVERYTHING. REMEMBER, 7 DROPS OF 35% FOOD GRADE HYDROGEN PEROXIDE TO A GALLON OF WATER WILL PURIFY IT AND THE WATER WILL PICK UP A MUCH IMPROVED "FLAVOR" OF FRESHNESS.**

THIS is why one of the first items confiscated from health food stores, labs, and so on—IS HYDROGEN PEROXIDE IN FOOD GRADE. I remind you readers of long standing: the best treatment for arthritis and other seemingly "incurable" diseases is hydrogen peroxide therapy in accompanying regimen of Gaiandriana which moves in and restores the cellular restructuring of self.

### WATER

I cannot urge you often enough to TREAT your faucet water. Even if you have a reverse-osmosis unit—treat that water with proper amounts of hydrogen peroxide for YOU DO NOT KNOW WHAT IS IN THAT WATER. IT WON'T HELP CONTAMINATION BY TOXINS, BUT IT WILL TAKE CARE OF THE VIRAL OR BACTERIAL CONTAMINATES. IT IS CHEAP AND NON-TOXIC IN PURIFICATION AMOUNTS. The best mouthwash and gum enhancer is a mouthwash of several drops of hydrogen peroxide in a fourth cup of water (or so) and cleanse mouth after brushing (or just do it several times a day as convenient). If the solution is "light", just swallow the wash—it can only help you unless you have an active mouth infection. Moreover I suggest keeping some hydrogen peroxide near and handy to drop a few drops of undiluted peroxide on your toothbrush a couple of times a week—or daily—whatever. You will have a sterilized brush and stop spreading germs and recontamination.

### SPILLING

If you spill full-strength (35%) peroxide on your skin—it will burn you. Rinse immediately under water and it will be fine. It will bleach, so rinse anything that gets splattered—in water. It is simply one of those substances which needs to be handled properly. Peroxide offers so many "cleaning" uses that I won't even effort to list them—but you will find it about the most useful item around your kitchen, bath, etc. You can find information at health food stores and vitamin supply outlets.

We offer these things as a service rather than a major business, so we are perhaps remiss in full-range material. We can do better when the full load eases a bit. Thank you for your patience and loving support of the ones who have taken this load on in addition to their other tasks—ever without complaint and ever wishing to help and please. ✨

# Additional Uses For 35% Food-Grade Hydrogen Peroxide

Example of information printed in *Echo* newsletter: [Quoting]

**Caution:** If you spill 35%  $H_2O_2$  on your skin, rinse immediately with water. Avoid any contact with eyes.

**To make a 3% solution: Mix 1oz. 35% to 11oz. water.  
Use distilled water as often as possible.**

**Vegetable soak:** Add 1/4 cup 3%  $H_2O_2$  to full sink of cold water. Soak light skinned (like lettuce) 20 minutes, thicker skinned (like cucumbers) 30 minutes. Drain, dry and refrigerate. Prolongs freshness.

If time is a problem, spray vegetables (and fruits) with a solution of 3%. Let stand for a few minutes, rinse and dry.

**Leftover tossed salad:** Spray with a solution of 1/2 cup water and 1 Tbsp. 3%. Drain, cover and refrigerate.

**To freshen kitchen:** Keep a spray bottle of 3% in the kitchen. Use it to wipe off counter tops and appliances. It will disinfect and give the kitchen a fresh smell. Works great in the refrigerator and kids' school lunch boxes.

**Marinade:** Place meat, fish, or poultry in a casserole dish (avoid using aluminum pans). Cover with 3%  $H_2O_2$ . Place loosely covered in refrigerator for 1/2 hour. Rinse and cook.

**In the dishwasher:** Add 2oz. of 3%  $H_2O_2$  to your regular washing formula.

**Sprouting seeds:** Add 1oz. 3%  $H_2O_2$  to 1 pint of water and soak the seeds overnight. Add the same amount of  $H_2O_2$  each time you rinse the seeds.

**House and garden plants:** Put 1oz. 3%  $H_2O_2$  in 1 quart water. (Or add 16 drops 35% to one quart water.) Water or mist plants with this solution.

**Insecticide spray:** Mix 8oz. white sugar, 4-8oz. 3%  $H_2O_2$  in 1 gallon of water.

**Humidifiers and steamers:** Mix 1 pint 3%  $H_2O_2$  to 1 gallon of water.

**Laundry:** Add 8oz. of 3% to your wash in place of bleaches.

**Shower:** Keep a spray bottle of 3%  $H_2O_2$  in the shower. Spray your body after washing to replace the acid mantle on your skin that soap removes.

**Facial:** Use 3% on a cotton ball as a facial freshener after washing.

**Rejuvenating Detoxifying bath:** Add 6oz. 35%  $H_2O_2$  to 1/2 tub of water. May increase  $H_2O_2$  up to 2 cups per bath. Soak at least 1/2 hour.

**Alternate bath:** Add 1/2 cup 35%  $H_2O_2$ , 1/2 cup sea salt, 1/2 cup baking soda or Epsom salts to bath water and soak.

**Foot soak:** Add 1 1/2oz. 35%  $H_2O_2$  to 1 gallon water and soak.

**Athlete's foot:** Soak feet nightly in 3%  $H_2O_2$  until condition is improved.

**Mouthwash:** Use 3%  $H_2O_2$ . Add a dash of liquid chlorophyll for flavoring if desired.

**Toothpaste:** Use baking soda and add enough 3%  $H_2O_2$  to make a paste. Or just dip your brush in 3%  $H_2O_2$  and brush.

**Douche or Enema:** Add 6 Tbsp. of 3%  $H_2O_2$  to a quart of distilled water. 6 Tbsp. is the *maximum amount* to use.

**Colonic:** Add 1/2 pint 3%  $H_2O_2$  to 5 gallons warm water. (Note: 1 pint 3% is the *maximum amount* to use.)

**Pets:** For small animals (dogs & cats) use 1oz. 3%  $H_2O_2$  to 1qt. of water.

**Agriculture:** Use 8oz. 35%  $H_2O_2$  per 1000 gallons of water. If you do not have an injector, start out by using 1tsp. 35%  $H_2O_2$  in the drinking cup at the stanchion.

For the drinking water of cows that are sick, use 1pt. 3%  $H_2O_2$  to 5 gallons of water. To drench sick calves, put 1/3pt. of 3%  $H_2O_2$  in a pt. bottle and fill remainder with water. Do this twice a day. For an adult cow, use the same procedure, but use a quart.

To foliage feed crops, put 5 to 16oz. of 35% food-grade hydrogen peroxide into 20 gallons of water. Spray on plants early in the morning when the dew is still on them and the birds are singing. (It has been found that the singing of the birds opens the pores of the plants.)

**Storing water:** 1oz 35%  $H_2O_2$  to 50 gallons water (kills viruses, etc.).

## Middle East News

# Sabre Rattling & Name Calling

# Ancient Tricks For Starting WW-III

The following information is from the International News section of the September 1997 issue of Dr. John Coleman's superb World In Review. We share this intelligence from his well placed Middle-Eastern sources as important background for making sense out of the mush the media has been slinging as things continue to heat-up in this most volatile arena.

From John's outlay you can more clearly see how the chess pieces are REALLY lining-up on this turbulent playing field. You can also better appreciate important connections to other matters such as the Swiss banking extortion plot by the Khazarian Zionists. Also note who is selling arms to whom and why. What makes the world go 'round is surely different from what fictions abound through our mind-programing television screens.

—Dr. Edwin M. Young, Editor-In-Chief

### 9/97 WORLD IN REVIEW

## The Middle East

War between Israel and several Arab and Muslim states in the Middle East looms larger with every passing day. Mrs. Albright's failed mission to Israel, Egypt and Lebanon was a foregone conclusion intended to make it look as if President

Clinton was actually doing something to ease the explosive anger of the Palestinians, and the Israelis, shocked by the Jerusalem bombing of Machane Yehuda market. Dennis Ross, President Clinton's Middle East advisor and holdover from the Bush Administration is being blamed for putting too rosy a shine on his plan which Mrs. Albright followed.

Dennis Pipes, editor of the *Middle East Quarterly* was also consulted before Albright's trip. Pipes told the Clinton Administration that Albright "is going to be more even-handed than her predecessor ... I think the emphasis is going to be on mutuality, and that will lead to more strain. It's likely now to be more evident." Pipes said that Albright should place the blame for the breakdown of the Oslo accord, where it belongs, with the Arabs: "We're seeing one party backslide. What ought to happen is that the secretary of state tells the Palestinians, and behind them, the Arab states, that it is up to them to make this work."

Founder of "Americans for Peace Now", Mark Rosenbaum told State Department officials involved with Albright's tour: "I hope Albright sticks to her double-barreled guns. We are looking for mutual concessions on both the Palestinian and Israeli sides to stop the melting down in the peace process."

The purchase of a house in the Ras al-Amud district of East Jerusalem by Irving Moskowitz did not help Mrs. Albright. But the owner of the house, who was dragged out and threatened with death for selling his property to Moskowitz, denied that he had done so. "I did not sell my house; I did not sell my house to Mr. Moskowitz," the 55-year-old Fouad Hadiya, a blacksmith, shouted as he tried to get past Israeli security guards posted around the house. As if to confirm Hadiya's denials, Moskowitz's lawyers said the home was purchased from Jews and not from Arabs, but did not give any specifics.

Added to Albright's problems was the situation in Israel's "security zone" inside Lebanon where 29 Israeli soldiers have been killed in the past six weeks. According to accounts published by correspondent Arie O'Sullivan, a mission undertaken by a 16-man commando Israeli Army unit was to rout the Hizbollah from positions inside Lebanon from where they were launching attacks into the security zone, ended in disaster: "The 16-man commando team was landed 3 kilometers away, between Sidon and Tyre, its target, the village of Ansaria, when a Hizbollah-laid mine blew it apart. A rain of gunfire cut down those who were not wounded in the explosion. Of the 16 raiders, 10 were killed, including the force commander..."

In a separate battle, an Israeli force in South Lebanon was caught in a brush fire after a battle between itself and Hizbollah units. The Israelis called for mortar and artillery fire to be directed

toward the area where the Hizbollah were thought to be, on a hillside, opposite their position. It was believed that a mortar round set the bush on the hillside on fire. The Israelis stayed in their positions, when suddenly, the wind shifted and the flames roared through their position, burning four soldiers to death as they tried to flee.

Prime Minister Netanyahu is refusing all demands by the Israeli military and members of his own political party to end the occupation of Lebanon, and my source says that if Netanyahu continues to resist the advice of his army specialists, "he will be left with only one way to go, and that is a full-scale invasion of Lebanon."

My source's report does not look promising: "If that happens, it will surely bring a swift response from Syria, a key player in the region, yet the one country Mrs. Albright did not visit. If the United States is drawn into the conflict, the Russian military might well depose Yeltsin and come to the aid of Syria. Iran is more than likely to step into the fray, and, eventually, Egypt will be sucked in, although for now, it is officially standing aloof but privately backing Syria to the hilt. An even-handed approach by the U.S. would go a long way to defusing the perilous situation, but it is not likely to come from President Clinton or the Congress. That leaves the possibility of an all-out war looming on the horizon."

## Libya

The Arab League has decided to ignore U.S.-inspired U.N. sanctions against Libya and announced their intention to allow Libyan aircraft to overfly any Arab state and land at any of its airfields. "This is more than a mere gesture," my Cairo source told me, "this is the first explicit rejection of the U.S.-imposed U.N. sanctions imposed on Libya in 1992," he said.

The resolution read: "We invite Arab countries to take measures to alleviate the sanctions on Libya until a peaceful and just solution to the crisis can be found." The resolution was signed by 18 Arab foreign ministers, "and reflects the animosity felt toward the United States as Israel's chief backer and what they see as a clear bias in favor of Israel and its lack of neutrality in dealing with violations of the peace agreement," my source told me. "After the new Jewish settlement was opened up in East Jerusalem, there was a considerable hardening toward relations with the U.S. by the Arab states, and this is likely to continue and go even further than this resolution," he told me.

## Iran

The CIA and the DIA got quite a bit of information from the Saudi citizen arrested in Canada and later released to Jordan, although the FBI wanted to get its hands on him in the U.S. Hani Abdel Rahim Sayegh told the DIA that Iranian intelligence General Ahmed Sharifi was behind the bomb attack on the Al Khobar building in Saudi Arabia that killed 23 U.S. servicemen. The Saudis had already told U.S. security agents that Gen. Sharifi was behind the bomb plot of June 1996. Although one of the most important members of the Pasdarans cooperating with the Al Qods force, whose spiritual and political head is Hezbollah's mullah Ahmed Salek Kashani, Sharifi denies any linkage to the Al Khobar bombing.

The U.S. preoccupation with Iran has caused the

government to lash out at what it calls "unsubstantiated rumors against us". The war of words is over U.S. intelligence reports that North Korea and Russia are working together to arm the Iranians with medium and long-range missiles of the Nodong ballistic missile in service with North Korea. The U.S. is accusing Russia of building the Shahab-3 with a range of 800-900 miles and capable of carrying chemical and bacteriological warheads as well as nuclear warheads of 1,650 pounds. The Shahab-4 has a range of 1,240 miles and is capable of carrying the same warheads as the shorter-range Shahab-3, but with a weight of 2,200 pounds.

The missiles will be ready for service by 1999 and will cover the entire Middle East and as far away as Italy and Germany. The U.S. and Israeli intelligence services say that Rosvoorruzheniye, the Russian arms manufacturer, is the company working with the Iranians and that the missiles will be operated by Russian-trained special forces units of the Iranian Army. General Alexander Kotelkin dismisses U.S. and Israeli concerns as coming from "external enemies". (See "Russia" herein.)

Israel and the U.S. charge that by building the Shahab-3 and Shahab-4, Iran is violating the Missile Technology Control protocol, signed by 31 nations to ban the production of missiles with a greater range than 186 miles capable of carrying warheads in excess of 1,100 pounds.

## Russia

Still seething over the Clinton insult of refusing it NATO membership, sources told me that Russia's military leaders are taking a hand in forging closer economic ties with Iran, Syria, Lebanon, Saudi Arabia, Egypt, Qatar and Sudan, South Korea, and Cyprus as well as stationing substantial groups of military advisors in these countries. The first fruit of the new drive is the formation of a the first Islamic bank, Badr Bank, with start-up capital of \$20 million. "The U.S. can go on telling the world we are a spent force," my source, who is a member of PAMYAT, told me, "and let them go on lying to their people; Washington has always excelled in that area."

Nikolai Kovalyov, head of the Federalnaja Sluzba Besopasnosti (FSB) Russia's counter intelligence agency, is offering protection for companies engaged in industry in Russia. Lashing out against what he called "U.S. spying in Russia", Kovalyov said that the U.S. spy agencies "have set up shop in Russia, but we will protect foreign companies working in Russia against American intrigue." Kovalyov spoke at a Davos, Switzerland, economic conclave in that city, the first time that a Russian delegate was invited to attend.

He met with several prominent Swiss businessmen and according to my source, they exchanged views with him about recent claims of world Jewry against Swiss banks, which an aide of Kovalyov dismissed as "Bronfman bombast". Kovalyov was told that the Swiss people "are deeply angered by what they see as an American-inspired attack on their sovereignty to the point where the entire Swiss government might be thrown out at the next election. They are angry with the government for caving in to what they see as unjust demands," Kovalyov was told.

Kovalyov may also have been referring to Rosvoorruzheiy, the giant Russian armaments company which is locked in a bitter struggle with the Clinton Administration over the sale of its sophisticated S-300-V (NATO designation SA12) antimissile missile which is being sold in increasing numbers to clients in the Middle East like Syria and Iran. The S-300-V is far superior to the American "Patriot" missile. In fact the S-300-V is the only antiballistic missile capable of shooting down short and medium-range missiles between 30 and 1,100 km.

Its performance is devastating when compared with that of the U.S. "Patriot".

Kovalyov says that the U.S. has engaged in a campaign of slander and lies to put Saudi Arabia off buying a large number of the missiles and that Clinton refused to give the Colombian president a visa, just because he ordered Russian instead of American helicopters. The head of the Russian armaments agency, Rosvoorruzheniye, General Alexander Kotelkin, also lashed out against the U.S., saying in an interview with the newspaper *Nezavismaya Gazeta*: "Our external enemies are our Western rivals. We are especially worried by the fact that the U.S.

Administration has joined the struggle against Rosvoorruzheniye, and is exerting unprecedented pressure on the governments and presidents of countries which are prepared to become our clients."

## Palestine/Gaza

HAMAS, the Islamic fundamentalist group is facing a crisis within its ranks following the double terror bombing in Jerusalem. A Palestinian delegation headed by Amin al Hindi, met with Israel's Shin Bet secret police on August 17th and let it be known that he would like to see HAMAS stamped out along with the Islamic Jihad. He was vigorously opposed by Palestinian police chief Ghazi al Jbali, and the head of the Preventative Security Force in Gaza, Colonel Jibril Rajoub, who believes that HAMAS and its militant wing Ezzedine al Qassamzre, will play a decisive role in forcing Prime Minister Netanyahu to give up on some of his election promises, and make a number of significant concessions to the Palestinians.

For one thing, al Hindi told the meeting at which several CIA agents were present, HAMAS is backed to the hilt by Syri, and until Israel comes to an agreement with Syria, it will be impossible to neutralize HAMAS. He added that Hizbollah was similarly backed by Iran which would never withdraw its support and that fighting in the "occupied zone of Lebanon is going to escalate. They (the Israelis) have another Vietnam shaping up and they better deal with it before it traps them," al Hindi said.

The Palestinian delegation told Shin Bet and the CIA that the Jerusalem terror bombing was the work of a new wing of HAMAS, operating outside of the West Bank and Gaza, over which Arafat has no control.

According to the Palestinians, the type of explosives used was not a part of the HAMAS arsenal, but of the type which blew up members of Hizbollah in a Jerusalem hotel on April 6, 1996. The Palestinians said they believed that the new wing of HAMAS was founded in total secrecy to avenge the Shin Bet's assassination of Yehia Ayyash "the engineer" in Gaza and the arrest of Hassan Salameh, his right-hand man, which resulted in the

Mike Thompson/The State Journal-Register

Do Unto Others . . .

BY CAMMUSO FOR THE SYRACUSE HERALD-JOURNAL, N.Y.

flight to Sudan by Mohamed Daif, the number-three man in HAMAS.

The Palestinians say that the two bombers entered Israel on British passports from Sudan, where a large training camp is maintained, financed by Iran, and when they tried to interrogate some of the new HAMAS recruits at Ain Heloue, near Saida in Lebanon, a violent confrontation occurred in which Arafat's men beat a hasty retreat. In the aftermath, a car carrying Said Baraki, who has close connections with Iran and is one of the top men in Islamic Jihad in Lebanon, was attacked by two men with machine guns, killing the driver. Baraki escaped unharmed.

The special plan to involve the CIA directly in talks between the Israelis and the Palestinians is the work of Dennis Ross, Clinton's Middle East troubleshooter, which he announced during his recent visit to Tel Aviv. Pointing out that direct cooperation between Arafat and Netanyahu has deteriorated with the advent of Netanyahu to power, which has stalled the peace process. But Ross intimated that his idea is not popular with Netanyahu and his inner circle.

U.S. spokesman for Netanyahu, Frank Gaffney, director of the Center for Security Policy (nothing to do with the Clinton Administration) and a former deputy assistant secretary of defense in the Reagan Administration, says that the plan is unworkable: "The Ross intelligence initiative puts the CIA station chief in an undesirable, if not unworkable position," says Mr. Gaffney. David Wurmser, a research fellow at the American Enterprise Institute, joined Gaffney in criticizing the latest Clinton efforts to salvage what is left of the peace process: "America's willingness to offer up its Tel Aviv station chief (of the CIA) illustrates the high price America is willing to pay to keep the process going and loss of perspective regarding the American interests involved. The system puts Israel on par with the PLO in terms of having its honesty judged by the CIA," Wurmser said.

Surprising support for the Ross plan came from the American Jewish Committee's Jason Isaacson, who said that he was briefed on the arrangement by American officials: "It may be just what is needed to get the peace process back on the move, encourage security cooperation and fight terrorism. If the three parties are in favor of this (the Ross initiative) then it is entirely a useful concept, a useful formula," Isaacson said.

## Turkey

Having deposed the pro-Islamic government of Turkey, the U.S. now finds itself involved in the problems of how to solve another roadblock to full relations between Ankara and Tel-Aviv. "The Turkish Delight (a type of candy) has gone sour," said my source. "The dilemma that the U.S. has to solve is how to get Israel's choice of ambassador to Ankara, Ehud Toledano, 'washed'. The difficulty is of Toledano's own making. A few years ago he was on Israel state radio, accusing the Turks of committing genocide against the Armenians. The Ankara government thereupon rescinded Mr. Toledano's research permit to study in the archives of the Ottoman Empire. If David Levy (Israel's foreign minister) insists on forcing Toledano on the Turks, it could end military cooperation between the two governments at a time when the Clinton Administration is heavily relying on a military alliance between Ankara and Jerusalem, as a

power-bloc against Iran, which heavily backs Syria."

## Egypt

Commenting on the death of Princess Diana, the authoritative Egyptian newspaper *Al Ahram*, which mirrors government opinion, says that Lady Diana's death "was a deliberate murder conducted by British intelligence because the British establishment could not accept an Arab Muslim stepfather of a future king of England..." said editor Anis Mansur. I remember the famous statesman-editor of *Al Ahram*, Mohamed Helkal, whom I mention in my book *The Committee of 300* as being amazingly accurate in his contributions to the paper, and in personal interviews with leading world figures, like Chou En Lai. If the current editor is anything like his predecessor, he may know something more than the rest of us do.

## Croatia

Putting aside their differences, which date back to Croatian support of Hitler during the Second World War, the Croatian government has entered into a planned arms deal with Israel said to be worth \$100 million. The Israeli government is pleased with the proposed deal, but Mark Weitzman, director of the Simon Wiesenthal Center's Task Force on Hate is not altogether happy: "We still have a lot of concerns about some of the other things that have gone on over the last couple of years that smack of the rewriting of history," he said. "Whether it is the renaming of places or the publication of the *Protocols of Zion*, there is still a question of atmosphere here," Weitzman said.

## China

China is pressing ahead with its nuclear-powered electricity generating power stations and is exporting its nuclear power generating expertise to

several other countries. Beijing plans to have 160 nuclear power stations on line in the country to keep pace with the planned industrial expansion and to help with the demand for power from individual users. China recently purchased four nuclear reactors from France at a cost of \$4 billion, plus two more from Canada at a cost of \$3 billion. The United States did not tender any bids, because Bill Clinton does not want to be seen as stomping on the environmentalists at home. Meantime, China is going ahead with its cooperation with Iran and Syria for the supply of sophisticated rocket launching systems, said to be easily capable of reaching any target in Israel and Saudi Arabia, as well as menacing shipping in the Persian Gulf.

Intelligence sources say that some of the sophisticated French warplanes China bought a year ago may be finding their way to Syria and Iran. My source says that in his recent visit to China, Israel's Benjamin Netanyahu brought up the sensitive China-Syria-Iran relations, and told the Chinese, "Iran's attempts to become a nuclear power must be thwarted not only for the sake of Israeli security, but also in the interests of world peace."

## Kurdistan

While President Clinton is itching to have another cruise-missile go-around against Baghdad, Turkish military units continue to "mop up" the very same Kurds, for whose protection George Bush ostensibly established his so-called "no-fly zones". *WIR* has kept its readers well posted on developments about a Lebanon-style "security zone" to keep Kurdish nationalist forces from causing trouble in support of Kurds living in Turkey.

Turkey plans to restore 400 villages along the border with Iran, long since abandoned by the Kurds who fled in advance of marauding Turkish military forces. The funds will come from "humanitarian aid" money provided by Turkey. Meantime the Turks say that there haven't been any concrete steps taken to implement the "security zone agreement" with the Kurds. ~~A~~

THEY ALWAYS SEE THINGS  
FROM MY POINT OF VIEW.

# Soltec: *Consciously* Focusing The Creative Energy Within

11/2/97 SOLTEC

Good afternoon, my friend. It is I, Toniose Soltec, come in the Radiant One Light of Creator Source. Be at PEACE!

Please find comfort in knowing that ALL is as it should be, and that there are reasons for ALL things. You may not be able to see the WHY at any given moment, but with persistence in your searching, that which you seek WILL be revealed to you as you are ready for same.

From a Higher perspective, all is seen in terms of energy flows. The ability for one to understand and use these energies in a responsible manner is what "living" is all about. There would seem to be various conflicts in this idea, for many are efforting to utilize energy in such a manner as to keep others from tapping and utilizing the same Potential within. This sort of suppression is what has placed your world in the state of turbulence that it is in today.

As ones begin to awaken to the TRUE purpose of experience, they will rightfully begin to utilize their own inner determination, and thus also begin—perhaps for the first time in their current experience—to take control of their destiny. This is a new experience for most of you—to CONSCIOUSLY take control of your life, that is, take control of your energy flows.

Most, at this time, are in a state of semi-consciousness and are constantly being lulled back to sleep or overwhelmed to a point of various levels of shut-down. This is to say that ones are being bombarded so heavily with external pressures and worries that they find little to no time for the inner part of life that would bring nourishment and balance.

Money has become a primary consideration for most people. Your world has become "brain-washed" into believing that you must first create the money before you can have anything.

This is a very big lie!

Money is, in its purest form, a means of exchanging energy. The fundamental concept is not too different from the flow of electricity in a circuit and the storage of that energy in a battery. You work (put forth energy) in exchange for dollars, which are a mode of storing that energy of work. The dollars can then be converted back into energy by such as paying a contractor to build a new front porch for you, or even by purchasing a washing machine, which itself is the product of the labors (energy) of others.

The most overlooked fact is that Creation begins with desire, not money. The inner desire

of the heart will radiate out to the rest of the universe and your desires will begin to manifest.

If you struggle constantly to find money, then your focus must be upon dollars. Let me ask you this: Did you come into this experience to seek out and create dollars?

Let us assume your answer is "No!". Then why do most of you put dollars foremost in your experience?

Those of you who focus on projects and see them as complete, seldom have any problem with the incidentals of money. The difference is in your thoughts or beliefs about same. If you believe that you must first have the money prior to doing anything, then you are greatly mistaken and very little will get done while you wait and continue to worry.

Remember your past lessons. You live in a bi-polar, electric, pulse-wave universe. The physical is a PRODUCT of this energy—not the other way around. The energy that created your planet, Sun, solar system, galaxy, universe, and beyond came first in the form of desire—not money! Who could pay for such?! How much do each of you pay for the Sun to shine each day?!

The point here is to illustrate that money is a distant second to that of the creative desire that wells up within. If you are having trouble with money, then look carefully at what it is that you plan to do with it when you get it.

When you can take what little you have and move forward an inner desire, and put energy into manifesting your desire, you will find a multiplication of that energy because the basic Law of Creation states: Go forth and create!

And thus expand and grow. This implies the use of energy. The same energy that was used to create the physical universe! The same energy that was used to create YOU!

When you can become more focused upon the end desire of what it is that you want, and not upon the money you think you need to accomplish that end desire, you will have 90% of the creation completed. You will only have to recognize the opportunities when they present themselves to you. In most cases you will be amazed by the

coincidences that begin manifesting all around you! This is how you create the "miracles". This is the secret to creating your own "luck" whether it be good or bad.

There is no reason that any of you should lack for anything that you are wanting. For many of you, you have been trained to believe that you must work hard for what you have. I say to you now that when you can get rid of these old programs and come into a better understanding of the TRUE nature of yourself, as well as the energy framework of the current experience that you are in, you will realize that this limitation is not so!

How hard do you think God "worked" at creating YOU or your physical universe with its TRILLIONS of suns and planets. He did not have to "work" at this, for He understands perfectly the Laws of Creation. Neither do you, when you can let go of the old ways of thinking.

When your idea is more inspired than not, others will recognize the value of adding their energy to yours in both

desire, and if need be, money. This is the secret of those who are "lightning rods" for facilitating projects. The magnetism of the confidence they radiate literally attracts whatever is needed to accomplish the goal.

When the focus is more on the LACK of something, then the energy you attract will be more of the same and you will multiply your LACK! This is at the heart (pun intended) of the mind-control programming strategy aimed at you ones by the elite would-be kings. If you can come to recognize what is at work here, you can reverse this downward spiral.

When a good idea can be held in the heart, and you can see the idea begin to manifest ever more solidly within, you will, if you hold the thought long enough, begin to attract more and more ideas (details) into your consciousness, if you but ALLOW for them to come. This is where the value of focused persistence comes into the equation. Maybe the better word here is to become "passionate" about your ideas! What is fundamentally implied is the FLOWING of creative energies in the same way that electricity or water or wind currents must flow to be useful

**When you become more CONSCIOUSLY aware of how you are focusing your energy (thoughts and desires), you will begin the first step necessary to taking control of your destiny. You will find that you spend less time sitting around waiting for something to "happen" and more time creating the life experiences that you want.**

in the natural order of balanced energy exchange.

Many of you will block these energy flows due to past programming of your "middle-class" (suppressed) upbringing. Those of you who came from a more affluent upbringing will generally find that you seldom lack those things that you desire for you were not programmed with negative beliefs regarding money. Any of you can overcome the past programming and beliefs, and thus change how you flow energy.

When you become more **CONSCIOUSLY** aware of how you are focusing your energy (thoughts and desires), you will begin the first step necessary to taking control of your destiny. You will find that you spend less time sitting around waiting for something to "happen" and more time creating the life experiences that you want.

The manner in which you focus your energy is directly related to all aspects of your life. Whether it be money or health concerns or relationships with others, look first to where you are placing your thoughts and desires (energy). You will see that, for instance, when you overly fixate upon (pump energy into) a health problem, then there will be a **MULTIPLICATION** of that desire—and it will likely get worse! This is why a placebo is so often effective at "curing" someone—because they believe and thus focus their thoughts on the new belief instead of the old. Esu "Jesus" Immanuel rarely healed anyone while in his teaching mission upon your planet. Rather, it was usually the strong belief of those he touched which allowed these "passionate" ones to heal themselves.

The Creation is not interested in what, from your vantage point, you may term "good" or "evil", "right" or "wrong". The Creation is only interested in expansion and growth. From that experiential vantage point, **ALL** can be viewed as learning.

When you put forth a desire, and hold that desire within your heart, it will be multiplied. When you are inspired, you most often pump great energy into that inspired idea, and thus you will see more clearly the energy amplification. This is a key to the success of those you call great artists. From a technical point of view, success comes from the energy-accumulating (and thus idea-manifesting) condition held in place by the "force field" of the inspiration.

Likewise, when you hold into a state of negativity, negativity shall accumulate around you. When you live, for instance, in a chronic state of depression, you will often pump great amounts of energy into the depression, and thus amplify your "desire" for more depression.

This is why it is often said that there are two great motivators of people—**INSPIRATION** and **DESPERATION**. Remember: you live in that "bipolar" (yin versus yang, positive versus negative, yes versus no, right versus wrong), electromagnetic, pulse-wave universe of Light.

There are ones on your planet at this time who know well these basic concepts of energy flow and energy utilization, but not all of them are what you would refer to as "nice" people. When these ones can keep you, in a sense, "fat, dumb and happy" between the two polar-opposite extremes, then they can more easily control you.

That is, like a cornered animal, if you are driven to become too desperate, you become dangerous to these ones who are trying to control you. In a condition of desperation, your resourcefulness may be "inspired" to kick-in and do something creative.

Likewise, when you finally awaken to the true (energy-driven) nature of this material "canvas" upon which you have chosen to "paint", your everyday levels of confidence and inspiration become such that you cannot easily be fooled or controlled, and there again you become a threat to the would-be controllers. The last thing they want is for you to grow beyond their manipulation techniques!

This is enough for now. This message contains the insights that many are looking for, yet do not quite know it. May this be of value to those of you who desire to know why your life's experiences have been what they have been. I am Ceres Anthonious "Toniose" Soltec, come as Teacher and Guide. I am sent by our Father, Aton (The One Light). Blessings and Salu!

### 11/22/97 SOLTEC

Good morning, my friend. It is I, Toniose Soltec, come in the Radiant One Light of our Father. Be at peace, for there is work to be done.

At our last writing session before important interruptions, we left off talking about energy flows and the dynamics of creating. These principles are the basis for bringing into existence all that you recognize as manifest reality—whether we are talking about a child's creation of a clay turtle, or Creator's manifestation of an entire universe.

We can see that many do not hold long in their consciousness these ideas, for there are great numbers of distractions all about you.

These distractions are, for the most part, deliberately calculated and set into motion by those who are efforting at controlling every one and every thing. These ones provide you, who have desire to be free and to grow through your limitations, with a most challenging environment in which to experience!

Look not upon these ones with negativity in your heart, but with appreciation for presenting you with such challenges that will bring forth the growth that you desire! Many of you in previous times were in similar capacities as these ones are, and you are now seeing the play from the opposite perspective. This is so that you can appreciate the value of both experiences, so that you can better choose what it is that helps you to grow in a quite responsible manner. Such are the cycles of experience when viewed from a more expansive perspective.

The importance of recognizing consciously how it is that you are utilizing your energy at any (and every) given moment, is the key to creating your heart's desires. When you ones become overly fixated upon a negative condition that you witness, you tend to get stuck and thus constrict the natural cosmic energy flow through you into the physical realm. Joy comes from allowing the energy to flow naturally and freely. You can know how your energy is flowing simply by how it is that you are *feeling* at any given moment in time. I do not mean here how you **THINK** you are feeling (an intellectual focus, often susceptible to lack of honesty with self), but how you actually **ARE** feeling (an emotional reading of the heart).

**YOU** decide how it is that you are going to

focus your energy (thoughts and desires)! Thus the responsibility of how you are feeling at any given moment in time is up to you, and you alone. If you perceive yourself to be a victim, and you spend any length of time dwelling on this idea, you will surely begin to manifest your desire to be a victim.

So then you say, "BUT, I DO NOT WANT TO BE A VICTIM!"

I say to you that what you dwell upon, you radiate as a desire, and The Creation responds to you, for you are a **CREATOR!** Whether you recognize this consciously or not, **YOU ARE A CREATOR, MADE IN THE IMAGE OF THE CREATOR SOURCE OF ALL THAT IS!**

Your desires are what you manifest. What you mouth has very little to do with it! When you entered into your current experience, you knew that there would be the challenges of distractions that the physical expression would provide. You also knew there would be great value in overcoming these distractions, that you would learn from them how to more deliberately focus your thoughts and desires, and ultimately expand and grow as an extension of Creator.

Let me give you an insight that may help you to see more clearly the point here. Make a list of all the things that you are wanting. Write out next to your list why you are wanting these things.

If you stop now and take the time to do this, prior to reading further, you will recognize a greater impact from the points I have made above. So stop reading, and make a list of everything that you are wanting and why it is that you are wanting them. You

**The "don'ts" and "do nots" fail to register an emotional (energy) intent because they are merely "window dressing" words on otherwise worry-laden and fear-laden underlying actions. See this, and more importantly, FEEL this.**

can have **ANYTHING**.

Now I am assuming that you have made your list. And if you could see from my perspective, you would recognize how basically similar are so many of the wants on your lists.

In order to point out how it is that you are focusing your energy, look at what it is you are wanting—and more importantly, **WHY**.

Let's say that you wanted a good, strong, healthy body. Most all of you want that. Now let us look at the reasons for wanting this.

Why do you want the good strong healthy body? Is it because you hate feeling bad or sick? Is it because you do not want to be inhibited in any way? Is it because you don't like being a burden to others? Is it because you have things to do and you don't want to be held back in any way? **OR**—is it because you love to have the energy to do the things that you are wanting to do when you want to do them? You love the adventure of living and the exhilaration of freedom. Is it because you appreciate the balance of well-being that radiates from within?

I hear you saying, "Well, all of those are good reasons!" Well, I say to you: let us look at these reasons more carefully and perhaps we can see where it is you are, energy-wise (pun intended), in relation to your desire for a good, strong, healthy body.

First, take all of the "don'ts" and "do nots" out of the above reasons, especially before the "OR" in the above example. When you say, "I don't want to be inhibited", you are radiating to

the universe and all of Creation INHIBITION!

The "don'ts" and "do nots" fail to register an emotional (energy) intent because they are merely "window dressing" words on otherwise worry-laden and fear-laden underlying actions. See this, and more importantly, FEEL this.

That is, when you say you "don't" want to be inhibited by a sick body, what are you actually thinking (and emotionally worrying) about? You are thinking about being inhibited by a sick body! You can't help but begin to radiate the thought of inhibition. Likewise, when you "hate feeling bad" this idea will cause you to dwell upon the idea of feeling bad—and you will actually cause yourself to feel bad if you stay with the thought long enough!

When you can shift your focus to a vision of a young, strong, healthy body, full of energy and life, eager to explore new and exciting environments, full of joy, without dwelling upon the negative reasons, then you will be radiating with the heart in perfect synchronization with your head-desire, and the energy will begin to manifest quickly and, in many cases, miraculously.

Let's make this contrast clearer with another example. Consider the following two statements:

(1) I hate to come home to a dirty house.

(2) I love to come home to a clean house.

At first glance you might say that the statements are saying the same thing. However the vibration induced by the two positions will cause you to FEEL quite a bit different. Recognize that the two are polar opposites. Would you rather attract into your experience "hate" of dirt or "love" of cleanliness? FEEL the effect of each, even as you read these words!

When you can discipline yourselves to use thoughts that cause an UPLIFTMENT WITHIN, rather than a downward negativity, you will have realized a key to synchronizing the head and the heart. Please appreciate the direct "physics" of what I am explaining here: We are talking about the consequences of higher- versus lower-frequency energy radiations. There is much more POWER OF MANIFESTATION within the higher-frequency emanation, for such joy-generated energy is DIRECTLY FLOWING from the Infinite Source! The awesome power of this Energy is what the dark ones wish you to remain ignorant about, and thus they do everything within their abilities to subvert or divert it.

You ones are being bombarded with negativity that is constantly influencing your thoughts. The "don'ts" and "do nots" are everywhere in your daily doses of mind-control programming.

We witness many of you pumping out contrary vibrational frequencies to that of your desires. This is to say that the mental focus is not in harmony with the emotional emanations coming forth from within. Many are wanting from an energy vibration of fear. The fear of the unknown. When the fear of lack wells up within, we see that many are preoccupied with the fear and thus dwell in such an emotional state as to cut-off themselves from the natural energy flows of Creator. In actuality, it is generally a constriction of The Energy moreso than a complete disconnect, else your own physical manifestation could not maintain form and you would die.

The point of this exercise is to show you that though you are saying you want one thing, you are often radiating the opposite. Look to your list of reasons and remove all of the "don'ts" and "do nots". Also look for words with a negative feeling to them like "hate". These statements are

often reflections of the self-talk or thoughts that go through your mind when you focus upon your desires.

Learn to focus your thoughts deliberately and, most importantly, learn to focus your FEELINGS associated with your desires. When you can feel good about the subject of your desires, then you can know that your energy is flowing in a direction that is in alignment with who you really are and why you are there.

This is the reason behind the statement we of the Hosts have made so often to you, that if you can't do a thing *with love in your heart*, it is better to not do the thing at all. And we would also call to your attention the wise words to the older popular song which go: "Accentuate the positive, eliminate the negative—and look out for Mr. in-between." Consider these ideas from the point of view of energy flow and you are well on your way to a more fulfilling and productive experience—as Creator intended!

If, over a period of time, you begin to feel anxiety over a specific desire or subject of focus, then it is because there is always a multiplication of your desire. This is to say that you are projecting that which causes the anxiety to well-up within. This is as it should be, and you can be thankful in knowing that your Inner Guidance system is functioning properly and presenting you with that which requires your attention toward balancing.

With simple effort to change your focus toward something that makes you FEEL better, you can take conscious control over your emotional state at any given time. Perhaps the most simple and direct way is to look around you and find something to appreciate.

Can you appreciate the Sun that warms your day and gives forth life-producing energy? Can you appreciate the rain that waters the vegetation that gives forth, directly or indirectly to you, energy in the form of nourishment? Can you see how wonderful is the opportunity that you have before you to meet your challenges and thus grow beyond who you are this day? Can you see that the environment in which you find yourself is, in fact, perfect for providing you with these challenges?

The excitement of the journey is most often that which you long for, not the destination. You are Infinite, experiencing beings. You are co-creators who are directly expanding the ALL THAT IS. Within you lies Infinite Potential to create. You are molders of this Energy. Your greatest joy comes from flowing this Energy—not bottling it up or hoarding it like your elite, would-be controllers attempt to do.

When a goal is reached and the journey is over, you are often left looking for your next challenge. This is to say that you are left looking for another journey of experience. These are the endless cycles of life—both in the physical dimensions and beyond.

Money makes a good analogy, for it symbolizes energy and is a commodity you all can easily relate to. Let me leave you with this thought: is there more fun in saving money (energy), or in spending it (setting it into motion)?

I am Ceres Anthonious "Toniose" Soltec, come in the Radiant One Light of Creator Source. May you find Inner Understanding beyond the limitations of these words. And from that Source of Understanding, may YOUR Joy radiate from within and thus be that which manifests all around you. Salu! ✨

## PHOENIX JOURNAL

### THE RAINBOW MASTERS

BY THE MASTERS  
(J7) \$6.00 150 Pages

This *Journal* is a manual for living the life blessed of God. Cuts to the core of the nature of man, yet offers gentle direction filled with compassion beyond measure. Each energy is uniquely powerful yet, together, they form a team of one. The Masters offer insight to the planet, our purpose, God's involvement and will, our journey home, the Greater Vision. The messages resonate as musical chords within the very soul essence. The words shared renew hope and give the phrase "Trust in God" a deeper meaning.

#### A few Of The Important Topics Covered Are:

- \* Who Is Telling The Truth?
- \* The Laws Of God
- \* The SEVEN RAYS OF LIFE
- \* Cults And Churches
- \* Truth And The Laws Of Creation
- \* Precious Ancient Knowledge Preserved
- \* From The "Star In The East"
- \* Each Is A Portion Of God
- \* Immanuel And The Essenes
- \* Time For Earth To Come Home
- \* Covenant Of The BOW
- \* Earth Is Special
- \* Get Prepared For The First Strike
- \* Calling Working Troops
- \* "Force" Not Of God
- \* Trap Of The Human Ego
- \* Astral Plane Cancellation
- \* Melchizedek Blighted Through Evil Input
- \* Gender Problems And Responsibility
- \* Healing Comes Through Mind
- \* Universal Law—Not Miracles
- \* Christ Path Deliberately Hidden
- \* Preparation For Transmutation
- \* No Secular Alliance
- \* Children Are Of Primary Concern

Shipping included, postpaid in the Continental U.S.A. Canada, Mexico and Foreign orders please call or write for quotes on additional shipping charges.

# TELEPHONE HOTLINE

**805-822-0202**

As an adjunct to *CONTACT*, the Telephone Hotline keeps you as informed as possible on current events and other important information that needs to get to our subscribers before our publishing date.

The message machine will answer after 2 rings if there are any new messages for that day, and after 4 rings if not. Thus *daily* callers can hang up after 2 rings and save toll charges if no new message has been recorded. If the Hotline does not answer your call, then that means there is currently no Hotline message.
